III-V semiconductor diodes, large-signal charactn. at microwave and MM-wave freqs. 88−25459
IIR-type discrete-time filters, general analogue-to-digital transformation 86−34496
image raggedness, effective measure, num. procedure 86−23160
induction heating plant, EM field computation using numerical anal. *(German)* 88−43492
infinite plane grating, numerical anal. of surface current distrib. 87−75363
initial-value problems, Zakian algorithm, time domain derivation from Pade approximant 86−7702
input impedance and radiation fields of aprinted-dipole on a semi-infinite substrate 86−10179
integrated dielectric waveguiding systems, anal. using polarisation integral eqn. 86−10137
integrated display with parallel writing and monitoring planes, numerical anal. of parallax *(Japanese)* 87−35147
integrated optics, beam propagating method, algorithm 85−35540
inverse problem, time domain EM, for dissipative medium 85−51413
inverse scattering of plane EM wave by radially inhomogeneous dielec. spheres 85−51416
inverse scattering theory, Christoffel-Hurwitz inversion identity applic. to EM imaging 85−51419
isolated dielectric resonators, computed modal field distribs. 85−17792
Kirchhoff and small-perturbation rough surface scattering models, numerical study 88−52180
Kreiss matrix theorem, resolvent condition 85−22388
Laplace equation in unbounded domains, numerical soln. 85−44669
laser welding, Stefan problem solution, method of lines 86−10032
lightning-CN tower interaction, numerical anal. 86−15921
Lille Univ., numerical analysis and optimisation *(French)* 88−18617
LIM, 2D anal. 88−55373
limit k-periodic continued fractions 86−34186
linear algebraic equations, program complex to solve 85−28172
linear electronic networks with correlated noise sources *(German)* 85−54611
linear induction motors, numerical anal. taking secondary saturation and end effects into account 87−15805
linear program optimal basis estimation 86−40633
loaded microwave ovens, resonant frequencies determ. using transmission-line matrix method 85−5541
locking mechanisms in oscillator systems with unidirectional couplings 87−44654
LSI cct. anal., high-precision numerical integration, parallel method 88−24864
machine induction bearings with symmetrical and asymmetrical exciting current distribution, numerical anal. *(Polish)* 86−33299
magnetic field distribution in air gap, slot depth/width effects 86−56716
magnetic frequency tripler with series-connected reactors, numerical anal. of efficiency 88−910
magnetic hysteresis, Preisach-Krasnoselskii model, numerical implementation 86−35966

numerical analysis continued
magnetic recording process, two-dimens. simulation *(German)* 86−36036
magnetic vortex field, 2D, with boundary conditions of 3rd kind, numerical determ. for tube drawing, inductive heating *(German)* 87−19137
magnetoresistive laminated heads, reproducing characts., numerical anal. 86−68164
marine EM sounding, forward modelling for freq.-domain systems 88−23169
matched linear antenna array fed by pulsed signals, radiation characts. 87−12838
matrix singular value decomposition 86−300
metal grating with sinusoidal cross-section, EM plane wave diffraction, numerical anal. *(Japanese)* 86−48567
MIC coupled microstrip lines with multilayer dielecs., charact. parameters calc., numerical procedure 86−27636
micro-gap discharge current pulses in atmospheric air, theoretical and expt. study 88−44908
microstrip, coplanar waveguide and slotline on anisotropic substrates, propag. characts., numerical anal. 86−8461
microstrip printed dipoles, numerical anal. *(Japanese)* 87−19284
microstrip transmission line, numerical soln. of coupled integral eqns. 87−39432
microwave filters using coupled transmission lines, conductor losses evaluation 87−73656
microwave imaging, active, of buried objects, num. simulations 86−56273
microwave mixers, numerical anal. of intermodulation distortion 88−71130
microwave multilayer lossy dielectric loaded resonator admittance analysis by transversal resonance method *(Croatian)* 87−52816
microwave ovens loaded with lossy process materials, transmission-line matrix analysis method 85−27798
Minkowsky's conjecture on the critical determinant 86−57366
missile system model, CADET applied to large angle terminal engagement 88−68709
MNOS devices, nonstationary transport in depolarised mode 88−7382
mono-filar conical helix, anal. 85−13300
monomode optical fibre dispersion *(Italian)* 86−48144
monopole antenna on cubical conducting box, input impedance 87−75594
monopulse radar systems, angle-tracking performance in presence of interfering second target, anal. 87−70124
MOS capacitors, radiation effects, numerical anal. 87−60185
MOS short channel structures, two dimensional numerical analysis and optimisation strategy *(German)* 85−18362
MOSFET effect channel width, numerical anal. 85−55808
MOSFETs, subthreshold model of narrow-gate effect 88−26270
movable boundary scheme eval. in circuit and packet switched networks 87−48354
multidimensional continuous systems, signal processing approach to digital simulation 87−47822
multidimensional IIR general-support filters, anal. 85−23047
multilayer dielectric waveguides, coordinate transformation anal. for transmission and scattering *(Chinese)* 85−51475
multilayer soil effects on EM wave spreading by water *(Croatian)* 85−30039
multilevel interconnection lines, pulse propag. characts., anal. and modelling 87−38364
multimode laser with modulated inversion 87−61189
multistep-index fibre with uniaxial anisotropy, numerical anal. 85−35464
multistep-index monomode fibres, numerical anal. *(Polish)* 86−58746
nonlinear dielectric slab waveguides , FEA *(Japanese)* 88−72619
nonlinear film guided waves, propag. 87−74742
nonlinear magnetic devices, monotone and convex magnetisation curves 88−7794
nonlinear networks *(Japanese)* 88−6634
nonlinear nonautonomous networks and systems, computer-aided determ. and analysis of periodic solns. *(German)* 87−16841
nonlinear power networks, transient behaviour analysis, appl. of small parameter asymptote *(Russian)* 85−4608
nuclear power plant severe accidents, aerosol behaviour simulation codes, distrib. fn. 88−62036
obstacle problem, numerical soln. by penalty method 86−62121
Omega navigation station umbrella antenna, anal. 86−22784
open-ended waveguides, convergence of numerical solns. 86−10168
open-ended waveguides, treatment by modal anal. and hybrid modal-spectral techniques 86−64038
optical anisotropic fibers with elliptical deformed core 88−72012
optical bistable ring cavity, solitary waves as infinite-dimens. map fixed points, num. anal. 88−27296
optical coherent multichannel system, intermodulation interference, numerical anal. 87−56166
optical directional coupler, nonlinear, coherent, with saturable index changes 88−33733
optical fibres, multimode systems, eval. method for modal noise 88−39892
optical fibres, polarisation maintaining type with crescent-like vacuum pits, numerical anal. *(Japanese)* 85−41180
optical waveguide, single-mode optical Y-junction, anal. by bounded step and bend approx. 88−45183
optical waveguides planar, GRIN, numerical anal. using matrix method 87−60914
optimisation problems, bounds and general linear constraints 85−28139
optimisation techniques, book *(French)* 88−56182
optoelectronic semiconductor switching devices, gap transit time effects 85−12734
order model anal., filtering and image processing appls. 88−49645
orthogonal polynomials and Christoffel functions 87−23548
p-n junctions, planar, breakdown voltage anal. rel. to junction curvature 86−14912
permanent magnet DC motor magnetisation process 87−35950
Ph/Ph/c queue algorithm for multi-server queueing systems 86−19893
phase change rewritable optical disc, erasure condition using circular beam irrad., numerical study *(Japanese)* 88−45066
phase unwrapping by regions 88−46249
Π-shaped open magnetic structures, field distribution computation, applications in electromagnetic iron separators *(Russian)* 85−56965
piezoelectric motor dynamics, numerical procedure *(Russian)* 86−61478
plane EM scattering by two discontinuities of impedance plane 87−47306
PLL, second-order type, pull-in range anal. using Galerkin method *(Japanese)* 85−39969
PLL pull-in range with interfering signal *(Japanese)* 88−38425
PLL with CW interfering signal, lock frequency range determ., numerical anal. *(Japanese)* 85−17221

numerical analysis continued
PLL with interfering signal, numerical anal. of lock range 86−67104
PLL with time-delay, pull-in range performance, numerical anal. using Galerkin's procedure *(Japanese)* 86−14071
plunger type electromagnet, numerical anal. of transient dynamic characts. *(Japanese)* 88−40495
polyphase power systems, generalised math. modelling 86−39073
power electronic networks numerical nodal anal. 85−498
power system relaying and fault location determ., numerical soln. 85−32228
power system remote control, HDO transmitter, transient phenomena in static frequency convertor-by-pass transformer circuit *(Czech)* 85−43527
power systems, state estimation using WLS and LO algorithms *(Croatian)* 85−9420
power thyristors, under repeated short-term loading, heating conditions and cyclic stability anal. and computation *(Russian)* 85−60289
power transformer three-dimensional magnetic field numerical analysis using vector magnetic potential *(Russian)* 86−48524
power transformers, 3D anisotropic magnetic field calculation in transformer joints 88−55404
power-boundedness of interval matrices 86−34225
probability that a numerical analysis problem is difficult 88−49759
pulsed power generation, numerical anal. of target implosion and ignition 88−62484
pulsed power generation using ion beam ICF, numerical anal. of target implosion 88−62490
pyramid type twin delta loop antenna, characts. *(Japanese)* 85−51497
queueing network sojourn time sensitivity estimation using perturbation anal. 87−51922
radial-flux-type hysteresis motor with reaction torque, FEA 88−55321
radio-wave reflection and scattering in the ionosphere sporadic E_s layer 88−8475
railgun conductor heating from multiple current pulses 87−26686
reactor fuel assemblies, mathematical anal. of vibrations *(French)* 85−4807
rectangular dielectric waveguides combined with ferrites, numerical anal. *(Japanese)* 85−30075
rectangular waveguide inductive windows, numerical anal., singular integral equations 87−73583
rectangular waveguides, with inductive windows, numerical anal. using singular integral eqns. *(Japanese)* 86−42909
regression experiments, optimum singular plans 86−57367
resurf medium and HV diode structs., 2D numerical anal. 86−15122
RLC circuit limiting EMF calc. by linear programming and Norton-Hoff regularisation *(French)* 85−28323
salient pole synchronous motors with solid poles, design parameters of equivalent circuits *(Russian)* 85−5069
sample variance computing using textbook one pass algorithm *(Japanese)* 88−6430
scale-type meaningful dependent variables, psychophysical laws 87−8492
Schottky barrier diodes, boundary condition for numerical anal. 87−6655
scientific methodology aspects 87−72974
self-excited oscillator, delayed and amplitude limited, numerical modelling of stochastic processes 86−27126
semiconductor, Poisson's equation, generalised soln. *(French)* 88−57287
semiconductor components, numerical simulation *(German)* 85−29182
semiconductor device current continuity eqns., discretisation scheme evaluation, const.-flow patch test 86−21480
semiconductor device modelling, continuity eqns., numerical solns. 88−7561
semiconductor device problem, steady state, conditioning anal. 88−7557
semiconductor devices and structures, 3D analysis 88−50813
semiconductor laser, single-mode with external feedback, feedback regimes num. anal. 88−72316
shaded-pole motor, transient anal. by numerical solution of basic performance equations 85−9874
short-backfire antenna gain optimisation by coaxial waveguide excitation 87−33532
short-channel MOSFET gate capacitance, meas. and numerical modeling 88−26269
simultaneous nonlinear algebraic eqns., numerical anal. *(Japanese)* 87−16538
single pole heads, recording characts., numerical anal. 88−26671
single-pole type recording head field meas. by microloop 88−57954
singular integral equations with a Cauchy kernel 86−34267
singular perturbation problems, nonasymptotic method 88−6347
singular perturbation problems, numerical solution by terminal boundary-value 87−36562
SOI MOSFETs, switching characts., numerical anal. 86−28331
solar cell efficiency, second order effects of parasitic resistances, numerical analysis 85−10108
solar cell performance, a-Si, effects of interface states, computer simulation model 88−37386
soliton emission from nonlinear waveguide 88−13918
spatial filters, modified, matched, optimality considerations 86−15545
spectral factorisation problems, numerical algorithms and software 88−73161
spiral antenna, asymmetrical, two-wire, numerical anal. of radiation characts. 85−51483
steady-state contact press., numerical anal. of thermoelastic effects 88−38809
step-by-step motors control, numerical simulation and experimental results *(Rumanian)* 85−32519
stepping motor damping, electronic self-controlled, rotor position dependent 87−30662
stratification methods in waveguiding structures 85−36077
submicron devices, extension of the Scharfetter-Gummel algorithm to the energy balance equation 85−18268
substrates, thermal characts. simulation 88−39619
superconducting wire stability rel. to rapid current charging and pulsed heating 88−64994
surface acoustic waveguides on piezoelectric anisotropic substrate, accurate anal. 88−13636
surface current distribution on infinite plane grating 88−20882
symmetric dual-reflector antennas, low-loss off-axis feeds 87−27107
symmetric induction machines, relationship between real and complex form of math. model 86−19255
synchronous machines, rectifier excited, field overvoltages during sequential 3-phase faults 85−9849
tapered waveguide, radiation characts., ray optics and energy flux based numerical method 85−35529
TE_0 dielectric rod resonators placed between parallel conductor plates, numerical anal. 86−67478

numerical analysis continued
TE_{111} gyroresonant accelerator cavity for high-harmonic gyrotron, theory and numerical simulation 85−6648
telecommunication traffic, TEDAS eval. and design system, numerical anal. subsystem 88−8992
telecommunication traffic parameters for time congestion estimation 87−75662
telecommunications, TEDAS traffic eval. and design assistant system, with numerical and subsystem *(Japanese)* 87−34304
TEM one-dimensional fields, numerical anal. 88−2457
terrestrial electricity, accuracy of integral eqn. method for direct current resistivity sounding 85−59439
thermohydraulic systems, failure modes, inductive anal. by numerical simulation 87−44061
thick obstacles in waveguide, numerical anal. of scattered waves using mode-matching method *(Japanese)* 85−13191
thin wires loaded by negative impedance amplifiers 86−22791
three-parallel thin-film waveguide, numerical anal. 88−51539
time-domain Weyl plane-wave representation for wave functions 85−36003
TM- and TE-scattering from multiple strips, circular cylinder presence, numerical solutions 88−2538
transfer phenomena in semicond. devices and structs., num. anal. using universal program 87−38174
transformer anisotropic model, magnetic field analysis *(Czech)* 88−38785
transformer winding circulation losses, calc. using method based on Maxwell's equation *(Czech)* 85−21673
transient methods in electromagnetic imaging, review 85−51411
transmission lines with branches and junctions 87−73834
triggered three electrode spark gaps, breakdown voltages, numerical calc. 85−5317
turbogenerators and hydroelectric generators, stress-strain condition and strength test anal., numerical anal. 88−43127
TVV-500-2E turbogenerators, numerical modelling of rotor winding cooling system *(Russian)* 88−17528
two-parallel embedded waveguides, num. anal. 88−1986
two-port circular planar circuit, transmission characts., numerical anal. using point matching method *(Japanese)* 85−11541
unstable EM field problems, topological approach 87−61314
US data reduction, resolution-noise-bandwidth trade-offs viewing method 85−10899
US inspection of welded joints, ray paths computation, algorithm 86−57497
US piston radiator beam pattern analysis, 3-D computer model 88−61681
US transducers, arbitrarily-shaped, pulse echo calc. using numerical techniques 86−44826
VanderLugt correlation technique, sensitivity, grating period change meas. 85−30294
variable reluctance incremental motors, numerical anal. of operation 88−48925
vectorial finite-element formalism for electromagnetic waveguiding structures with loss and/or gain *(Japanese)* 88−72618
VLSI CMOS technology, 2D numerical simulation of latchup behaviour 86−21822
wall-stabilised arc sustained in forced axial air-flow, numerical model 85−65376
wave rotor passages gradual opening, effect on flow pattern 85−53846
wide-channel passive single-mode directional couplers in glass with adjustable power transfer 88−65343
Wigner-Ville transform for signal/image processing 88−21230
wire antennas, arbitrary surfaces attached, numerical anal. 85−41726
wire antennas, effect of end surface current on numerical soln. convergence *(Japanese)* 85−62885
wire antennas, numerical anal. 87−47298
Witsenhausen's problem, numerical solution 86−3740
X-ray tube anode, rotating, liq.-cooled, numerical anal. of temp. distrib. 85−4280
AlGaAs-GaAs HJBT, energy transport effects, numerical model 86−67845
AlGaAs-GaAs bipolar inversion channel FET, 2D numerical simulation 88−57620
CO_2 laser, generation in 4.3 μm region 86−9768
Cu sheet laser cutting, process and technology 88−20809
GaAs CCD, numerical anal. of charge transfer props. 86−47584
GaAs HEMT 2-D numerical anal. *(Japanese)* 85−23818
GaAs device models, numerical simulation 88−7558
H_2-cl_2 chain-reaction chemical laser, numerical analysis *(German)* 87−68348
He-Ne laser lifetime calculated by best linear undistorted estimation *(Chinese)* 88−65787
InGaAsP buried channel waveguide for electroabsorption modulation 88−26889
IrO_x/polystyrene sulfonic acid/WO_3 complemental electrochromic display, electrical characterisation 88−42227
$LiNbO_3$:Ti waveguides, proton exchanged, parametric oscill. numerical model 87−54414
Na-S batteries potential distrib. and internal resist., numerical anal. 85−39173
SF_6 circuit breakers, transient anal. model for delayed zero current interruption simulatjon 85−27561
a-Si FET/Schottky diode ICs, dynamic performance, numerical anal. 86−41966
Si solar cell efficiency improvement simulation analysis 87−9762
Si solar cells, n^+p and BSF, minority carrier diffusion length, base layer thickness, numerical analysis 88−17934
$Y_3Fe_5O_{12}$-$(YSm)_3(FeGa)_5O_{12}$ double-layer mag. garnet films, mode spectroscopy 85−24303

ordinary differential eqns., linear and nonlinear, finite analytic numerical method 88−43844
ordinary differential eqns. with discontinuous nonlinearities, numerical integration *(Japanese)* 86−7718
overhead power cables, electrostatic field structure *(Russian)* 88−5366
p-n junctions, breakdown voltages, 2D numerical method *(Chinese)* 87−66954
p-n junctions, minority carrier diffusion length, scanning method determ., numerical eval. 88−1433
p-n junctions, planar, field plates, blocking capability *(German)* 86−41568
Pade approximants, multivariate, non-normal, singular rules for their calculation 86−34205
Palmiet pumped storage station pump-turbine, appl. of numerical methods in develop. 88−11142
partial differential equations, solution using numerical method, appl. to Laplace transform *(German)* 88−31692
passive microwave component modelling 87−24409
patch microstrip, coupling between adjacent antennas, integral eqn. technique 88−7035
period-doubling and chaos in an nth order nonlinear differential equation 88−72405
periodic solutions of nonlinear ODEs, Gauss-Newton algorithm 85−22362
periodic surface, diffraction by plane harmonic wave, comparison of numerical methods 85−41589
permanent magnet synchronous motor drives, torque pulsation limitation, numerical model 88−18146
permittivity meas. of lossy materials, using waveguide-fed series slot array 86−5488
perturbed waveguide, axial cylindrical conducting objects, mode determ. using numerical method 85−13184
phase control of shaded-pole induction motors 85−5103
planar array of nonlinearly loaded straight-wire coupled antennas anal., monopulse technique 87−61515
planar dipole phased arrays, numerical consideration of edge effect 86−29628
planar nonlinear waveguides, computer anal. method 88−13920
planar phased array, effects of antenna element structure on element properties and array pattern 86−29629
plotting probability density function of resultant error with two or more components 87−28886
point-to-zone radio systems in VHF-UHF bands, numerical method for calc. and planning *(Spanish)* 86−10966
polarisation holding fibres, boundary element anal. 86−68808
polarisation-maintaining optical fibres with circular pits in core anal. 85−7267
polygonal resistors, anal. and design by conformal mapping 86−35129
polynomial equations, numerical solution 86−13669
potential fields calc., estimation of errors in numerical methods *(Russian)* 88−40461
power converter circuit steady state determ. by Newton methods *(German)* 85−54630
power system, large scale, multilevel graded precision model for fast parallel computation 88−48448
power system cascade perturbation analysis, numerical integration methods *(Russian)* 87−35538
power system electromechanical transients, errors in anal. *(Russian)* 85−32062
power system network, elementary topology changes, load flow problem soln. *(Croatian)* 88−61799
power system networks, elect. distance determ., superposition property appl. *(Croatian)* 88−61860
power system optimal power-flows, numerical methods 87−71577
power system stability analysis, mathematical models and numerical methods of integration *(Russian)* 88−17035
power system state estimation, restoration of observability 88−5293
power system transients calc., numerical-integration methods stability 87−4219
power system with secondary storage battery, analysis using overlapped decoupling techniques 86−6285
power systems, fast contingency anal. algorithm study *(Korean)* 86−50795
power systems, transient stability, numerical soln. 85−32072

numerical methods continued
power VDMOS transistors, compromise between on-state resist., breakdown voltage and gate-drain capacitance 87−6768
preconditioned conjugate gradient methods, implementation and appl. 85−28171
preconditioned iterative methods for linear equations 85−28180
prime number Hartley transform implementation using transversal filter type structures 88−63143
principal nth root of complex matrix and matrix sector functions, fast and stable algorithm 88−63224
programmed numerical field calculation as a tool for constructing andoptimizing electrical devices *(German)* 86−63921
quartz LF resonators, Lagrangean plate element for static temp, behavior 88−20212
quasi-neutron method for sparse systems of nonlinearequations *(Japanese)* 86−52399
radar, cylindrical reflector symmetry role in numerical solution of diffraction problem 85−25926
radar cross sections, numerical computation methods, use in student teaching 87−34651
radar detection probabilities evaluation, by steepest descent integration 85−14335
radio holography phase retrieval of reflector antennas and radiotelescopes 85−57159
radio systems design, experimental-analytical method 86−30149
random signal detection under Poisson noise background 87−47782
rapid transit system energy regeneration, power networks simulation 87−36227
rational approx. of analytic fns., computational aspects 86−62126
rectangular waveguide, dispersion props., with impedance strip in E plane 86−29533
recursive convolution algorithm for causal linear systems 85−333
reflector antenna pattern anal., calc. methods comparison 87−27029
reflector antenna synthesis, collocation methods 85−41720
reflector CAD and numerical methods *(German)* 86−33852
RELAP 5/MOD.1 Cycle 19 computer code reliability test, numerical simulator *(Italian)* 87−78360
relativistic electron beam modulation by external microwave source 88−27442
relativistic electron beams at high current, form. and vacuum transport, num. calcs. 88−12881
reliability function derivatives using discretisation 85−5871
repeat call models, efficiency 87−75986
resonators used in electron spin resonance spectrometers, electrodynamic design 86−29524
ribbon matrices inversion, analytical and numerical solutions 87−19633
robust regression, linear models in numerical methods 86−46249
robust spectral estimation 88−40917
Romberg numerical integral method for TSC anal. *(Korean)* 88−31680
rotating cryostat of supercond. generator, thermal design and operation performance 88−69285
Runge-Kutta algorithms, comparison of truncation error estimates and intrinsic algorithms 87−44231
Runge-Kutta method for integration of ordinary differential eqns. with nonlinearities *(Japanese)* 86−34263
Runge-Kutta space appl., initial value problems, order conditions 85−22417
Runge-Kutta-Nystrom formula pairs for differential eqns. of form $y''=f(x,y)$ 86−34246
Runge-Kutta-Nystrom methods for 2nd order IVP 87−65384
saccadic eye movements, human, digital differentiation algorithms for CAA 88−48103
sampling fn. design, max. entropy principle, appl. to homogeneous texture anal. 88−72938
SAR images, 1D despeckling algorithm, approximation-theoretic and num. techniques 88−52521
satellite transmission system design using numerical optimisation techniques 86−30727
scalar potential formulation of nonlinear magnetostatic field problem 85−22442
scattering problems, surface fields, numerical determ. at interior resonance 87−75402
Schwarz alternating procedure and SOR 86−62150
sea surface simulated images, optical analysis 88−30181
second-order conservative schemes and the entropy condition 85−39660
sectionally meromorphic functions, determ. of poles 86−62196
semiconductor crystn. in ampoules, modelling *(Russian)* 88−50689
semiconductor device, small-signal anal. techniques 86−21474
semiconductor device continuity equations soln. 88−1616
semiconductor device modelling, mathematical and computational aspects 87−45849
semiconductor device modelling nonlinear Poisson eqn., methods of soln. 88−26187
semiconductor device problem, conditioning of steady state 88−1611
semiconductor devices, numerical simulation 88−44729
semiconductor devices and processes, numerical modelling, conf., Los Angeles, CA, USA (Dec. 1986) 88−6129
semiconductor heterostructure, steady-state generalised energy-momentum conservation eqns., closed-form soln. 88−7327
semiconductor impurity distrib. in high temp. processes, estimation using BASIC program *(Japanese)* 88−57442
semiconductor laser gain distrib. and photon density profiles, numerical anal. 87−68531
semiconductor optical waveguides, nonlinear response, carrier diffusion effect 87−74730
semiconductor process simulation, geometry problems, numerical conformal mapping 86−21301
semiconductor simulation using finite elements *(German)* 86−7681
semiconductor structures, hot electron transient behaviour, numerical model 87−6459
SGEMP boundary layer, wave eqn. 85−24863
shape reconstruction, algorithms 88−59197
short-pulse microwave coupling to apertures in aconducting plane 86−36685
signal processing, prediction and interpolation errors, props. 87−61945
simulation, real-time, conservation eqn. appl. 87−71769
simulation method with Schwarz's alternating procedure *(Japanese)* 86−63910
simulations for sinusoidal oscillators with random numbers and initial impulses 87−5704
sine wave oscillator cct. with stiff element, transient and steady state anal. *(Japanese)* 86−67079

numerical methods continued
sinewave oscillator circuit with stiffness, transient and steady states anal. 88−12241
single-mode, microbending losses, combined analytical and numerical methods for calc. 86−63636
single-mode graded-index planar optical waveguides, numerical method for propag. characts. study 86−42265
singular minimisers detection 87−65371
singular value decomposition, generalized, $(A-\lambda B)$-problem 85−22387
singularly disturbed elliptic boundary valve problems, numerical integration *(German)* 88−38113
slot antenna fed by stripline waveguide, accurate anal. 88−8606
slotted electrode cell, primary current distribution and resistance calc. 85−32670
smart sensors characterisation using multiple regression methods 88−4388
smoothing, theoretical aspects and signal processing appls. 86−3906
SOI devices, numerical model 86−2376
SOI formation process, laser-induced seeded lateral growth, two-dimens. numerical simulation 85−54453
sparse linear least squares, elimination, orthogonalization and iterative methods 85−5932
sparse matrix computation, modification of the minimum-degree algorithm bymultiple elimination 86−13683
sparse matrix methods in optimization 85−5942
sparse systems of equation, conf. London, England (Nov. 1983) 85−27957
sparsity, direct methods for linear equations 85−28181
spectral analysis of signals, number-theoretic transformations 88−21172
spiral antenna backed by reflector, numerical analysis 86−42951
square-opening meshes, EM characts., numerical eval. of anal. methods 88−52247
state-of-the-art *(Japanese)* 86−52375
static field solver with open boundary conditions in MAFIA 3D CAD system 88−52077
stationary numerical models of semiconductor models, theory 87−67190
steady-state response computing of analogue and microwave ccts. 88−70483
steel losses in motors, magnetic props. of materials calc., numerical methods *(Russian)* 88−23856
steelmaking furnaces, electric arcs behaviour, waveform anal. 87−9950
stiff systems of ordinary differential equations, quasi-Newton methods 85−33363
stripline CAD algorithms for synthesis *(Polish)* 85−988
submicron monopolar semiconductor struct., nonstationary processes, numerical modelling, transfer phenomena 87−11724
supercomputing, conf., Athens, Greece, (June, 1987) 88−69999
superferric magnet design, 2-D and 3-D numerical techniques 88−7835
surface current density calc. on 2-D scatterer with smooth contour 86−63976
surface waves excitation on unidirectionally conducting screen by arbitrary phased line source 88−45670
symbolic-numerical analysis of electronic ccts., algorithm 87−73222
synchronous machine elec. parameter estimation from frequency response tests 87−51172
target classification, conf., Rome, Italy (June 1987) 88−31306
Taylor series expansion, numerical algorithm 86−66666
Taylor series methods for time varying singular systems of differential equations 85−33364
temporal regularisation of optical flow 88−46241
tensioned conductor as a physical pendulum−an analytical solution of short circuit effects *(German)* 87−57656
thermography data analysis, hybrid experimental numerical technique 88−68063
thermopile characts., design-technological factors influence, numerical expt. 86−51921
thin film anisotropic structures, magnetisation and demagnetising factors calcs. 88−51152
thin-wire antennas, integral evaluation 87−47294
three phase transmission lines, untransposed, state equation modelling and simulation programs 85−21229
three-dimensional bodies, mag. field, analytical continuation 85−7565
three-phase overhead line step response, numerical calc. *(Croatian)* 88−61953
three-phase phase-controlled thyristor AC voltage controllers anal. and performance 85−65335
thyristor switching phenomena analysis, two-dimensional model *(Japanese)* 88−13366
time series analysis, numerical solution of nonlinear system 85−33357
time-dependent transport equation, moment method solution 86−68734
Toeplitz solvers, numerical performance improvement using pivoting 87−55110
tomographic reconstruction, back-projection method simplification 88−28061
tomography, optical microscopic type, constrained resolution enhancement 87−27635
trace theorem in an anisotropic Sobolev space 88−49775
transformer and choke core air gaps, optimum length and tolerances, numerical method *(Polish)* 85−1852
transient eddy current FELIX cylinder problem (international eddy current workshop problem 1) 88−65959
transient nonstationary behaviour analysis of delay line discriminator, frequency meas. appl. 86−24647
transistor eqns., num. solns. to radial form 88−39352
travelling wave antennas, improved directivity 88−40695
tumour treatment, acoustic field synthesis by sector-vortex array 87−71165
two-dimension stable state numerical computation for semiconductor device *(Chinese)* 88−39350
two-dimensional circuits analysis by wave simulation 88−505
two-level system optimal recognition algorithms, numerical methods 88−21359
two-parameter eigenvalue problems 86−46229
two-sided estimate of time of pursuit, evasion game 85−54261
undulator with a composite magnetic field, numerical simulation 85−37868
US analysis and optimisation 85−8814
US radiation coupling for noncoaxial alignment and unequal size transmitter and receiver *(Japanese)* 87−71425
vacuum lines, mag. self-insulating stationary states calcs. 85−6633
variable parameter method, external characts. calc. of nonlinear devices 87−10636
vector diffraction on axisymmetric body in half-space, numerical algorithm 88−34280
vector hysteresis numerical model 85−62188

numerical methods continued
vector radiative transfer equation solving in discrete random media 87−75452
vision, ill-conditioned problem soln. by eqn. error minimisation 87−62362
VLSI complexity of some arithmetic and numerical problems 88−50905
VLSI numerical device simulation, conf., Boston, MA, USA (Nov. 1984) 86−19705
VLSI numerical model hierarchies 87−67364
VLSI process simulation, phys. models and numerical methods 87−67360
voice and data bursts integration using new switching concept 85−42397
voltage stabilisers characts. using discretely-controlled power transformers, numerical parameter anal. *(Russian)* 86−6879
Volterra equations of first kind, roots 86−371
VR step motors, optimal switching angle, numerical prediction 88−17676
waveguide fed radiating structures of revolution, integral eqn. anal. 87−47299
waveguide laser, self-focusing parallel-plate, modes, numerical calc. 88−1980
waveguides, phased arrays with lossy ground plane, surface impedance method for anal. 87−61434
weak compactum, incorrectly posed problems 85−60929
wear behaviour modelling, Wiener process transform *(German)* 88−38044
wet ice sphere, EM wave scatt., numerical soln. *(Chinese)* 88−27464
Wiener-Hopf integral equation, solution algorithm using, modified method of indeterminate coeffs. *(Russian)* 86−370
xerography, electrical field structure *(German)* 85−13040
AlGaAs-GaAs heterostructure FET, 2D numerical simulation, energy transport model 88−7635
BN, pyrolitic, coupled microstrip, propag. const. calc. using spectral matrix method 88−25361
GaAs CCD with buried channel, numerical estimate of charge-transfer time 86−15162
GaAs IMPATT diodes, heat source analysis, numerical method 88−54819
GaAs MESFET, two-dimens. numerical anal., p-buffer layer 88−64597
He flow in supercond. generators, numerical expts. 88−69288
$LiNbO_3$:Ti diffused waveguide, mode spectrum, numerical calc. results 88−1982
S pollution over Europe, mathematical model 85−59506
Si VLSI device and cct. simulation of transient behaviour 86−21647
Si detectors, electrical props., numerical simulation 87−29484
Si n^+-p-p^+ solar cell, quasi-Fermi level distrib. 86−51900
Si, nonlinear thermal oxidation, numerical modelling 85−34847
Xe laser instabilities, numerical modelling 88−45358
ZnO resistors, surface effect in medium with nonlinear cond. 85−61475
numerical methods, convergence *see convergence of numerical methods*

observability
2D digital filters, minimum sensitivity struct. and balanced realisation *(Japanese)* 88−32355
2D systems, sensitivity minimisation and balanced-realisations 88−19282
3 D separable-denominator recursive digital filters, approx. and min. roundoff noise synthesis 88−19276
3-D separable-denominator transfer functions, balanced realisation and model reduction 88−38329
4-quadrant convertor, asymmetric, anal. and control, for supply DC current 85−32617
*N*th-order dynamics target observability from angle measurements 88−67444
approximate predictor and filter for partiallyobserved vector ARMA processes 86−16282
asymptotically optimum sample size for quickest detection 87−55074
bearings-only target motion anal. for uniform motion, observability criteria for angle meas. method *(French)* 88−22192
bearings-only tracking, dynamic observability and optimisation of observing ship manoeuvres *(French)* 88−22205
combinatorial ccts. fault analysis and appl., FAULT BLASTER procedure 86−46769
combinatorial ccts. testing, informed test generation guidance using partially specified fanout constraints 87−24100
continuous moving web processing machine multimotor drive state observer 86−71084
digital ccts. testability estimation, using enhanced Dairy testability analyser 86−38240
drives, current- or voltage source invertor-fed, rotor temp. identification and compensation by online observation 85−27699
ECSRL networks composed of switches and linear RLC elements, formulation and soln. 87−59127
electric drive direct digital cascade control for position, speed and torque 86−71085
extended Kalman filter for range and speed estimation from frequency meas. 87−27504
IC testability analysis in test generation 86−49954
IC testing, automatic test generation, guided inconsistent path sensitization approach 86−46743
ladder network, arbitrary transfer function min. realisation, algebraic means *(Chinese)* 85−11401
linear lumped passive elec. ccts., controllability and observability 86−27033
linear rational expectations model, unobserved components and errors in meas. 87−28889
linear systems, minimum sensitivity structures synthesis using controllability and observability measures 87−19767
logic testing, statistical fault anal. 87−36915
nonlinear data observability and information 88−58991
nonlinear observability and mixed-coordinate bearing-onlysignal processing 85−51669
partially observable linear-quadratic stochastic pursuit-evasion games 87−65313
power electronic systems feedback control, optimal pole assignment 86−7884
power network observability: identification of observable islands and measurement placement 85−48537
power network observability theory 85−48538
power system dynamic control, reduced-order models, based on controllability and observability 87−64068
power system modal anal., coupling measures with subsynchronous resonance using eigenvectors 88−30277
power system modal controllability and observability 88−75041
power system observability anal. and state estimation on personal computer 88−54877
power system observability and related functions 86−6201
power system observability determ. using graph-theoretic approach 88−10702
power system state estimation, observability, error detectability and identifiability analysis *(Chinese)* 86−39045
power system state estimation, observability methods 88−23283
power system state estimation, orthogonal transformation based, observability anal. 86−50787
power system state estimation, orthogonal transformation based, observability anal. 86−56306
power system state estimation, restoration of observability 88−5293
power system state estimation observability anal., bad data processing using Hachtel augmented matrix 88−10709
power system state estimation observability determ. using network flow technique 86−56297
power system topological observability anal. using incidence matrix *(Korean)* 88−36741
power systems network observability analysis through measurement Jacobian matrix reduction 87−57488
power systems observable island identification for state estimation using incidence matrix 87−71510
radar, observability in passive tracking 86−59939
real-time modeling of power networks 88−30313
relative navigation observability determ., using range-only meas. 85−58247
satellite tracking, trajectory estimation with angle-only measurements usingmultiple sensors 86−69834
single stuck-at fault detection, facilitated by combinational network design 88−6760
solar energy systems, observability 88−11403
sonar observability requirements, for three-dimensional tracking via angle meas. 87−3249
switch level random pattern testability analysis , controllability and observability calc. 88−70717
switching network with RLC linear elements, anal. 86−62413
testability conditions for 2D bilateral arrays 88−70466
three-dimensional tracking via angle meas., observability requirements 85−52385
tracking systems, satellite-based, observability and signal processing 87−7786
two-player competitive differential games with incomplete information, asymptotic observer 85−49436
VLSI fabrication processes, statistical control 88−6255

internal wave estimates from towed thermistor chain, finestructure contamination reduction 86−25441
internal wave observation using echosounders 88−60283
internal wave surface patterns, airborne SAR imagery analysis 87−63973
internal waves, imaging by SAR 86−32575
internal waves, origin of intensity modulation in SAR images 86−44812
internal waves, parameters estimation from backscattered radio signals *(Russian)* 87−77880
internal waves, radar imaging theory 85−37098
internal waves displacement, vertical profiles, spectral anal. of unequally spaced data 88−42658
internal waves imaging by X-band radar, role of nonlinear interactions of short surface waves 88−23189
Kachchh tidal power project, feasibility study 86−65812
kinematics approximation, filter approaches 86−38964
laser sea surface sensing from aircraft 88−30177
laser sounding of upper layer with large surface waves, echo signal intensity fluctuations 86−32578
lidar remote sensing, appl. to determ. of statistical props. of moving sea surface 88−30182
lidar remote sensing method for ocean wave determ. 87−77882
long-wave field effects on resonant Bragg waves, implications for SAR imagery of ocean bottom topography 87−57397
marine radar, sea wave observation 85−47589
marine radar for sea wave observation *(Japanese)* 85−53191
maritime satellite communications, fading BER performance due to sea surface reflection *(Japanese)* 87−28458
measurement of wave action, vibratory pressure transducer 87−42251
measurement of wave height and dominant period by shipboard radar 85−32011
measurement system and data transmission equipment 85−4460
meter for wave meas., parallel capacitance wire wave sensor 87−77885
microwave backscattering on water surfaces, higher order Bragg scattering 86−68783
microwave radar sensing, modelling interactions between ocean and environment 87−35496
microwave remote sensing of ocean wave directional spectra by aircraft 87−71385
microwave scattering characts. of ocean surface with oil spills, theoretical investig. 88−2585
microwave scattering from sea surface, modelling 86−22698
microwave scattering on simple water waves, backscattering spectra study 87−68764
monitoring network in Mid Atlantic Bight 85−32027
Morison eqn. modification for nonlinear steady potential wave drift 85−4480
multifrequency continuous wave radar for ocean wave and turbulence meas. 85−64755
multilook images processing by SAR 87−56232
nadir-looking radar for simultaneous ocean cross section and rainfall meas. 87−63969
Nantucket Shoals, roughness transition obs. rel. to surface currents and radar imaging of sea bottom 87−57396
NDBC directional wave measurements buoy, calibration techniques 86−32555
near-surface currents meas. using satellite telemetering buoy 87−57408
New York Bight surface waves, SAR images and numerical simulations 88−10585
ocean radar cross-section modelling from airborne scatterometer meas. 88−47213
ocean surface, wave breaking, turbulent mixing and radio probing, symposium, Sendai, Japan (July 1984) 86−56259
offshore wind turbine structures, breaking-wave impact and scaling effects 86−61442
optical scanner for sea surface fine struct. anal. 86−32561
passive tapered channel for wave kinetic energy conversion 87−30426
radar, low angle tracking over the sea, signal reflection 86−22699
radar backscatter, modulation transfer function 88−9626
radar backscatter from sea surface, meas. at extremely low grazing angle by C-band Doppler radar 87−57399
radar clutter, sea surface pollution effect 85−47557
radar cross-section modelling from airborne scatterometer meas. 88−47213
radar imagery of sea roughness, SLAR backscatt. rel. to wave direction 85−59490
radar imaging from ship, 2-D power spectra ambiguity removal method 85−32005
radar imaging model comparison with SARSEX data 88−30175
radar low grazing angle sea scatter, Doppler peak spectral shift model 86−32553
radar measurement of moving waves, SAR imaging 86−70534
radar measurements 86−32554
radar measurements, directional-wave spectrum contamination, elimination from noise in elevation meas. 86−32554
radar method for sea state determin., theory and modeling 86−32581
radar ocean imaging model for small to moderate incidence angles 87−28647
radar reflection by sea surface, wind wave effects 88−72546
radar reflection from sea surface, second-order spectrum 88−35576
radar reflections from sea surface 88−5186
radar remote sensing from satellite, method for nonlinear wave parameters 87−57324
radar remote sensing method for wave parameters, dual-radar system 87−71368
radar remote sensing of directional spectra, by 3 freq. microwave scatterometry 85−32013
radar remote sensing of water directions, airborne Doppler method 87−57325
radar remote sensing of wave heights, validation of GEOSAT altimetry using buoy data 88−10563
radar remote sensing technique for directional spectra 85−32004
radar scattering coefficient, sensitivity to ocean winds 86−38954
radar sensing 85−53183

ocean waves continued
real time wave spectra prod. from SIR-C SAR 88−10576

current meter, description of Chinese computerised instrument *(Chinese)* 88−68644
current meter, response of spherical EM current meter design 85−32021
current meter mooring motion, correction methods for temp. and vel. data 87−71379
current meter of moored buoy type, for surface flow 87−77879
current meter with drag-induced tilt meas., design and data recording techniques 87−35500
current meters, dynamic response of EM current meters 86−6130
current meters intercomparison, laboratory and field meas. 87−9013
current meters intercomparison for near-surface current meas. over Norwegian continental shelf 87−9008
current meters standardisation problems and solutions 87−9029
current profiler using pulse-to-pulse coherent Doppler technique 87−9025
current profiling system design and calibration, HF volumetric backscattering 87−9027
data acquisition system for marine environment monitoring 86−60952
data acquisition system incorporating data selection and compression 85−4463
data acquisition systems for buoys and coastal facilities, design criteria 86−60951
data collection and transfer system, large-capacity ARGOS system for remote sensing date *(Japanese)* 88−10566
data logger for oceanographic use, for use underwater 86−55570
data logger with 8085 microprocessor 87−4110
deep sea measurement, overview *(Japanese)* 88−42659
deep sea video equipment 86−25437
deep water high speed retrievable instrument sledge 88−23190
deep-ocean buoy position location system evolution 88−5196
deep-ocean penetrator telemetry system, nuclear waste disposal appl. 88−68640
deep-water remotely operated multipurpose vehicle design 88−54761
Delaware Bay acoustic Doppler profiler intercomparison expt. 87−9020
depth measurement in shallow waters, airborne scanning lidar system 87−50566
DFVLR side-looking airborne radar, appl. to marine oil slicks detect. 87−63975
digital CTD microprofiler, for seawater conf. and temp. meas. *(Japanese)* 86−18581
digital thermosonde (ATsTM-1), appl. to marine geothermal investigations 88−42663
digital XBT system for dynamic height real-time computation 87−71378
direction-finding antenna, compact, for HF remote sensing 85−24959
DOLPHIN multivehicle control system for offshore surveys 88−48366
DOLPHIN offshore survey vehicle hydrographic instrumentation and software 88−48367
Doppler imaging radars, response charact. determ. using speckle 86−65548
Doppler mid-ocean acoustic current profiling from submergedbuoys 87−9026
Doppler shear profiler for midocean front study 87−71375
drifting data buoy development and deployment status and prospects 88−48363
dual-frequency scatterometer for surface current meas., clutter removal 85−64758
electric fields at seafloor, instrument using long antenna 86−38942
electrical conductivity apparatus for towing behind ship 85−32033
electrical conductivity cells for profiling instruments, transient behaviour 87−71369
electrical conductivity meter for sea water, design using active transformer 87−42250
electrical conductivity microstructure meas. equipment for thermohaline characts. determ. 87−63968

oceanographic equipment continued
electrochemical probe with chromoamperometric controller for dissolved O_2 concentration determ. 88−74339
electrolytic sensors in seawater, electrode noise meas. 85−8827
EM altimeter for ocean meas. 86−65486
EM current meters for use in surf zone, field intercomparisons 88−74985
ENDECO pulsed dissolved O_2 sensor controller response and calibration 88−42675
EPSONDE deep ocean microstructure profiler 88−42671
EPSONDE instrument for deep ocean meas. , temp. microstructure and velocity turbulence determ. 88−74981
ERS-1 altimeter, automatic tracking mode switching algorithm 87−57392
ERS-1 payload instruments, development status 87−57390
ERS-1 radar altimeter, performance, calibration, and data validation 87−57340
ERS-1 radar remote sensing satellite, data processing facilities at ground station 87−57346
ERS-1 sensors, ESA approach for calibration and performance verification 87−57391
ERS-1 synthetic aperture radar and scatterometer 85−64751
expendable bathythermographs, digitization and calibration 87−42246
expendable cond.-temp.-depth probe sensor step response expts. 88−48359
expendable dissipation profiler mechanics model 88−48356
exposed Location Buoy, meteorological data supply 86−65565
fibre optic pH sensor for seawater monitoring 88−36677
fibre optic photoelastic intensity-modulated hydrophone 85−9375
fibre optic remote sensing for in situ measurement of marine optical properties 87−42260
fluorescent lidar for the study of natural media , using Milan-IC Cu vapour laser *(Russian)* 88−74988
Flying Fish, untethered sensor platform with acoustic homing capability 86−60962
Forth controlled oceanographic instrument 87−29950
free fall cond.-temp.-depth instrument calibration using H_2O triple point and Ga melting point standards 88−42670
free fall cond.-temp.-depth sensor progress report 88−42668
free fall tethered instrument platform 88−48352
free-fall conductivity-temperature-depth system , ENDECO progress reports 88−74983
GATE Lagrangian Batfish Experiment 85−59489
general purpose data acquisition system 85−21001
general purpose digitiser for oceanographic cond.-temp.-depth instrument 88−42667
Geosat, radar altimeter characts. and results 87−57403
GLORIA, processing techniques for digital sonar images 87−4148
GLORIA, sidescanning sonar 85−15434
helicopter-deployed buoy for ocean surface meteorological meas. 88−74969
high-density cassette data acquisition system 86−60960
Histos network for hydrological and meteorological measurement for East-Scheldt storm surge barrier construction 87−29947
hydrographic and bathymetric systems for NOAA programs 88−74987
hydrographic survey vessel (Takuyo) and continental shelf research *(Japanese)* 85−32001
hydrometeorological measurement system made in USSR 87−42249
ICERAD high resolution pulse Doppler radar for small target detection in sea clutter 88−15650
IEEE Oceanic Engineering Society establishment 85−49246
image processing workstation for ocean remote sensing 86−60954
incoherent multibeam acoustic Doppler current profiler, estimation accuracies 86−44802
incoherent multibeam acoustic Doppler current profiler, spatial response 86−44803
inductive conductivity sensors, theory 85−53188
internal wave measurement system using moored thermistor chain 85−32019
Laser Airborne Depth Sounder (LADS), Australian appl. 86−56254
laser sounder for US Navy hydrographers, appl. to coastal bathymetric surveys 88−10570
laser sounding complex, collection and data-processing system 88−48328
LF hydrophones absolute calibration, use of stand 86−44780
long-range side-scan sonar 85−42662
Loran-based drifting buoy, low-cost expendable equipment 85−32029
macroaggregate determin., light scatt. and camera equipment system 86−12177
magnetic bubble memory recorder for EAVE-East untethered submersible vehicle 85−4464
magnetomodulatory amplifier for electrical prospecting apparatus, theoretical design and config. *(Russian)* 87−52410
marine gauging technology, human factors in maker/user evolvement 85−32008
Marine Observation Satellite-1, visible and IR radiometer *(Japanese)* 87−42247
Marine Observation Satellite-1 (MOS-1) radiometers performance 88−61654
mass spectroscopy of $^3He/^4He$ isotopes in seawater, automated cryogenic charcoal trap system 85−26916
membrane-covered polargraphic O_2 sensors, performance improvement using pulsing technique 87−42259
microbiological fouling and scaling meas. with flow cell array 85−4475
microcomputer systems, for conductivity-temperature-depth data acquisition and display 85−38352
microprocessor development system for ROV CUDA, hardware and software 86−65562
microprocessor-based acoustic telemetry system for tidemeasurement 86−44810
microprocessor-based conductivity-temp.-depth sensor system 88−74982
microprocessor-based tide measuring system 85−15431
MOMO-1, Marine Observation Satellite-1, MESSR development *(Japanese)* 88−54751
MOMO-1, Marine Observation Satellite-1, system development *(Japanese)* 88−54750
MOMO-1, Marine Observation Satellite-1, tracking and control systems *(Japanese)* 88−54752
moored current meters, use of fairings for meas. in high currents 87−71373
multi-hydrophone digital acoustic buoy system with in-situ FFT processing 85−31110
multibeam ocean floor mapping systems 88−10587
multichannel lidar fluorosensor spectrometer for active-passive airborne ocean colour meas. 86−32550
multichannel ship-borne digitizer system 87−37403

oceanographic equipment continued
multifrequency continuous wave radar for ocean wave and turbulence meas. 85−64755
NASA scatterometer for oceanic wind global obs. 86−12183
NAUTILE (SM97), manned submersible, results of tests and first operational dives 86−65558
NDBC directional wave measurements buoy, calibration techniques 86−32555
near-surface currents meas. using satellite telemetering buoy 87−57408
nearshore process meas., underwater digitisation and transmission system 88−54754
Neil Brown Mark III CTD, algorithm for combining separately digitised fast and slow temp. signals 87−71363
Next Generation Water Level Measurement System field units 88−48357
Nimbus 7 Coastal Zone Colour Scanner detectors, sensitivity decay evaluation 85−53190
Nimbus-7 Scanning Multichannel Microwave Radiometer for sea surface temp. meas. 86−32568
nose-towed underwater vehicles, dynamic tests and model simulation 85−64767
ocean bottom seismic stations, press. waves recording by hydrophone amplifier 88−5116
ocean current measurement with spherical EM ocean current meter 85−4467
Ocean Surface Current Radar (OSCR), appl. to vector meas. on inner continental shelf 87−50562
Ocean Topography Experiment proposals 86−50755
oceanic ULF elec. field. meas. method and apparatus 85−59421
Oceans 84 conf., Washington, DC (Sept. 1984) 85−27940
optical fibre multiplexed hydrophone array for at-sea deployment 88−68657
optical interferometric electronic-bench salinometer-densitometer 86−60963
optical plankton counter for light attenuation and zooplankton meas. 88−42657
optical scanner for directional slope distrib. of wind disturbed ocean surface 86−32580
optical scanner for sea surface fine struct. anal. 86−32561
particle and water sampler for use in deep sea, and sensor package 88−5182
suspended particulate monitoring instrument using optical sensor 85−4469
piezoceramic hydrophone sensitivity dependence on hydrostatic pressure determ. 85−9376
piezoelectric transducer for hydrostatic pressure change meas., metrological charcts. 85−4457
POPUP, bottom-moored long term current profiler 85−21019
POSEIDON solid state altimeter for sea level meas. 88−36672
pressure fluctuation gauge for use in deep-sea 87−71371
pressure-to-freq. transducers, linearising device *(Russian)* 86−50753
probes and self-recording data collection systems, microprocessor based, with Macintosh interface 88−61653
pulse current Doppler sonar for water vel. and turbulence meas. 86−65564
pulse Doppler radar cross sections of icebergs and ocean 88−15651
pulse-coherent Doppler sonar improvement by coded pulse trains 88−48342
pulse-to-pulse incoherent Doppler sonar, asymptotic performance 85−53186
radar altimetry remote sensing satellite, instrument description and signal processing 88−5188
radar ocean wave spectrometer use for wave energy spectra estimation 87−71387
radar system of Cosmos-1500 satellite, design and appls. 87−35491
radionavigation at sea using NAVSTAR-GPS Z-SET receiver 85−58257
RAFOS neutrally buoyant subsurface float, acoustic tracking, data acquisition and telemetry 87−77883
Ranger 1: a self-propelled data buoy 86−56256
real-time multisensor processing instrumentation system and software 88−53568
remote sensing by radar altimetry 85−32007
remote sensing by radar altimetry, Poseidon radar system 88−5187
remote sensing satellite equipment for sea surface temp. meas., comparison 86−32569
remote shadow visualiser, appl. to obs. of seawater density inhomogeneities 88−42664
remotely operated vehicle for ocean bottom surveys 87−4143
resistivity probe with four ring electrodes 87−71366
robots, US imaging system design 88−28989
rotatable horizontal line array, azimuthal and vertical arrival angle resolution 88−41759
RUM III submersible vehicle, control system hardware and software 86−65563
SALARGOS oceanographic and meteorological data buoy for Arctic deployment 88−48336
salinity and temp. depth profiling, new C/STD helicopter based equipment 85−32020
salinity measurement, gamma salinometer using ^{241}Am isotope *(Russian)* 86−38966
salinity of seawater, optical interferometric precision instrument 85−32018
sampling devices for coastal pelagic ecosystem and resulting hemipelagic sedimentation anal. 86−60965
SARDINE: a System for Analyzing, Recording, and Displaying Information from NRL-towchain Experiments 88−61657
scanning lidar bathymeter for water depth measurement 87−41040
scanning lidar bathymeter for water depth measurement 88−16923
scanning radiometer for irradiance meas. in marine environment 85−59496
SCARAB deep sea salvage vessel 86−25440
scatterometer antenna composed of microstripsubarrays 86−48702
scientific data acquisition systems, personal computer based, shipboard 88−48385
Sea Beam bathymetric system, sidelobe interference cancellation 86−60958
Sea floor heat flow measuring system, appl. on floor of Japan sea *(Japanese)* 87−50545
sea state sensing using HF ground wave radar, appl. of 2-D digital signal processor 85−53194
Sea-Bird temp. and cond. probes, dynamic response calibration 87−71374
sea-truth measurements with multiparameter acquisition system using on-line PC *(Italian)* 88−23186
seabed instrument to measure shear stress during sedimentation studies 85−4473
seabed surveying and cable burying equipment for Koyo Maru ship 85−31051
seafloor exploration remotely operated vehicle, ARGO/JASON system 87−29919
seafloor topography mapping, sonar multibeam charting system 85−32016

oceanographic equipment continued
seawater particulate in-situ sampler design and development 88−48354
seawater salinity determ., precision conductivity ratio meas. system 85−64754
sediment age and deposition rate determin. equipment for automated radiometric method 85−64702
self-governing profiling system, appl. to flow vel., temp. salinity and turbidity meas. 88−16922
self-orienting ocean floor seismometer package and shore system electronics 88−42644
semiconductor laser-based instrumentation for ocean studies 87−77890
sensor chain for oceanographic data collection *(Norwegian)* 85−38351
Seto Inland Sea (Japan) benthic boundary layer water quality and O_2 consumption monitoring system 88−48355
shallow-water acoustic meas. system , using submersible towers 88−74984
ship's radar, appl. to ocean waves directional spectrum meas. 87−57398
ship-borne type wave height meter using microwave Doppler radar *(Japanese)* 85−48484
ship-lowered CTD instruments, salinity despiking methods 87−4142
shipboard 115-kHz acoustic Doppler current profiler, performance evaluation 88−16921
Shipboard Data System III positioning and navigation system 88−10589
shipborne X-band radar for ocean waves imaging 88−10582
shore based sea-level meas. data acquisition and transmission 87−55833
solid state recording current meter conversion 86−65557
solid-state recorders for long-term deployment oceanographic instrumentation 87−42254
sonar deep-sea instrumentation system for seafloor studies 85−43488
sonar meas. of waves and currents, Doppler sonar methods 87−77886
sonar recorder, design principles and operation *(Russian)* 86−38965
sonar sea-bed imaging system, high resolution 85−37117
sonar workstation, design and construction for oceanography appl. 87−42258
SONARLINK deep ocean adaptive telemetry system 85−31112
sonars for submersible vehicles, for obstacle avoidance and obstacle searching 87−77836
sound velocity meter with piezoelectric components 85−59500
spaceborne remote sensing, conf., Baltimore, USA (April 1986) 87−65036
spaceborne scatterometers, comparative study of wind estimation algorithms 88−10552
SPEAR-F, wave height spectrum buoy 86−65556
spectral properties of seawater, in situ transmissometer using solid-state components 86−6132
spectral reflectance of surface, solid-state radiometer for remote sensing 86−6132
Spectrasat hybrid radar ocean wave spectrometer/SAR approach for wave monitoring 87−71392
Spectrasat radar ocean-wave spectrometer, design and operation 87−71393
Spectrasat radioaltimeter/SAR instrument design and processing of data 87−71394
Spectrasat SAR satellite for global collection of ocean wave spectra 86−12184
SPOT-4 satellite vegetation-imaging instrument in-flight calibration 88−68653
STABLE instrument for studying benthic boundary layer current struct. and sediment transport 87−57409
submersible, unmanned, for underwater exploration, design of dynamics and control system 86−32582
submersible remotely-controlled exploratory vehicles, thrust vector control jet nozzle charcts. *(Japanese)* 88−68645
Surface Contour Radar for wave meas., capabilities comparison with Airborne Oceanographic Lidar 87−71388
surface current meas., CODAR intercomparison, Delaware Bay (1984) 87−9011
surface potential probe, for capillary and gravity water waves meas. 86−55895
Systeme Acoustique Remorque, appl. to acoustic imagery of sea floor 86−65559
temperature meas. by inverted echo sounder, instrumentation design 85−32022
temperature profile measuring device for surface layers, floating sonde 88−30150
temperature profiling of upper ocean, improved automated Thermotrawl system 85−43487
tethered current meter, ENDECO Type 174 model evolution 87−9010
thermistor array for ocean patches geometric struct. anal. 86−25442
thermistor chain buoy development for ice infested waters 88−48360
thermistor chain for midocean front study 87−71375
tide gauge system using computerised instrumentation methods 85−32023
tides and waves meas. with double transmission line *(Spanish)* 87−50569
towed body for turbulence meas. 87−71376
Towed Ocean Sensor System (TOSS) 88−42672
towed thermistor chain for internal wave estimates, finestructure contamination reduction 86−25441
towed thermistor spar 87−57406
towed transport meter 87−9014
tracking of water parcels, isopycnal Swallow float design 85−26915
transparency meter, appl. of self-contained submersible instrument 88−42662
Tucker and microwave-type wave recorders, comparison *(Japanese)* 87−57381
turbidity of seawater, two-fibre optical sensing device 88−48330
turbulence microstructure instrument, for profiling of coastal bottom boundary layers 88−10558
two-channel IR radiometer, appl. to remote meas. of sea surface temp. 87−35493
two-electrode conductivity cell dynamic response 88−42669
underwater robotic vehicle and manipulator capabilities 88−54758
underwater sound electronics for ocean exploitation *(Chinese)* 85−15428
underwater sound positioning system, high precision short range, development 87−56286
underwater sound velocity meter calibration and accuracy 88−5195
underwater vehicles, demonstration of closed-loop trajectory control 86−65561
UNIBOOM, acoustic method for marine sediment anal. 85−53139
United State Navy Geosat Mission radar altimeter satellite programme 86−12185
universal acoustic deep ocean transceiver with RF command data link 87−42257
unmanned deep ocean remotely operated system, mech. model 88−42665

oceanographic equipment continued
unmanned underwater vehicles, present state and technical trends *(Japanese)* 85−15430
upper, ocean meas. under sea ice, medium-resolution turbulence cluster 87−9028
US instrumentation, underwater appl. 85−4516
Variable Depth V-FIN Depressor, remote controlled towed vehicle, appl. to hydrographic meas. 86−65560
vector averaging current meter and Edgerton Germeshausen and Grier Inc. vector meas. current meter comparison 87−50564
vector meas. current meters comparison, at 30 m and 50 m depth 87−9009
vector meas. current meters intercomparison, surface mooring in shallow water 87−9006
velocity and CTD profiler, TOPS free-fall instrument 87−71370
vented resonant-pipe projector for deep-towed seismic profiling 88−48349
vertically rising microstructure profiler for temp. and cond. meas. 87−61867
VHF radar for ocean surface current and sea state remote sensing 87−34659
vibrocorer for sandy core sampling 86−65550
wave directional spectrum buoy for data transmission by Argos satellite 85−4477
wave gauges, bottom-mounted directional equipment performance 85−32028
wave height meter using shipborne microwave Doppler radar 85−53185
wave measurement with Canadian waverider buoys 85−4476
wave measuring pressure transducers 87−42251
wave meter, parallel capacitance wire wave sensor 87−77885
wave monitoring network in Mid Atlantic Bight 85−32027
Wavescan buoy data acquisition module 87−56557
wide-band monopulse sonar, remote seafloor profiling appl. 87−71365
wideband underwater transducer array with single acoustic matching plate 88−10623
wind scatterometer, optimum operating freq. selection 88−61648
WOTAN underwater wind recording instruments 85−32009
WRELADS laser airborne hydrographic system, depth bias model 86−65521
Hg column pressure sensor for fast cond.-temp.-depth probes 88−42673
Li D-size cell performance and safety for oceanographic use 88−43366
Mg-CuCl seawater activated battery for oceanographic appls., electrochem. properties investig. *(Russian)* 88−23188
Mg-O_2 seawater activated battery for oceanographic appls., electrochem. properties investig. *(Russian)* 88−23188
O_2 sensor, fluorescence based 88−35948

current measurement, inclinometer-type meter design 87−35500
current measurement by means of Doppler acoustic profiler 85−4468
current measurement method for coastal area, HF radar technique 86−6129
current measurement using free-drifting buoys 85−31999
current meter, response of spherical EM current meter design 85−32021
current meter mooring motion, correction methods for temp. and vel. data 87−71379
current meters, dynamic response of EM current meters 86−6130
current meters standardisation problems and solutions 87−9029
current remote sensing method using interferometric radar 87−71396
current sensing, space-time analysis of acoustic scintillations 87−9015
current vel. meas. using acoustic Doppler backscatter, review 86−44801
data acquisition system for marine environment monitoring 86−60952
data acquisition system incorporating data selection and compression 85−4463
data acquisition systems for buoys and coastal facilities, design criteria 86−60951
data editing technique 86−22985
data identification in an integrated data-logging and-processing network system 86−60170
data processing equipment aboard on ocean going launch 86−56267
data rationalising system using IEEE 488 standard interface 85−4466
data telemetry, motivations and methods 88−30179
deep sea measurement, overview *(Japanese)* 88−42659
depth measurement in shallow waters, airborne scanning lidar system 87−50566
digital doubling integrating filter for heave meas. 87−42253
digital image processing for sidescan sonar data analysis 87−56285
digital sonar imaging, processing techniques for images from GLORIA 87−4148
directional wave spectra, approaches for comparing remote and in-situ meas. 87−71384
directional wave spectra, max. likelihood and Longuet-Higgings calc. comparison 88−48372
distributed computer appl. 85−21020
Doppler imaging radars, response charact. determ. using speckle 86−65548
dual frequency radars, azimuthal resolution improvement for ocean surface currents 86−25438
electric field measurements in sea, theory for medium with fields generated by extraneous sources 87−29946
electric fields of ULF freq. in ocean, meas. method and apparatus 85−59421
electrical conductivity apparatus for towing behind ship 85−32033
electrical conductivity cells for profiling instruments, transient behaviour 87−71369
ELIA knowledge-based Landsat TM image anal. system 87−50571
EM and acoustic wave propag. above and below sea surface, conf., London, England (Nov. 1985) 86−19754
EM current meters for use in surf zone, field intercomparisons 88−74985
EM surveying of oceanic crust using active dipole source 86−65552
EM surveying of shallow ocean sediments, airborne technique 86−44811
EM waves scattering from surface with small and shallow inhomogeneities 85−13122
ERS-1 SAR wave mode for ocean-wave spectra recovery, calibration 86−55352
ERS-1 satellite with ocean radiometer/radar remote sensing capability for weather forecasting *(French)* 85−15435
ERS-1 wind and wave calibration workshop, Schliersee, Germany (June 1986) 87−10042
estuarine circulation, hydraulic and FEM expts., anal. by imaging system techniques 86−60973
Eulerian flow field estimations and remote sensing 88−61655
expendable bathythermographs, digitization and calibration 87−42246
fibre optic digital uplink for ocean-floor experimentation 85−37006
fibre optic sensors for oceanographic appl. 88−67823
fish abundance meas. in culture nets using acoustic method 85−20277
fish echo-sounder signals, Wigner Ville transform appl. 86−30064
fish farms, plankton mag.-separation, buildup of magnetic flocs containing plankton on a single wire 88−52170
fish-finding by satellite using seawater temp. obs. *(Japanese)* 86−38968
fisheries hydroacoustics at the Pacific Biological Station in Nanaimo, BC 85−20274
fishery information from satellite remote-sensing data *(Japanese)* 85−64762
floor mapping, GLORIA distortion correction using MIPS software 88−54756
flow meas. by acoustic field space-time scintillation analysis 88−48348
Forth controlled oceanographic instrument 87−29950

oceanographic techniques continued
Fourier transform filtering, oceanic appls. of tidal harmonic filter and discrete Fourier transform 88−61659
frequency-separated cm radio waves propagation over sea, spatial-temporal characts. 86−63992
geodetic positioning at sea, international activities in AD 1979 to 1983 period 86−4768
GEOSAT radar altimeter, for measurement of sea surface from satellite 88−10504
GEOSAT radar altimetry experiment, waveform analysis and height corrections 88−10511
GEOSAT radar altimetry from satellite, program for ocean monitoring 88−10561
GEOSAT radar satellite for geodesy and oceanography, ground station methods 88−10507
GEOSAT radioaltimetry satellite of US Navy, for marine geoid and ocean variables 88−10503
GEOSAT satellite, radar altimetry expt. for obs. of sea surface, design and operation 88−10506
GEOSAT satellite radar altimetry method for sea surface observation, noise spectrum 88−10505
global sea surface temp. fields prod. from remotely sensed data 86−32569
GPS, differential mode, hydrographic surveys 87−41084
GPS, ocean surveying impact 85−37129
GPS and DGPS, Geoloc hybridisation for long-range dynamic radiolocation 87−63095
GPS radionavigation for dynamic applications, Doppler processing technique 86−60949
GPS-aided inertial positioning in irregular ocean gravity fields 88−9685
GPS-aided marine positioning developments 88−10590
Gulf Coast, marine navigation and surveying, personal computers appls. 86−4770
Gulf of Mexico floor mapping with GLORIA digital image processing 88−10594
harbor directional wave spectrum determ. method *(Japanese)* 85−59493
HF backscattered spectrum of ocean surface, analytical model 86−65541
HF Doppler radars for ocean wind-driven currents anal. 86−50752
HF four-element CODAR beam forming 86−65024
HF ground-wave radar, receiver design 88−47217
HF ground-wave radar remote meas. of Celtic Sea ocean wave and current, NURWEC 2 project 87−56263
HF multifrequency radar obs. of currents and current shears 86−65536
HF radar, wave and current sensing 87−56262
HF radar appl., wind direction temporal and spatial changes obs. 86−65530
HF radar for surface current meas. 85−43486
HF radar meas. interpretation, linear gravity-wave dispersion relation 86−65539
HF radar meas. of sea surface, gravity-wave dispersion relation role 86−65540
HF radar measurements of ocean wave parameters duringNURWEC 86−65531
HF radar obs., for Canadian east coast 86−65534
HF radar observations of Arctic pack-ice breakup 86−65537
HF radar sea echo interpretation, role of second-order shallow water hydrodynamic coupling coeff. 87−57405
HF radar sea echo interpretation, second-order shallow-water hydrodynamic coupling coefficient 86−65542
HF radar sea echoes, Bragg coherence 87−20595
HF skywave radar, remote sensing enhancement by FM signal correction 88−47219
HF skywave radar remote sensing of ocean surface conditions 88−16932
HF skywave sea state radars at high latitudes, ionospheric factors affecting performance 86−59072
high performance floating point hybrid amplifiers 86−52708
Hudson Bay transient surface height variations, interactive hydrodynamic model and Seasat altimetry correction 86−6140
hydrodynamic simulation animation, menu-driven software package 88−48386
hydrographic mapping techniques, complex monopulse processing 85−31108
hydrographic measurements, appl. of Variable Depth V-FIN Depressor vehicle 86−65560
hydrographic positioning accuracy improvement using multiple lines 88−5198
hydrographic survey positioning by spread-spectrum radiolocation 88−10588
hydrographic survey vessel (Takuyo) and continental shelf research *(Japanese)* 85−32001
hydrographic surveying of bathymetry, different positioning systems *(Japanese)* 85−32002
ice hazard detection using electric dipole field 86−22598
ice motion determ. using digital SAR imagery 86−32552
ice remote sensing by radar, theoretical model for microwave reflection 88−10577
ice remote sensing from satellite, microwave imaging device 85−31997
ice surveying, thermal viewing equipment effectiveness 86−12180
iceberg detection by radar, performance anal. 86−60955
iceberg detection by radar, radar cross-section model 86−17454
iceberg drift dynamic modelling from current profiles and wind obs. 88−48333
icebergs, marine radar detection, polarisation effect 86−17453
icebergs remote sensing, HF ground-wave Doppler radar appl. 86−65538
IEEE Oceanic Engineering Society establishment 85−49246
IEEE standard serial ASCII instrumentation loop (SAIL)shipboard data communication 86−50754
image processing techniques, application to marine fisheries 85−32024
image processing workstation for ocean remote sensing 86−60954
imagery, dual-freq. SAR, calibration 87−4152
incoherent Doppler sonar spectral analysis, modelling methods 86−44804
information and data service in Canada 85−4458
INMARSAT satellite transmission of oceanographic data 87−34503
instrumental wave measurements and utilization of wave data 85−15436
internal wave currents estimation, appl. of SAR and IR scatterometer imagery 87−57395
internal wave detection by radar, real aperture method 85−26907
internal wave estimates from towed thermistor chain, finestructure contamination reduction 86−25441
internal wave measurement system using moored thermistor chain 85−32019
oceanographic techniques continued
internal wave parameters estimation, appl. of backscattered radio signals *(Russian)* 87−77880
internal waves imaging, origin of intensity modulation in SAR images 86−44812
Landsat observation of tidal vortices at Naruto Strait, Japan *(Japanese)* 85−32006
Landsat-5 Thematic Mapper use in marine appl. 88−16927
large-scale sea surface temperature variability fromsatellite and shipboard measurements 86−32567
laser airborne depth surrounding in Australia 86−56254
laser fluorosensing of natural waters, environmental effects on laser-induced fluoresc. spectra 87−42252
laser remote sensing of upper ocean layers, problems and methods 87−77881
laser sea surface sensing, statistical parameters of reflected signal 88−16929
laser sea surface sensing from aircraft 88−30177
laser sounding of upper layer with large surface waves, echo signal intensity fluctuations 86−32578
least-squares method as filter, related power in spectrometry 87−21787
LF underwater acoustic propagation and sediment depth, meas. 87−56287
lidar, Raman and Brillouin, for sea and atm. temp. profiles meas. 85−15421
line broadening on HF ocean surface radar 86−32556
linear time-invariant space-invariant filters and WKB approx. 86−10408
macroaggregate determin., light scatt. and camera equipment system 86−12177
magnetic variation sounding, numerical solution of inductive problems 85−9370
marine biological images from coastal waters, image processing and pattern recognition 85−36318
marine EM sounding, forward modelling for freq.-domain systems 88−23169
marine fisheries research, application of remote sensing and interactive anal. 85−32025
marine geodetic methods and positional changes 88−5202
marine geothermal investigations, appl. of self-contained digital thermosonde (ATsTM-1) 88−42663
marine pollution detection, discrimination between crude-oil spills and monomolecular sea slicks 86−32589
marine radar for sea wave observation *(Japanese)* 85−53191
marine seismology, press, waves recording by ocean bottom seismic stations 88−5116
matched-field processing in deep-water Pacific environment, simulation 87−71364
membrane-covered polargraphic O_2 sensors, performance improvement using pulsing technique 87−42259
meteorological and oceanographic support during the Falklands conflict 85−26889
meteorological and oceanographical measurements by HF radar *(French)* 86−4726
microwave altimeter for marine observation satellite, bread board model 86−25455
microwave backscatter from ocean, uncertainty effect on satellite radar altimetry accuracy 86−32558
microwave backscatter from sea surface, azimuth modulation minima for K_u band 88−68617
microwave echoes from sea surface, decorrelation time 85−64757
microwave radar sensing, modelling interactions between ocean and environment 87−35496
microwave radiometry of lakes, seas, and oceans 86−32557
microwave remote sensing, statistics of specular refl. points on ocean surface 87−75393
microwave remote sensing of ocean wave directional spectra by aircraft 87−71385
microwave remote sensing radiometer, for future atmos. ocean, hydrology research 88−5180
microwave scattering characts. of ocean surface with oil spills, theoretical investig. 88−2585
microwave scattering from sea surface, modelling 86−22698
midocean front study with Doppler shear profiler and thermistor chain 87−71375
MM wave radiometric meas. for airborne and ground based appls. 88−22764
MM-wave radiometric imaging, sea ice meas./location appl. 86−38969
mooring deployment and recovery through drifting ice 88−48338
MOS-1 VTIR data processing software *(Japanese)* 87−41507
moving acoustic source in ocean, signal filtering and tracking 86−64300
multichannel satellite radiance meas. of sea surface temp. 85−43482
multichannel ship-borne digitizer system 87−37403
multifrequency continuous wave radar for ocean wave and turbulence meas. 85−64755
multifrequency microwave radar for ocean surface currents meas. 85−26912
multifrequency microwave radars for ocean current meas. 85−32014
nadir-looking radar for simultaneous ocean cross section and rainfall meas. 87−63969
navigation and positioning at sea using GPS satellite and inertial methods 85−58256
navigation and positioning techniques, development 87−63092
navigation around ports and harbours, real-time navigational information systems 86−60950
navigational positioning methods in oceanography, space-time resolution 86−65544
Neil Brown Mark III CTD, algorithm for combining separately digitised fast and slow temp. signals 87−71363
Newfoundland snow crab movement tracking by US telemetry 88−54753
NHK special productions, picture taking and computer graphics, Toyama Bay natural phenomena investigation *(Japanese)* 85−26914
Nimbus 7 Coastal Zone Colour Scanner detectors, sensitivity decay evaluation 85−53190
NOAA satellite programs, 1984 research and development trends 85−9363
nonlinear multichannel algorithms for estimating sea surface temperature with AVHRR satellite data 88−72939
North Sea bed current profiling with pulse-to-pulse coherent sonar 88−48341
North Sea obs., rijkswaterstaat's interest in HF radar 86−65532
ocean acoustic tomography, techniques *(French)* 88−23191
ocean floor geodesy system surface element positioning by GPS 88−10591
ocean surface, wave breaking, turbulent mixing and radio probing, symposium, Sendai, Japan (July 1984) 86−56259

oceanographic techniques continued
ocean technology electronics, conf., Edinburgh, Scotland (March 1987) 87−51747
ocean wave meas. by shipboard radar, for wave height and dominant period 85−32011
ocean wave spectra, transformation into SAR image spectra 87−35492
ocean waves energy spectra estimation using radar ocean wave spectrometer 87−71387
oceanography technology, conf., San Diego, USA (Feb. 1986) 86−55383
offshore well temp. data acquisition and acoustic telemetry 88−48350
oil detection using time resolved LIDAR fluorosensor 88−10598
oil films on sea surface, radar remote sensing and ocean wave Marangoni effect 88−54748
oil films on sea surface, radar signatures 88−4086
oil pollution at sea, X-band SLAR radar observations and technique 88−4113
oil slick detection, appl. of side-looking airborne radar 87−63975
oil slicks at sea, airborne SLAR method operating in X-band 86−69830
oil slicks detection, remote sensing of transformation of short wind wave spectra *(Russian)* 88−5184
oil spill detection and analysis, results from radar and microwave radiometry 87−63976
oil spills detection, appl. of radar obs. of damping effect on wind-excited sea ripples 85−59499
oilspill estimation with radar and microwave radiometry 86−56271
optical remote sensing from space, conf., Cannes, France (Nov. 1985) 87−21773
optical underwater measurement techniques using low-power lasers 88−36676
pH determination for seawater, shipborne flow-through system 88−48329
phytoplankton conc., quantitative remote sensing, light refl. compensation method *(Japanese)* 86−32583
pollution detection, discrimination between crude oil spills and monomolecular sea slicks by airborne remote sensors 87−63974
position determination on seafloor, GPS satellite method 85−59495
prompt γ-ray activation analysis of seawater pollutants using shallow neutron probe 88−61663
pulse current Doppler sonar for water vel. and turbulence meas. 86−65564
pulsed microwave amplifiers for active remote sensing from space 85−61134
radar, elimination of directional-wave spectrum contaminationfrom noise in elevation measurements 86−32554
radar altimetry, appl. of surface elevation and slopes joint distrib. for nonlinear random sea 86−38967
radar altimetry remote sensing satellite, instrument description and signal processing 88−5188
radar backscatter for ocean currents meas., error minimisation 85−26913
radar cross-section for wind-driven sea with swell 86−32560
radar detection of marine oil spills, impact of higher-order Bragg terms on radar return 85−59498
radar dual-frequency scattering, clutter background limitations removal 85−64758
radar for ocean and coastline surveillance 86−17512
radar for ocean surface object detection, problem of optimal discrimination in presence of receiver noise 87−50567
radar imaging of land and sea surfaces, by imaging radar polarimetry 87−70119
radar imaging of sea bottom, implications of surface currents obs. at Nantucket Shoals 87−57396
radar imaging of sea surface *(Russian)* 85−59492
radar low grazing angle sea scatter, Doppler peak spectral shift model 86−32553
radar measurement of moving waves, SAR imaging 86−70534
radar measurements *(Russian)* 86−65549
radar method for sea state determ., theory and modeling 86−32581
radar ocean imaging, model for small to moderate incidence angles 87−28647
radar remote sensing, appl. of side-looking radar of Cosmos-1500 satellite 87−35491
radar remote sensing, normal incidence microwave backscatter theory 88−60210
radar remote sensing, obs. of ocean waves rel. to model for fetch-limited wave growth 88−10579
radar remote sensing, origin of sea surface return in C and Ku bands 88−16930
radar remote sensing, sea surface refls. rel. to cm-wave refr. in atmospheric boundary layer 88−5186
radar scattering from sea surface, calc. method including polarization effects 88−5191
radar second-order Doppler return from ocean surface 86−32559
radar signatures of Andaman Sea internal solitons 86−32574
RADARSAT for ocean and ice meas. for Canada 86−65547
radionavigation at sea using NAVSTAR-GPS Z-SET receiver 85−58257
radionavigation for aircraft doing coastal hydrographic surveys, Thomson-Trident system *(French)* 87−42205
radionavigation methods, differences between nautical charts and the geodetic datum *(Japanese)* 87−35495
real time wave spectra prod. from SIR-C SAR 88−10576
real-time geophysical data products for the oceanographic community 85−32026
real-time ocean wave-height mapping with HF skywave radar, tests 86−65527
reflected optical second harmonic generation technique, appl. to study of ocean surface organic films 88−61658
remote sea-state sensing, JINDALEE skywave radar appl., frequency management support 86−65526
remote sensing, acquisition and anal. of NOAA HRPT data by FRS-68010 system 87−57374
remote sensing, appls. of microwaves 88−54733
remote sensing, automatic tracking mode switching algorithm for ERS-1 altimeter 87−57392
remote sensing, development status of ERS-1 payload instruments 87−57390
remote sensing, digital processing of side-looking radar imagery from Cosmos-1500 satellite 87−35483
remote sensing, ESA approach for ERS-1 sensor calibration and performance verification 87−57391
remote sensing, first-order spectral component of microwave scatt. on water waves 87−68764
remote sensing, large-capacity ARGOS data collection and transfer system *(Japanese)* 88−10566

oceanographic techniques continued
remote sensing, microwave emissivity of sea foam at 19 and 37 GHz 88−10568
remote sensing, performance, calibration, and data validation of ERS-1 radar altimeter 87−57340
remote sensing, portable multispectral video system 86−60953
remote sensing, surface-field approach to EM wave scattering from rough surface 88−42636
remote sensing, two-scale Bragg scatt. model for microwave backscatter from wind-generated waves 87−57393
remote sensing appl. 86−32571
remote sensing by multibeam radar altimetry 88−5189
remote sensing by radar altimetry 85−32007
remote sensing by radar altimetry, Poseidon radar system 88−5187
remote sensing for control of marine pollution, book 86−70533
remote sensing from space, commercial directions for 1985 to 2000 85−9364
remote sensing in glaciology, symposium, Cambridge, United Kingdom (September 1986) 88−5106
remote sensing of ocean surface current and sea state using VHF radar 87−34659
remote sensing of power station thermal discharges 87−30137
remote sensing of scattering coefficient for airbornelaser hydrography 86−65522
remote sensing of sea-surface conditions, HF narrow-beam radar systems appl. 86−65524
remote sensing with the JINDALEE skywave radar 86−65525
salinity and temp. depth profiling, new C/STD helicopter based equipment 85−32020
salinity measurement, gamma salinometer using ^{241}Am isotope *(Russian)* 86−38966
salinity measurement, matching of CTD sensors response characts. 88−74980
SAR appl. to sea surface, image norms 85−53189
SAR applications 86−32572
SAR automated remote sensing for sea ice 87−57388
SAR data from dynamic ocean surfaces, multi-look processing 87−20599
SAR for internal waves imaging 86−32575
SAR for sea ice imaging 85−64763
SAR image form. 86−32573
SAR image reconstruction algorithm with complex phase correction *(Japanese)* 87−77891
SAR imagery of ocean bottom topography, results from improved model 87−57397
SAR imagery use for ocean waves energy spectra estimation 87−71386
SAR images simulation via phase history generation 88−60276
SAR imaging, comparison of SIR-B and Seasat wave spectra with simultaneous buoy data 88−10534
SAR imaging, inversion problems 85−63748
SAR imaging, transformation of ocean wave spectra into SAR image spectra 87−35492
SAR imaging model 88−10584
SAR imaging of New York Bight surface waves 88−10585
SAR imaging of ocean azimuth travelling surface waves 88−10583
SAR imaging of ocean waves, direct and inverse methods 86−12186
SAR imaging of surface currents and wave-current interactions, intensity modulations 86−32576
SAR imaging of surface waves importance of motion related contributions 87−15075
SAR imaging of the ocean, inverse problems 85−47565
SAR imaging of waves, numerical simulation 87−15074
SAR ocean imagery, model and optimal algorithm 85−26909
SAR ocean wave imaging, inverse methods 85−64766
SAR oceanography, basis for theory and expt. 88−60275
SAR sea ice imagery, geophys. anal., computer-assisted techniques 87−4151
satellite altimeter returns mispointing errors onboard correction, oceanographic meas. appl. 88−68545
satellite altimeters, pulse train simulation and appls. 85−47588
satellite multibeam altimetry for current and wave meas. 85−21018
satellite oceanography, introduction for oceanographers and remote-sensing scientists, book 88−31348
satellite passive microwave ice map, near real-time data system 87−4150
satellite radar altimetry methods, technique for radar pulse return averaging 87−63902
satellite radar remote sensing method for sea-surface topography 88−10564
satellite-derived meteorological and oceanographic data, naval operations, practical appls. 85−26891
satellite-derived sea surface temperature, processing, compression and transmission for real-time use at sea 88−61656
scanning beam radar ocean-wave spectrometer technique 87−71393
Scripps seagoing computer centers: real-time dataacquisition and processing 86−60967
sea, velocity and temperature fluctuations, turbulent diffusivities estimation *(Japanese)* 85−64750
Sea Beam sidelobe interference rejection, adaptive noise canceling 88−68641
sea bed classification by sonar, spectral anal. method for computer classification 85−43485
sea floor exploration, results from first year of manned submersible NAUTILE 86−65558
sea floor heat flow determ., appl. of 16-channel heat flow measuring system in Japan Sea *(Japanese)* 87−50545
sea ice, surface roughness meas. *(Japanese)* 87−57382
sea ice sensing, shipborne interface system (STAR-VUE) for tactical ice navigation 87−63977
sea ice surface-based marine radar imaging techniques 85−48487
sea ice thickness, radar meas. accuracy increase using cepstral anal. of reflected signals 86−25445
sea level determ., EM bias of 10 GHz radar altimeter meas. 85−19125
sea level determ., EM bias of 36 GHz radar altimeter meas. 85−19124
sea state meas. by radiometric method 87−35494
sea state parameters deconvolution from altimeter waveforms, parameters accuracy estimation 88−10569
sea state remote sensing by ground-wave radar 88−48373
sea surface, moving, statistical props., laser radar study 88−30182
sea surface and depth detection in the WRELADSairborne depth sounder 86−65517
sea surface geometry statistical characterisation, method for discontinuous wave slope field 86−60946
sea surface mean reference estimation in WRELADS airborne depth sounder 86−65518

oceanographic techniques continued
sea surface modelling for daylight imagery studies, using plastic coated paper 88−68642
sea surface roughness parameters, remote determ. via microwave polarisation meas. *(Russian)* 86−6128
sea surface scattering, wind measurements for nonuniform wind fields by spaceborne scatterometers 88−10551
sea surface scatterometry, quasi-specular sea scatter with modified refl. coeff. 86−60937
sea surface scatterometry, radar scattering and equilibr. ranges in wind-generated waves 87−63970
sea surface temp. monitoring using IR radiometry, review 87−71397
sea surface temperature, algorithms from AVHRR data 87−4149
sea surface temperature meas., comparison of satellite-derived temps. with in situ skin meas. 87−50565
sea surface temperature measurement, atmospheric effects on Landsat thermal IR data 88−10578
sea surface temperature measurement, remote sensing by two-channel radiometric method 87−35493
sea surface temperatures from the Scanning MultichannelMicrowave Radiometer on Nimbus 7 86−32568
sea surface wave height estimation, appl. of Bhaskara II SAMIR data 85−43484
sea water, cond. and temp. meas. with depth using mag. tape recording system *(Japanese)* 86−18581
sea wave measurements using ship radar, directional wave spectrum determ. 87−57398
sea wave spectra determ., appl. of EM techniques 88−16931
sea waves measurement, results from along-track meas. in Barents Sea by side-looking airborne radar 85−59491
sea-floor morphology, automatic mapping with multibeam echosounder data 86−60974
sea-ice detection by SHF radar and reflectivity of first-year ice 86−17452
sea-ice dynamics from SAR images, automated analysis techniques 88−30173
sea-surface topography from satellite altimetry 88−10560
seabed mapping, high-resolution side scan sonar technique 86−25439
seabed mapping using side-looking sonar system 86−12178
seabed topography meas. by multibeam sonar using complex fast Fourier transform 87−35490
seafloor imaging, alternative synthetic aperture sonar processing, method 85−26910
seafloor mapping, NECOR Sea Beam data collection and processing 88−30180
seafloor mapping by sonar methods 87−77835
Seasat A Satellite Scatterometer I model function upgrading 86−6141
Seasat microwave altimeter meas. of ocean gravity wave equilib.-range spectral behaviour 87−57404
Seasat SAR imagery, methods for extracting sea ice data 87−15072
seawater density inhomogeneities visualisation, appl. of remote shadow visualiser 88−42664
seawater effective salinity determ., conductivity comparator 87−4146
seawater monitoring using fibre optics pH sensor 88−36677
sediment age and deposition rate determin. equipment for automated radiometric method 85−64702
sediments of seafloor, NMR imaging, method for organic rich layers 87−4108
seismic profiling using surface towed radio telemetry array (STRATA) 86−65555
seismic reflection exploration of seafloor, influence of heave of towed source 87−39726
sensor chain for oceanographic data collection *(Norwegian)* 85−38351
shallow water tomography, acoustic reciprocal transmission expts. 87−9016
ship detection with high-resolution HF skywave radar 86−65529
ship navigation device for avoidance of submarine cables 86−60948
ship positioning using acoustic location method, calibration procedure 86−60947
ship radar imaging, by inverse range-Doppler technique 88−4085
shipboard Doppler current profiler data merging with LORAN-C data, absolute current estimation 87−9024
shipborne motion-compensated crane operation 85−4479
Shuttle SAR imaging of directional wave spectra off Chile coast 86−32577
side scan sonar for marine sediment study 85−38350
side scan sonar records, use of image processing 87−33829
side-scan acoustic image processing software, TRIAS 86−59313
signal processing and sensing, VLSI full custom devices, parallel architecture 87−69198
signals deconvolution, new generalised l_p-algorithm based on linear programming 86−60959
silt sediment density, in-situ measurement method using broadband parametric sound source 86−12188
SIR-B ocean-wave enhancement with fast Fourier transform techniques 87−71390
SIR-B oil pollution expt. in Japan 88−53366
SIR-B oil-pollution expt. in Japan 88−53362
SIR-B use for height and wavelength determ. 88−10586
skywave sea-state radar techniques, auroral zone latitude, expt. investig. 86−65528
Small oceanographic data acquisition (SODA) system 86−60966
sonar, method for passive source location using bearing estimation 88−74053
sonar, multibeam, appl. to graphic display of seabed configuration 85−31109
sonar, Sea Beam shipboard data collection and processingenhancement 86−55384
sonar Doppler method for currents and turbulence, signal processing techniques 87−77884
sonar echo statistics as remote sensing tool 86−44809
sonar for seafloor object detection, problem of optimal discrimination in presence of receiver noise 87−50567
sonar meas. of waves and currents, Doppler sonar methods 87−77886
sonar methods used in offshore oil industry 87−76874
sonar systems, computerised signal processing 86−60945
sonar workstation,. design and construction for oceanography appl. 87−42258
sonars for submersible vehicles, for obstacle avoidance and obstacle searching 87−77836
sound received by vertical or horizontal array, following backscatter from sea floor 88−10557

oceanographic techniques continued
spaceborne remote sensing of ocean waves, conf., Baltimore, USA (April 1986) 87−65036
spaceborne synthetic aperture radar, ocean waves prediction 85−31095
spectral analysis of ocean profiles from unequally spaced data 88−42658
Spectrasat hybrid radar ocean wave spectrometer/SAR approach for wave monitoring 87−71392
standards based distributed oceanographic computingsystem 86−60970
statistical characterization of small scale bottomtopography as derived from multibeam sonar data 86−56260
streaming tape data loggers, design and implementation 86−60186
submarine relief features on radar image and Skylab optical photograph, comparison 88−60242
submersible based data display and data logging system 86−56265
submersible vehicles, communications, power supplies and artificial intelligence 85−48485
surface altimetry, ERS-1 data appl. 86−6082
Surface Contour Radar use for ocean directional wave spectra 86−12179
surface height estimator using SAR complex imagery, comments and reply 85−26911
surface layer temperature profile determ., appl. of microwave emission meas. *(Russian)* 88−5185
surface simulated images, optical analysis 88−30181
surface temp. meas. by satellites 86−32563
surface temperature determ. from satellites, buoys and ships *(Chinese)* 86−18583
surface temperature determ. from VAS multispectral image data 86−32566
surface temperature fields, method for data processing and display, use of VAS multispectral data 87−77878
surface temperature retrieval from HIRS2/MSU data 86−32565
surface wind estimation from Nimbus-7 scanning multichannel microwave radiometry 86−6113
surface wind speed, Seasat radar altimeter, scatterometer and scanning multichannel microwave radiometer obs. compared 86−6114
synthetic seismograms generation using contextvision GOP300 image processor, seismic model 88−60291
Takuyo vessel for continental shelf and hydrographic surveys *(Japanese)* 85−32001
telemetric channel for transmission of data inoceanographic research, deep-sea investigations *(Russian)* 86−25443
telemetry of ocean bottom data using acoustic method 85−3909
temperature finestructure patches, digital imaging 86−60972
temperature profiling of upper ocean, improved automated Thermotrawl system 85−43487
tidal and storm-surge measurements with single-siteCODAR 86−65533
tomography, time-of-flight, signal processing techniques 85−57423
tracking by SAR using nested correlations 88−16925
tracking of water parcels, isopycnal Swallow float design 85−26915
transparency measurement, appl. of self-contained submersible transparency meter 88−42662
tsunami magnitude estimation using navigation computer *(Japanese)* 88−41774
turbidity estimation using WRELADS laser airborne depth sounder 86−65520
turbulence in bottom boundary layer, acoustic current meter array method 88−10559
UHF radiometry method of water body mineralization and temp. determ. 88−36675
ultrasonic phase-sensitive range finder, appl. to shallow seafloor analysis 85−20276
under-ice reverberation rejection 86−18585
underwater acoustic exploration, appl. of array processing for parallel linear recursive Kalman filtering 87−35499
underwater acoustic model-based signal processing 88−14679
underwater acoustic telemetry, channel capacity in bits per joule 86−43486
underwater acoustic tomography 86−38977
underwater research equipment location and orientation determ. using acoustic system 88−36674
underwater sound measurement, appl. of acoustic array sensor tracking system 86−60957
undulating profiler coupled digital measurement and control system 86−56266
unmanned underwater vehicles, present state and technical trends *(Japanese)* 85−15430
upper layer sounding using airborne laser 86−65543
use of multipolarisation SAR in oceanographic research programs 86−56261
videosignal telemetry using acoustic underwater link up to 300 metres 85−4465
water level and circulation forecasting, appl. of real-time data systems 87−50570
wave directional spectra, radar remote sensing technique 85−32004
wave directional spectra, remote sensing by SAR satellite method 85−32010
wave directional spectrum meas. from HF radar Doppler spectra 86−59937
wave height remote sensing method using GEOSAT radar altimetry, validation using buoy data 88−10563
wave heights determ. from wave images, weak structural texture anal. 88−74990
wave imaging with ship radar, 2-D power spectra ambiguity removal method 85−32005
wave kinematics approximation, filter approaches 86−38964
wave meas. at sea using radar *(German)* 87−77888
wave measurement system and data transmission equipment 85−4460
wave measurements using Airborne Oceanographic Lidar and Surface Contour Radar, comparison 87−71388
wave measuring pressure transducers 87−42251
wave parameter remote sensing method, using dual-radar system 87−71368
wave parameters determination, appl. of radar imagery of sea 85−48482
wave recording system using laser to measure sea slope 87−50568
wave remote sensing, radar Bragg scatt. simulation using wire wave sensor 87−77885
wave remote sensing by airborne lidar method 87−77882
wave remote sensing by Doppler airborne radar, for wave directions 87−57325
wave remote sensing by radar, by 3 freq. microwave scatterometry 85−32013
wave remote sensing by radar, method for nonlinear wave parameters 87−57324
wave remote sensing by SLAR radar method 85−59490

oceanographic techniques continued
wave remote sensing with GEOSAT radar satellite, comparison with ground-truth data 88−10562
wave spectra estimation technique from SIR-B data 87−71389
wave spectral energy measurement, appl. to quality checking of marine wind speeds 88−48321
wave theoretical approach to acoustic currentprofiling 87−8746
waves, SAR imaging, effects of sea surface motion 85−64756
waves and tides meas. with double transmission line *(Spanish)* 87−50569
waves SAR images 3D formulation 87−4145
weather-ship obs. of sea state, momentum, heat and humidity flux 87−71377
wind obs. through ambient noise, calibration for wind sensors 88−48326
wind obs. through ambient noise, numerical calibration model 88−48351
wind wave directional parameter sensing by acoustic doppler meas. 88−48371
X-band airborne SAR imagery for coastal studies 85−53187
X-band radar imaging of ocean subsurface features, role of nonlinear interactions of short surface waves 88−23189
O_2 content measurement, appl. of fluorescence based dissolved oxygen sensor 88−35948
O_2 dissolved content measurement, pulsed electrode instrument design 85−26908

oceanography

Barents Sea, along-track meas. of sea waves by side-looking airborne radar 85−59491
biological fouling of surfaces, simple monitoring equipment 85−4475
NW Black Sea, remote meas. of sea surface temp. by two-channel method 87−35493
bottom currents, effect on ocean bottom seismometers 86−12129
Bristol Channel, UK, Ocean Surface Current Radar (OSCR) vector meas. on inner continental shelf 87−50562
bubble clouds breaking waves, meas. by automatically recording inverted echo sounder (ARIES) 87−4147
Cape Cod Bay, EM surveying of shallow ocean sediments, airborne technique 86−44811
CFAR radar, adaptive design, sea clutter anal. 85−47583
coastal waters, scanning radiometer for irradiance meas. 85−59496
coastal zone remote sensing by NASA C130 airplane, data anal. 88−61667
colour boundaries, satellite relayed coastal zone colour scanner 85−32032
computer-based British Isles marine atlas proposal 88−48369
conductivity-temperature-depth data acquisition and display, microcomputer systems 85−38352
Cordova Channel, BC, Canada, current meas. using acoustic scintillation analysis 86−44805
current forecasting for navigation in Japanese waters *(Japanese)* 88−41773
current measurement, inclinometer-type meter design 87−35500
currents, meas. by radar backscatter, error minimisation 85−26913
data rationalising system using IEEE 488 standard interface 85−4466
data telemetry, motivations and methods 88−30179
Delaware Bay region, water masses delineation, use of SPOT and LANDSAT data 86−12181
dissolved O_2 measurement, performance characts. and calibration of ENDECO type 1125 system 88−74339
DISSTRESS system for wind stress meas. over ocean, performance and filtering characts. 88−59159
dynamic height real-time computation using digital XBT system 87−71378
electric field measurements in sea, theory for medium with fields generated by extraneous sources 87−29946
electric fields of ULF freq. in ocean, meas. method and apparatus 85−59421
EM induction problems, numerical solutions for specific configurations involving buried anomalies and oceans 85−9370
estuaries, scanning radiometer for irradiance meas. 85−59496
fetch-limited wave growth, new model from airborne radar obs. 88−10579
fibre optics on shipboard 85−18655
Florida Current, HF radar current observations in summer 86−6129
Florida Current, meas. using moored currents meters with fairings 87−71373
Florida Current tidal transport rel. to tidal heights and cable voltages 87−47072
fluorescence spectra, laser-induced, of natural waters, environmental effects 87−42252
GATE Lagrangian Batfish Experiment 85−59489
geographic information system applications to ocean environment 88−48375
geoid meas. with ERS-1 altimeter 86−56231
Georgia (USA) estuaries circulation survey (1980) 85−4481
GEOSAT radar altimetry from satellite, program for ocean monitoring 88−10561
Gulf of Kachchh, field data collection for 600 MW tidal power project 86−65813
Gulf of Maine quasi-real-time density, temp. and salinity meas. by moored buoys 88−48374
HF acoustic propagation, range dependent ocean channel transition 87−28702
Honeywell ELAC ocean floor chart system 88−53384
Huanghai and Bohai seas, surface temp. determ. *(Chinese)* 86−18583
images, digital filtering from NOAA series satellites 87−75850
N Indian Ocean, sea surface wave height estimation from Bhaskara II SAMIR data 85−43484

oceanography continued
information and data service in Canada 85−4458
interdisciplinary marine research programme trends 85−4492
internal wave currents, estimation from SAR and IR scatterometer imagery 87−57395
internal waves, origin of intensity modulation in SAR images 86−44812
internal waves, parameters estimation from backscattered radio signals *(Russian)* 87−77880
internal waves of N Atlantic, by real aperture airborne radar 85−26907
International Geoscience and Remote Sensing Symposium, Ann Arbor, MI, USA, (May 1987) 88−47
Kachchh tidal power project, feasibility study 86−65812
LANDSAT MSS data, water information extraction *(Japanese)* 86−18582
Liverpool Bay, surface current meas. with backscattered HF radar echoes 85−43486
long-wave field effects on resonant Bragg waves, implications for SAR imagery of ocean bottom topography 87−57397
machine-contoured display techniques and capabilities 88−48380
magnetic field of moving electrolyte solution 86−22599
marine pollution data archiving, user preferences 85−4499
marine pollution detection, discrimination between crude-oil spills and monomolecular sea slicks 86−32589
mean sea level, EM bias of 10 GHz radar altimeter meas. 85−19125
mean sea level, EM bias of 36 GHz radar altimeter meas. 85−19124
microwave backscatter from sea surface, azimuth modulation minima for K_u band 88−68617
midocean front study with Doppler shear profiler and thermistor chain 87−71375
mm waves at grazing incidence to sea surface, specular refl. coeffs. 86−3515
nearshore tidal and residual circulation, fine struct., HF radar obs. 87−71381
NESDUS-70 meteorological satellite data utilisation system *(Japanese)* 86−43779
Newfoundland shelf acoustic reflectivity meas., sea floor roughness effects 88−54755
Nimbus-7 CZCS: electronic overshoot due to cloud reflectance 88−30171
North Sea, combined navigation and gravimetry expt. (1986) 88−10593
North Sea, discrimination between crude oil spills and monomolecular sea slicks by airborne remote sensors 87−63974
North Sea, oil slick detect. with side-looking airborne radar 87−63975
North Sea, oil spill detection and analysis using radar and microwave radiometry 87−63976

Oceans 1986 conference, Washington, DC, USA (1986 September) 87−31137
Oceans 84 conf., Washington, DC (Sept. 1984) 85−27940
OCEANS '87 conference, Halifax, NS, Canada (Sept.-Oct. 1987) 88−43582
oil spills detection, appl. of radar obs. of damping effect on wind-excited sea ripples 85−59499
optical properties meas. by fibre optics equipment 87−42260
N Pacific, remote sensing of near surface humidity 85−31994
Pacific, sea-level monitoring in equatorial region using GEOSAT 88−10509
Pacific continental slope off Monterey Bay, turbulence measurements from a towed body 87−71376
Personal Computer Oceanographic Database for ARGOS PTT data management 88−48377
radar backscatter from rain disturbed sea surface, experimental study 85−47556
radar backscatter from sea surface, meas. at extremely low grazing angle by C-band Doppler radar 87−57399
radar backscatter return in C and Ku bands, contrib. of second-order Bragg term 88−16930
radar reflection from sea surface, second-order spectrum 88−35576
radar reflections from sea surface 88−5186
radar return from sea surface, impact of higher-order Bragg terms 85−59498
radar scattering from sea surface, calc. method including polarization effects 88−5191
radiocommunication below the sea surface, influence of seabed on subLF radiowaves 87−68751
radiowave emission from sea surface with waves, theory 87−33424
radiowave propagation, sea-surface effects in 30 to 300 GHz band 86−6112
radiowave propagation within sea, for rough seafloor and surface 88−66058
real-time oceanographic data management 88−48379
Red Sea (Atlantis II Deep) mining for polymetallic sulphides 85−5621
remote sensing *(Spanish)* 86−59821
remote sensing of rain, spaceborne radar appl., sea clutter effect calculation 85−59501
research facilities, computer access considerations 85−30736
rift mapping acoustic transponder net maintenance 88−5201
San Francisco Bay, tidal current observations using new radar method 87−71396
SAR imaging of ocean tidal-current interactions, implications for bathymetry determ. 85−64697
satellite oceanography, introduction for oceanographers and remote-sensing scientists, book 88−31348
sea foam, microwave emissivity at 19 and 37 GHz 88−10568
sea level oscillations anal., least-squares method as filter and related power in spectrometry 87−21787
sea surface 37-GHz brightness temp., appl. to satellite method for oceanic rain rates meas. 86−70529
sea surface geometry, statistical characterisation for discontinuous wave slope field 86−60946
sea surface scatterometry, quasi-specular sea scatter with modified refl. coeff. 86−60937
sea surface temp. determ. from multichannel satellite radiance meas. 85−43482
sea surface temperature meas., comparison of satellite-derived temps. with in situ skin meas. 87−50565
sea surface temperature measurement, atmospheric effects on Landsat thermal IR data 88−10578

oceanography continued
sea wave measurements using ship radar, directional wave spectrum determ. 87−57398
sea-surface topography from satellite altimetry 88−10560
Seafloor Benchmark Positioning System expt., acoustic positioning accuracy 88−5197
seafloor roughness, sonar echo statistics 86−44809
seawater density inhomogeneities visualisation, appl. of remote shadow visualiser 88−42664
shelf seas, flow vel., temp., salinity and turbidity meas. by self-governing profiling system 88−16922
shipboard environmental data acquisition system SEAS 88−48370
short wind waves spectra, transform in large film slicks *(Russian)* 88−5184
Shuttle Imaging Radar-B, multiple incidence angle studies 86−17482
small-angle scattering of EM wave fields, intensity fluctuations 86−36692
small-scale activity patches statistical anal. 86−25442
Somali Current, obs. with buoy-mounted acoustic Doppler current profiler 87−63971
sonar, method for passive source location using bearing estimation 88−74053
sonar performance models, implementation of rough surface loss 86−59958
sound received by vertical or horizontal array, following backscatter from sea floor 88−10557
spaceborne Earth observation, evolution and trends 86−18533
surface, radar image spectrum anal. *(Russian)* 85−59492
surface current meas. using multifrequency microwave radars 85−32014
surface currents, azimuthal resolution improvement for dual freq. radars 86−25438
surface currents, intensity modulations in SAR images 86−32576
surface currents, measurement with multifrequency microwave radar 85−26912
surface currents observations at Nantucket Shoals, implications for radar imaging of sea bottom 87−57396
surface layer temperature profile, determ. from microwave emission meas. *(Russian)* 88−5185
surface motion, effect on waves SAR imaging 85−64756
surface organic films study, appl. of reflected optical second harmonic generation technique 88−61658
surface roughness imaging and bathymetric charact. determ. 87−57358
surface temperature meas. with NOAA-7 AVHRR radiometer 88−16928
temperature and vel. time series, correction for current meter mooring motion 87−71379
temperature meas. equipment 86−25437
time series data anal., appl. of Fourier transform filtering 88−61659
Topex-Poseidon ocean topography satellite project 86−12187
transparency measurement, appl. of self-contained submersible transparency meter 88−42662
turbulence measurement in deep ocean, appl. of EPSONDE instrument 88−74981
ULF/ELF electromagnetic fields generated along theseafloor interface by a straight current source ofinfinite length 86−59036
under-ice reverberation rejection 85−64752
Unix based hydrographic data acquisition and processing 86−56263
upper layer sounding using airborne laser 86−65543
vector averaging current meter and Edgerton Germeshausen and Grier Inc. vector meas. current meter comparison 87−50564
velocity and turbulence, meas. with pulse current Doppler sonar 86−65564
VHF Compact Direction Finder PA 022 on Nordsee research platform 85−25947
water level and circulation forecasting, appl. of real-time data systems 87−50570
wave parameters, determ. from radar imagery of sea 85−48482
wave spectra, comparison of SIR-B and Seasat radar obs. with simultaneous buoy data 88−10534
waves and tides meas. with double transmission line *(Spanish)* 87−50569
whitecaps and foam, effects on wind speed extraction with pulse-limited radar altimeter 87−21782
wind driven currents, investigation with HF Doppler radars 86−50752
wind-disturbed surface, directional slope distrib. meas. with optical scanner 86−32580
Winter Marginal Ice Zone Expt. 1987 operations 88−48340

cascaded operational amplifier basis for practical amplifier design 85−54692
cascoded CMOS op amp design, improved PSSR and common-mode input range 85−28395
characteristics and equivalent ccts. 86−34558
charact. meas. and testing 88−6673
charge-nulled CMOS switch 85−6173
chopper amplifier cct. for use as low-offset filter, with freq.-synchronised A/D convertor 86−67038
chopper operational transconductance amplifier with dynamic bias control and current controlled cascaded output 88−56480
chopper stabilised, operational amplifiers, device configs. and appls. *(Spanish)* 88−56484
chopper stabilised operational amplifiers 87−59201
chopper-stabilised, precision performance using two nulling capacitors 86−20316
chopper-stabilised operational amplifier, functional mode *(German)* 86−57664
chopper-stabilised operational amplifier appls. *(German)* 86−57669
circuit anal. with atypical connections 87−16894
circuit for voltage offset reduction *(Swedish)* 87−10692
circuit functions of networks with op. amps. 88−580
circuits for active filter, voltage-frequency convertor and video amplifier 88−44064
class AB low-distortion output stage with improved stability for monolithic power amplifiers 88−56473
class AB output stage, quiescent current setting using op amps 86−759
CLC231 buffer amplifier, simplifying design tasks 86−20319
CLC 400 and CLC 401 200 MHz 15-ns settling monolithic op. amps. 88−7724
CMOS, LF noise red. by autozero technique 85−6172
CMOS 3 μm analogue standard cell library, design considerations 87−46190
CMOS amplifier anal. and design for low temps. 87−32531
CMOS amplifier in switched capacitor circuits *(French)* 85−55023
CMOS amplifiers for video applications 87−534
CMOS analogue building blocks for instrumentation 87−34954
CMOS analogue standard cell library 86−68000
CMOS and bipolar operational amplifiers, low-level transient radiation response simulations 88−25020
CMOS ASIC signal processing chips combining analogue and digital functions *(German)* 88−39682
CMOS buffer for driving large capacitive loads 86−67047
CMOS chopper amplifier 87−23962
CMOS chopper stabilised DC operational amplifiers, MAX420 series for 15 V systems 87−31724
CMOS chopper stabilised op-amps, ICL 7650/7652, design, operation and charact. *(French)* 87−44613
CMOS continuous time filters using open loop tuneabletransconductance amplifiers 86−67350
CMOS differential difference amplifier, implementation, charact. and appls. 87−44620
CMOS extended bandwidth programmable operational amplifier 86−797
CMOS fully differential and single ended op amps, 80 MHz low offset 86−802
CMOS invertor circuits for operational amplifiers, improved distortion anal. 86−34569
CMOS low-noise operational amplifiers, design techniques 85−62097
CMOS LSI for document image signal processor, high-speed and high accuracy *(Japanese)* 88−33393
CMOS LV analogue signal processor LSI for mobile radiotelephone systems 87−62862
CMOS op-amp design with high dynamic range and low-distortion output struct. 88−18939
CMOS op-amps, operational charact., 77 to 300 K 88−32034
CMOS operational amplifier, National Semiconductor LM669, active offset correction features *(German)* 86−8006
CMOS operational amplifier with extremely high inputresistance *(German)* 85−49763
CMOS operational amplifiers, high unity gain-bandwidth current gain based 85−61124
CMOS operational amplifiers, internally compensated, cct. designs for virtual ground and buffer appls. 86−8026
CMOS operational amplifiers, two-stage, compensation technique 87−65871
CMOS operational amplifiers, voltage gain enhancement using conductance cancellation 85−22687
CMOS operational amplifiers for switched capacitor filter application *(Korean)* 87−31996
CMOS operational amplifiers with low output impedance and 70 MHz gain-bandwidth, design and performance 86−57693
CMOS operational transconductance amplifier for voltage-controlled analog signal processing, filter appls. 86−57692
CMOS parameter extraction 85−45684
CMOS programmable gain/loss circuit controlled by 8 bit digital word, AGC appl. 88−19299
CMOS sampled differential push-pull cascode op amp, design and video-band filter appl. 85−22688
CMOS transconductance amplifiers with improved linearity 86−796
CMOS type, design using custom/semicustom building block technique 85−7084

instrumentation grade process-insensitive NMOS operational amplifier 85−44910
integrated, high speed and accuracy, optimisation 86−57690
integrated, micro and macromodelling, composite op. amps. 86−57689
integrated operational amplifier, appl. problems and technical solns. *(German)* 86−14008
integrated operational amplifier application difficulties *(German)* 86−14009
integrator cct., nonminimum phase property calcs. 87−73575
integrator structs. specified using operational transconductance amplifier models, noise performance formulae 88−70897
interface, large source impedance design 88−6667
interface convertor current loop/0 to 10 V *(German)* 85−17764
interface for capacitive sensor *(German)* 87−56661
intermediate cascode stage for wideband operational amplifiers 88−70571
inverting circuits, demodulation RFI statistics 86−27118
inverting type, active compensation using NIC 88−56467
ISO120/121 isolation amplifier takes on 1500 V r.m.s. continuously 88−38392
isolating amplifiers *(German)* 85−39939
isolation amplifiers break ground loops and achieve high CMRR 88−25003
isolation amplifiers with advances in packaging and transformer technologies 86−46580
JFET input op amp ICs *(Japanese)* 86−57678
JFET operational amplifier with improved HF response 85−28397
junction-isolated 50 fA input current JFET op amp 87−16915
junction-isolated bipolar chip, 50 fA 86−62451
junction-isolated op. amp., design and fabrication using linear bipolar process 88−56474
L C simulation active R C low-pass filter with reduced number of operational amplifiers *(Japanese)* 85−40183
laboratory power supply 87−73293
LC simulation active R filter, synthesis 88−50239
LC simulation active R filters, synthesis *(Japanese)* 87−5960
leapfrog-type active *RC* filters with reduced number of operational amplifiers *(Japanese)* 87−52734
LF400, fast settling time *(German)* 86−57665
LF400 monolithic op amp, designing fast settling ccts 85−33681
LF401 op amp trimmed after assembly for low offset 87−65874
LG 4101 fast wideband operational amplifier *(German)* 88−25011
LH0032 op. amp. and current buffer LH0033 *(German)* 86−57668
LH4101 op amp, simplifying the design of high speed analogue circuits 87−59200
LH 101 hybrid amplifier for 50-ohm load in video range *(German)* 86−57666
LinCMOS technology for amplifiers and data convertors *(French)* 85−7081
LinCMOS technology from Texas Instruments *(Italian)* 87−38523
line operational amplifier adapted to transformation of C_x, R_x and $tg\delta_x$ of capacitors *(Polish)* 85−39944
linear, simulation using cct. synthesis programs *(Russian)* 87−16903
linear circuit design using microcircuits 88−49983.
linear circuits, noise 86−34575
linear CMOS operational amplifier *(German)* 86−15254
linear ICs, design 85−604
linear inductance-time and related conversions using IC op amps 87−52399
Linear Technology LTC1052, design principles for appls. 85−33679
linear variable differential transformer inductive displacement pick-up *(German)* 87−32024
linear voltage-controlled elliptic filters, using operational transconductance amplifier *(Spanish)* 87−73545
linear working range, limiting effects *(Polish)* 87−37017
linearisation of Pt resistance thermocouple, using negative imittance converter *(Czech)* 85−3937
LM10 1.5 V cell analog circuit 86−7999
LM10 bipolar linear IC, cct. appls. 87−73345
LM10 operational amp./voltage reference IC 87−65881
LM12, 150W high power op. amp. provides diverse cct. functions 86−52688
LM12 150 W operational amplifier in TO-3 encapsulation, integral DSOA protective circuits *(Swedish)* 87−10691
LM12 monolithic power op amp 88−50036
LM12 power op amp has build-in fault protection 87−37027
LM13600 operational transconductance amp., appls. 88−56487
LM301 op amp, single negative supply appl. 85−22643
LM3303/3403, LP324, LMC660, and LM837, features application optimised 86−57680
LM604 Mux-Amp, multiplexer-op amp IC 87−46050
LM6361, 6364, 6365 VIP fast op-amps, appl. examples *(German)* 88−44056
LM 10 high performance op. amp./voltage reference IC 87−65882

matched logarithmic amplifiers for millimeterwave detectors 88−56975
MAX420 series, CMOS, DC stabilised CMOS amplifiers 86−52686
MDA 2020 AF power op. amp., parameters and appls. *(Czech)* 86−27110
MDM-type operational amplifiers, macromodelling 87−16896
measuring amplifier for EM flowmeter *(Polish)* 85−586
MESFET analogue design techniques for high speed GaAs operational amplifiers 88−12239
micropower op amp offers simplicity and versatility 88−50028
microwatt operational amplifier for monocell powering *(German)* 85−22666
microwave operational amplifiers, appls. *(German)* 86−57670
microwave transistors, DC bias using op amps 86−57659
minimal grounded element-radio-type function generation using op-amp/current conveyor active device 85−61158
mixed-signal evaluation circuit *(German)* 85−11407
modelling operational amplifiers for higher-frequency filter design 87−5693
modified feedback arrangement, nonlinear model and distortion reduction 85−17181
monolithic, noise meas. in linear ICs *(Croatian)* 85−64265
monolithic, nonlinear macromodel for time-domain simulation 88−63536
monolithic, parameters and performance *(Italian)* 87−52396
monolithic amplifiers, design using isolated collector vertical p-n-p technology 87−23966
monolithic chopper-stabilized operational amplifiers for error-free amplification of smallest signals *(German)* 88−25009
monolithic differential switched-capacitor amplifier 87−37022
monolithic low-pass filter, continuous-time, composed of matched transconductance amplifiers 86−63465
monolithic measuring amplifiers *(German)* 88−32017
monolithic op amp, 150 W *(German)* 87−31727
monolithic op. amp. IC for low-current meas. 86−52690
monolithic op amp with JFET input and 200 ns settling time 88−12237
monolithic op amps 87−73327
monolithic op amps for 12-bit data acquisition, low cost family with 1 μs settling time 87−73350
monolithic operation amplifiers 87−23938
monolithic operational amplifier, LM12, 150 W output, design and protection features *(German)* 87−65863
monolithic p-channel JFET/bipolar quad op amp with in-package trim, design and charact. 88−18936
monolithic power operational amplifiers for large loads, comparison with hybrid devices 88−25023
monolithic precision operational amplifiers, development trends 85−11028
monolithic quad bipolar op amp with JFET inputs, in-package trimming of input offset 88−44062
monolithic type, appl. difficulties and solns. *(German)* 85−54689
monolithic type, Burr-Brown OPA 128, config. and appls. *(German)* 87−44614
monolithic type, LM12, 150 W, design, performance and appls. *(German)* 87−23948
MOS analogue IC, high temp. performance 85−62082
MOS IC, single-channel, harmonic performance 85−62081
mOS models and amplifier design for lowtemperature operation 86−67063
MOS operational amplifier design for analog signal processing, generalised model *(German)* 85−54683
MOS operational amplifiers, design and realisation *(German)* 86−8016
MOS operational amplifiers, offset voltage cancellation technique 85−39931
MOS switched capacitor integrators, amplifier slew rate and freq. depend. gain effects 87−45048
MOS voltage controlled DTA for Fukahorirealizations 86−795
MOSFET-C filters, based on active RC prototypes, implementation 88−25312
MOSFET-C Tow-Thomas active RC biquadratic filters, high frequency effects 86−62686
MOSFET-capacitor integrator, config. and biquad filter implementation appl. 86−20704
multiamplifier networks, Fliege's complementary transform., special cases 85−922
multichannel amplifier for CAMAC module, with automatic input cct. testing 86−44202
multipliers, analogue, based on transconductance amps. *(Spanish)* 86−41260
multithreshold logic circuits implemented withoperational amplifiers 85−54833
narrow-band amplifier with synchronous filter, for multichannel signal recording system 86−31329
National Semiconductor's LMC 660 quad CMOS op. amp. 86−46579
NE5230 2-V operational amplifier for process control systems 86−758
NE 5230, 2-V *(German)* 86−57663
negative feedback techniques and nested differential amplifiers 86−757
negative impedances, noise and temp. drift 87−44638
network charact. effects 87−52310
networks order determination 85−6195
new active compensated noninverting and inverting amplifier circuits *(German)* 87−44619
new floating point impedance simulation using operational amplifiers 88−50243

operational amplifiers continued
NIC, class A current inversion type, performance comparison with translinear implementation 87−31993
NIC compensated inverting amplifier, optimum design and sensitivity study 85−17178
NMOS high-performance op amp design *(German)* 86−57675
NMOS linear depletion resistor appl. in noninverting op amp 85−28396
NMOS operational amplifier, noise anal. and low noise design *(Chinese)* 86−28477
NMOS operational amplifier design and fabrication using digital techniques 86−52707
NMOS/CMOS types, design and performance for low temp. operation 85−23974
noise, theoretical and practical examination *(Dutch)* 85−580
noise meas., power spectral density estimation appl. *(Czech)* 88−56466
noise meas./separation method *(German)* 85−58868
noise performance and noise sources 85−11026
noise suppression using additional RC filters *(German)* 88−25014
noise-free, below 1 $nV/\sqrt{Hz}$ limit *(German)* 86−57661
non-inverting high-gain type, selection guide for LF and HF operation *(Spanish)* 87−37031
noninverting finite-gain amplifiers, actively compensated, classification, generation, evaluation, filter appl. 85−601
noninverting integrator to eliminate phase reversal 85−28660
noninverting operational amplifiers, turn-on response *(German)* 86−67056
nonlinear anal., two-pole time-domain model 86−67048
nonlinear circuits, composite op-amps appl. 86−793
nonlinear macromodels for monolithic op-amps *(Chinese)* 87−59182
nonlinear negative feedback, anal. 87−52403
nonlinear resistive network containing linear op. amps., unique soln. *(Japanese)* 85−17641
nonlinear single op-amp ccts., design, cook-book approach 85−54626
nonlinearities modelling by graphical-analytical method, control appl. *(Czech)* 86−20234
normalizing amplifier for convertor signals processing 86−17910
notch filter, adjustable bandwidth type, anal. and op-amp cct. design *(German)* 87−10965
notch filters, low- and high-pass types, active compensation using op-amp integrator loop 86−1256
novel design of a sample and hold circuit utilizing composite op amps 87−10708
NTC thermistors as temp. sensors, op-amp cct. configs. for linearising charact. 86−55631
offset and drift performance *(German)* 87−44631
offset equalisation using CMOS D/A convertor *(German)* 86−27499
offset trimmer potentiometers for op-amp compensation appls. *(German)* 88−63978
offset voltage compensation for broadband operational amplifiers *(German)* 87−23949
offset voltage compensation in op. amps. *(German)* 86−765
one-chip op amps, HA 2541 and HA 2542, for streamlined design of fast analogue ccts. 85−28392
OP-32 micropower system *(Dutch)* 85−54688
OP-90, low power operational amplifier in precision voltage cct. 87−44527
OP-97 operational amplifier, specifications and possible appls. 88−32024
op-amps in waveform generation and filtering explained 86−27084
OPA27, current-loop instrum., current-loop scaling cct. 88−60609
operational amplifier design for analogue LSI appls. 86−52698
operational amplifier fundamentals *(German)* 85−590
operational transconductance amplifier based integrable voltage/current-controlled ideal capacitance-multiplier 86−41209
operational transconductance amplifiers based filters and amplifiers, temp. compensation 87−73334
OPLM301A, precision OP in digital multimeter *(German)* 86−5341
optical loss measurement using two photodiode-operational amplifier pairs 85−20741
optical position-sensing circuitry design using op amps 88−22532
optimization of the photodiode-operational amplifierpair for weak light flux measurements 86−44313
oscillator power automatic-control system 88−6677
oscilloscope preamplifier, operational amplifiers and video amplifiers 88−63531
p-i-n photodiode photoreceivers with operational amplifiers for fibre optic communication 87−18847
PA03 high-power hybrid op amp 86−52689
parameter improvements and trade-offs 87−37026
parasitic-compensated single-amplifier switched-capacitor biquad, equiv. cct. and realisation 86−46975
parasitic-free switched-capacitor building block, single op-amp config. for delay/multiplier/summer ccts. 85−28632
particle size distribution curves, tracing using analogue cct. 86−62459
periodic signal integrators using voltage transformers and operational amplifiers *(Russian)* 88−70941
PGA102, programmable gain op amp 85−28391
PGA102 op. amp., Digital gain control streamlines signal-acquisition systems 86−52687
phase and magnitude compensated inventing amplifiers, design 86−62454
phase compensation of the three op amp instrumentation amplifier 88−16010
photodetector system with photodiode and operational amplifier, high speed photometry of half-tone images 85−26342
photointegrator, high-precision SNR calc. 87−70652
PIC control, analogue simulation of continuous systems *(German)* 86−34557
PID electronic control ccts. anal., appl. to op amps *(Spanish)* 85−11023
positive-impedance convertor for HF appls. synthesis using op-amps 85−40167
potentials setting in mass spectrometers, operational amplifiers with increased output voltage 86−67054
potentiostat, low cost design for corrosion studies 85−474
power, for wide spectrum of jobs and specifications 87−23943
power amplifier, power dissipation problems *(French)* 87−23955
power amplifiers, design *(Spanish)* 86−8019
power op. amps., selection criteria *(German)* 85−44896
power op. amps benefit from integration and conquered thermal problems 85−61125
power op-amp, LH0101, config. and appls. *(German)* 88−18933
power op-amp ICs, review 85−28405
power op-amp OPA 541, appl. in microprocessor controlled DC motor drive system *(German)* 88−75965

operational amplifiers continued
power operational amplifier, output stages, feedback and protection considerations 86−8002
power operational amplifiers, input differential stage, driver amplifier and bias network aspects 86−755
power supply circuit using LM 325 voltage regulator 85−10971
power supply for operational amplifiers *(Spanish)* 85−61090
power supply regulation using LM324 op. amp. 85−6148
power-booster stages 86−57658
precision differential operational amplifier, with modem channel 87−16901
precision four-quadrant divider *(German)* 87−37481
precision IC op amp guide 87−73332
precision IC op amps 86−20317
precision improvement, operational vs. instrument amplifiers *(German)* 88−32016
precision linear detector 86−67107
precision measuring amplifiers by means of cascade connection *(German)* 86−46584
Precision Monolithics OP range, configs. and characts. *(Italian)* 88−50031
Precision Monolithics OP-80 CMOS IC 87−59185
precision op amp, monolithic, 20 μW dissipation, design and characts. 87−23964
precision op amps, monolithic technology 85−22662
precision operational amplifier with single current supply *(German)* 88−25012
precision operational amplifiers *(French)* 87−10690
precision signal handling and convertor-microprocessor interface techniques, book 85−32965
precision types, LT1013 and LT1014, config., characts. and appls. 86−20331
precision VCO using 3160 op. amp. 85−54724
principles, ideal and typical *(Russian)* 85−589
programmable amplifiers *(German)* 88−44067
programmable amplifiers for computer communications systems 88−25024
programmable constant current generator cct. 86−20279
programmable differential amplifiers, two op-amp config. with digital control 87−31728
programmable gain amplifiers 87−37014
programmable gain for floating-point A/D converter uses low resolution DAC to get wide dynamic range 88−50221
programmable op amp developments 85−28401
programmable-gain amplifier using DAC with op-amp *(German)* 88−50030
PROSAIC, knowledge-based system for analog integratedcircuit design 86−28520
proton beams profile meas., operational amplifier cct. 86−70355
pulse amplification, gating and adding unit, for multidetector spectrometers 85−9111
pulsed electrostatic probes characts., excitation and meas. cct. 85−26437
PWM transconductance amplifier for precise microstepping 86−62460
pyroelectric detector, with lens-conical condenser, source follower and op. amp. 86−44318
quad, use with discrete components to create bidirectional port 86−46575
quad CMOS single-supply op amp with rail-to-rail output swing, design and characts. 87−16890
quad CMOS single-supply opamp with rail-to-rail output swing 87−16917
quad opamp, trimmable p-channel JFET 87−59215
quadratic fns., computation using analogue ccts., low-cost implementations *(Spanish)* 87−11005
quadruple, operation and appls. *(Italian)* 87−59191
rad hardened and high temperature 87−37012
radio component section automatic welding, current meas. device 86−38478
rail voltage regulation using Zener diodes 86−20315
rail voltage supply for op-amps, voltage regulator configs. and overcurrent protection 86−27083
RC active all-pass biquads using generalised immitance convertor, comparison and anal. 85−932
RC active biquad filter using differential output/input operational amplifier 85−17656
RC active filter using operational amplifier pole, design *(Chinese)* 86−62678
RC active filters, use of uncompensated op-amps to extend freq. range 86−1248
RC active filters using op-amps, computer-aided synthesis *(German)* 87−10964
RC active second-order filters, HF type using op-amp pole, synthesis method *(Japanese)* 85−23010
RC actively-compensated active filters for HF 86−62694
RC continuous-time active filters, new structs. 86−67355
RC filter realisation, band-pass, maximal input voltage determ. *(Czech)* 85−11414
RC low-pass active filter, op-amp gain-bandwidth compensation for high-freq. appls. 86−57966
RC oscillators canonic realisation 86−57710
RC topological active network synthesis, op amp relocation 86−52943
RC zero-active-sensitivity filters, transfer function 87−52719
RC-active highpass filters design using 2-OA GIC 85−40165
RC-active oscillator config. employing unity-gain amplifiers 86−804
RC-oscillators with single control resistor, synthesis 85−61150
resistance meas. above 100 GΩ, integrating method appl., accuracy analysis 86−24690
resistor implementation for linear IC appls. 88−33376
resistor tracking aids system stability 88−63481
resistorless active-C oscillator, operational transconductance amplifier based config. 87−73361
review *(German)* 85−49758
review of models in which specification improvements approach perfection [op amps] 85−54703
review of op amp specifications 88−50043
RF, design approach eliminating gain-bandwidth product 86−27107
RFI demodulation in inverting and non-inverting op amps 86−15948
RS-232C driver/receiver using dual op. amp. 86−52910
Sallen-Key ccts., op-amp configs., HF compensation based on pole sensitivity *(Japanese)* 88−70903
sample and hold ccts., review *(Spanish)* 88−12538
sawtooth wave/frequency-independent duty-cycle square-wave oscillator 87−44673
SC biquad block, balanced type realised with single op-amp *(Japanese)* 88−56758
SC filters, integrated type with operational transconductance amplifiers, noise behaviour study *(German)* 88−63778
operational amplifiers continued
SC filters, ladder type, lossless discrete integrator config. with single op-amp, design method *(Japanese)* 88−50249
SC ladder filters, bilinear-transformed admittance-scaled type, finite G-B effects 85−17677
scaled time-constant true integrator-differentiatorbuilding block 86−41255
scanning operational amplifier with automatic data-channel allocation 87−59202
Schmitt trigger, programmable using op.-amp., cct. 86−8069
second-order active filters using resistors and switched-capacitor simulated inductors and capacitors 86−41207
second-order oscillators with single op-amp, Loeb's criterion and latch-up effect 88−18969
second-order programmable switched-capacitor filters, op-amp topologies 86−62719
selection circuits using op. amps., computer-assisted anal. *(German)* 88−63792
self-sustained oscillation in RC or RL circuit with hysteresis resistor 86−62473
semiconductor electron current detector for direct recording of electron microscopic diffraction images 85−29714
semiconductor structures with p-n junctions, simulating-cct. synthesis *(Russian)* 85−29176
semistate implementation of op-amp cct., differentiator realisation 86−67434
settling time meas. of operational amps. 87−21260
settling time measurement *(German)* 86−57662
settling-time meas., use of clamping amp. 87−63325
SGS-Thomson operational amplifiers in CMOS-technique, low-loss, high noise-immunity, low noise *(German)* 88−25010
signal conditioning ccts. using operational amplifiers 88−70564
signal processing ccts. for meas. appls *(German)* 85−64089
signal splitter in electric-reflection spectrometer 86−31331
simulated inductors, config. using mutators with differentiators 87−52714
sine wave oscillator with good sensitivity, RC op-amp design 87−10726
sine-cosine function generator, op-amp based cct. design *(German)* 86−827
single op-amp single resistance controlled oscillator, identification and synthesis method 85−11085
single op.amp. biquad, design using predistortion technique 87−31989
single-amplifier impedance convertor, restriction on realisability, LCR filter appl. *(Japanese)* 88−38619
single-pole operational amplifier effects on the performance of switched-capacitor filters 85−17676
small current meas. *(French)* 88−12230
SMPS control using high-speed operational amplifiers 88−75813
SMPS with high speed operation amplifier 88−69502
SOS CMOS operational amplifier IC, high-temp. operation, fabrication and characts. *(Japanese)* 88−6678
spectrometer amplifier with effective zero-line stabilisation 86−40929
SPICE appl. to SC filter and op amp development *(Spanish)* 87−37457
SPST switch cct. using analogue multiplier 86−41251
square-law diode detector , wide dynamic range, radioastronomical appls. 88−70598
square-wave generator, active-C type, cct. config. with three op-amps and single capacitor 86−34619
squarewave generator circuits, design 85−641
stability and appls. *(Spanish)* 87−5691
stepwise-increasing voltage generator, micromodular realisation *(Russian)* 87−52447
stereo preamplifier for mag. cartridge, 747 op-amp based cct. design 85−11020
stereo preamplifier for magnetic pick-up, cct. design using dual op amp IC *(Spanish)* 85−44909
stereo radio receiver, SKR 500, base width control using fourfold op. amps. *(German)* 85−26007
stray-insensitive switched capacitor networks using op-amps, time multiplexing, filter appls. 87−37444
student operational amplifier laboratory employing SPICE analysis technique 88−11638
super-FET operation amplifier with DIFET technology *(German)* 85−39940
switched capacitance filters for signal detection, Thomson Semiconductors range *(French)* 88−12491
switched capacitor active filters, synthesis using Z-domain equiv. admittance approach 87−31992
switched capacitor amplifier with frequency controlledgain 86−798
switched capacitor band-pass filter, symmetrical wave type, operational amplifier realisation 85−34047
switched capacitor filters, low-pass micropower type using class AB op-amps, CMOS implementation 86−34969
switched capacitor filters, non-ideal op amp realisation, general synthesis procedure 87−31995
switched capacitor filters, second-order, realisation using unity-gain amplifiers 86−34980
switched capacitor filters, transient anal. of charge-transfer error 87−45033
switched capacitor filters with nonideal operational amplifiers, anal. 88−56424
switched capacitor integrators in filters, noise behaviour, influence of non-white voltage noise of op-amp *(German)* 87−37451
switched capacitor model of nonideal op-amp in two-op-amp biquad 87−5951
switched capacitor networks, stray-insensitive single op-amp configs., generation, classification and design 86−62706
switched capacitor state-space filter design based on single op-amp biquads 87−853
switched differential op-amp with low-offset and reduced 1/f noise 87−16892
switched-capacitor active network nodal anal. 85−23020
switched-capacitor building-blocks with reduced sensitivity to finite amplifier gain, bandwidth, and offset voltage 87−66349
switched-capacitor ccts., offset-compensation schemes for op. amps. 85−17678
switched-capacitor filters, universal type, two op. amp. config. 86−1242
switched-capacitor gain stage with reduced sensitivity to finite amplifier gain and offset voltage 87−16888
switched-capacitor network anal. with nonideal op-amps 86−41211
switched-capacitor operational amplifier IC, analogue MOS switch characteristic and offset voltage model *(German)* 87−31733
switched-capacitor operational amplifier IC, MOS capacitor implementation and network design *(German)* 86−27460

operational amplifiers continued
switched-capacitor operational amplifier time-domain analysis algorithm *(German)* 87−31734
switched-capacitor realization of *N*th-order transfer function using a single multiplexed op-amp 87−37447
switching peak detector with wide frequency and dynamic ranges 88−12208
synthesis, automatic, based on analytic circuit models 88−25036
synthesized inductance as a band-stop and band-pass filter *(Czech)* 88−70900
TAB 1453 operational amplifier, config. and appls. *(German)* 85−6183
TAB 1453 p-n-p op. amp., appls. 85−17176
TAB 1453 PNP op. amp. appl. *(German)* 86−766
tape-recorder remote control, voice operated switch using op.-amp. cct. *(Spanish)* 85−20420
teaching experience with operational amplifier *(Spanish)* 88−24383
temperature meas. using high-precision op. amps. 86−55867
temperature measurement circuit based on op. amp.s and thermistor 85−8978
temperature to pulse-width converter, low-power for environmental monitoring 87−49697
tester design for characts. meas. using three-freq. method *(Japanese)* 88−6679
testing method for op-amp K_{CMR} *(Chinese)* 85−33673
thermistors signal conditioning *(Italian)* 87−41454
thermoelectric temp. meas. system, operational amplifier based config. *(German)* 87−63326
three amplifiers biquad, alternative design method 87−52738
three op-amp. instrumentation amp., props. 88−25005
time constants, freq. response and cct. stability 85−11025
time switch appl., 30 V DC circuit, description *(Dutch)* 88−25611
tracking power supply to increase follower speed 88−63514
transconductance, sinusoidal quadrature operational transconductance amplifier oscillators 86−818
transconductance, voltage/current transactor based active filter configs. and their synthesis 88−50258
transconductance, wide-range electronically tunable ideal grounded inductance appl. 88−50242
transconductance amplifier, operation and appls. 88−38398
transconductance amplifiers, improved nonlinear macromodel for computer simulation 85−22689
transconductance amplifiers for current handling and output voltage range improvement 87−52389
transducer interfaces using operational amplifiers *(Spanish)* 85−17160
transducer interfacing using amplifiers *(Spanish)* 85−26267
transfer coeff. regulation in amplifying stages *(Russian)* 88−63539
transient and overvoltage protection using Zener diodes *(German)* 85−10997
transient intermodulation distortion in op. amps. *(Japanese)* 87−65888
transimpedance amplifier design *(German)* 88−25015
transimpedance wideband amplifier, 500 V/μs 12 bit *(German)* 87−59216
transit circuit of the macromodel of an operational amplifier 87−52401
translinear operational current amplifier, network config. for building block appls. 86−34568
travelling salesman problem, neural network method, effect of synaptic strengths 88−63546
tunable multifunction filters for instrumentation, using operational transconductance amplifiers 87−45038
tunable oscillators with operational transconductance amplifiers, realisation in IC form 85−6218
two amplifier active RC biquad, config. and parasitic stability 87−45036
two-phase-clock SC biquads, op amp nonideality effect on freq. response 87−887
ULN-3750 family of power op. amps. simplify drive circuits 86−750
unipolar current source using two operational amplifiers 86−734
unity gain amplifier in the switched-capacitor connection *(Slovak)* 88−6669
unity gain op. amp. oscillator designs 88−596
universal biquad, operational transconductance amplifier/capacitor realisation 86−20696
US pulse-echo overlap equipment modification, for scopes with no intensity modulation 86−24465
V I-curves of regulated power supplies, tracing using operational amplifier circuit *(German)* 86−67046
V/F convertors, input improvement using op. amps. 86−52991
VA5470 BiMOS-E op-amps, bridge oscillator ccts. 88−63532
variable capacitance modulator appl. *(German)* 86−27099
variable function amplifier 86−785
VCO, operational amplifier-based design 86−14037
VCVS, two-op-amp non-inverting design 87−37440
vector stimulator for neurophysiological studies of periodontal mechanosensitive units 88−42486
video op-amp IC meas. method 88−32014
video switch, two chip implementation using AD5539 op-amp and AD539JN freq. multiplier *(German)* 86−62788
video-band active RC filter *(Japanese)* 85−61374
voltage amplifiers, two operational amplifier, actively compensated, design 85−54695
voltage controlled current source with a difference *(German)* 86−20264
voltage controlled element, topology and design constraints 85−17179
voltage divider network using MAA 741 amplifiers *(German)* 85−6175
voltage follower bandwidth extension technique 85−54702
voltage-controlled active-R oscillator 86−57703
voltage-controlled current source based on operational amplifiers *(Russian)* 86−67314
voltage-current/current-voltage convertors using operational amplifiers in summing mode 87−24387
voltage-follower with DC level shift, cable shielding 86−8405
voltage-to-current convertors using operational amplifiers 85−23080
voltage/frequency conversion functions 85−33677
Volterra theory for describing saturating systems 87−31735
wave switched capacitor filters, canonic adaptor realisations with min. op-amps 86−27449
wide-band precision rectification, implementation using op-amp supply current sensing, peak detector cct. appl. 87−23908
wide-bandwidth, high accuracy logarithmic amplifier for line-scan imaging systems 87−59210
wideband, fast settling appls., op amp topology and CLC 220 hybrid implementation 87−73353
wideband differential amplifier, using general-purpose operational amplifier ICs 87−65877
operational amplifiers continued
wideband op amps and buffers, S-parameters determ., test methods and graphical representation 88−25029
wideband operational amplifiers, characts. and layout practices 87−530
Wien bridge oscillator using operational amplifiers, theoretical cct. anal. 88−38410
window comparator, config. using INA 101 instrumentation amplifier *(German)* 88−12531
Z-domain method for analysis of switched-capacitor networks containing operational amplifiers with finite DC gain and bandwidth 87−59705
zero-active-sensitivity filters, gain-sensitivity product concept 87−37454
GaAs MESFET high-gain op-amps for switched capacitor filters 87−45061
GaAs MESFET high-speed operational amplifiers *(Chinese)* 87−65893
GaAs MESFET level-shifting differential to single-ended convertor ccts. for op. amp. appls. 87−73336
GaAs MESFET operational amplifier IC with high-speed operation, design and performance 87−65868
GaAs SC ccts. for high-speed signal processing, implementation in MESFET technology 88−20154
GaAs analogue cct. technology for signal processing appls. *(Chinese)* 87−67488
GaAs monolithic op-amp, design and fabrication 88−63537
GaAs monolithic operational amplifier 87−23961
GaAs monolithic true logarithmic amplifier for 0.5 to 4 GHz applications 88−63951
GaAs operational amplifier IC with high CMRR 88−18952
Ge avalanche photodiode/GaAs FET/op-amp transimpedance optical receiver design 85−3990
Si-gate LOCOS CMOS, design rules *(Chinese)* 85−35157

CdS, linear and nonlinear optical props. of free, bound excitons, bistable device appl. 85−56793

optical bistability continued
CdS, nonlinear and optically bistable effects, low-density exciton gas to electron-hole plasma transition 85−41485
CdS, optical nonlinearity and bistability 85−35869
CdS, optical nonlinearity, review 88−51919
CdS, picojoule subnanosecond all-optical switching using bound excitons 85−24643
CdS platelets, fast all-optical switching 87−33322
CdS platelets, giant nonlinearities and low power optical bistability 85−41484
CdS, resonatorless optical bistability lattice heating transient effects 86−3310
CdS self-electro-optic effect device 88−65372
CdS, self-electro-optical device, modulation and optical bistability, 514 nm 88−27280
CdS, three types of electronic optical bistabilities 87−26537
CdSe, all-optical data processing, picosecond plasma dynamics 88−46195
CdSe bistable filters, performance investig. 88−65452
CdSe, picosecond all-optical NOR gate, Mott transition 86−63872
CdSeS doped glasses, optical bistability with 25 psec switching time 88−2372
CuCl, dispersive optical bistability in dense exciton-biexciton system, stationary props. 85−41489
CuCl, dispersive optical bistability stationary props. and switching characts. 85−56841
CuCl nonlinear etalon, optical bistability obs. 85−41481
CuCl, optical bistability due to biexcitons 85−41479
CuCl, optical bistability, memory effects 86−22501
CuCl platelets, optical bistability and dielec. function nonlinearities due to biexcitons 87−46996
Er^{3+} doped single mode fibre laser 88−65873
GaAS fast turnoff in optical switching low-finesse etalons operating in refl. mode 88−40328
GaAlAs external cavity semiconductor lasers, polarisation bistability 87−68545
GaAlAs laser coupled to external cavity of variable length, bistable behavior 87−68618
GaAlAs leaky waveguide, modal bistability 88−72118
GaAlAs optically coupled monolithically integrated translasers, bistable optical electrical/microwave switching 85−7415
GaAlAs passive waveguide, intrinsic optical bistability obs. 87−33317
GaAlAs, semiconductor lasers, mode-switching behaviour, driving current and temp. effects *(Japanese)* 88−8220
GaAlAs waveguide, intrinsic optical bistability and multistability 86−42624
GaAlAs waveguides, induced absorpt. optical bistability 87−75228
GaAlAs waveguides, optical bistable switching on microsecond timescale 88−2386
GaAlAs waveguides, strong optical nonlinearities for efficient all-optical switching 86−68623
GaAlAs-GaAs avalanche heterojunction phototransistors with optoelectronic bistability 86−42426
GaAs all-optical logic gate arrays, fabrication and characterisation 87−33305
GaAs biased semi-insulating, cross modulation effect 87−26545
GaAs bistable devices as logic gates for room-temp. single-wavelength optical latching circuits 88−51635
GaAs etalon optical logic devices, parallel operation and crosstalk meas. 86−54206
GaAs etalons for parallel nonlinear optical signal processing 85−56842
GaAs etalons, pulsed optical logic 87−33303
GaAs, nonlinear Fabry-Perot etalons, MOVPE grown, optical bistability and gating 87−54396
GaAs nonlinear Fabry-Perot etalons, optical bistability, logic gating and waveguide operation 88−26871
GaAs nonlinear etalon, optical bistability obs. 85−41481
GaAs, optical bistability room temperature, evidence of excitonic nature 86−2652
GaAs optical bistable devices, array fabrication 86−36558
GaAs ultrafast all-optical logic gate based on MQW bistable device 87−33306
GaAs:Cr nonresonant self-electrooptic effect devices, optical bistability and switching 88−51918
GaAs/AlGaAs quantum well waveguides, polarisation-sensitive electroabsorpt. 86−15518
GaAs/GaAlAs optoelectronic triangular barrier switch, negative differential resistance, optical radiation obs. 88−45318
GaAs/GaAlAs twin diode external cavity ring laser, bistability and instability in output 85−29842
GaAs-AlAs multi-quantum-well structures, ultrafast relaxation of excitons, resonant Rayleigh type optical mixing study 85−41472
GaAs-AlGaAs DH laser, inhomogeneously excited, bistable operation, lasing wavelength depend. 87−61170
GaAs-AlGaAs MQW, bistability from increasing absorpt., self electro-optic device 85−41480
GaAs-AlGaAs MQW optical NOR gate, exciton and carrier dynamics, time resolved obs. 87−26542
GaAs-AlGaAs, bistable multiquantum well lasers with 45° dry-etched mirror 88−20682
GaAs-AlGaAs, bistable n-channel double heterostruct. optoelectronic switch, transient response 88−40098
GaAs-AlGaAs diode lasers, C^3 bistable, hysterical and spectral behaviour 86−48456
GaAs-AlGaAs laser diodes, inhomogeneously pumped quantum well, bistability obs. 88−27286
GaAs-AlGaAs multiple quantum well lasers, voltage-controlled optical bistability, 2D exciton 87−2111
GaAs-AlGaAs multiple quantum well nonlinear Fabry-Perot etalon as picosecond optical NOR gate 85−24641
GaAs-AlGaAs multiple quantum well structures, MBE, characteris. and nonlinear opt. effects 85−41514
GaAs-AlGaAs multiple-quantum-well etalon, optical NOR gate using diode laser sources 86−68615
GaAs-AlGaAs optical bistability room temperature, evidence of excitonic nature 86−2652
GaAs-AlGaAs quantum-well lasers, self longit.-mode stabilisation 88−2241
GaAs-AlGaAs strip loaded waveguide, electronic optical bistability 88−7913
GaAs-AlGaAs strip-loaded waveguide, electronic optical bistability 88−72117

optical bistability continued
GaAs-AlGaAs three-terminal noninverting optoelectronic logic device 88−2058
GaAs-AlGaAs twin stripe LD, optical tristability and ternary digital functions 88−27288
GaAs-GaAlAs MQW subpicosec. all-optical logic gate, Stark effect appl. 88−8015
GaAs-GaAlAs MQW ultrafast all-optical gate with subpicosecond ON and OFF response time 87−7434
GaAs-GaAlAs inhomogeneity pumped lasers, transient anal. of optical bistability 88−40330
GaAs-GaAlAs injection lasers, coupled, bistability induced by waveguiding 86−22505
GaAs-GaAlAs monolithic laser amplifier, C^3, with bistable characts. 87−12499
GaAs-GaAlAs p-n-p-n negative resist. laser, optical bistability and switching characts. *(Chinese)* 86−42525
GaAs-GaAlAs passive MQW strain-induced waveguide, optical nonlinearities 88−20405
GaAs-GaAlAs passive MQW waveguide resonators, all-optical switching effects, expt. study 87−7096
GaAs-GaAlAs pnpn laser diode, optical bistability and switching characts. 87−33294
GaInAs-AlInAs MQW etalon, room temp. 1·55 μm optical bistability 87−75231
GaP, optoelectronic bistability 88−51923
GaSe double resonator system, optical hysteresis and multistability 88−2371
GaSe fast-response bistable semiconductor device 85−56806
GaSe interferometer as four-level logic element based on optical bistability 88−26913
$GaSe_{0.4}S_{0.6}$, optical multistability obs. 86−15789
He-Ne gas laser, single-mode, quasi-isotropic, with optical feedback, light polarisation 85−62502
He-Ne laser bistable device with liquid crystal in coupled cavity *(French)* 85−56812
HgCdTe Fabry-Perot IR bistable devices, parameter optimisation 87−33267
HgCdTe Fabry-Perot etalons, optical bistability and instability *(Chinese)* 88−72400
HgCdTe IR bistable device parameter optimisation *(Chinese)* 88−40325
HgCdTe optical bistability, nonlinear refraction and absorption 88−65847
HgCdTe optical bistability, nonlinear refraction and absorption at room temp. 88−65857
InAs, bistability obs. in refl. at 3 mW, prediction for nonlinear dielec. class 85−41483
InGaAs/InP multiple quantum wells, self-electro-optic device and modulation converter 88−26878
InGaAs-InAlAs MQW laser diodes, optically bistable operation using reson. tunnelling effect 87−68600
InGaAs-InP MQW excitonic states, nonlinear optical props. and appls. *(French)* 88−8297
InGaAs-InP multiple quantum wells, 1.55 μm optical logic etalon with picojoule switching energy 87−61225
InGaAsP TM-wave injected BH laser, ps switching optical bistability 87−26547
InGaAsP TM-wave injected laser based optical RS flip-flop 87−46989
InGaAsP laser amplifier, room temp. operation at 1.5 μm, optical bistability meas. 86−3147
InGaAsP laser optical bistability on reflection 87−68615
InGaAsP/InP amplifiers, room-temperature optical bistability 85−41454
InGaAsP/InP bistable laser amplifier as 1.3 μm optical AND gate 86−57761
InGaAsP/InP lasers, polarization bistability, hysteresis loops 85−24538
InGaAsP/InP nonlinear laser diode amplifiers for optical thresholding and logic 87−54340
InGaAsP-InP bistable DH laser formed by proton bombardment *(Chinese)* 86−9822
InGaAsP-InP bistable lasers optical feedback effect 87−68619
InGaAsP-InP bistable lasers, temp. depend. 87−7362
InGaAsP-InP injection lasers, twin-ridge, modal bistability 87−68622
InGaAsP-InP laser amplifier, bistable, dynamics 87−39164
InGaAsP-InP laser, polarisation bistability, mode inhibition mechanism 87−68495
InGaAsP-InP laser, polarisation-bistable, switching mechanism 87−68621
InGaAsP-InP lasers, injection, bistable, switching characts. and repetition freq. 88−34014
InGaAsP-InP ridge-waveguide stripe structure bistable DH laser, expt. characts. *(Chinese)* 87−39087
InGaAsP-InP semiconductor lasers, bistable control 87−75113
n-InP, nonlinear absorpt. mechanism, resonator-free optical bistability study 86−27878
InP self-electro-optic-effect devices 88−40355
InP:Fe self-electrooptic effect devices, nonresonant optical bistability 87−54411
InS etalons, intrinsic optically bistable device external switching by incoherent illum. 86−22481
InSb Fabry-Perot IR bistable devices, parameter optimisation 87−33267
InSb IR bistable devices, optimal design *(Chinese)* 88−40324
InSb, absorption switching and bistability 85−24649
InSb bistable elements, frequency optimisation 86−63866
InSb bistable etalon, logic operations with two control beams 86−22482
InSb bistable etalon, regenerative pulsations 87−12576
InSb bistable optical arrays, diffusion effects 87−33325
InSb bistable optical element, diffusive transverse coupling, switching waves and crosstalk 86−22490
InSb, carrier diffusion meas., ang. depend. of degenerate four-wave mixing 85−35885
InSb cascaded optical bistable elements for all-optical power limiting of CO_2 laser pulses 86−42620
InSb etalon, crosstalk between bistable elements 88−26912
InSb etalon, optical transphasor gain and bandwidth meas. 86−22484
InSb etalons as optically bistable devices 85−56836
InSb etalons, transphasors with high gain, bistable switches and sequential logic gates 85−41482
InSb logic gates for all-optical computer 85−62659
InSb, nonlinear Fabry-Perot etalon, optical bistability and digital computing 85−51281
InSb, optical bistability, logic devices appl. 85−51289
InSb, optical bistability, quasi-CW, at room temp. 86−42627

optical bistability continued
InSb, optical bistability, two-photon, dynamic behaviour and response-time control at 10.6 μm 88−27290
InSb optical bistable elements as optical computer components 87−19047
InSb optical switching elements, transverse coupling 87−33324
InSb optically bistable element, switching power, spot size dependence 85−56785
InSb optically bistable etalon, critical slowing-down phenomena 87−7441
InSb, picosecond CO_2 laser-induced selfdefocusing 88−27289
InSb, room temp., cascaded bistable optical devices based on two-photon absorpt. 87−33304
InSb transphasor channels, diffusive transverse coupling 87−74830
InSb transphasor, gain-bandwidth 86−58965
InSb transphasor, gain-bandwidth product 87−33308
InSb-CO laser bistable system, dynamic response and noise susceptibility 88−65851
$LiNbO_3$ phase electro-optical modulator, polarization bistability with a mirrorless hybrid device 88−7971
NH_3 Raman laser, single- and multimode, instabilities and chaos obs. 86−22503
NH_3 lasers, FIR, instabilities and chaotic emission 87−12347
Na atoms in Fabry-Perot resonators, static and dynamic behaviour in transverse mag. fields 85−41492
Na vapour, bistability in intracavity resonant degenerate four-wave mixing 87−33328
Na vapour filled Fabry-Perot, multistability, D1 line, hyperfine and Zeeman pumping 85−46467
Na vapour, gain/feedback approach to optical instabilities 88−72411
Na vapour, intracavity resonant degenerate 4-wave mixing, bistability in phase conjugation 85−12941
Na vapour, mirrorless dispersive optical bistability due to cross trapping of counterpropag. beams 85−46475
Na vapour, transverse optical bistabilities and instabilities 86−22491
Na vapour, two-phase clock based on transverse-profile Ikeda instability 87−39242
Na vapour-filled Fabry-Perot cavity, period doubling and intermittency in transmission 87−39236
Nd doped Z 87−33134
$Nd:Gd_3Ga_5O_{12}$ rod., active optical bistability obs. due to resonator config. transition 85−46431
Nd^{3+}:YAG ring laser, CW, optical bistability and hysteresis 85−56745
$Pb(Mg_{1/3}Nb_{2/3})O_3$-based ceramic electrostrictor, appl. in bistable optical device 86−3287
Si Schottky SEED device, hybrid optical bistability based on increasing absorpt. in depletion layer 87−46968
Si hybrid devices, absorption bistability and charact. control 88−65846
Si interferometer, self-electro-optic, low power optical bistability and multistability 86−22497
Si, nonlinear Fabry-Perot interferometer, optical bistability and instability 85−51279
Si on sapphire, bistable optical device using guided mode excitation 87−33315
Si on sapphire waveguide optimisation, optical bistability obs. *(French)* 88−58646
Si self-electro-optic-effect devices 88−40355
Si, thermo-optical SEED devices, nonlinearity, bistability and switching behaviour 88−34100
$Si-Al_2O_3$ waveguide device for optical bistable operation 88−34114
Si-on-sapphire nonlinear optical film, ultrafast optical switching obs. and anal. *(French)* 88−8298
$Sr_{1-x}Ba_xNb_2O_6$, optical phase conjugation in nonresonant and saturable absorptive/resonant systems 88−27284
VO_2 film, thermooptic bistability and nonlinear switching waves 85−51261
ZnS, ZnSe interference filters, simultaneous optical bistable switching on adjacent pixels, pattern recognition 87−33311
ZnS, ZnSe nonlinear planar waveguides, bistability and self-pulsing using prism couplers 87−33319
ZnS bistable etalons, design parameter effects 88−8288
ZnS bistable etalons, switching power depend. on spot size 86−68627
ZnS interference filters as nonlinear decision-making elements for three-spot pattern recognition and associative memories 88−51629
ZnS interference filters for parallel nonlinear optical signal processing 85−56842
ZnS wavelength prism coupling, nonlinear coupler example 87−19039
ZnS(Se) interference filters, microsecond room temp. optical bistability and crosstalk 85−18767
ZnSe, bistable interference filters, nanosecond switching at room temp. 87−7436
ZnSe bistable interference filters switched by ns light pulses, temporal behaviour 87−61236
ZnSe bistable interference filters, switching processes, steady-state model 87−26512
ZnSe, bulk, thermal dispersive optical bistability and absorptive bistability 86−36570
ZnSe interference filter triple bistable-element loop circuit for digital parallel all-optical computer 87−33300
ZnSe interference filters, thermally induced optical bistability 86−22496
ZnSe interference filters: room temp., visible wavelength optical bistability 85−24648
ZnSe nonlinear interf. filter white light switching, spatial light modulator design 87−33307
ZnSe nonlinear interference filters, fast switching and slowing down 88−27305
ZnSe nonlinear visible interf. filter, critical slowing down 87−33310
ZnSe, optical bistability due to increasing absorption and self-focusing 85−29897
ZnSe, optical bistability in an ion-implanted semiconductor 88−27307
ZnSe optically bistable element arrays, appl. as man-machine interface 87−46977
ZnSe single crystal waveguides, optical bistability, nonlinear switch ing 87−74664
$ZnSe-BaF_2$ molecular beam deposited multilayer interference filters, optical bistability 88−65450

single mode fiber transport and coaxial distribution of video on demand 87−41226
single mode fibre, field dispersion measurement techniques 85−12628
single mode fibre, length dependence of cutoff wavelength, bending loss 86−68242
single mode fibre, transmission capability 85−8437
single mode fibre cable field tests using 1.3 μm portable OTDR 85−29627
single mode fibre cable installation by AT&T 85−20233
single mode fibre cables, field test with portable time domain reflectometer 86−5557
single mode fibre cables, large scale manufacture and testing 85−20234
single mode fibre designs 85−50970
single mode fibre in loose-tube cable designs, optical stability 86−49648
single mode fibre industrial prod., MCVD process control *(French)* 86−9573
single mode fibre optic connectors and splices, four rod alignment guide concept 85−7218
single mode fibre ribbon cable, preconnectorised, use in New Orleans 85−58128
single mode fibre route between Liverpool and Preston, England 85−25860

optical cables continued
single mode fibre splicing and jointing of fibre cables 85−18735
single mode fibre system, development 85−8440
single mode fibre systems, Italian field experiments 85−8392
single mode fibre-optic ground wire link using dispersion-shifted fibres 88−73967
single mode fibres, GeO_2-doped, in submarine cables, H_2 influence on loss 85−35434
single mode fibres, self core alignment arc fusion splicer, cladding mode leakage light power monitoring method *(Japanese)* 87−8307
single mode fibres, step-index core and dispersion-shifted segmented core, in loose tube cable designs, bending resist. 86−43857
single mode fibres for land cables, design, fabrication and characterisation 85−18733
single mode fibres for landline and submarine cables, splicing 86−37888
single mode fibres for undersea cable, high strength low loss flame fusion splicing 85−7220
single mode graded index optical fibre cables characts. 87−18623
single mode lightguide media, high performance 85−47540
single mode optical fibre, field splicing system 85−56353
single mode optical fibre cable, field splicing system 85−20237
single mode optical fibre cable, Melbourne-Sydney telecommunication route, future development 85−31057
single mode optical fibre cables for 1.3 μm region, design and transmission characts. 85−20236
single mode optical fibre cables from AT&T, technology and development 87−62931
single mode optical fibre for simultaneous transmission of 3 video signals *(French)* 86−30831
single mode pushin connector development *(German)* 88−15460
single process cable, optical loss increase at low temp. 87−60949
single process manufacture, struct., design 86−69783
single-ended distance-resolved loss meas. by OTDR 88−35524
single-mode, second and third windows, meas. 88−73975
single-mode fiber cable and joining technologies for broadband networks 88−47119
single-mode fibre appls. 86−69775
single-mode fibre bonded splice, thermal stresses, finite element analysis 85−46171
single-mode fibre cable developments by NTT, review 87−49068
single-mode fibre cables, installed, polarisation props. 87−13726
single-mode fibre cables at 1300 nm, optical and mechanical properties 85−58146
single-mode fibre cables for telephone authority *(Swedish)* 87−3202
single-mode fibre cables in Italy, expt. results *(Czech)* 87−62990
single-mode fibre connector with metal-plastic ferrule, design and performance 88−22137
single-mode fibre long lengths, polarisation dispersion determ. using multilongit. mode lasers 88−20350
single-mode fibre splices anal., spectral loss characts. eval. 88−65220
single-mode fibre splicing 85−52372
single-mode fibre splicing, local launch and monitor 86−48157
single-mode fibre transmission systems, modal noise 86−11107
single-mode fibres, meas. 85−63689
single-mode fibres, RF phase shift depend. on microbending loss 85−46173
single-mode fibres exposed to H_2, loss increase over long term *(French)* 87−25919
single-mode fibres for increased transmission capacity *(German)* 85−47520
single-mode fibres suitable for subscriber cables, design 87−8297
single-mode nylon coated fibre in cable, length depend. of cutoff wavelength study *(Japanese)* 85−18726
single-mode optical cable production and installation on 39 km route without repeaters, EMI conditions 88−22149
single-mode optical fibre, pure silica core, struct. and characts., transmission cable appl. 87−46545
single-mode optical fibre cable, high performance, covering whole of Japan 86−4658
single-mode optical fibre cable splicing and jointing techniques *(Japanese)* 86−2689
single-mode optical fibre cables with fibre density of 1.5 fibres/mm^2 87−49039
single-mode optical fibre ribbon cable for subscriber line 86−43856
single-mode optical fibre submarine cable, polarisation fluctuation during and after ocean installation 87−40886
single-mode optical fibre systems, evolutionary potential 85−37066
single-mode optical fibres, quasi-matched and depressed-cladding, design and fabrication 88−65239
single-mode optical-fibre ribbon cable 85−31029
single-mode ribbon cable and array splicing 85−63692
single-mode splice, optimisation 85−63684
single-mode splicing machine with splice protection, miniature package and screen-test 88−72081
single-mode subscriber loop systems, fibre, cable and interconnect technologies 88−46775
single-mode system between Liverpool and Preston, England, 50 km at 140 mbit/s 85−58143
single-mode tactical fiber optic cable assemblies 88−28910
single-mode/multimode fibre line characts. 87−62953
singlemode cable, performance 86−11090
singlemode cables and splicing technology 85−14300
SL undersea cable system, optical repeater design 85−37027
SL undersea fibre optic cables, design and testing 85−37022
SL undersea lightwave system, digital fibre optic transmission system 85−37014
SL undersea lightwave transmission system 86−30838
slack fibre accommodation block for 800-fibre fusion splices 86−69785
slotted core optical fibre cable manufacture 88−9577
small diameter cables, relation between sheath thickness and lateral load characts. *(Japanese)* 86−55306
small size optical cable for military aircraft appls. *(French)* 86−11129
splice closure addressable moisture sensor converted from pressure transducer 87−49118
splice closure for subscriber optical fibre cable 87−62987
splice loss effects on passband 87−62954
splice loss meas. using OTDR 88−41691
splicer develop. using profile alignment system 87−74687
splicing and installation, field experience 86−30769
splicing by fusion method 87−8288
splicing in factory environment of optical waveguide fibre 85−58131
splicing methods, fusion and mech. splices 85−50959
optical cables continued
splicing single mode optical fiber 85−42601
splicing techniques 87−34591
splicing techniques for cable installation *(Spanish)* 85−52348
splicing using fusing technology with integrated attenuation meas. techniques *(German)* 87−76759
ST style connection system with optimal performance 88−65247
standardisation of optical fibre links *(French)* 86−11128
static fatigue of optical fibres in bending, humidity and proof stress effect 88−47083

PSK modulated coherent states, cut-off rate performance 88−8668
pulse encoded line signals, error probability study *(German)* 85−52350
pulse propagation, asymptotic in soliton-based optical-fibre communication system 88−33649
pulsed analogue/dig. signals, optical multiplexing 88−41019
pulsed fibre optical communication systems, noise 86−36180
PWM for analog fibre optic communications 87−34571
PWM for electrically isolated analogue transmission 86−16112
quantum channel with noncoherent radiation source, potential noise immunity 88−72715
quantum coherent and photon communication systems, comparison 88−15500
quantum communication channel with independent coherent states, cut-off rate 87−56191
quantum communication processes, mathematical model 87−7640
quasioptics for frequencies greater than 80 GHz 85−25914
RADICOMS, in-house wireless communication system using infraredradiation 86−37914
railway signalling installations using optical fibres, prospects 85−58116
Raman effect optical amplifiers for transmissionsystems 86−54219
receiver sensitivity anal. for synchronous coherent optical fibre transmission systems 87−56165
reception, identification and synchronization of words of 5B-6B line code *(Polish)* 87−68967
reliable high speed bipolar ICs for long distance transmission 88−41615
repeater spacing in optical transmission line using Raman amplification, theoretical limit 87−8302
research advances in telecommunications industry 87−62927
resonator matrix for closely spaced carrier system 86−4667
RF satellite communication systems, laser crosslink configurations 86−30728
RF/optical technologies integration for communications, instrumentation and weapons appls. 87−49106
ring LAN, star shaped, advantages 87−48616
safety and liability in installation 87−20565
sampled optical time-division multiplexing of asynchronous data 88−9534
satellite communication projects using laser links, Austrian contributions *(German)* 88−53203
satellite-borne free-space optical communication systems, beam pointing error evaluation 86−23925
self-clocking line transmission code, encoder/decoder ccts., WDM fibre-optic communication appl. 88−2961
self-homodyne DPSK transmission at 1 and 2 Gbit/s over 86 km of fibre 88−3977
semiconductor laser frequency-noise cancellation by nonlinear heterodyne detection 87−26417
optical communication continued
semiconductor laser intensity fluctuations, effect on communication system performance, error probability 87−34570
semiconductor laser reliability for undersea optical transmission systems 86−29160
semiconductor lasers, band structure engineering for optical communications 88−72324
semiconductor lasers, phase noise, review 86−48517
semiconductor materials and structures, electro-optical device development 86−2857
sensors, practical aspects 86−5231
shot-noise limited in presence of ISI 88−67354
signal amplification at 1.3 μm by two-wave mixing in InP:Fe, expt. study 88−40327
signal processing for lightwave communications and computation 88−40034
signal reception with atmospheric turbulence effects, comparison of noncoherent and heterodyne methods 86−23060
signal regenerator using bistable laser amplifier, error-rate meas. 87−68617
signals transmission with optical fibres and LED and IRED handling of modulated laser beam *(German)* 87−7100
single filter FSK system, characterisation 88−47156
single mode fibre communication, optical amplification 88−67418
single mode fibre high capacity optical transmission, WDM at 1.5 μm 86−69792
single mode fibre optic high data rate transmission system perform., optical feedback effects 86−69794
single mode fibre optic systems, system penalty effects caused by spectral variations and chromatic dispersion 85−37040
single mode fibres, characterisation 85−24304
single mode fibres for coherent systems, characterisation 88−41611
single mode fibres with depressed index cladding or pure silica core 87−12108
single mode optical fibre laser transmission, dynamics of deterministic chaos 87−75676
single-mode fibre, laser coupling using gradient-index lenses and compact disc package 86−63619
single-mode fibre for digital optical communication, techniques *(German)* 87−70031
single-mode fibre links, bandwidth enhancement by correcting chromatic dispersion 87−49077
single-mode fibre loss-limited transmission using 1.3 μm LED 86−4632
single-mode fibre optic communication systems, high performance, development 87−49074
single-mode fibre optic transmission in France, long distance high bit rate appls 87−49072
single-mode fibre transmission at 560 Mb/s and 140 Mb/s using 1300 nm LEDs 86−49696
single-mode fibre transmission over 30 km using LED source 86−49677
single-mode fibre transmission system, WDM expt. using 1.31/5 μm LEDs 88−47142
single-mode fibre transmission using 1.3 μm mesa-structure surface-emitting LEDs 86−49697
single-mode fibres, dispersion-shifted and dispersion-flattened designs 87−12209
single-mode fibres, transmission capacity anal. *(Norwegian)* 86−36215
single-mode lightguide systems, modal noise probability 86−48165
single-mode polarisation for multi-layered optical fibre 88−60153
single-mode-fibre/LED communication systems, dispersion-limited transmission and spectral filtering 87−3198
single-polarisation single-mode fibre, 3 km long 86−9465
slotted ring protocols in high speed LANs, perform. anal. 88−73588
solid state components for optical transmission technology *(German)* 85−14243
soliton propagation in optical fibres 88−45131
soliton transmission over 4000 km fibre with loss compensated by Raman gain 88−72042
solitons, propagation and properties in optical fibres *(German)* 88−33657
source linewidth criteria for heterodyne communication with PSK modulation 86−37883
sources, quadratic coherence and noise *(French)* 88−65833
sources for fibre optic transmission systems, quantum noise *(French)* 86−9704
space coherent optical communication system, state-of-the-art review 87−56169
space communication ESA activities and plans 87−70079

565 Mb/s high capacity line terminal for bridging long distances 85−47530
565 Mbit/s highly integrated optical fibre system 87−13683
565 Mbit/s single mode optical transmission system 88−28900
565 Mbit/s transmission systems, high reliability bipolar ICs 86−37916
565 Mbit/s trunk transmission system with high reliability, design 87−28570
565-Mbps fibre optic systems, monolithic ICs design 85−52369
1300 nm system components *(German)* 86−43836
1550 nm semiconductor laser development 86−49578
1553B-1773 databus, fibre optic soln. 85−31026
5212 low-noise preamplifier for fibre optic receivers 86−46578
15000 km fibre-optic transmission using a linear repeater 87−76732
accessor and star coupler composed of planar gradient-index glass waveguide 86−42361
acousto-optic channelized receiver, development 85−14236
ACT satellite and airborne laser transceiver, communication expt. 88−53296
active components, standardized test procedures 88−35556
active device fibre optic connector system for multi-tap data bus in satellites and VHSIC 87−20579
active fibres in telecommunications 88−58105
aerospace and military appls. of lightwave technology 88−73949
airborne fibre optic components, characts. and specification 87−38814
all-optical regenerator using self-electrooptic effect devices 88−60140
AM optical signals, quasioptimal reception, superheterodyne optical receiver 87−49096
AM sideband injection locking of semiconductor lasers for FDM coherent optical communication 88−47104
AM sideband injection locking of slave semicond. laser, characts. for WDM 87−46866
AM-FM acousto-optic device for real-time optical correlator 87−12277
amplifier chains, linear optical, noise accumulation 86−3288
amplifiers, British Telecom development initiatives 88−3966
amplifiers, concepts and appls. *(French)* 86−49581
analog optical signals, linear filtering quality 86−30033
analogue baseband video transmission, LED, response linearization *(Japanese)* 85−52378
analogue signal transmission, optical communication techniques *(Japanese)* 88−53267
analogue transmission system, low-coherence laser design 85−63670
angular division multiplexer using graded-index rod lenses for fibre communication 85−8412
antenna phased arrays, optically derived signal set 88−27670
anti reflection coating design for fibre optic communication equipment, production run simulation 87−12287
antinoise correction in receiver systems of optoelectronic devices 86−48274
APD, high gain-bandwidth-product for multigigabit/s data rates 88−14024
APD receiver, digital PPM over optical fibres 87−8279
APD receiver using NRZ signalling, bit timing recovery scheme performance study 86−23853
APD receivers, multigigabit-per-second 88−22083
ASK heterodyne optical receivers with tuned front ends, theory 88−60145
ASK heterodyne receiver, effects of laser phase noise and filtering of non-Gaussian processes 86−30779
ASK multiport optical homodyne receivers 87−70053
ASK multiport optical homodyne receivers 88−67402
ASK optical heterodyne systems, receiver analysis 87−76768
ASK phase-diversity homodyne receiver, 150 Mbit/s, 0.5 linewidth/bit rate ratio 88−35472
ASK polarisation diversity and standard coherent optical heterodyne receivers, comparison 88−22070
ASK two-part optical homodyne receivers, impact of laser intensity noise 87−76736
asymmetric fiber optic coupler for LAN applications 88−13863
asymmetrical optical directional couplers with periodic struct., spectral props. 88−2000
AT and T miniaturised types and ODL50/200 transmitters *(German)* 87−70038
attenuator, programmable, for fibreoptic test environments, design approach 87−40901
Australian optical fibre trunk network, rack power system using rectifiers and recomb. batteries 87−30820
automatic endless polarisation control with three elements of limited birefr. range 87−20482
automatic mounting and adjustment method *(German)* 86−48124
automatic polarisation control schemes, overcoming finite-range limitation of certain state of polarisation control devices 86−23857
automobile multiplexing system using optical fibre network 87−13498
avalanche photodetector based optical receivers, simulation studies on nonlinear bit synchronisers 88−9549
avalanche photodiode noise figure, new definition 88−58354
avalanche photodiodes, dynamic behaviour in lightwave systems *(German)* 85−47525
avalanche photodiodes reliability for undersea transmission systems 85−35745
balanced dual-detector receiver for optical heterodynecommunication at Gbit/s rates 86−43814
band-pass filter using concatenated fused-taper couplers 85−29559
beam couplers obtained by grinding, characts. 88−3985
beam distribution and splitting methods *(German)* 85−31043
beamforming using optical processors 88−2855
beams, vertical cantilever, for optical switching 88−53278
Bell system lightguide cable interconnectionequipment, central office to customer premises 85−58129
Berlin IV project for optical communications transmission *(German)* 85−25890
BH distributed feedback laser emitting at 1.3 μm for high-bit-rate systems 87−40893
BH lasers at 1.3 and 1.55 micron for long distance transmission *(French)* 88−58557
BIC for multiplexing/demultiplexing in optical transmission systems 87−8264
biconical couplers, single-mode, fused for wavelength diffusion multiplexing, channel spacing between 100 and 300 nm 88−33630
biconical taper coaxial optical fibre coupler 86−4633
bidirectional digital optical fiber system with transmitters synchronized with receivers 87−76769
bidirectional multichannel 1.44 Gbit/s lightwave distribution system using subcarrier multiplexing 88−53256

optical communication equipment continued
bidirectional optical rotary joint, low-loss, for fibre-optic appls. 85−8398
bidirectional transmission at 1.3 μm over single-mode fibre using biconical tapered couplers 85−3444
bidirectional transmission on single-mode fibre using edge-emitting LED and optical couplers 88−47131
bidirectional transmission systems using single glass fibre *(German)* 86−4616
bidirectional-wavelength-multiplexing integrated module development 85−31020
BIGFON signals reception, digital PCM tuner appl. 85−52335
binary intensity modulated receiver, direct signal detection, optimum performance anal. and construction *(Japanese)* 85−20215
binary optical communications, alignment jitter tolerance from APD-based receivers 88−41641
bipolar fibre-optic preamplifiers, optimum emitter aspect ratio 87−73337
bipolar fibre-optic receiver, 250 Mbit/s, single-chip device using ASPECT technology 88−9616
bipolar high-gain limiting amplifier IC for optical fibre receivers, design and characts. 87−65866
bipolar integrated circuits for broadband communications systems *(German)* 87−40917
bipolar monolithic decision cct., 2.1 Gbit/s, with decision threshold ambiguity width below 10 mV 86−4631
bipolar monolithic very-wideband amplifier 85−11029
bipulse regenerators for optical communications systems 86−30812
birefringent filters and wavelength multiplexers, four-waveplate dual tuner 88−2081
bistable laser diode memory for optical time-division switching network, operational characts. *(Japanese)* 87−76803
bistable wavelength switching device using two-electrode DFB laser, optical wavelength multiplexing appl. 88−65416
bit error rate metering equipment for investigating optical fibre shortdistance measuring systems *(German)* 86−44351
bit rate limiter for 'dark' fibre communication 88−4013
book, optical fibre communications, principles and practice 85−32966
book, optical fibres 87−13
BR 10 34 to 140 M bit/s optical fibre terminal, thermal simulation 87−20574
branching devices, principles and structures *(Japanese)* 88−28887
Brillouin amplifier, semiconductor laser pumped with electronically controlled bandwidth, characts. 87−33271
British Technology Group, fibre optic inventions and patents 85−29540
British Telecom all-optical regenerator, development 87−28338
broad-passband width optical filter using diffr. grating and retroreflector prism, multi/demultiplexer appl. 85−47502
broadband communication with light waveguide *(German)* 86−15469
broadband ISDN, future lightwave technology 88−3385
broadband metal/glass single-mode fibre polarisers 87−7085
broadband network for telephone and data communications, config. and equipment *(German)* 86−64973
broadband receiver module for freq. multiplexed signals, hybrid cct. realisation *(German)* 88−28857
broadband transmission terminal equipment, design and hardware *(Japanese)* 85−30552
buried-crescent 1.3 μm laser diode for optical fibre communications 85−56660
Burr-Brown FOT/FOR 110 fibre optic data collection transmitter/receiver module kit *(German)* 85−25867
Burrus type LED-optical fibre coupling, influence of construction/materials parameters 86−2980
burst signal transmission, miniaturised DC-300 Mb/s transmitter/receiver modules 88−22109
bus, star passive optical with collision detection for CSMA/CD-based local area networks 85−42583
buses, multimode optical-fibre, increased power injection through mode-selective coupling, LAN design 85−63665
business communications and process control, fibre optics use, hardware directory 85−63700
bypass switch for network protection 88−15476
cable adaptable to fault location and repair 85−3459
cable connector termination, PCS, radiation exposure and testing 85−35420
cable joint cabinets and closures for subscriber loops *(Japanese)* 87−8257
cables, fire-resistant, development and testing 87−8299
call-by-call activation technique for fiber-optic subscriber transmission units 88−22079
Canada fibre optic telecom. system construction 88−22161
carrier density mediated intermodulation distortion meas. of optical amplifiers 88−15458
cascaded injection-locked laser repeater system, effect of laser linewidth and phase distortion 87−40964
cascaded single-mode fiber optic transversal filters 87−49086
CATV, multichannel multidrop digital video transmission equipment 86−55312
CCD optoelectronic transversal filter with binary mask 88−47089
$Cd_{0.7}Hg_{0.3}Te$-GaAs, MOCVD for optical fibre communication devices 88−60174
CD laser source for miniaturised fibre optic laser receptacle 88−34056
centering effect in single mode multi-fiber connectors 88−51484
chalcogenide glass fibres for transmission in the 8 to 12 micrometres waveband 86−68300
channel based on coincident photon pairs in spontaneous parametric down-conversion 86−17360
chip-to-chip interconnects, Gigabit per second 87−38960
chirp-induced penalty in optical fibre systems 87−76750
circuit assignment architectures for optical switching systems 88−22065
circulator, YIG spherical lens/PANDA fibre polariser/fibre optic beam splitter construction 85−56305
circulator for fibre optic transceivers 87−74661
circulators, polarisation-independent using two fibre-optic polarising beam splitters 86−42245
CMI encoder and decoder, monolithic integrated devices for gigabit optical links, design and performance 86−23854
CMOS integrated transceiver with analog PLL, design for 32 Mbit/s optical fibre data link 87−3207
CMOS optical data link receiver IC 87−18870
CMOS optical transmitter IC, 50 Mbit/s, design and characts. 87−20496
coal mines, all-optical fibre networks 88−22107
coaxial optical fibre couplers, influence of eccentric deformations *(German)* 87−34556

optical communication equipment continued
codec, monolithic, 565/680 Mbit/s operation, semicustom design techniques, multiplex/optical fibre transmission appls. 85−36814
Codestar passive fibre-optic star coupler for Ethernet 86−16885
coherent 1 Gbit/s bipolar optical FSK transmission experiment over 121 km of fibre 88−28830
coherent and direct detection systems comparison 85−31076
coherent communication networks, development 88−47101
coherent communications using fibre optics 87−76779
coherent fibre-link receiver endless polarisation control using four fibre squeezers 87−40880
coherent lightwave communication systems, external cavity semiconductor lasers, feedback bandwidth dependence 88−40237
coherent lightwave communications, modulation and detection 86−64978
coherent lightwave communications, receiver modelling 87−49093
coherent lightwave transmission system, optical receiver design 88−67405
coherent lightwave transmission systems, chromatic dispersion limitations 88−53273
coherent lightwave transmission technology *(Japanese)* 88−73914
coherent multichannel system, intermodulation interference, numerical anal. 87−56166
coherent multichannel systems, influence of source noise spectrum on channel spacing 88−47139
coherent multiplexed interferometric fibre sensors, reduction of excess noise 88−67818
coherent optic devices and technologies, colloquium, London, England (March 1985) 85−39447
coherent optical 10 channel wideband transmissions with optical transient wave amplifier *(German)* 87−28595
coherent optical communication devices *(Japanese)* 87−40898
coherent optical communications, 250000 channels on one glass fibre *(German)* 85−58099
coherent optical fibre communication systems, advances 88−58142
coherent optical fibre system using dither technique for polarisation control 88−22108
coherent optical receiver for 680 Mbit/s using phasediversity 86−23850
coherent optical receivers, performance anal. and laser linewidth requirements 87−13723
coherent optical receivers, performance analysis and laser linewidth requirements 86−59907
coherent optical receivers, phase diversity techniques 87−56164
coherent optical receivers, statistics of laser freq. fluctuations 86−30778
coherent optical receivers with asynchronous demodulation, laser linewidth effect 88−67419
coherent optical systems for local loop appls. 88−47160
coherent optical transmission system using robust PSK method 86−23934
coherent system using optical local oscillator to operate with photodetector mixer 85−3477
coherent transmission system with phase diversity reception, broad linewidth DFB lasers 88−47138
cold or hot spared component with lognormal lifetime, failure rate 88−70167
collimating system using rod lens 87−2004
collimators for free space optical communication 88−27241
collision detection method and small loss-deviation star coupler for CSMA/CD star transmission system 86−11118
Colorado springs area EMP hardening project 85−37008
combined optical mixer-preamplifier for 1.3 μm lightwave subcarrier systems 88−28832
common-collector full-monolithic preamplifier for 560 Mbit/s optical transmission 86−29015
communication fibre optics, equipment testing apparatus 87−76763
communication satellites appls., conf., Los Angeles, CA, USA (Jan. 1986) 87−16252
communication system, error probability calc. by Edgeworth series expansion 88−65191
communication trends in ISDN, optical communications, submarine cables and spectrum space 87−40112
communications using optical fibre cables, cable type, construction and LANs 88−9532
commutation devices using gradans for fibre optic communication lines, parameter meas. 87−54035
commutation of light signal using right-angle trapezoidal prism 86−28854
commutator switches for optical communication channels using bulk acoustooptic deflectors 88−67336
compensational deformation for new endless polarisation matching control for optical receivers 88−67395
component reliability considerations for fiber optic communication systems 88−4021
components, passive made using fused-head-end method, progress 88−13883
components, review 86−63609
components and appls. 86−49570
components based on LEDs and multimode fibres for 40 channel WDM for short haul communications networks 86−43872
components design *(Japanese)* 85−56316
components for fibre optics *(Italian)* 88−35484
components for military optical fibre links at 1300 nm *(French)* 88−60164
components for multimode fibre-optic networks, manufacturing technique 86−63634
components for submarine fibre optic communication systems, reliability 87−70055
composite logic gate element and multiplexer for optical computing and optical communications 87−33312
computer communication using optoelectronic devices and optical fibres *(German)* 88−9122
computer coupling using volstrons 88−65206
computer data links, transmitter availability improvement using monolithic laser arrays 88−46581
concatenated fibre couplers, mode transmission matrices for total loss/attenuation calc. 85−42579
conf., London, England (Dec. 1984) 85−22088
conference,. Barcelona, Spain (Sept. 1986) 88−62879
conference, Cambridge, USA (Sept. 1986) 88−11561
conference, Helsinki, Finland (Sept. 1987) 88−43584
conference, lasers and electro-optics, San Francisco, CA, USA (June 1986) 87−65063
conference, optical fibre communication and integrated optics, Reno, NV, USA (Jan. 1987) 87−65064

optical communication equipment continued
connectorised laser package with GRIN lenses for local loop appls. 88−51474
connectors, low-loss two-channel single probe molded, for optical communication *(French)* 86−9568
connectors, splicers and splitters of high-precision *(German)* 86−23865
connectors, standards and standardisation *(German)* 87−56171
connectors for LAN applications, evaluation 88−13871
connectors for near perfect long haul transmission 87−3187
connectors for singlemode fibres, manufacturers face up to user demands 85−18693
coplanar three-wave mixer for coherent and heterodyne detection of optical signals 88−67340
Costas loop PSK homodyne and heterodyne coherent optical receivers, anal. 86−43813
Costas phase-locked loop, sensitivity analysis and performance optimisation 87−49064
coupler, bidirectional, active, compact for fibre optic transmission 87−3196
coupler, WDM active, bidirectional transmission on single fibre 87−8308
coupler switching time reduction *(Swedish)* 87−62961
couplers, moulded active, for optical networks 86−9571
couplers, multi mono for video communication networks 86−37891
couplers, wideband transmission charact. *(German)* 85−58104
couplers between one and several multimode fibres, realisation *(French)* 86−9572
coupling, interconnecting and multiplexing components, review *(German)* 87−13717
coupling and branching devices, Polish-made *(Polish)* 86−4681
CPFSK coherent optical receivers, bit error ratio 88−22072
CPFSK coherent optical receivers, impact of IF bandwidth and laser phase noise 88−53258
crossbar for multiprocessor networks and telephone switching systems 87−62975
crossbar N×N switch for quantum confined Stark effect, insertion loss 88−2051
crossbar switch, 8×8 optoelectronic type, config. and 100-175 Mbit/s operation 88−35479
crosstalk in a two-channel coherent fibre-optic ASK system using an optical amplifier and non-negligible linewidth lasers 88−47030
crosstalk in optical amplifiers for two-channeltransmission 86−69769
crystalline-quartz optical components for optoelectronics 86−43834
CSELT optical fibres research activities for telecom. *(Italian)* 87−56108
CSP diode lasers, NASA developments 87−70081
CTNE undersea repeatered lightwave cable system for Canary Islands 85−37018
cycle slipping in an optical communication systememploying subcarrier angle modulation 87−3210
cylindrical grooved optical cables, termination 85−58130
D-fibre optical switch, wavelength-independ., config., charact., communication network appls. 88−15455
data bus, fibre optics, using FDM and asymmetric coupler 85−8395
data bus, high speed, for avionics integration 86−11139
data bus, high speed fibre optic 86−11135
data bus design and realisation *(French)* 86−17417
data bus system, dual channel, high speed multiplex, for aircraft 86−11140
data communication with plastic optical waveguides *(German)* 88−65299
data communications, developments in transmitters, receivers and fibre links 86−49633
data communications using optical fibre technology 86−37869
data link for high-speed LAN, 125 Mbit/s config. and equipment design 87−49112
data link using optical fibres *(Spanish)* 85−3468
data links for personal computers 88−60186
data packet routing cct., integrated optoelectronic chip implementation 87−20494
databus, hybrid protocol fibre using TDM and FDM 86−37895
datalink transmitter/receiver using 1.3 micron LED and PIN-PD 86−4663
Datapoint Corporation's LightLink, IR data transmitter 85−37012
DBR semiconductor lasers with integrated passive waveguide, linewidth and side-mode suppression study 86−36479
DBR surface emitting lasers with semicond. multilayer, anal. and appl. 87−54307
DC and LF AC meas. optical receivers anal. for optical fibre communication systems 87−56173
DC-coupled amplifier, wide dynamic range, automatic gain control for 560 Mbit/s optical transmission 88−3992
DC-coupled broadband gain-controllable monolithic amplifier IC *(Japanese)* 87−52416
DC/DC converters for fibre optics power supplies, future trends 88−30826
decision and clock recovery circuits for gigahertz optical fiber receivers in silicon NMOS 87−46202
decision circuit for fibre transmission system, flip-flops, ECL output *(German)* 87−40916
decoding, optimal, of line code for digital transmission on optical fibres 88−45910
deep space communications, development program 87−70080
deformable mirror device for optical crossbar switch 88−60171
degradations in Gbit/s DFB laser transmission systems due to phase-to-intensity noise conversion by multiple reflection points 88−41629
delay lines, fibre, diode-pumped recirculating ring 88−65283
demultiplexer, fibre optic, using graded index lenses 86−49629
demultiplexer, hologram, waveguide communication system with wavelength-division multiplexing 85−20214
demultiplexer using Ebert mounted Si grating, design, aberration reduction 85−14267
demultiplexer/decision cct., Si bipolar implementation for gigabit optical fibre communication systems 87−28634
demultiplexers for multichannel networks 88−67176
demultiplexers for unidirectional fibre optic transmission systems, minimum spacing of band-pass filters 86−64990
demultiplexing and tapping device using a spherical geodesic lens 85−47526
densely spaced WDM coherent optical star network 87−76737
detection of deep-red low-level light pulses with APD 86−55726
detector for fibre communication systems, high sensitivity *(Japanese)* 86−49594
detectors for communications, advantages and disadvantages 86−60249
detectors for optical power measurements 88−9979
Deutsche Bundespost long-distance 140 Mbit/s fibre optic link, transmission equipment review 85−31067

optical communication equipment continued
development of high speed optical transmission technique *(Japanese)* 87−40910
development trends in optical fibre networks 88−73989
developments in devices and components for lightwave transmission systems 88−73950
developments in systems and equipment technology 85−42588
devices, present conditions and future perspective *(Japanese)* 88−35494
devices and systems aspects in Gbit/s range fibre transmission research 88−4017
devices for 2-5 μm wavelength *(Japanese)* 88−13811
devices for coherent optical fibre transmission systems 88−47103
devices for communication systems *(Japanese)* 87−34567
devices for fibre optic communications *(Japanese)* 87−40912
devices for optical communication systems *(Japanese)* 88−28841
DFB diode lasers. 1.5 μm, antirefl./high-refl. facet config. with high-output-power 86−36478
DFB graded-index-rod coupled-cavity laser, 1.5 μm, direct high FM, dynamic linewidth props. 86−9841
DFB laser 88−41627
DFB laser, 1.478 μm, for 1 Gbit/s optical transmission expt. over 83 km 86−11110
DFB laser, 2.2 Gbit/s transmission 88−3989
DFB laser, low threshold, high bit-rate appl. 87−39132
DFB laser, two-electrode type, fabrication and charactn., optical fibre communication appl. 88−65674
DFB laser amplifier, multielectrode, optical signal selection 88−20632
DFB laser amplifier, use for wavelength selection with ns switching times in multiplex system 88−67348
DFB laser communication appls., repeaterless transmission over distances over 100 km 88−28849
DFB laser diode, gain switched, 1.3 μm, ps optical pulse compression through highly dispersive single-mode fibre 86−3144
DFB laser evaluation at 1.53 μm for high dispersion multi-Gbit transmission system 87−40969
DFB laser single-longit.-mode operation under gain-switched operating conditions 88−67344
DFB lasers, 1.3 μm, for high bit rate transmission *(Japanese)* 87−49049
DFB lasers, quarter wavelength shifted type, gigabit/s performance study 88−47032
DFB lasers and phase diversity reception for coherent transmission system 87−40975
DFB lasers with second-order grating, mode selectivity study 86−54141
DFB semiconductor laser, high-frequency response due to wavelength detuning effect 88−20653
DFB semiconductor laser amplifier, optical freq. selective amplification 87−33141
DFB semiconductor lasers, optimum operation study under chirped pulse transmission 85−46390
DH lasers for optical communication 87−46899
dichroically combined diode laser transmitter, space communications 87−68678
differential freq. deviation multiplexing, two-channel system demonstration 88−15447
differential mode analysis of fibre optic components 87−3195
digital color TV multiplexing equipment 86−55454
digital component video signals routing using optical system 87−13935
digital data transfer to rotating aerial platform, optical slip-rings 85−14292
digital fibre optic, AGC for Si avalanche photodiode using const. current/const. voltage supply *(French)* 86−15582
digital fibre optic systems, two-level binary line codes 85−52362
digital fibre-optic communication channel *(Russian)* 87−70064
digital fibre-optic transmission systems, Gbit/s, DFBL mode partitioning, spectral behaviour 88−28826
digital incoherent optical interconnections 87−49080
digital multipliers arrangements for optical cables *(Polish)* 88−60198
digital optical data processing hardware *(German)* 88−33808
digital optical processors, characts. 85−42614
digital optical receiver performance in noise and intersymbol interf. presence 87−49066
digital optical transceivers from Mitsubishi Electric 87−3191
digital optics promise 86−23839
digital telephone network in Italy with optical fibres, broadband communications for ISDN 87−48472
digital transmitter/receiver module, high-speed, operating at 1.3 μm wavelength 88−3986
digital video signal transmission equip. using fibre optics link *(Russian)* 88−4007
diode DFB laser, single mode fibre coupling module with optical isolator for high bit rate modulation 86−42568
diode DFB/DBR lasers, heterodyne transmission appl. frequency narrowing 86−22412
diode laser, self-sustained picosec. optical pulse generation 88−51819
diode laser amplifiers in high performance optical communication and computing systems 88−67376
diode laser mode partition noise, parameter depend., evaluation method 86−48424
diode laser module, star coupler and WDM wavelength divider *(Japanese)* 85−8428
diode laser spectral degradations in 565 Mbit/s single mode optical systems 85−25906

ion-exchanged waveguides for optical signal processing 88−72132
IR communication system using LEDs and FM, transmitter and receiver ccts. *(Spanish)* 88−4005
IR diodes arrays, wafer level hybridisation for diffuse data transmission 87−7225
IR eight-channel telemetry system for condition monitoring, low-power semicustom IC implementation 88−22479
IR fibres, prospective materials, fabrication methods and appls. 86−22157
IR fibres and materials, review 85−35468
IR LED transmitter and photodiode receiver using PFM, design and construction *(Spanish)* 86−30829
IR LEDs from East Germany *(Czech)* 86−17387
IR linked keyboard runs computer remotely 85−14274
IR local wireless communication 87−76766
IR optical fibres in Japan, development for telecommunication appls. 87−18701
IR radiation, free-space optical transmission alternative 85−19699
IR telecontrol equipment, IC based designs and detectors/transducers *(French)* 86−32612
IR transmitter and receiver, through-air, remote control design 85−42587
IR vidicon calibration, using computer-controlled lamp 88−32728
ISDN broad-band communications systems, architecture 86−64433
ISDN user access, optical technology 87−48384
isolator for single mode fibre, high performance polariser 88−65243
isolator using garnet single crystal as Faraday rotator *(Japanese)* 86−49596
Japan, integrated optics development 88−4060
Japan, international long haul optical fibre submarine cable system 86−59901
Japan optical ISLs, research and development activities 88−67297
Japan optoelectronic devices market, demands 87−7195
Japan optoelectronics market, communications and information spur 87−46641
Japanese fibre-optic system and optoelectronic IC developments 87−49019
Japanese optical fibre cable network system construction *(Japanese)* 86−4646
JFETs, optimised, as front-ends in fibre-optic receiver preamplifiers, noise performance 88−33261
jitter accumulation simulation for fibre-optic regenerators, circulating loop technique 88−35492
Johnson counter, 10-stage, using super self-aligned process technology, for optical fibre transmission system 85−699
Krone TV optical fibre transmission system, portable and fixed *(German)* 88−22280
LA140LWL line equipment for 140 Mbit/s fibre optic transmission system, supervision and additional services 88−35517
LA140LWL line equipment for Australian 140 Mbit/s fibre-optic transmission system, basic equipment 88−35516
LA565LWL 565 Mbit/s long haul fibre-optic transmission system, installation and performance 88−53304
LA 140 GF conduction line equip. for 140 Mbit/s dig. optical conductor system *(German)* 85−47511
λ/4 shifted 1.5 μm DFB laser diode filter, 100 Mbit/s two-channel WDM expt. 88−35475
LAMBDANET architecture, multiwavelength optical network, demonstration of high capacity 87−76733
LAN, 200 Mbit/s, network architecture and equipment for multi-service integration 86−69770
LAN, Fibernet II, Ethernet-compatible, fibre-optic 85−63660
LAN, fibre optic appls. 85−41183
LAN, fibre optic backbone, SUMINET-4100 88−21659
LAN, fibre-optic, passive, using burst TDMA scheme 85−63661
LAN, fibre-optic, synchronous, for multi-gigabit/s mixed traffic communication 86−11119
LAN, integrated optical switching *(German)* 88−35115
LAN, OPALnet-II, high-reliability 100-Mbit/s optical accessing loop network 85−63658
LAN, optical, activities in Europe, overview 85−63653
LAN, optoelectronic switching circuits for process data transmission over optic cable networks *(German)* 87−38958
LAN, plastic fibre appls. 88−46540
LAN, WDM star networks, video transmission characts. 85−63659
LAN components, fibre optic, developments 86−37884
LAN fibre-optic development in Japan, overview 85−63654
LAN optical components for the future 88−35534
LAN optical fibre loop network, medium-/small-scale development 85−63664
LAN optically switched, based on transmissive single mode optical star coupler 86−43589
LAN using optical fibres for secure data transmission *(German)* 88−46546
LANs, components reliability 87−76785
LANs, fibre optic, possibilities and limits *(German)* 86−4617
LANs, fibre optic, selective broadcast interconnection 86−23483
LANs, fibre optic technology appl. 86−30840
LANs, optical couplers and multiplexers *(Spanish)* 87−49104
LANs, principles and performance of components fibre optic components *(Italian)* 87−49046
LANs, topology and equipment considerations 86−37870
LANs and communications, conf., Amsterdam, Netherlands (June 1986) 88−31286

optical communication equipment continued
LANs components, development 87−8303
LANs employing optical media, transmitter stabilisation 86−11052
LANs using optical fibres *(German)* 85−25491
large capacity non-blocking digital cross-connect system using high speed optical links 87−40534
large scale 1×600 mechanical optical switch operated by computer-controlled robot 88−22124
large scale interconnections using dynamic gratings 87−46094
laser, narrow-linewidth, with prism grating/GRIN rod lens config. as external cavity 87−54368
laser amplifier-induced crosstalk in multichannel coherent lightwave systems 88−2239
laser diode, accelerated life testing considerations 87−75118
laser diode, single transverse mode, tunable, amplification props., multiplexing appls. 88−20647
laser diode and optical isolator, fabrication *(Japanese)* 88−41655
laser diode based communication system using heterodyne detection, optical design 87−28601
laser diode beam combining for optical PPM communications, systems evaluations 88−28881
laser diode communication systems, performance characts. 86−63835
laser diode communication systems, polarisation power summing 88−27179
laser diode coupled to $LiNbO_3$ chip using optical isolation by orthogonal polarisation, stable operation 88−1985
laser diode locked to atomic resonances, optical heterodyne detection technique for communication appls. 87−76758
laser diode module for fibre optic transmission up to 4 Gbit/s 88−20654
laser diode polarization beam combiners in opticalcommunication systems 86−43837
laser diode testing for use as fibre optic sources 85−46383
laser diode transmitters for high-bandwidth fibre optic system 87−20516
laser diode with feedback using fibre delay line as stable-frequency single generator and fibre sensor 85−62704
laser diode/LED transmitters for optical communication systems, master-slice monolithic integration design and characts. 86−48301
laser diodes, high-speed communication applications 85−18920
laser diodes, optical pulse jitter characts. due to refl. light, expt. study *(Japanese)* 86−15723
laser diodes, single-mode, coupled to optical fibres, refl. induced freq. shifts 85−7437
laser diodes, single-mode systems, route design, dispersion penalty calc. 88−47051
laser diodes communications for the European Data Relay System 87−76791
laser diodes for undersea optical transmission systems, screening by ageing test 86−15707
laser diodes freq. locked to Rb atomic transitions in multiwavelength coherent communications 88−58526
laser diodes testing, using subnanosecond current pulse generator 85−8862
laser dipole optical switches, tandem transmission characts., circular pulse method 88−9519
laser intersatellite link design 87−76790
laser light modulation using acrylic plate Faraday rotator, educational use 87−56148
laser linewidth effect on coherent optical receivers with nonsynchronous demodulation 87−56163
laser package, low-cost connectorised, 1.3 μm, design parameters for subscriber loop using graded-index lenses 87−54309
laser pulses with constant false alarm rate probability, detection *(Spanish)* 85−13602
laser radiation used in optical communications, damage to eye *(German)* 88−22063
laser safety standards development for fibre-optic communication systems 86−42518
laser sources for coherent optical fibre communication systems 87−12650
laser sources for transmission systems, multiport spectral measurements 88−40313
laser transmitter bias current optimisation *(German)* 86−23858
laser transmitter module for FDDI applications 88−72464
laser transmitter threshold current control with temp. compensation 86−48412
laser-MESFET optoelectronic integration on GaAs, characts. and fabrication using MOCVD epitaxy 87−12332
lasers and detectors for 1.3 and 1.5 micron optical fibre communication 86−30766
lasers and LEDs, visible and IR radiation transmission, dissertation 86−37913
lasers and LEDs for communications appls. 88−15482
laterally coupled ridge waveguide laser, improved dynamic single-frequency low-chirp operation 86−48381
LED, edge emitting, for 1.3 μm optical communications 87−46716
LED, edge-emitting, 1.3 μm, for analogue video signal transmission in single-mode fibres 86−69781
LED, high power high speed edge-emitting, for optical communication systems 86−42458
LED, high-speed surface-emitting DH, at 1.3 μm, for Gbit/s fibre transmission expts. 86−11121
LED and laser diode optical transmission components, non-linear distortion meas., microcomputer-aided system *(German)* 86−17768
LED and photodiode reliability in fibre optic video distributed systems *(Japanese)* 88−8071
LED for fibre optic communication systems 87−20515
LED limitations on fiber optic bandwidths 86−43827
LED linearisation for analog baseband video transmission monolithic LED/photo-detector device 87−56122
LED modulation characts. for optical data transmission *(Czech)* 86−2986
LED transmitter for optical-fibre short-haul telecom. 87−70071
LED transmitter with GaAs-integrated driver 86−43850
LED wavelength division multiplexing 87−20537
LED-based lightwave systems, high-bit-rate, dispersion and loss, temp. effects 86−23848
LED/1.3 μm single-mode fiber transmission systems, performance aspects of short distance links *(German)* 88−53276
LEDs, edge emitting at 1.3 μm, high linearity, for analog transmission systems 86−42459
LEDs, interface recomb. and self-absorption, influence on performance for optical communication 87−7224
LEDs, long wavelength, a challenge to laser diodes 86−22260

optical communication equipment continued
LEDs, surface emitting, for integrated transmitter receivers at 200 Mbit/s 88−14048
LEDs as fibre optic system sources, testing 85−41284
LEDs edge-emitting at 1.3 μm, active stripe width and length variation, effects 86−2989
lens design, conf., Cherry Hill, USA (June 1985) 87−22967
light guide measurement instruments *(German)* 87−35213
light senders for optical communication 85−63690
light stabilising loop efficiency, source-photodetector mismatch effect 87−76783
light transmitter and receiver in opto-coupler *(German)* 85−31034
lightguide connectors, losses minimisation 86−23935
lightguide systems development *(German)* 87−34554
lightwave communication systems, performance limitations 88−53271
lightwave LANs, current directions 88−15152
lightwave networks, multiple-access, subcarrier multiplexing 88−3994
lightwave source and detector technologies, recent advances 88−8233
lightwave subcarrier multiplexing systems employing multiple optical carriers, optical interf. 88−22069
lightwave technology in microwave systems 87−19324
lightwave transmission, multimegabit, limitations 86−23937
lightwave transmission system, basics 85−63688
line code and terminal configuration for very large-capacity optical transmission system 87−28573
line equipment, 34 Mbit/s, for Swiss PTT 87−76765
line equipment for 565 Mbit/s optical communication over single mode fibres 85−25901
line equipment supervision 85−14315
linear direct-detection fiber-optic receiveroptimization in the presence of intersymbolinterference 86−49591
linear travelling wave semiconductor laser amplifiers for optical communication systems 87−68448
linearisation of the optical transmission of signals in data acquisition *(Spanish)* 88−15439
linewidth analyser *(Japanese)* 87−68586
linewidth reduction by coupled-phase-shift DFB lasers 87−75090
liquid cryst. optical switches for multi-mode optical fibres *(Japanese)* 88−40008
liquid crystal ferroelec. spatial light modulators for optical interconnection 3D gate array 87−74876
load-carrying cable, attenuation, influence of fibre fabrication process 86−36170
local area network, intelligent, with opt. fibres, architecture and realisation *(French)* 86−11085
local line transmission system, 2 Mbit/s, using single-mode fibre 86−30776
local networks, optical transmission *(German)* 87−8309
local networks using optical fibres, transmitters and receivers *(Italian)* 85−20246
local optical transmission, design of fibre optic communication systems 87−13685
local signal transmission by optical waveguide systems *(German)* 87−40888
locator for buried optical fibre cables, built-in system 88−60190
LOCNET, experimental broadband LAN with optical switching 86−11120
LOCNET, LAN using optical switching 85−63656
long haul optical transmission systems, laser diodes use 88−34054
long wavelength light systems, photodetectors and low-noise amplifiers 85−31478
long wavelength optical devices for fibre-optic communications, laser diodes, LEDs, photodiodes *(Japanese)* 87−13718
long-distance optical transmission system *(German)* 88−73991
long-haul transmission using 405 Mb/s fibre optic system, design and performance 86−55323
long-span optical fibre transmission systems, 2 to 4 μm wavelength 87−40976
long-span transmission system, influence of directly modulated DFB LD submode oscillation 88−53269
long-wavelength high-reliability lasers, characts. 87−54350
long-wavelength lasers for optical fibre communications systems, book 88−69989
long-wavelength light sources and photodetectors for fibre-optic communications, developments review 86−49632
long-wavelength lightwave devices, recent progress 88−15481
loose tube splices for polarization maintaining fibers 88−45136
low crosstalk polarisation-maintaining optical fibre with an 11 km length 85−1990
low polarisation sensitivity optical amplifier configs., expt. study 88−15456
low-loss fiber-optic connectors take to simple fieldinstallation 86−59893
low-loss mechanical splices and field installation tool *(French)* 86−48141
low-loss rearrangeably nonblocking 4×4 switch matrix module 88−67391
low-noise laser diode module with optical isolator using highly Bi-substituted garnet film 87−40875
LPI optical communication system 85−31071
Mach-Zehnder modulators and optical switches on III-V semiconductors 88−72139
Mach-Zehnder nonsymmetric interferometers used as low-drive-voltage modulators 88−73929
Mach-Zehnder systems for heterodyne fibre polarimetry in different coherence conditions 88−10151
Mach-Zehnder waveguide freq. translator, freq. multiplex in optical system 86−17372
machine applications, light effect *(German)* 87−34553
magneto-optical 2×2 switch for single-mode fibres 85−2100
manufacture, machine-vision-assisted workstations use 88−67335
manufacture at Mittweida Technical College *(German)* 87−16362
manufacturing micro-optic devices with low insertion loss using autocollimated imaging 87−20534
master/slave D-type flip-flop, 3.8 Gbit/s bipolar IC for high-speed optical communication systems 86−46672
materials, conf., Cannes, France (Nov. 1987) 88−55797
matrix switch for high-speed data buses 86−69790
MCI fibre optic transmission systems, system design considerations 85−14304
MCNIU, high performance FDDI LAN for Space Station appls. 88−35544

measurement techniques for fibre optic communication component *(French)* 88−58104
measurements and tests on optical light guide components *(German)* 87−13701
measuring instruments, research and development 86−24803
mechanical 4×1 optical switch for use in submarine cable, precise fibre alignment 85−52359
mechanical connectors for optical fibre cables 87−8290
MESFET detector/preamplifier, 3 GHz bandwidth, monolithic integration for optical receiver appl. 87−34630
MESFET front-end cct. for 1.55 μm, 450 Mbit/s high-sensitivity receiver design and a long distance transmission experiment 87−62998
mesh waveguide optical star coupler, design and characts. 85−46137
METROBUS lightwave network, synchronous optical transmission 88−9595
micro-lens, design and fabrication, fibre coupling device appls. 85−56347
micro-optical single-mode multi/demultiplexer for fourwavelength channels 86−23598
microlens array, planar, monolithically integrated, appls. 88−65356
microlens array for stacked planar optics for optical communications and electro-optical systems 86−4683
microlens cap equipped LED, SE-13AS2, design for optical fibre communication system appls. 87−46719
microoptical components for optical communication, microlenses *(Japanese)* 87−38889
micropower laser diodes for optical interconnects 88−34049
microstrip line equaliser to compensate fibre chromatic dispersion in optical heterodyne detect. 88−22074
microwave amplifier based RF optical receivers for microwave optical fibres 88−12585
microwave appls., conf., Orlando, FL, USA (May 1987) 88−24327
microwave fiber optic link, transmitter and receiver design 85−14234
microwave fibre optics, technology and market forecast, 1984-94 86−4660
microwave signals, direct transmission over optical fibre, optoelectronic componentry 87−74950
microwave-multiplexed wideband lightwave systems using optical amplifiers for subscriber distribution 88−67343
microwaves 16 QAM signal transmission over single mode fibre 88−4019
mid-IR fibre ultralow-loss communications 87−8310
military appls., optical fibre architectures and components for high data buses 85−13960
military fiber-optic components 88−3970
miniature packaged external-cavity semicond. laser with 50 GHz cont. elec. tuning range 88−67352
minimum time control theory, appl. to optical modulation 87−68947
Mitsubishi DFB lasers for optical fiber communication 88−2261
Mitsubishi optical transmission system MP-2000, development *(Japanese)* 88−28854
mixer formed in waveguide on basis of anisotropic diffraction grating structures for multichannel fibre-optic communication lines 85−7286
MMIC role in future satellite communications 88−67329
MMICs, conf., New York, NY, USA (May 1988) 88−62897
mobile optical fibre systems, hard-wearing, realisation principles *(German)* 86−23910
mobile robots, radiated optical communication system 87−8336
modem, 1.2 Gb/s, for multi-channel digital video transmission 86−11114
modulated semiconductor laser diode for optical fibre transmission, spectral chirp reduction *(Japanese)* 87−54331
modulator, electrically controlled using tunnelling-assisted absorption modulation in GaAs sawtooth struct. 88−67351
modulator and link for antennas, fibre-optic 85−52344
modulators and photodetectors, design and performance for microwave and MM wave fibre optic systems 86−69796
modules and equipment for fiber optic transmission *(Japanese)* 88−28889
modules for fibre optic transmission systems *(Japanese)* 88−41664
monolithic AGC amplifier for output DC level stabilisation in 560 Mbit/s optical transmission 86−40918
monolithic AGC amplifier using SICOS technology, 400 Mbit/s optical repeater appl. 86−27085
monolithic fiber optic video signal transmission module 87−13710
monolithic four-channel photoreceiver integrated on GaAs substrate using MSM photodiodes and FETs 86−29017
monolithic IC for 565 Mbit/s single-mode transmission system 86−11112
monolithic integrated photoreceiver using high current gain heterojunction bipolar phototransistors 87−33074
monolithic optoelectronic ccts. for high-speed optical interconnects 88−4001
monolithic optoelectronic ICs for high-speed fibre optic transmission 87−18864
monolithic photodiode FET receiver 88−65515
monolithic photoreceiver operating at 140 Mbit/s, design using GaAs-GaAlAs bipolar devices 87−20500
monolithic superlattice pin waveguide detector, dual-wavelength demultiplexing 88−67396
monolithically integrated opto-electronic receivers for long-wavelength applications 88−73978
monolithically integrated photodiode and preamplifier for wide-band fiber optic links 88−51707
monolithically integrated pin photodetector-FET receiver technology, reviews 88−4002
monomode 280 Mb/s optical trunk transmission system 85−20226
monomode attenuator with permanent power transmissioncontrol *(French)* 86−9576
monomode connector design for long-distance communication *(German)* 87−46459
monomode fibre 1.3 μm 140 and 4×140 Mbit/s transmission systems *(French)* 86−11082
monomode fibre grating filters with high-reflectivity, design, fabrication and charactn. 86−36151
monomode fibre transmission system, 4.5 Gbit/s, transmitter and receiver 88−47109
monomode fibres, design of French of S 280 submarine system *(French)* 86−11083
monomode optaball connector form Radiall, construction and characts. *(Dutch)* 87−74792
monomode optical fibre, optical time domain reflectometer using photon counting technique 87−20486
monomode planar optical waveguides, distributed coupling, wavelength optical multiplexing study *(French)* 86−11056
monomode star coupler design *(German)* 85−8431
monomode transmission system with 1300 and 1550 nm DFB lasers at 2.23 Gbit/s 88−4018
MQW devices for optical communication 88−65735
MS-1 fibre-optic modem, review *(Polish)* 85−25616

semiconductor DFB laser sources for coherent optical communication systems 87−40974
semiconductor DFB lasers, single longitudinal-mode high-power type, design, theoretical aspects 87−7351
semiconductor diode lasers, formulas for direct FM response 88−14198
semiconductor distributed reflector laser progress, dynamic single mode, resonator config. 85−2341
semiconductor dynamic single mode lasers *(Japanese)* 86−48403
semiconductor dynamic-single-mode lasers for optical fibre communications 86−15720
semiconductor injection lasers, meas. of ps. pulses using autocorrelation systems 86−31685
semiconductor injection lasers, reliability 87−75117
semiconductor injection lasers at 1.3 μm, nearly single frequency, mode power partition events 85−62600
semiconductor integrated optical circuits for telecommunications, development advances 85−46199
semiconductor junction lasers, single frequency, for optical communications 85−46388
semiconductor laser, chirping reduction for improved single-mode fibre transmission capacity 86−15702
semiconductor laser, gain-switched, pulse-code-modulated light generation with high bit rate 85−2328
semiconductor laser, KDD single-wavelength oscillation development 85−56650
semiconductor laser, optical transmitter appl. *(German)* 87−2132
semiconductor laser, single frequency, 1.55 μm, system performance, computer simulation and noise anal. 87−61161
semiconductor laser, telecommunication appls. *(Japanese)* 86−22398
semiconductor laser, ultrafast, large-signal dynamics under digital modulation 85−56609
semiconductor laser amplifier, travelling wave 1.5 μm 85−25911
semiconductor laser amplifier at 1.5 μm, heterodyne gain and noise meas. 86−58928
semiconductor laser amplifier for multiplexed coherent systems 87−39133
semiconductor laser amplifier model, inline wideband dynamic, use in 2 Gbit/s fibre communication system 88−58540
semiconductor laser amplifier repeaters, fibre-tailed packages, design for 1.5 μm communication 86−37872
semiconductor laser amplifiers, very low reflectivity coating polarisation characts 88−65730
semiconductor laser amplifiers as repeaters in optical transmission systems 86−48432
semiconductor laser amplifiers for optical transmission systems at 1.5 μm, gain meas. 85−56619
semiconductor laser at 1.5 μm, external cavity, for communication, performance characts. 87−56160
semiconductor laser coupled to external high-Q resonator, modulation performance 88−40212
semiconductor laser devices for coherent optical communication 87−49120
semiconductor laser diodes, relevant to IR fibreoptics technology, new developments 87−18981
semiconductor laser diodes performance in high bit rate optical transmission systems 85−42624
semiconductor laser encapsulation developments, fibre optic appls., historical review 85−29808
semiconductor laser for light-wave communication, development 87−7369
semiconductor laser for optical fibre communication systems, simultaneous stabilization of frequency and output power 88−27186
semiconductor laser frequency control, optical fibre communication systems, laser types 85−51194
semiconductor laser frequency stabilisation for coherent communication appls. 87−54332
semiconductor laser homodyne optical phase-locked-loop 86−43815
semiconductor laser longevity certification, statistical approach 85−41402
semiconductor laser mixer for RF signal down-conversion process, losses and operating props. study 85−46464
semiconductor laser modulator, operation above 565 Mbit/s 87−75195
semiconductor laser negative feedback statistical FM, for coherent optical communication systems 86−3179
semiconductor laser optical preamplifiers perform., practical limitations 85−8416
semiconductor laser properties, nature, and appls. *(German)* 85−18951
semiconductor laser reliability assurance strategy for long-life appl. 85−41401
semiconductor laser source, high power, and beam forming optics 88−20683
semiconductor laser sources as optical intersatellite links 88−20684
semiconductor laser transmitters for optical fibre data links, characts., construction and operation *(German)* 87−70045
semiconductor laser-amplifier repeater, bidirection and two-channel transmission system meas. 87−76730
semiconductor laser-to-fibre coupling, all-elec. scheme for dynamic coupling control 88−13908
semiconductor lasers, automated packaging using low-cost lead frame technology 86−63836
semiconductor lasers, electrically frequency-controlled narrow-linewidth, design theory 88−8197
semiconductor lasers, external cavity strong feedback, for coherent optical communication systems, anal. and design 88−8213
semiconductor lasers, in optical fibre communication 86−15721
semiconductor lasers, modulation props. and optical feedback characts. of laser diodes stabilised by external cavity or injection locking 85−35768
semiconductor lasers, modulation-induced spectral penalties in high bit-rates-ingle mode systems 86−48423
semiconductor lasers, optical communication and discs appl. *(Japanese)* 86−22397
semiconductor lasers, optical fibre communication and beam appls. 88−58552
semiconductor lasers, residual linewidth in high-power limit, origin 88−65680
semiconductor lasers, single frequency, modulation induced transient chirping, optical communications appl. 85−62573
semiconductor lasers, single-frequency, linewidth for coherent light wave communications 86−48435
semiconductor lasers, single-mode generation in communications, linewidth reduction and freq. stabilisation *(German)* 88−28856

optical communication equipment continued
semiconductor lasers, structure, performance and appl. in optical communication 85−56641
semiconductor lasers, two-mode, influence of mode partition fluctuations 86−63888
semiconductor lasers for fibre optic transmission system equipment *(Italian)* 86−48399
semiconductor lasers for optical communication systems 85−18934
semiconductor lasers for optical fibre communications 87−68509
semiconductor lasers for optical subscriber systems *(Japanese)* 85−56622
semiconductor lasers reliability for undersea transmission systems 85−35745
semiconductor lasers with high-reliability for optical communications 87−26404
semiconductor multimode laser for communication links with spectral multiplexing 85−14282
semiconductor optical amp characteristics 88−73898
semiconductor optical amplifiers for communication appl., nonlinearity compensation technique 88−67347
semiconductor optical devices for intercity optical fiber transmission systems 85−42622
semiconductor optoelectronic devices, recent progress *(Japanese)* 88−8035
semiconductor optoelectronic devices for transmission *(Japanese)* 88−9551
semiconductor short external cavity single mode lasers, modal output power 88−8251
semiconductor sources and detectors for optical fibre communications appl. *(Japanese)* 85−8427
semiconductor sources and detectors in fibre-optic systems, review 86−4661
semiconductor transmitters and receivers, development *(German)* 86−64995
semiconductor tunable narrow line external cavity lasers for coherentoptical systems 86−9834
semiconductors for integrated optics/optoelectronics in optical fibre communication systems, props. review 87−7170
semicustom regenerator IC with ECL array, design for 140 Mbit/s optical fibre transmission system 85−37074
semileaky isolator, multilayer, design 88−51545
sending and receiving circuits from 34 Mbit/s optical fiber system *(Polish)* 87−70089
serial high-speed data bus, for military aircraft 86−70461
serial highway for CAMAC system using optical bus adapters 85−63663
services integration and multiplexing for broad-bandcommunication systems 86−64434
short distance fibre optic systems, components and performance aspects *(German)* 88−73913
short-distance fibre-optic links for industrial appls., implementations and components *(German)* 86−11070
SHOWMUX SA-7057 fibre optic multiplex transmission equipment *(Japanese)* 88−53303
SHOWMUX series fibre optic signal multiplex transmitter for control and meas. signals *(Japanese)* 87−62989
signal generator *(Japanese)* 87−56711
signal preamplifiers, comparison with receivers for transmission *(German)* 86−23882
signal processing components and applications 88−67407
signal processing principles, acoustooptic FM receiver demonstration for student laboratory tutorials 85−36260
signal transmission using high speed optical analog module for instrumentation *(Japanese)* 87−70094
single fibre for transmission of 2D and coloured pictures, spectral scanning method appl. 85−20210
single frequency lasers from Japan, review 86−22410
single mode 1.5 μm DFB lasers, modulation induced mode partition, bit error rate performance 88−51792
single mode 405 Mb/s 1.3 μm optical fibre transmission system 85−20223
single mode 565 Mb/s optical fibre line equipment 85−20224
single mode all-fibre switching matrices for broadband systems applications 88−7884
single mode depressed cladding fibre design and perform. for SL undersea system, review 85−37021
single mode dispersion shifted spliced fibres and cables, optical transmission props. 85−7237
single mode fibre 90 Mb/s transmission expt. using 1.5 μm multi-longitudinal mode InGaAsP/InP lasers 85−37063
single mode fibre for national trunk network in UK 87−76819
single mode fibre recirculating delay line 85−12550
single mode fibre route between Liverpool and Preston, England 85−25860
single mode fibre transmission over 75 km at 565 Mb/s using low cost components 85−8417
single mode fibres, OH-ion content in statistical distrib. of losses in repeater sections 88−41682
single mode fibres, wavelength depend. of Brillouin gain spectra 88−33607
single mode fibres for landline and submarine cables, splicing 86−37888
single mode fused couplers insensitive to external refractive index 88−58085
single mode high channel density wavelength division multiplexers design 88−47060
single mode laser optical sources for coherent systems 88−4062
single mode lightwave systems, design considerations 85−14313
single mode optical fibre system, high capacity, performance and maintenance features 88−47107
single mode optical fibres, multichannel WDM technique 88−45099
single mode optical fibres for telecommunications andmeasurement *(French)* 85−63635
single mode optical subscriber links, economics of laser vs. LED 87−34539
single mode Oslo-Drammen fibre lint, optical line equipment *(Norwegian)* 88−15493
single mode pushin connector development *(German)* 88−15460
single polarisation optical fibres for sensors and communication lines 85−18694
single- to multimode fibre coupler design and technology 86−9535
single-fibre lightwave transmission system with 1.37 Tbit km/s capacity using WDM of DFB lasers 85−25869
single-frequency lasers for coherent lightwave systems 86−22411
single-frequency semiconductor lasers, mode-partition noise, anal. 86−17373
single-longitudinal mode laser diodes for optical fibre transmission, error rate performance *(Japanese)* 85−31059
single-longitudinal-mode distributed feedback laser diode 88−15498
single-mode 5-fibre plastic connector, loss anal. 86−55308

optical communication equipment continued
single-mode 810M optical transmission system operating at 1.3 μm, config. and equipment design 88−28835
single-mode component packaging, recent developments and potential impact on single-mode technology 86−36197
single-mode data buses for LAN appls. 85−63657
single-mode fiber-optic demultiplexer, props. 87−76771
single-mode fibre 1×50 switch for 10 fibre ribbon, config. and charact. 87−76807
single-mode fibre analogue video signal transmission expt. using 1.3 μm edge emitting LEDs 86−30781
single-mode fibre cables, installed, polarisation props. 87−13726
single-mode fibre communication system, optical meas. devices *(Japanese)* 86−28781
single-mode fibre connector design, long-haul system appls. 86−4666
single-mode fibre designs for telecommunications, review 87−68064
single-mode fibre directional coupler with narrowband Bragg refl. filter 86−53955
single-mode fibre link using edge-emitting diodes, transmission study at 1.3 μm 85−42577
single-mode fibre optic components for conversion of laser phase noise to intensity noise 88−1970
single-mode fibre optical focusing beam system design using GRIN rod lens 87−62942
single-mode fibre systems, narrowband position-tuned multilayer interference filter 85−63642
single-mode fibre transmission at 1 Gbit/s using edge-emitting LED and PINFET receiver 87−49027
single-mode fibre WDM in the 1.2/1.3 μm region 86−43869
single-mode fibre/laser diode pigtailed modules for digital communications, Toshiba TOLD 300 series 87−40937
single-mode fibres, chromatic dispersion meas. technique using WDM 87−7122
single-mode fibres, direct meas. of chromatic dispersion using streak camera 85−48116
single-mode fibres, optical couplers multi/demultiplexer development *(Japanese)* 88−41658
single-mode fibres in ribbon, optimum number determ. *(Japanese)* 88−39948
single-mode fibres jacketed with loose jelly-filled tube, loss mechanisms 87−7130
single-mode fibres suitable for subscriber cables, design 87−8297
single-mode fibres testing, equivalent-step-index parameters determ. 87−3203
single-mode fibres with modified dispersion charact., review 87−7106
single-mode fluoride fibres, dispersion-flattened, design for optimum performance from 1.5 to 2.9 μm 88−65178
single-mode fused biconical couplers for wavelength division multiplexing 88−45135
single-mode fused coupler for undersea opticaltransmission systems 86−59906
single-mode guided-wave optical gate matrix switch, fabrication 88−47130
single-mode guided-wave optical gate matrix switch using Mach-Zehnder interferometer gates 87−76740
single-mode laser diode, coupling to optical waveguide via gap, theoretical study 87−53971
single-mode laser packages, welding techniques stability 88−67429
single-mode lightguide systems, modal noise probability 86−63644
single-mode multiple connector *(German)* 86−23918
single-mode optical coupler, wavelength-flattened 8×8 star config., design and performance 87−12111
single-mode optical fibre switch *(Japanese)* 86−28876
single-mode optical fibre wavelength-tunable WDM coupler, design and performance 87−56127
single-mode optical isolator at 1.3 μm usingall-fibre components 86−53957
single-mode optical-fibre switch 87−56124
single-mode passive fibre components, automated coupler manufacturing system development 86−63681
single-mode ten-fiber connector, very small 88−33645
single-mode transmission lines, chromatic dispersion, far-end meas. technique 85−31065
single-mode wavelength division multiplexer/demultiplexer for two channel bidirectional transmission 88−47150
single-mode-fibre optical time domain reflectometer using 1.5 μm semicond. laser 86−43816
single-mode-fibre passive components made in the fused-head-end technique 87−49032
single-mode-fibre/LED communication systems, dispersion-limited transmission and spectral filtering 87−3198
SL undersea cable system, optical repeater design 85−37027
SL undersea lightwave system, compact 1.3 μm laser transmitter design for regenerators 85−37039
SL undersea lightwave system, digital fibre optic transmission system 85−37014
SL undersea lightwave system, high reliability high sensitivity receiver design 85−37041
SL undersea lightwave system, mechanical optical switch for regenerators 85−37042
SL undersea lightwave system, terminal transmission equipment 85−37047
SL undersea optical communication system, ultra-high speed/reliability ICs for regenerators 85−37038
SL undersea optical fibre cable system, branching repeater design 85−37031
SL undersea optical fibre transmission system at 295.6 Mb/s, highly integrated regenerator design 85−37032
SL undersea supervisory system for repeater control and monitoring 85−37045
slip ring for off-axis high-bit-rate data transmission 86−37867

time-division digital switching using bistable laser diodes and optical switches 85−42612
time-division optical power divider using electroopticlight switches 86−43829
timing recovery cct. for 2 Gbit/s digital communications system using dielec. resonator filter 87−66440
token passing ring prototype node design, IEEE 802.5, for electrical switching station 88−67034
token ring LANs, ANSI FDDI and SAE HSRB comparison 88−35166
token-based protocols for high-speed optical-fibernetworks 85−63655
token-ring LAN, DAFNE 88−53314
tolerance comparison between conventional and λ/4-shifted DFB lasers, 2.4 Gbit/s 88−67357
train control system, high-speed, with optical fibre connected decentralised computer 87−79154
transceiver for interack communications 88−73977
transceiver platform for laser communication expts. 87−20518
transceivers, design, charact. and performance for fibre communication appls. *(Japanese)* 85−8429
transcoders of binary fibre-optical code 5B-6B *(Polish)* 87−70091
transducer, optically-powered, with optical-fibre data link 85−25865
transimpedance measurement receiver units for constant optical power in optical fibre systems 87−28550
transimpedance measurement receivers for modulated optical power in optical fibre systems 87−28551
transimpedance preamplifier with 70-dB AGC range in fine-line NMOS, optical receiver/repeater appls. 88−56475
transmission and switching technology *(Norwegian)* 87−49115
transmission class substations, implementation of integrated protection and control system 85−65401
transmission equipment, charact. and appls. *(Japanese)* 88−9569
transmission equipment, installation and testing 88−9586
transmission equipment for 12-channel DPCM video signals *(Japanese)* 88−28861
optical communication equipment continued
transmission equipment for 800 Mbit/s 8-channel multiplexed PCM-TV signal *(Japanese)* 88−28860
transmission experiments with external modulator for high bit-rate application 88−9602
transmission expts. at 1.55 μm for long-span submarine cable system design 88−41647
transmission line using stimulated Raman scattering for signal light amplification, configuration 86−64984
transmission modules for intraoffice networks 87−28578
transmission networks, submerged optical multiplexing techniques 88−47189
transmission of measuring signals, appl. of optical fibres *(Polish)* 85−37081
transmission subsystem, multimode four-channel, using wavelength division multiplexing 85−42581
transmission system, supervisory systems 86−55322
transmission systems, future possibilities 88−47019
transmission techniques, basics *(German)* 85−31041
transmissive star couplers, design for full-duplex multiple access optical networks 86−37874
transmitter and receiver modules for optical communications 85−20191
transmitter and receiver modules with optoelectronic-integrated circuits for optical LANs 86−64988
transmitter/receiver, boresight alignment 87−41027
transmitter/receiver IC module interconnection by optical fibers 86−4648
transmitter/receiver modules, miniaturised high speed, using 1.3 μm LED and PIN photodiode 86−4686
transmitters, semiconductor laser appls. 85−25900
transmitters and receivers for light waveguide *(German)* 85−58102
transmitters and receivers for light waveguides *(German)* 85−50917
transmitters and receivers for waveguide technology *(German)* 85−52334
transmitters for LANs, performance/cost considerations 88−73987
transmitting adaptive system, operating algorithm *(Russian)* 85−63633
transoceanic regenerated optical system, jitter accumulation 88−53257
transparent optical network design using quantum amplifiers and sources 88−3999
travelling-wave optical amplifier, 1.5 μm, polarisation-dependent gain spectrum 87−8273
travelling-wave optical amplifier at 1·3 μm 87−75091
travelling-wave optical amplifiers, nonlinear models 88−60139
Tree-Net, a multi-level fiber optics MAN 88−53313
tree-structured optical waveguide switches for switching networks *(Japanese)* 87−8320
tree-structured waveguide optical switches for optical switching networks 88−15442
trends in optical communications 85−14293
trunk line transmission system using high-capacity optical fibre transmission 85−25903
TTL driving optical arbiter module 85−20175
tunable birefringent wavelength-divisionmultiplexer/demultiplexer 85−58094
tunable DBR laser, 1.55 μm, wide tuning range, struct. and charact. study 88−45411
tunable eight-channel wavelength demultiplexer using acousto-optic. light deflector, fibre communication appls. 86−55288
tunable optical multi/demultiplexer for optical FDM transmission system 85−42576
tuned optical receivers, improved design 87−70036
TV25GF optical TV transmission system, review *(German)* 88−60450
TV engineering, the application of optical devices *(Japanese)* 88−3991
TV link LED module with multiple output fibers *(Japanese)* 88−28893
TW semiconductor laser amplifier, picosecond pulse response 87−75078
twin grating wavelength multiplexer in single-mode fibre 88−67412
twin-rectangular-cored fibre couplers, fabrication and charact. 87−53976
two-channel ASK heterodyne detection system, crosstalk and prefiltering without laser phase noise 88−73927
two-way communication system using rotary coupler 85−62284
UK-Belgium fibre optic submarine communications system, reliability 87−28633
UK-Belgium no.5 optical fibre submarine system 85−37019
ultra high speed fiber optic systems and components 88−4059
ultra high speed optoelectronic multiplexer bus as an integral design component for a parallel computer 87−40623
ultra-low loss mechanical fiber switch 88−72072
ultra-low reflectivity 1.5 μm semiconductor laser preamplifier 88−47039
ultra-wideband direction finding using a fiber optic beamforming processor 88−74075
undersea fiber-optic regenerator using an integral-substrate package and flip-chip SAW mounting 85−37036
undersea fibre optic cable communication system, operational, reliability and systems considerations 85−8418
undersea fibre optic sensor systems, lead sensitivity problems, cable design approach 88−72057
undersea fibre transmission systems, timing recovery with SAW transversal filters in regenerators 85−37035
undersea lightwave systems, appl. of laser amps. 88−47116
undersea lightwave systems at 1.55 μm, future trends 85−37048
undersea optical fibre links, high reliability fast bipolar IC appls. 85−37033
undersea transmission-system reliability withlaser-diode standby-redundant optical repeaters 85−52336
underwater and deep sea appls., fibre optic couplers and connectors 85−8399
underwater laser communication receiver, development 87−62968
unrepeatered optical submarine links, UK to Isle of Man 88−47178
UPPERBUS, bit-serial real-time bus with 560 Mbit/s fibre optic transmission 87−13443
US CGNET fiber optic remoting system 86−30839
very fast LEDs offer response for optical LAN 85−41290
very-high-speed line terminating multiplexer operating up to multi-Gbit/sec 87−40550
video monitoring circuit using fibre optics transmission in Gubrist road tunnel *(French, German)* 87−13691
video selecting equipment, design and performance *(Japanese)* 86−4625
video selecting equipment for fiber-optic videodistribution system 86−49831
video signal transmission by optical link, intensity modulation of LED light carrier 85−47522
video signals high-speed communication, with FDDI standards, Am 7968, 9 taxi chips *(German)* 88−53260
videocommunication networks, present status and trends 88−22314

optical communication equipment continued
visual communication networks, passive components evolution *(French)* 87−49021
VLSI fibre distributed data interface chips for LANs 88−35554
VLSI holographic interconnects, LD requirements and limitations 88−51557
VLSI optical interconnection networks 88−4003
volstron nonlinearity investigation 86−49603
waveguide four-channel multi/demultiplexer for optical FDM transmission 88−35503
waveguide horn-grating demultiplexer circuit, single-mode operation 87−34579
wavelength demultiplexer, integrated, concept and design 85−42572
wavelength demultiplexer, mech. tunable single-channel, using monochromator with GRIN lens optics 85−8396
wavelength demultiplexer using echelette grating on Si substrate 85−37002
wavelength division multiplexed systems, two-channel fibre Raman amplification 88−41640
wavelength division multiplexer, technological trends 88−9606
wavelength division multiplexer grating, micro-optical, fabrication by ion etching 85−37009
wavelength division multiplexers, diffraction grating based, review 85−37010
wavelength division multiplexers for optical telecommunication *(French)* 85−20200
wavelength division multiplexers/demultiplexers using fused taper couplers, insertion loss and isolation 88−45098
wavelength filter with sharp cut-off characts. 87−74815
wavelength flattened 8×8 single-mode star coupler 88−65241
wavelength multiplexer, industrial fiber optic, for three channels and duplex transmission *(French)* 86−11126
wavelength multiplexer, six channel single mode, with waveguide concentrator 85−3478
wavelength multiplexer and demultiplexer, six-channel, for single mode systems 86−23595
wavelength multiplexer/demultiplexer module for single-mode fibre communication systems *(Japanese)* 88−47054
wavelength multiplexers 88−58225
wavelength multiplexing components for fibre optics communications systems *(German)* 86−4615
wavelength multiplexing for enhanced fibre-optic performance 87−20562
wavelength multiplexing for optical region *(German)* 87−40542
wavelength routeing approach 88−73753
wavelength routing approach to optical communications networks 88−53312
wavelength-division multiplexing in 1.5 μm window, installed link 85−3448
wavelength-multiplexed optical switching system using acousto-optic switches 88−47118
WDM, birefringent, bit error rate and power penalty anal. 88−41638
WDM, integrated-optical, multichannel, for monomode systems 86−4691
WDM components for optical communication, review of single mode devices 85−8413
WDM demultiplexer with chirped grating, design 87−40552
WDM equipment, environmental testing 87−76784
WDM experiment using 1300/1500 nm dual-wavelength LED for single-mode fibre transmission systems 88−15444
WDM fibre systems, planar optical demultiplexer with chirped grating 85−2060
WDM fibre transmission system integrated optical exchange using SAW slab-waveguide switches 86−69786
WDM for fibre-optic communication systems *(Japanese)* 88−28888
WDM grating manufacture by ion beam etching on glass 86−4690
WDM integrated optical switch devices using acousto-optic effects *(Japanese)* 88−65404
WDM LED spectral slicing for single mode local loop 88−41625
WDM multi/demultiplexers, for two-channel single-mode transmission systems 85−14266
WDM multiplexer/demultiplexer, tunable birefr. 86−49679
WDM optical fibre transmission systems, linear crosstalk 85−63668
WDM optical filter design and performance optimisation *(Chinese)* 86−68367
WDM optical repeater for fibre-optic passive star networks connection 86−64987
WDM optical switch, wavelength-division-multiplexing using acoustooptic deflector 88−28582
WDM system, four channel for monomode fibre 86−11098
WDM system using 3 wavelength-selective fused single-mode fibre couplers as multiplexers 88−67410
WDM technology for optical communication, review 85−8419
WDM technology review, demultiplexer designs 85−52365
WDM transceiver module *(Japanese)* 87−76528
WDM transmission systems, design parameters using LEDs and single mode fibres 88−35531
WDM two channel optical transmission systems, design 88−9601
wide-band guided-wave periodic multi/demultiplexer with a ring resonator for optical FDM transmission systems 88−73924
wide-band optical heterodyne balanced mixer receivers, design 87−56161
wide-band semiconductor lasers and optical modulators for communications 88−73947
wideband 1.5 μm optical receiver using travelling-wave laser amplifier 87−13698
wideband amplifiers for Gbit/s optical link receiver *(Czech)* 86−55302
wideband data and video services transport over single mode fibre 87−28626
wideband guided-wave electrooptic and electroabsorption devices, characts and appls. 87−49123
wideband guided-wave periodic multi/demultiplexer with a ring cavity for optical FDM transmission systems 88−35473
wideband homodyne phase diversity receiver, coherent transmission experiments 87−49073
wideband homodyne receiver using phase diversity 86−43862
wideband optical receiver with third-order capacitive current-current feedback 88−67356
wideband optical receivers using travelling wave amplifiers for Gbit/s systems 88−47105
wideband optical switching and distribution networks 87−76809
wideband preamplifier, Gbit/s fibre optic, charactn. 87−49062
wideband variable peaking AGC amplifier for high-speed optical digital transmission, bipolar IC 87−23944
wireless exhibition guide *(German)* 85−31044
wireless keyboard switch, development *(Japanese)* 85−58112

$Ga_{1-x}In_xAs$-InP integrated PIN-FET, growht by MBE and device results 85−49561
GaInAsP 1.5 μm travelling-wave laser amplifier with angled facets 87−75089
GaInAsP DFB laser array 88−58527
GaInAsP DFB laser, effect of detuning of ps pulse generation, expt. study 88−27146
GaInAsP buried channel electroabsorption modulator for 1.3 μm fibre links 88−13937
GaInAsP buried crescent lasers, high-speed 1.3 μm devices with InP:Fe, Ti current blocking layers 88−51806
GaInAsP laser diode ps optical pulse generation at 1.54 μm in single mode 88−41623
GaInAsP lasers, multichannel intermodulation distortion 88−14196
GaInAsP semiconductor laser amplifiers at 1.5 μm for single-mode fibre communications 88−8198
GaInAsP/InP 11.5-GHz bandwidth buried crescent laser with high output power 88−20635
GaInAsP/InP BH lasers, CW operation at 3 μm at room temp. *(Korean)* 87−46886
GaInAsP/InP BH lasers with semi-insulating InP blocking layers, MOVPE 88−14197
GaInAsP/InP JFET with submicron gate 88−57673
GaInAsP/InP distributed-reflector dynamic-single-mode lasers 88−40243
GaInAsP/InP, planar single mode heterostructures, calculated characts. 87−18983
GaInAsP/InP quantum box structure with p-n junction and optical guide structure, fabrication 88−45447
GaInAsP-InP 1.5-1.6 μm bundle-integrated-guide DBR lasers 87−61174
GaInAsP-InP 1.55 μm BH DFB high-speed laser with simple mesa structure 88−20643
GaInAsP-InP DBR injection locked dynamic single mode lasers, struct. and fabrication 87−68512
GaInAsP-InP DBR lasers, 1.3 μm, hybrid beam/vapour epitaxial growth, wavelength uniformity study 88−58534
GaInAsP-InP DFB laser, VPE transported, with blue-shifted FM response from DC to 2 GHz 88−58528
GaInAsP-InP DFB lasers, 1.3 μm DCPBH type, narrow linewidth, λ/4 shifted first-order gratings 88−20638
GaInAsP-InP LED at 1.3 μm for fibre optic communication systems *(Japanese)* 88−26992
GaInAsP-InP distrib. reflector laser, 1.5 μm, struct. and high-power single longit. mode operation 88−40208
GaInAsP-InP double channel mesa lasers, LPE fabrication and high power performance 85−41407
GaInAsP-InP hetero-bipolar transistors, implanted planar devices for optoelectronic IC appls. 87−12312
GaInAsP-InP high-speed 1.5 μm self-aligned constricted mesa lasers grown entirely by MOCVD 88−45409
GaInAsP-InP laser, five-wavelength integrated DFB with quarter-wave-shifted structures for WDM 87−68475
GaInAsP-InP pigtail laser modules, 1.3 μm, for monomode long haul communications *(French)* 86−9876
GaInAsP-InP planar buried-ridge structure lasers, high-temp. CW operation 1.5 μm 88−65679
GaInAsP-InP travelling-wave laser amplifier, wavelength depend. of noise figure, expt. study 88−20640
GaInAsSb lasers for mid-IR communications 88−15479
GaInAsSb photodetectors for mid-IR communications 88−15479
GaSb-AlGaSb MQW laser diode, high-speed modulation characts. 87−39089
GaSb-AlGaSb MQWs, electroabsorption effect and high-speed waveguide optical modulator fabrication 87−54106
$(GdBi)_3(FeAl)_5O_{12}$, magneto-optical props., appl. to 1.3 μm optical isolator 88−26899
Ge avalanche photodiode, small detectable area, receiver sensitivity temp. dependence 85−14247
Ge avalanche photodiodes for optical transmission systems, reliability 86−28993
Ge avalanche photodiodes, ion implanted, with p^+n-planar struct. for IR optical fibre communication *(Chinese)* 87−68276
Ge small area ion implanted p^+-n avalanche photodiode for 1.3 μm wavelength 86−36342

optical communication equipment continued
GeO_2-core optical fibre efficient linearly polarised Raman generation 88−13802
$Ge_{0.6}Si_{0.4}$ rib waveguide avalanche photodetectors for 1.3 μm optical fibre communication 87−8627
Ge_xSi_{1-x}/Si strained-layer superlattice avalanche photodetectors, 1.3 μm operation, MBE fabrication and performance 86−48289
Ge_xSi_{1-x}/Si strained-layer superlattice detectors, high photoconductive gain, 1.3 μm operation 86−70136
Ge_xSi_{1-x}/Si strained-layer superlattice waveguide IR photodetectors 86−44310
He-Ne 1500 nm frequency stabilized Zeeman laser, heterodyne expt. 88−45371
He-Ne 1500 nm stabilised transverse Zeeman laser, expt. for coherent communication 87−38976
He-Ne lasers, design for optical cable transmitter appls. at 1523 nm *(German)* 85−46305
He-Ne lasers, freq. stabilisation at 1.52 μm 87−38975
HgCdTe, devices for fibre optics communications, ion implantation technique optimisation 88−57448
HgCdTe, new material for near IR optoelectronics 87−54191
HgCdTe photodiodes for heterodyne appls. 87−38934
$Hg_{0.3}Cd_{0.7}Te$ APD for fibre optic transmission systems at 1.3 μm *(French)* 86−9692
$Hg_{0.3}Cd_{0.7}Te$ avalanche photodiode for optical fibre transmission system impact ionisation rates 86−9684
$Hg_{0.3}Cd_{0.7}Te$ avalanche photodiode foroptical-fiber transmission systems at λ=1.3 μm 85−58105
$InAs_xSb_{1-x}$-InAs IR APD for long distance fibre optic communication 88−20506
InGaAs 12-channel p-i-n detector arrays and packaging for 1.3 μm appls. 88−45325
InGaAs 8 GHz low-noise p-i-n photodiode for GaAs FET optical receiver 87−40878
InGaAs PIN photodiode grown by MOVPE 86−42441
InGaAs PIN photodiode monolithically integrated on InGaAlAs ridge waveguides 88−45329
InGaAs PIN photodiodes, MOVPE fabrication 88−45315
InGaAs avalanche photodiode optical receiver, design for 2 and 4 Gbit/s rates 86−4640
InGaAs cap monitor photodiode integrated with InGaAsP/InP λ/4 shifted laser 88−45306
InGaAs fact photoconductive detectors, speed enhancement using Be ion bombardment 85−56443
InGaAs laser diode optical switch modules, tandem switching charact. study 85−29821
InGaAs p-i-n photodiode detectors, design and performance, optical fibre communication appls. 86−49604
InGaAs p-i-n photodiode, high speed, grown on semi-insulating INP substrate suitable for monolithic integration 85−2155
InGaAs photodetector, 20 GHz bandwidth, design for long-wavelength microwave optical links 85−46265
InGaAs photodetector for microwave optical transmission, 20 GHz bandwidth 86−42439
InGaAs photodiodes for long-wavelength fibre optic communications 88−33879
InGaAs photodiodes, high-speed/long wavelength photodetectors, electro-optic sampling system for response meas. 86−36332
InGaAs photodiodes, reliability programme for SL submarine cable appls. 85−41270
InGaAs planar p-i-n photodetectors, MOCVD fabricated, design and charact. study 86−22234
$In_{0.53}Ga_{0.47}As$ p-i-n amplifier struct. for monolithically integrated optical receiver front-end 88−73921
$In_{0.53}Ga_{0.47}As$ photoconductor receiver for long-wavelength optical communications, sensitivity 85−58107
$In_{0.53}Ga_{0.57}As$:Fe photoconductive detectors for optical communication 86−30791
InGaAs/InAlAs M efficient MQW waveguide phase shifters 87−38950
InGaAs/InP PIN photodiode for long-wavelength optical communications 86−54044
InGaAs/InP heterostructure avalanche photodiodes, efficiency and response *(Japanese)* 85−51046
InGaAs/InP monolithic photoreceiver for single 5 V power supply operation 88−65510
InGaAs/InP monolithic photoreceiver with single V power supply 88−45328
InGaAs/InP p-i-n photodiodes for microwave fibre links, high-speed self passivated 87−56129
InGaAs/InP photodiodes for optical fibre communication, design with sensitivity improvement *(Japanese)* 86−54043
InGaAs/InP planar small-area p-i-n photodiodes for 1.3 μm and 1.55 μm wavelengths 86−36341
$In_{0.53}Ga_{0.47}As$/InP lateral phototransistor for optical communication appls. 85−35628
InGaAs-InP 1.5 μm photodetectors, optical communication appls. 87−18963
InGaAs-InP APDs, SAGM devices with MOCVD grown pseudoquaternary superlattice graded heterojunction 88−2115
InGaAs-InP DFB ridge waveguide lasers, 1.5 μm, charact. and reliability 88−4061
InGaAs-InP DH lasers with DFB gratings, fabrication using electron beam lithography, charact. 88−20663
InGaAs-InP MQW optical modulator, buried-mesa electroabsorption type, MOCVD grown, struct. and charact. 87−54108
InGaAs-InP long-wavelength PIN photodiodes, reliability 86−42440
InGaAs-InP monolithically integrated PIN-JFET photoreceiver 86−54056
InGaAs-InP planar p-i-n photodiode detectors, very high speed operation, performance charact. study 87−12314
$In_{1-x}Ga_xAs$-InP heterostructure APD for 1.55 μ optical fibre communication system *(Japanese)* 87−34574
InGaAsP 12-channel LED arrays and packaging for 1.3-μm appls. 88−45325
InGaAsP 1.3 μm laser reliability determ. for submarine cable systems 85−41403
InGaAsP 1.3 μm mesa-struct. surface-emitting LED for single-mode optical fibre coupling 85−46288
InGaAsP 1.5 μm DFB laser diodes, optical communication appls. 87−18963
InGaAsP 1.5 μm optical amplifiers, gain measurements 86−11066

optical communication equipment continued
InGaAsP 1.5 μm travelling-wave laser amplifier with 5.2 dB noise figure 87−39093
InGaAsP BH laser with 22 GHz bandwidth and high modulation efficiency 87−75079
InGaAsP BH lasers, vapour-phase regrown, 1.3 μm CW operation with 15 GHz direct modulation bandwidth 85−51162
InGaAsP DBR diode laser, 1.3 μm wavelength, RF modulated, single-longit. mode optical pulse generation 87−13695
InGaAsP DFB lasers for optical communication, operational charact. 87−68510
InGaAsP Fabry-Perot cavity-type laser amplifier for 1.5 μm wavelength. 87−56125
InGaAsP LED in 1.2 to 1.6 μm spectral region for high-speed optical communications 88−15483
InGaAsP MQW BH lasers grown by LPE, dynamic spectral linewidth 87−39095
InGaAsP Y-branch grating demultiplexer for WDM operation 87−40883
InGaAsP and InGaAs 'mushroom' laser, for 1.3 and 1.5 μm wavelengths *(Czech)* 86−42574
InGaAsP buried heterostructure laser diode struct. for transmission above 2 Gbit/s *(French)* 88−51786
InGaAsP carrier injection modulator integrated with DFB laser diode, struct. and charact. 87−38948
InGaAsP controlled chirped single freq. laser with dispersion-shifted fibres for WDM communication 86−11108
InGaAsP double channel planar BH laser diode, LPE growth *(Japanese)* 85−33435
InGaAsP double-channel planar BH MQW laser, 1.3 μm, design, fabrication and charact. 85−2308
InGaAsP dovetail DCPBH laser for high bit rates and monolithic integration 88−20659
InGaAsP edge emitting LEDs, design for 1.3 μm 180 Mbit/s transmission over single-mode fibre 85−56449
InGaAsP edge-emitting LED for single-mode-fibre subscriber loop appl. 86−22253
InGaAsP edge-emitting LEDs for single-mode optical communication systems 85−62457
InGaAsP high-speed laser, optical correlation meas. of switching transients 86−42527
InGaAsP laser diode, antirefl. coated facet, for fibre optic wideband analogue modulation 86−42583
InGaAsP laser diodes, power charact. and appls *(Italian)* 86−36480
InGaAsP lasers, 1.3 and 1.55 micron, lightwave system appls., performance comparison 86−22369
InGaAsP lasers, 26 GHz bandwidth, design and performance, optical fibre communication appls. 86−49604
InGaAsP lasers in 1.2 to 1.6 μm spectral region for high-speed optical communications 88−15483
InGaAsP lasers with tight optical confinement, communication appls., 26.5 GHz 86−15697
InGaAsP low-current 1.3 μm edge-emitting LED for single mode fibre subscriber loop appl. 87−18858
InGaAsP materials, OMVPE growth for long wavelength detectors and emitters 87−10434
InGaAsP p-i-n photodiodes, 1.3 μm wavelength for optical communications 86−28994
InGaAsP photodiodes for optical communication systems in 1.3 μm band *(Slovak)* 86−11086
InGaAsP ridge-guide DFB multiquantum-well laser, design, fabrication and performance charact. 85−51161
InGaAsP three-channel buried crescent lasers, 1.51 μm, high-speed analog and digital modulation 85−2281
InGaAsP vapour-phase transported lasers, 1.52 μm, FM, modification for bandwidth improvement 85−41393
InGaAsP vapour-phase-transport DFB laser, 1.55 μm, chirping under ps gain switching and 4 GHz modulation 86−3143
InGaAsP/InP 1.3 μm DFB p-substrate partially inverted BH laser diode 87−54312
InGaAsP/InP 1.3 μm surface emitting LED for transmission rates up to 200 Mb/S 86−36358
InGaAsP/InP 1.3 μm wavelength LED, development *(Japanese)* 88−40097
InGaAsP/InP 1.52 μm mushroom stripe DFB lasers with second order grating, threshold current 86−63810
InGaAsP/InP BH lasers for optical fibre communication, lasing charact. and reliability 85−18952
InGaAsP/InP DH LED, high speed with wavelength 1.3 μm 86−54051
InGaAsP/InP avalanche photodiodes, design and fabrication for 1 to 1.6 μm wavelength region *(German)* 85−2146
InGaAsP/InP buried crescent laser diode emitting at 1.3 μ, high temp. CW operation 85−2310
InGaAsP/InP distributed feedback laser, performance and optical communications appls. *(Japanese)* 85−51188
InGaAsP/InP distributed feedback p-substrate partially inverted buried heterostructure laser diode 88−45451
InGaAsP/InP edge-emitting LEDs for optical fibre communication, reliability exam. 85−35651
InGaAsP/InP heterojunction bipolar transistor, monolithic integration for lightwave communication 88−14060
InGaAsP/InP high power laser diodes in long wavelength region 88−28877
InGaAsP/InP high power separate confinement mesa stripe lasers 87−2123
InGaAsP/InP laser diodes, 1.3 microns, reliability, submarine fibre-optic communications appl. 85−29824
InGaAsP/InP lasers at 1.3 μm with high facet power densities, CW performance 87−54320
InGaAsP/InP lasers, modal and relative intensity noise under VHF modulation, effect of degradation 85−7483
InGaAsP/InP long wavelength edge emitting LED for single mode fiber optic communication 88−33894
InGaAsP/InP metal-clad ridge waveguide laser, 1.3 μm operation, lateral waveguiding anal. and structs. 86−3130
InGaAsP/InP monolithic pin/amplifier photoreceiver, development *(Japanese)* 88−40073
InGaAsP/InP multimode optical switches operated by acarrier induced refractive index change 86−42358
InGaAsP/InP planar mesa BH 1.3 μm lasers for submarine cable appls., reliability assurance strategy 85−41404
InGaAsP/InP spontaneous DH end-emitting LED for 200 μm diameter fibre-optics communications 85−62459

optical communication equipment continued
InGaAsP/InP spontaneous double heterostruct. end-type emitters for optical fibres 86−22265
InGaAsP/InP transmitter OEICs, monolithically integrated, devices and technologies 88−73976
InGaAsP-InP 1.3 μm V-groove edge-emitting LED, emission and coupling props. 86−22256
InGaAsP-InP DB laser emitting at 1.3 μm for gigabit communication systems 87−68515
InGaAsP-InP DC-PBH lasers, 1.5 μm, two-step VPE-LPE grown, high reliability 86−15705
InGaAsP-InP DFB laser, 1.55 μm, transmission performance impairment due to optical spectrum degradation 86−42529
InGaAsP-InP DFB laser, VPE-transport process 88−45448
InGaAsP-InP DFB laser with modified double-channel planar BH struct., 1.3 μm high-speed operation 87−7358
InGaAsP-InP DFB lasers, 1.53 μm, VPE fabricated, very low-threshold design 87−54321
InGaAsP-InP DFB lasers with monolithic external cavity, spectral charact. for 1.3 μm 87−12464
InGaAsP-InP DH surface-emitting LEDs for optical fibre communications *(Japanese)* 86−58844
InGaAsP-InP LED photodiode arrays for optical communications systems 88−3995
InGaAsP-InP high speed metal clad ridge waveguide laser diode at 1.3 μm 88−34055
InGaAsP-InP high-speed electroabsorption modulator, monolithically integrated with DFB lasers 88−65375
InGaAsP-InP integrated optics wavelength filter for WDM communication 86−42354
InGaAsP-InP integrated optoelectronic circuits for high-speed fibre optic communication systems 88−20519
InGaAsP-InP laser diodes, space evaluation 88−45463
InGaAsP-InP laser module, 1.3 micron, for high bit rate appl. 88−2281
InGaAsP-InP packaged grating-tuned external cavity lasers for coherent transmission systems 85−24562
InGaAsP-InP planar buried ridge struct. lasers for long wavelength optical communication 88−65738
InGaAsP-InP planar buried-ridge-structure lasers, 1.3 and 1.55 μm wavelength, optical communication appls. 88−27183
InGaAsP-InP surface-emitting LEDs, 1.3 μm, for wide-bandwidth optical fibre communications 85−56451
InGaAsP-InP-ridge waveguide lasers, LPE fabricated, design and 1.5 μm low-threshold operation 87−7359
InP based JFET for monolithic integration in optical receivers 85−18822
InP electroabsorption, appl. to light modulation in optical communication systems 86−2869
InP individually addressable monolithic 1×12 LED array aligned with 12 fibre ribbon 86−22255
InP optical waveguide/photodetector combination in OEIC-receiver equipment of future fibre optic telecommunication networks 88−58397
InP ridge waveguide laser chip performance 88−2282
InP/$Ga_{0.47}In_{0.53}As$ superlattice avalanche photodiode, photoresponse charact. study, fibre-optic communication appl. 88−65479
InP/GaInAs reach-through avalanche photodiode 88−45307
InP/InGaAsP heterojunction photodiodes for 1-1.6 μm high bit rate communications 87−41522
InP/InGaAsP monolithic 12×12 element matrixed LED array, fabrication and performance 87−38949
InP/InGaAsP p-type substrate and mass transported doubly BH laser 85−2311
InP/InGaAsP/InGaAs APDs, MOCVD growth, design and charact. 86−36331
InP/InGaAsP/InGaAs avalanche photodiode with frontillumination for optical fiber transmission at Gbitrates in the 1-1.6 μm wavelength region 86−42443
InP-GaInAs p-i-n photodiode, planar embedded, very high-speed operation 88−20502
InP-GaInAsP integrated optical anisotropic semicond. waveguide 85−12585
InP-InGaAsP DH CW injection lasers, structure, fabrication and props. 85−12839
InP-InGaAsP planar 3D graded-junction APD 88−26976
InP-InGaAsP semiconductor light sources fabricated by vapor phase epitaxial regrowth 88−8214
InP-InGaAsP:Z edge emitting LED, heavily-doped mesa struct. for single-mode fibre transmission expts. at 1.3 μm 87−56132
InP-InGaAsP-InGaAs APD with gain-bandwidth product of 60 GHz, high speed 86−48281
InP-InGaAsP-InGaAs APDs for high bit rate lightwave systems 88−45303
InP-InGaAsP-InGaAs-InP structs., growth by LPE, photodiode appl. *(Japanese)* 88−12009
InP-based integrated optoelectronics, ESPRIT research programme 88−45327
$In_{2-x}Sn_xO_{3-y}$-GaAs photodiodes, design and charact. for MM-wave appls. 87−12313
KCl:Tl colour-centre laser, optical pulse compression in 1.5 μm wavelength using fibre 88−59203
$LiNbO_3$ 32 switch-elements integrated low-crosstalk 4×4 optical matrix switch 86−42359
$LiNbO_3$ 8×8 optical switch matrix, performance as gigahertz self-routing switching node 88−13930
$LiNbO_3$ Z-propag. waveguide polarisation-state controller *(Japanese)* 88−65361
$LiNbO_3$ based electro-optical devices, modelling and BPM calcs. 87−54115
$LiNbO_3$ electro-optic guided-wave modulators for single-mode transmissions 88−33754
$LiNbO_3$ electro-optical polarisation converter/tunable filter, performance study 88−33772
$LiNbO_3$ integrated one-to-four optical switch, time demultiplexer appl. 85−41197
$LiNbO_3$ integrated optic device for endless polarisation control, communication appls. 88−33771
$LiNbO_3$ integrated optic devices for fibre optic communications 88−73963
$LiNbO_3$ integrated optical components for optical communication networks 87−54095
$LiNbO_3$ integrated optical components for optical communication appls. *(German)* 87−18754
$LiNbO_3$ integrated optics, recent developments , review 88−72140
$LiNbO_3$ integrated-optic devices for optical communication 88−13932

optical communication equipment continued
$LiNbO_3$ integrated-optic wavelength multiplexers based on two-mode interference 88−72145
$LiNbO_3$ integrated-optical wavelength multiplexer/demultiplexer for single mode systems 87−76816
$LiNbO_3$ low-insertion-loss tunable WDM 87−74829
$LiNbO_3$ matrix switch, polarisation-independ. 4×4 config., struct. and performance 88−72153
$LiNbO_3$ modulators for high speed digital transmission 88−41688
$LiNbO_3$, optical components for modulation and switching 87−7173
$LiNbO_3$ optical matrix switch for space division switching system 88−22104
$LiNbO_3$ photonic switching devices, state of the art 88−45222
$LiNbO_3$ photonic switching systems, optical routing 88−65532

Nd glass fibre, light pulse compression 85−29587
Nd^{3+} doped fibre laser operating at 938 nm, diode-laser-pumped 87−76738
Nd:YAG laser for coherent communication 87−76792
Nd:YGG waveguide laser amplifiers for fibre-optic communication 87−18952
Nd^{3+}:SiO_2 single-mode fibre laser, diode pumped, CW and Q-switched operation study 86−29096
PLZT high-speed optical switches, epitaxial growth by RF planar magnetron sputtering 85−2090
PbCdS laser, GHz fibre optical communication expts. modulation performance, electron and photon lifetime 88−2277
PbCdTe laser diodes, modulation charact., 1 GHz communication expts. in 3.5-5.5 μm range 86−48422
PbSnTe laser diodes, modulation charact., 1 GHz communication expts. in 3.5-5.5 μm range 86−48422
Si APD in photon counting receiver, shot-noise-limited sensitivity, 50 dB dynamic range 86−48280
Si Fabry-Perot interferometers, micromachining manufacture 87−76752
Si PIN photodiode defects, optical system performance limitations 88−58361
Si active components, reliability considerations in radiation environment 87−74378
Si avalanche photodiode photon-counting receiver, short-noise-limited sensitivity 85−63643
Si bipolar decision circuit for bit rates up to 5 Gb/s 87−46166
Si bipolar transistor, high-speed self-aligned type optical detection up to 2.5 Gbit/s 88−60137
Si monolithic bipolar TDM multiplexer for semicond. injection laser PCM 85−24572
Si monolithic photodetector/amplifier IC for fibre and integrated optics appl. 86−2994
Si multi-gigabit-per-second bipolar ICs for optical fibre systems 88−60148
Si p-i-n photodiode with buried isolation region for short-haul optical fibre communications 87−2030
Si photodiode, input amplifiers props. and realisation data transmission appl. *(Czech)* 87−56705
Si photodiodes for optical communications, steady-state and transient simulations 87−7223

optical communication equipment continued
Si substrate, for new integrated optics structure, appl. to optical communications and interconnects 88−58224
Si-Ge single crystal IR detector on Si chip for fibre links 85−3993
SiN_x film quarter-wave-shifted gratings, fabrication using ECR-CVD 88−14189
SiO_2 optical fibre, hard clad, tapping for short-haul fibreoptic systems 88−26791
SiO_2 silica fibre optical connectors *(Japanese)* 86−58749
SiO_2 waveguides based integrated micro-optic components 88−45210
SiO_2:P waveguides, integrated four-channel Mach-Zehnder multi-demultiplexer 88−72147
SiO_2/TiO_2 dielectric multilayer reflector, CW operation of surface emitting laser 88−45446
SiO_2-GeO_2:Ho very high-rejection optical fibre filters, design and characts. 87−7095
SiO_2-Si edge filter, nonpolarising, for near-IR, prep. for opt. communication systems 88−8026
SiO_2-TiO_2 guided-wave hybrid optical transmitting-receiving module 86−69782
SiO_2-based optical fibres, long-term transmission loss increase in H_2 atm. 88−33641
TeO_2 paratellurite acoustoelectronic devices, impedance matching 87−32815
YIG, FZ growth for magnetooptic devices in fibre-optic communication systems 87−16558
ZrF_4 fibres, properties and appls. 88−58114
ZrF_4-based glass fibres for IR transmission, prep. and props. 86−68299

Si-Ge:H amorphous alloys, triode glow-discharge reactor deposition 86−13797
SiC amorphous film from SiF_2+CF_4 glow discharge decomposition, photoconductivity 85−28241
a-SiC:F(H) films, prep. by magnetron sputtering, props. 87−61022
a-SiC:F,H, glow discharge deposition and in situ doping, optical and electrical props. 86−34380
a-SiC:F,H, glow discharge deposition from SiF_2, elec. and optical props. 86−13805
p-SiC:H amorphous films, photochemically deposited, elec. and optical props., solar cell appl. 85−23457
a-SiC:H magnetron sputtering, H effects on film props. 87−52177
a-SiC:H sputtered films, elec. and optical props., sputtering press. depend. 86−47319
a-SiC:H thin films, magnetron sputtering using methane *(Japanese)* 87−44383
a-SiC:H,B, elec. and optical props., substrate temp. depend. *(Korean)* 87−74035
a-SiC:H,F magnetron sputtered films, prep. and props. study 86−35352
$Si_{1-x}C_x$:H amorphous films, glow discharge deposition and optical props. 85−6012
a-$Si_{1-x}C_x$:H magnetron sputtered fibres, elec. and optical props. *(Japanese)* 86−27891
a-$Si_{1-x}C_x$:H sputtered films, struct., optical and electronic props., RF power depend. 86−7835
a-$Si_{1-x}Ge_x$ films, RF glow discharge prep., elec. and optical props. *(Japanese)* 85−40456
$Si_{1-x}Ge_x$ films, optical band gap, photocond. props. 87−26157
a-SiGe:H alloy films, prep. by glow discharge deposition 86−34396
a-$Si_{1-x}Ge_x$:H sputtered films, struct., optical and electronic props. study 86−27929

optical constants continued
a-$Si_{1-x}Ge_x$:H, structural, electrical and optical props, inferred band struct. 85−34524
$Si_{1-x}Ge_x$:H. amorphous and microcrystalline films, magnetron sputtered, characterisation 86−63061
SiH,B(P) plasma CVD coatings with $(SiH_2)_n$ groups, doping, cond., optical gap control 87−53394
a-$Si_{1-x}N_x$ films, RF glow discharge prep., elec. and optical props. *(Japanese)* 85−40456
Si_3N_4 films, coaxial-line type microwave plasma CVD fabrication *(Japanese)* 86−20107
a-Si_xN_{1-x}, prep., electrical and optical props. 86−35350
$Si_{1-x}N_x$:H amorphous films, microwave glow discharge deposition, two-phase struct. 85−28240
a-SiN_x:H glow discharge films, struct., elec. and optical props., deposition conditions depend. 86−27935
SiN_x:H,B, microcrystalline, wide-gap, RF glow discharge deposition 87−10479
a-SiN_x:H,P(B), photoconductivity, temp. and light intensity depend. 86−63708
SiN_x:P(B)(Na)(Li) films, amorphous, substitutional and interstitial doping 88−25910
a-$SiNi_x$:P(B)(Na)(Li), interstitial and substitutional doping in glow discharge films 88−44644
SiO_2, optical coating ion beam sputter deposition, optical props. and laser damage 85−7199
SiSn:Cl,H amorphous films characts. 88−26933
a-SiSn:Cl,H glow discharge films, photocond. and optical band gap, doping effects 86−27933
a-$Si_{1-x}Sn_x$:H films, reactive magnetron sputtering, physical props. 86−62250
a-$Si_{1-x}Sn_x$:H films, sputtered, elec. and optical props., annealing effects 86−21155
a-$Si_{1-x}Sn_x$:H, phys. props., solar cell appl. 86−1748
a-$Si_{1-x}Te_x$ amorphous alloys, electronic and optical props. 87−1210
SnO_2 films, spray deposition, thermally activated growth rate, elec. and optical props. 85−16960
SnO_2:Br coatings, optical props., solar appl. 88−51421
SnO_2:F films, spray pyrolysis prep., optical and elec. props. 86−35342
SnO_2:F thin films, CVD prepared, optical characts. 86−21170
SnO_2:In, doped and undoped, films, vapour phase spray pyrolysis deposition, characterisation 86−13788
SnS thin films, chemical deposition and optical props. 87−65544
a-Sn_xSi_{1-x}:H films, RF sputtered optical absorption edge and photoconductance, effect of alloying 88−45276
SnTe thin films, synthesis by solid-state reactions 87−52164
Ta_2O_5 amorphous films, CVD and sputtering prep., struct., elec., and optical props. *(Japanese)* 86−475
Ta_2O_5, optical coating ion beam sputter deposition, optical props. and laser damage 85−7199
Ta_2O_5-Al_2O_3 mixed films, MOCVD prep., optical and elec. props. rel. to ion sensitive props. *(Japanese)* 86−26877
TiN films, dry process prep., hue and spectral refl. *(Japanese)* 86−34366
TiO_2, optical coating ion beam sputter deposition, optical props. and laser damage 85−7199
V_2O_5 films, vacuum-evaporated, electrochromic properties 85−41208
$Zn_5In_2S_8$, growth, props. 88−379
ZnO:In films, microstruct., elec. and optical props., film thickness depend. study 87−6380
Zn_3P_2 dominant impurity level, light absorption and elec. cond. studies 85−34530
ZnTe films, ion beam sputter deposited, elec. and optical props. 86−62253
ZrF_4-based IR fibres absorpt. loss reduction 85−56294
n-i-p-i doping superlattices, selective contacts and luminescence props. 88−31806

optical correlation
2D achromatic correlation in polychromatic light *(French)* 86−69142
achromatic optical correlator for white light pattern recognition 88−46204
acousto-, electro- and magneto-optical devices, conf., Los Angeles, USA (Jan. 1987) 88−37810
acousto-optic, time-integrating using photorefractive crystal 86−15532
acousto-optic ambiguity function processor, design, construction and performance 86−29972
acousto-optic correlator, spatial heterodyning of output signal, spatial carrier freq. control limitations study 85−35566
acousto-optic correlator, time-integrating, used for signal detect., detector array effects 85−41225
acousto-optic correlators 86−9641
acousto-optic correlators, spectral analysers, miniaturization, ruggedization 87−46615
acousto-optic multichannel space-integrating correlator, general I and Q data processing 87−7806
acousto-optic signal processor, 2-D time integrating 85−29670
acousto-optic signal processors, polarisation effects 87−12278
acousto-optic time integrating correlator, compact bulk design 86−2889
acousto-optic time-integrating correlator, passive surveillance appls. 86−37941
acousto-optic triple product processor and its applications 87−68231
acousto-optical correlator, optical architecture 88−42014
acousto-optical correlators possible appls. in radiointerferometry 87−34690
acousto-optical processors, transform domain filter effects anal., simulation 87−46619
acousto-optical time-integrating correlator for signal detect. *(Korean)* 87−47926
acoustooptic correlator, general time-, space- and freq.-multiplexed 86−2880
acoustooptic correlator, time-integrating, bandwidth 88−58282
acoustooptic correlators, freq.-multiplexed, space- and time-integrating architectures 85−35560
acoustooptic image correlators 87−38887
adaptive real-time pattern recognition using a liquid crystal TV based joint transform correlator 87−54121
adjustment errors influence on optical information processing system operation 87−69260
AM-FM acousto-optic device for real-time optical correlator 87−12277
analog optical processing and computing, conf., Cambridge, MA, USA (Oct. 1984) 86−13263
analogue acousto-optical correlator for parallel processing of radar signals *(French)* 88−22194

optical correlation continued
anamorphic Fourier correlator, shift and scale-invariant, using multiple circular harmonic filters 86−3961
array logic programming, image data processing 88−65409
associative memories, correlation based, nonlinearity requirements 88−65128
associative memories with correlation nonlinearities, performance anal. 88−65124
associative processor, error-correction coding 87−69247
astigmatic system, random signal processing 87−39873
asynchronous fiber optic local area network using CDMA and optical correlation 88−9564
autocorrelator based on multiphoton ionisation, for UV and visible regions 87−26480
automatic alignment by computer of images affected by random noise 85−19529
beam combiner, photorefractive adaptive, use in crossed acousto-optic cell correlator 88−33834
binary phase correlation filter improvement using iterative techniques 86−3957
binary phase-only correlation, appl. to machine vision 88−59232
binary phase-only correlation on machine vision imagery 87−47991
binary phase-only filter reconstruction using Hughes liquid crystal light valve 87−46598
binary phase-only filters, multiplexing capabilities 87−47874
binary phase-only filters in real-time coherent optical correlation system 88−40046
binary phase-only filters using Fourier and Hartley transforms, optical correlator performance 88−3140
binary spatial light modulator at Fourier plane, joint transform image correlation 88−33804
binary-phase-only-filter for distortion-invariant pattern recognition 88−66659
bipolar joint transform image correlator for multiple object identification 88−59231
capacity of optical correlators 88−59267
circular-harmonic filters, expansion centre determ. and sidelobe level prediction 88−3184
coded-spectrum diffraction interferometry, phase object characts. recognition and imaging 88−52537
coefficient of anisotropy of random field with known correlation function *(Russian)* 88−52522
coherent optical correlator, aperture tapering 85−19490
coherent optical image correlation system, behaviour of binary spatial light modulators 87−47956
coherent optical pattern recognition, review 85−36370
coherent pattern recognition using a two-stage spatialprefiltering procedure 86−30002
coherent-optical correlator with spatial carrier combined modulation 87−39957
color image correlation using a magneto-optic spatial light modulator 88−58276
colour image correlation 87−33759
colour image recognition by spectral-spatial matched filtering 85−25168
colour image statistical pattern recognition filter using incoherent optical correlator 87−69250
colour object identification by monochromatic binary correlation 88−46145
colour pattern recognition, real-time, using correlator, matched filter and spatial light modulator 85−13588
compound rotation-invariant filter using circular harmonic expansion 88−3137
compound rotation-invariant spatial filtering technique 88−33845
computer generated matched filters with spatial frequency tailoring 88−33844
computer-assisted spectrum-resolved SHG autocorrelator for monitoring phase characteristics of femtosecond pulses 87−75219
correlator, programmable microcomputer-based for automatic pattern recognition and identification 86−59336
correlator anal. and improvement 87−62230
correlography algorithm derivation and simulation, Idell-Fienup algorithm modification 88−46254
cross correlation to two images using an all-points-addressable display 85−13593
crossbar signal processor, design 87−13093
deformable mirror device for phase encoding and filtering, optical correlation 88−59268
diffraction grating autocorrelator for single-shot meas. of ultrashort light pulses duration 86−54188
digital correlator, fibre-optic, proposed topologies 87−27603
digital processing techniques for optical correlator systems 85−30487
digital signal processor optical crossbar interconnected, with basic algorithms 86−37141
digital-optical hybrid correlation system from processing aerial stereo photographs 88−34781
distortion invariant recognition using iteratively designed optical correlation filters 87−39940
dye laser, multimode, pulsed, intensity autocorrelation meas. and spontaneous FM phase locking 86−58895
dye laser, multimode CW, mode-correl. times and dynamical instabilities 86−29194
dye passively mode-locked laser, ultrashort pulse shape control and meas. with femtosec. accuracy 85−46438
dynamic frequency plane correlator for image correlation 86−29973
dynamic frequency plane image correlator based on photorefractive nondegenerate four wave mixing 87−62229
dynamic optical cross-correlator using liquid crystal light valve and $Bi_{12}SiO_{20}$ crystal in Fourier plane 85−36377
electro-optic Bragg processors, digital convolution and correlation 85−30300
electroabsorptive CCD spatial light modulator 85−12647
extended optical correlator, discrimination sensitivity 88−13981
fatigue detection based on the change of laser-produced diffraction patterns 88−40411
femtosecond laser pulse charactn. by single shot interferometric autocorrelation *(French)* 88−20727
fibre optic time domain reflectometry sensor, with enhanced signal processing technique 88−33678
fibres, single-mode, birefringent, correlation processing of fluctuating optical waves by optical heterodyne interferometry 88−33638

optical correlation continued
fibres, single-mode and multi-mode, statistical correlation props. *(Chinese)* 88−58068
filter, matched, spectrum shaping for light efficiency 85−46238
filter, synthetic discriminant function correlation, applying phase-only filter concept 85−35575
filter synthesis by iterative technique 87−2575
filters, distortion-invariant, iterative technique for synthesis 87−55265
filters, phase-only and binary phase-only, for threshold detectors 87−26134
filters, rotationally invariant correlation, for multiple images 86−63699
filters for correlation synthetic discriminant functions 86−69103
Fourier transformation incorporation, source emission coherence 88−28002
Fourier-magnitude estimation, accuracy from speckle intensity correlation 88−59221
Fresnel pseudocorrelator, holography based, for signal identification 85−25165
gray scale operation of a multichannel optical convolver using the Semetex magnetooptic spatial light modulator 88−58303
Hewlett Packard Model 8145A OTDR 88−29486
high capacity scanning correlation system, correlation plane displacement anal. 88−27995
holographic, correlator using injection laser, recognition reliability 85−62691
holographic correlator, effect of image inclination on signal 86−48512
holographic correlator, signal parameters, medium nonlinearity and filter spatial limitations effect 87−26562
holographic correlator revealing differences of common features in images 88−65895
holographic encoding filter for correlation *(Chinese)* 88−40043
holographic encoding filter for correlator 88−34166
holographic filter, phase-only, synthetic, for multiobject recognition 88−34168
holographic filters, optimal property 87−39254
holographic fingerprint lock system using optical correlation 88−34171
holographic match filtering with high diffr. efficiency 88−34784
holographic measurement systems, correlation props. 87−47018
holographic processor for recognition of 3D targets viewed from any direction 88−72186
holographic resonator, multiple correlations 88−65131
holographic tandem component, signal processing appls. 86−16496
hybrid cross-correlators, optical and digital, computer simulation 86−29971
hybrid mixer and digital correlator for high precision spectroscopy 88−28068
I and Q data, acousto-optic synchronization and demodulation 87−46617
IC photomask inspection using optical data processing techniques 86−47679
image convolution in real-time using VLSI structures 86−49033
image correlation, effect of additive and multiplicative noise 88−28045
image correlation at low light levels 85−51721
image correlation comparison, input pattern geometric distortions effect 85−46941
image correlation of filter hologram, longitudinal displacement effects 88−14287
image correlation using deformable mirror device 88−41052
image correlation using pulsed dynamic holography, expt. study 87−13060
image correlator, updatable, optimisation 87−62177
image digitisation step, optimum 88−46151
image focusing by correlative methods 88−21296
image information transmission, storage, and acquisition using an acousto-optic cell and optical matched filters 87−13053
image processing, optical median filtering using threshold decomposition 87−26138
image processing at low light levels, Monte Carlo method 86−3941
image processing of object moving at random in front of fixed background 86−59337
image processing techniques, appls. 85−7932
image recognition at low light levels using rotation-invariant filtering 86−64343
image recognition in presence of laser speckle 86−64344
image reconstruction in the presence of noise 88−46253
image registration, power cepstrum and spectrum techniques appl. 88−41004
image registration by phase correlation between boundary maps 87−33742
image sequence, optical flow determ. using pixel-based mutual correlation anal. 88−8853
images similarity measurements in optical correlatorsystems 86−3946
imaging 1D randomly translating object at low light levels using triple correlation 86−49002
imaging correlography with sparse collecting apertures 88−46252
in-plane translation meas. by speckle calculation, using linear image sensor 87−49972
incoherent optical sampled Fourier transforms for pattern recognition and counting 85−36314
inhomogeneously broadened absorbing materials, convolution correlation and storage of optical data 87−46430
integrated electro-optic Bragg processors for digital real-time signal processing 85−46215
integrated laser speckle intensity, clipped correlation dynamic range 88−52529
integrated optical autocorrelation device, single grating 85−12637
integrated optical pattern recognition device, matched spatial filter and correlating device 85−12638
integrated-optic correlator, time integration, Bragg acoustooptic cell, bandwidth study 87−46584
interference filters as nonlinear decision-making elements for associative memories 88−65432
intra-class distortion invariance and discrimination correlation filters 86−10535
joint transform correlator, real-time, using programmable magneto-optic spatial light modulator with liquid crystal light valve 85−57448
joint transform real-time programmable correlator, using magneto-optical device with liquid crystal light valve 85−13608
laser pulse profile meas. using optical processing 85−51235
laser pulses, ultrafast, temporal correlation determ. using optical phase conjugation 85−29917
laser sources for transmission systems, multiport spectral measurements 88−40313
laser speckle in heterodyne detect., correlation scales 85−51449
lensless intensity correlator, scale change and signal rotation *(Chinese)* 88−59199
linear discriminant functions, optimal 86−16532

optical correlation continued
liquid crystal light valve appl. in coherent optical correlator 88−7999
liquid crystal television for optical correlation 88−45227
liquid crystal TV as spatial modulator for optical data processing 87−12270
liquid crystal TV spatial light modulator, distortion correction with real-time joint transform correlator 87−75244
low noise correlation filters construction 87−39944
low noise optical correlation filter construction 86−43289
magneto-optic binary spatial light modulator for optical image correlation 85−25170
magneto-optic correlator, real-time operation 88−40012
magneto-optical spatial light modulator use in optical processors 85−12673
matched filter, adaptive, for detecting signals in nonwhite noise 86−54531
matched filter image correlator appls. to IR, SAR and visual target data 86−16535
medium accuracy optical computing, highly redundant number representation 87−7804
methane gas detection with infrared correlation light detection and ranging (LIDAR) system 88−10597
microcomputer-based programmable optical signal processor 86−65153
microlithography; image processing method for overlay and grid charactn. meas. 88−18519
mosaic image with controllable correlation 88−59195
motion blur compensation of CCD endoscope images by colour deviation method 87−47933
multichannel fast acting phonon correlator *(Russian)* 85−62420
multichannel holographic intensity correlator with quasimonochromatic cathode-ray tube 88−14288
multichannel optical correlator/convolver utilizing the magnetooptic spatial light modulator 87−60987
multichannel optoelectronic processor with correlation-function processing 87−20983
multiclass stochastic images buried in additive noise, classification using optimal correlation filter 87−39904
multimode fibre exits, light beam divergence cross-correlation reduction holographic correction 86−63654
multimode fibres, statistical correlation of optical field, vibr. effect 87−54019
multiple image correlation by binary phase-only code division multiplexing 88−28075
multiple matched filter, simultaneous detection of different patterns by optical correlation 88−8862
multiple matched filter design for character recognition 87−26136
multiple views object detection, in presence of clutter 88−59228
NASA Johnson Space Center, optical correlator development 87−39932
neurocomputer implemented using deformable mirror arrays 88−58321
noncoherent correlations, general anal. based on diffraction theory 85−51705
object identification from images of variable scale 85−25172
object recognition with incoherent holographic correlators 87−69366
optical image correlator, updatable 88−8845
optical sensing off height, speed and attitude from airborne vehicle, correlation-based method 87−71245
optical-logic-array processor using shadowgrams, parallel digital image processing 85−63101
optoelectronic devices, response speed meas., picosecond optical autocorrelation technique 86−48288
parallel array logic system, architecture without memory elements 87−13054
parallel-sequential optical correlator with a photoanisotropic medium 88−59193
parametric down-conversion, normalised intensity correlation function, intensity depend. 85−56811
partially coherent optical correlator with phase defects at input plane, anal. 87−39908
particle image velocimetry, rapid transparency analysis using optical correlation 88−60960
particle imaging velocimetry appl. using magnetooptic device 88−41005
pattern recognition, correlation rotationally invariant filters performance analysis, expansion center choice influence 88−52568
pattern recognition, incoherent OTF synthesis and edge enhancement 85−36313
pattern recognition by auto triple correlation method 88−28046
pattern recognition using 2D nonsymmetrical Fourier transformer 85−57450
pattern recognition with a wavelength-angle multiplexedoptical scanning correlator 86−64351
pattern recognition with binary phase-only filters 85−30295
pattern recognition with correlator using Fresnel hologram and extended source 88−20774
phase distortion, signal depend., in spatial modulator, effect on optical correlator performance 87−62142
phase-dominant spatial light modulators 88−52507
phase-only correlation filter, scaling and rot. sensitivity, computer simulations 85−25169
phase-only correlation filters, direct construction 88−28073
phase-only filters, direct construction 88−26922
phase-only matched filter, noisy, under partially coherent illumination, anal. 88−34778
phase-only matched filter in broad spectral band optical correlator, performance 86−48964
photodetectors, high-speed, response speed meas. using picosecond optical mixing 86−38376
photoelectric schlieren devices with probing beam inversion, signal correlation function and spectrum of medium inhomogeneities 86−48271
photon-counting streak camera for picosecond time-resolved photoelectric correlation meas. of laser field 88−40307
photon-limited image processing 85−57426
photorefractive materials, real time correlation by degenerate four wave mixing 85−51284
photorefractive two-wave and four-wave mixing, polarisation effects, optical correlator 88−2385
picosecond light pulse phase and width meas. by third order correlation function method *(Chinese)* 87−75197
processor using thin-film travelling-wave light modulator 86−16500
programmable real-time incoherent matrix multiplier foroptical processing 86−69099
projection synthetic discriminant function performance 85−25173
quantum-beat laser, negative cross-correlation 88−33913

optical correlation continued
Raman amplifier, phase correlation, pump beam temporal struct. effects 87−12568
randomly moving low-level object detection, algorithm 86−3940
rapid-scanning autocorrelator with extended scanning span for monitoring short optical pulses 88−10148
Rayleigh criteria separation of optical correlation signals 88−3136
real time correlation system for the phase conjugatewavefront 86−3279
real-time coherent correlator using binary magnetoopticspatial light modulators at input and Fourier planes 86−37114
real-time correlator employing US light modulator *(Japanese)* 86−28927
real-time image recognition by partially coherentlight 86−69106
real-time joint Fourier transform image correlation by partially coherent readout illum. 88−3141
real-time noncoherent correlator using liquid crystal television 88−2068
real-time optical correlation processing with $LiNbO_3$:Fe crystal *(Chinese)* 85−46918
real-time pattern recognition using modified liquid crystal TV in coherent optical correlator 86−37115
real-time performance 86−70092
real-time polychromatic signal detection by matched spatial filtering 86−29999
real-time polychromatic signal detection using colour liquid crystal television 87−60986
real-time two dimens. correlation, innovative and compact architectures 86−16530
receiver SNR, light intensity correlations effect 87−70653
recognition of complementary signals using optical correlator system 85−51714
recognition reliability in matched filter systems, improvements 88−46150
reference signal mask and scanning CCD photodetector 85−64157
relaxation method of compensation in an optical correlator 88−21301
response parameters with change of scale and rot. of correl. images 85−51711
robotic vision tray picking system design using multiple optical matched filters 87−39931
robotics, pattern recognition systems appl. *(Polish)* 86−30016
rotating rough surface, image reconstruction, Doppler interferometry 85−57490
rotating rough surface, image reconstruction from projections, Doppler spectra struct. 85−57489
rotation invariant composite filters 87−12288
rotation invariant correlation filters, iteratively designed, expt. use 87−75852
SAR, coherence and speckle reduction in compound correlated phased arrays 87−20626
satellite acquisition and tracking, model-based 88−48275
scale, rotation, and shift invariant image recognition 86−69102
semiconductor injection lasers, meas. of ps. pulses using autocorrelation systems 86−31685
SHG, surface, picosecond pulse duration meas. appl. 85−35855
shift-invariant imaging of photon-limited data using bispectral analysis 85−30352
single mode fibre time domain reflectometer using correlation method at 1.3 μm *(French)* 86−9579
single shot autocorrelator based on degenerate four wave mixing 88−8302
Space Station automation, optical processing 86−65488
spatial carrier representation, multiplication of complex spatial signals 85−36307
spatial holographic filter, correl. signal props. during nonlinear recording 86−36610
spatial light modulator-induced phase distortion and effect on optical correlation 88−33829
spatial matched filtering using holograms on amorphous mag. films *(Japanese)* 88−14308
spatial minimum average correlation energy filters 88−3138
spatial-light modulation, phase correction 88−27997
spatial-spectral scanning optical correlator, large-capacity real-time 86−38295
spatial-temporal correlation filter for in-plane distortion invariance 87−26135
speckle correlation measurements using clipped intensitysignals 85−63081
speckle pattern correlation by photographic means, developments and appls. 88−1187
subpicosecond laser pulse monitoring system using second harmonic spatial autocorrelation method and CCD image sensor 86−15783
support reduction method 88−14785
surface roughness measurement by speckle correlationmethods 87−3761
symbolic substitution using multichannel correlators 88−41006
synthetic discriminant function correlation filter, phase-only filter concept appl. 86−16534
synthetic discriminant function filters, computer-generated and phase-only 87−12285
synthetic discriminant function for image correlator 88−41055
synthetic discriminant function optical implementation, simulation 85−25174
synthetic discrimination function, optical implementation 86−15813
synthetic estimation filters for a control system 88−45263
target recognition and tracing from visible or thermal imagery, optical processing system 85−51745
thin inhomogeneous method, phase conjugation resolving power 87−39217
three plane optical correlation for high speed target recognition 88−73382
three-dimensional object representation and recognition, correl. plane struct., synthetic discriminant function control 85−51740
time autocorrelation of short, single shot, intense X-ray pulses 88−54429
time delay detection utilizing a Bragg cell in a joint transform correlator 88−40025
time domain reflectometry, distributed fibre optic sensing appl. 88−45128
time-integrating optical correlators, coherent differential demodulation 87−47954
tracking nonlinearity of correlator 87−33731
triple correlation as phase closure technique 87−13083
two-bit correlation 86−3956
ultrashort light pulse shape and duration, nonlinear optical register 86−3313
ultrashort light pulses, linear meas. by phase-contrast optical sweep 85−29908
Vander Lugt correlator, appl. to industrial inspection 87−47010
Vander Lugt three plane correlator for optical signal processing 88−66697
VanderLugt correlation technique, sensitivity, grating period change meas. 85−30294

optical couplers
16×16 optical fiber star coupler with waveguide mixer, design principles *(Chinese)* 88−58101
abruptly tapered fibers, nonadiabatic tapers 88−65222
acoustic fiber waveguide coupler 88−58163
acousto-optic edge-coupled surface wave deflector, 500 MHz bandwidth 85−29669
acousto-optic polarisation coupler and intensity modulator for birefringent fibre 86−28930
acousto-optical modulators, HF, as fiber optic couplers 88−39903
active device fibre optic connector system for multi-tap data bus in satellites and VHSIC 87−20579
aerial optical cable joint closure, structural design of fibre organiser *(Japanese)* 88−22122
alignment-tolerant optical fibre tips for laser transmitters 86−2718
all-fiber coupler as 1.3/1.55 micron multiplexer or wide band power splitter 88−7886
all-optical logic devices, guided wave 88−58323
AMP Espanola connectors for communications systems , product range *(Spanish)* 88−71158
anisotropic fiber couplers with nonaligned optical axes 88−39886
anisotropic media, prism-waveguide coupling anal. 86−42277
arrays of coupled waveguides with periodically varying props., charact. mode theory 86−36126
asymmetric fiber optic coupler for LAN applications 88−13863
asymmetric fibre optic coupler for LAN appls. 87−20503
asymmetric multiport couplers, power transfer 88−26834
asymmetrical optical directional couplers with periodic struct., spectral props. 88−2000
automatic mounting and adjustment method *(German)* 86−48124
axially coupled waveguides in integrated optical devices and fibre cables, coupling coeff., calc. *(German)* 85−50942
backward wave, sensors, anal. 87−68054
backward wave couplers and reflectors 88−39916
bandpass filters, co-directional, mode converting, spatially-variant coupling design 87−54151
beam couplers obtained by grinding, charact. 88−3985
beam splitters, fibre-optic polarising, anal. 87−12126
beam transformers for obtaining low-loss splices between dissimilar single-mode fibers 87−54010
beamforming and optical fibre gap devices fabrication 88−65237
bend-branch waveguide structures, radiation-field coupling 85−46130
biconic fiber to fibre rotary optical coupler 88−26806
biconical couplers, single-mode, fused for wavelength diffusion multiplexing, channel spacing between 100 and 300 nm 88−33630
biconical fused taper low-loss fibre coupler, fabrication and charact., temp. meas. appl. 87−26061
biconical taper coaxial coupler filter, charact. and fabrication from single-mode fibres 86−9469
biconical taper coaxial optical fibre coupler 86−4633
biconical taper coupler, multimode, coupling efficiency 85−62328
biconical tapered couplers, automated manufacture and charactn. overcoupled operation 87−68137
biconically tapered fibre star coupler, structure and fabrication 85−46142
bidirectional, active, compact for fibre optic transmission 87−3196
bidirectional optical fibre links *(French)* 86−30832
bidirectional single optical fibre links and components 87−56109
bidirectional transmission at 1.3 μm over single-mode fibre using biconical tapered couplers 85−3444
bidirectional transmission on single-mode fibre using edge-emitting LED and optical couplers 88−47131
birefringent single-mode fibre link with imperfect joints, polarisation noise 85−62338
birefringent-fibre polarisation coupler, output coupler of Mach-Zehnder interferometer 85−2022
bistability, mechano-optical, radiation-pressure-induced 85−29930
bistability by resonant excitation of nonlinear guided wave 88−40354
book, integrated optics theory and technology 86−19721
book, optical fibre communications, principles and practice 85−32966

optical couplers continued
book, optical fibres 87−13
Bragg gratings, curved planar, coupled beam anal. 88−20432
Bragg reflection waveguide coupler with an applicationto light power divider *(Japanese)* 85−50974
branching component for bunched optical fibre using two GRIN rod lenses 87−46474
British Technology Group, fibre optic inventions and patents 85−29540
broadband matrix switches, electro-optic or optoelectronic principles 87−7222
broadband subscriber network using optical star couplers 88−46771
building wiring system with optical fibres 85−14320
buses, multimode optical-fibre, increased power injection through mode-selective coupling, LAN design 85−63665
butt coupling between laser diode and optical waveguide via gap *(Japanese)* 86−42303
bypass switch for network protection 88−15476
cables and passive components for monomode fibre appl. *(French)* 86−9504
calibrated power meters, connector variation errors 88−67987
CCD camera with image intensifier and fibre optic coupling *(Czech)* 87−70463
centering effect in single mode multi-fiber connectors 88−51484
ceramic capillary connectors 85−18656
chalcogenide glass grating couplers, fabrication using electron beam induced Ag doping *(Japanese)* 87−38845
channel switches, extinction ratio degradation due to asymmetry in zero-gap directional coupling 88−20427
channel waveguides, single-mode, coupling constants, nondestructive eval. 88−72149
channel waveguides intersecting at right angle, Bragg grating coupling analysis 87−7174
chirped grating lenses on planar optical waveguides, performance limitations 85−29576
chirped gratings for efficient coupling into nonlinear waveguides 87−68028
CID-MCP detectors for scientific appls., fibre optic coupled 87−20925
circular waveguide, large open-ended, plane wave coupling, rays and modes 88−13925
Clos interconnection network, 2D, for dynamic data communications 88−51632
coaxial, double waveguide single-mode fiber coupler 88−33689
coaxial, mode-cutoff frequencies 85−29597
coaxial coupler, nonlinear, comparison with parallel fibre coupler 88−39976
coaxial optical fibre couplers, influence of eccentric deformations *(German)* 87−34556
coaxial waveguide coupling, influence of temp. and mechanical stresses 88−20412
coaxial waveguides, optical convertor based on controlled coupling 85−2031
Codestar passive fibre-optic star coupler for Ethernet 86−16885
coherent detection in optical systems, channel capacity and power budget 88−60129
coherent nonlinear coupler, power-depend. switching in presence of saturation 88−2021
coherent nonlinear directional coupler, power depend. switching in presence of saturation 87−68026
coherent optical 10 channel wideband transmissions with optical transient wave amplifier *(German)* 87−28595
coherently coupled optical waveguide bends, theoretical analysis 85−1970
collision detection method and small loss-deviation star coupler for CSMA/CD star transmission system 86−11118
colloquium, advanced fibre waveguide devices, London, England (May 1986) 86−45957
combination lens method of coupling laser diode to single-mode fibre 85−35390
combinatorial star couplers for single-mode optical fibers 85−12630
commercial fibre optic components 88−58130
communications appl., optical devices use *(Japanese)* 85−37076
commutation devices using gradans for fibre optic communication lines, parameter meas. 87−54035
component reliability considerations for fiber optic communication systems 88−4021
components, passive made using fused-head-end method, progress 88−13883
components for multimode fibre-optic networks, manufacturing technique 86−63634
components for optical submarine repeaters *(Japanese)* 88−41489
components reliability, for submarine system *(Japanese)* 86−11063
computer coupling using volstrons 88−65206
concatenated fibre couplers, mode transmission matrices for total loss/attenuation calc. 85−42579
concatenated fused-taper couplers as all-fibre wavelength filters, theoretical and expt. study 85−29559
concatenated tapered coaxial couplers, narrow passband filter synthesis 86−48195
concatenated tapered coaxial couplers as all-fibre wavelength filters 87−54148
concentric fiber optic termini for MIL-C-38999 series IV connectors 88−7852
conference, Cambridge, USA (Sept. 1986) 88−11561
confocal combination lens method for laser diode module using single-mode fibre 86−2716
connector, epoxyless polishless plastic, for multimode fibres 87−12196
connector, high-precision, for test and instrumentation 88−7855
connector loss and reflection coefficient variations with wavelength 88−39933
connector with spherical-ended fibres *(Japanese)* 87−46494
connectorised optical cable with 1000 fibres, design and characts. *(Japanese)* 88−22123
connectors, miniaturisation demands 88−38829
connectors, splicers and splitters of high-precision *(German)* 86−23865
connectors for optical fibres *(Italian)* 86−9480
connectors for singlemode fibres, manufacturers face up to user demands 85−18693
connectors for subscriber cables 87−34592
connectors for VLSI chips to replace hardwire 87−38954
connectors in LED systems, mode mixing effects 87−12186
connectors with low insertion loss 85−56289
core centering for optical fibre connectors *(German)* 88−7917
corrugated waveguide diffraction gratings in integrated optics, TE-TE and TM-TM coupling coeffs. 87−12236

optical couplers continued
corrugated waveguides with rectangular tooth shape, coupling coeff. exact derivation 85−7250
coupled laser cavities, coupling coeffs. 86−42599
coupled mode theory 87−38748
coupled mode theory, optical switches 88−7933
coupled single-mode fibre communication links 87−49065
coupled-cavity lasers, coupled-mode theory, exact formulation 88−34066
coupled-cavity lasers, coupling coeffs. 87−39163
coupled-mode equations, generalised, appl. to fibre couplers 86−36145
coupled-mode equations for guided modes in two parallel waveguides 87−54011
coupled-waveguide interferometers and directional couplers, modulation diagrams 88−51528
couplers, tunable single-mode fibre, anal. 86−48099
cross power and crosstalk calc. 88−33725
crossbar N×N switch for quantum confined Stark effect, insertion loss 88−2051
crosstalk elimination in optical directional couplers 85−24264
curved dielectric rib waveguides, cross-polarisation coupling 88−58188
curved planar Bragg gratings, coupled beam anal. 87−75522
cylindrical step-index fibre with spherical lens excited with GaAs lasers *(Chinese)* 85−29564
D-fibre polarisers and polarisation maintaining directional couplers, spliceless components 88−45101
data bus, fibre optics, using FDM and asymmetric coupler 85−8395
data link for plastic fibres *(Japanese)* 88−41661
data links broadening fibre optical appls. 88−28833
degenerate coupling between dielectric waveguides 86−22092
delay lines, fibre, diode-pumped recirculating ring 88−65283
demountable connectors for fibre optic components and systems 85−46158
demountable multi-fiber connectors for optical waveguides 87−38835
densely spaced WDM coherent optical star network 87−76737
depressed-cladding multiple-fibre couplers, fundamental-mode cutoff 85−1987
desorption, light induced, bistability mechanism in integrated optical devices 87−33316
developments in connector technology *(French)* 88−12685
DFB laser devices, 1.55 μm,. fabrication and performance, fibre coupling 88−65717
DFB lasers, line narrowing, external fibre resonators 88−58599
dielectric tapers with curved axes and no loss, exact theory 85−50983
dielectric/semiconductor guided-wave bistable devices, periodic coupling 87−33318
digital incoherent optical interconnections 87−49080
digital optical computation of algorithms of high regularity 88−2408
dimensions meas., using He-Ne laser and CCD camera 88−45086
diode DFB laser, single mode fibre coupling module with optical isolator for high bit rate modulation 86−42568
diode laser and photodetector packages for microwave optical transmission 88−24570
diode laser array, coupling with optical fibre 86−22083
diode laser arrays, coupling with photorefractive passive phase conjugate mirrors 87−61134
diode laser mode analysis and alignment with precision piezoelectric instrumentation 85−19001
diode laser to fibre coupler, construction and investig. for a modulation range up to 400 MHz *(German)* 85−46387
diode-laser array, grating-surface-emitting, stable 0° phase mode operation 88−45431
DIP type single mode laser modules 88−27163
directional, crosstalk and switching characts. 88−45179
directional, nonlinear, coherent, with saturable index changes, numerical anal. 88−33733
directional, three parallel waveguides, coupled-mode anal. 85−12582
directional, typical of electron beam writing techniques, accurate anal. 86−48131
directional, wavelength-selective coaxial optical-waveguide type, anal. *(German)* 86−36213
directional coherent coupler, nonlinear, instabilities, all-optical phase-controlled switching 87−7435
directional coupler, coherently mismatched, nonlinear nonreciprocity 87−7074
directional coupler, electro-optic on III-V semiconductors, design with beam propagation method 88−2019
directional coupler, fibre-film single mode 87−46478
directional coupler, light self-switching theory 85−2028
directional coupler, optically controlled fibre optic, perturbation anal. for design 86−48197
directional coupler, polarisation splitting type, design and anal. 88−65295
directional coupler, polarisation-preserving, appls. 87−1961
directional coupler, wavelength selective made of nonidentical single-mode fibres 86−42338
directional coupler and connecting device for fibre optic local area networks 85−8393
directional coupler modulators designed for analog modulation of large signals at 810 nm 88−7986
directional coupler resonators as guided-wave optical components 87−60894
directional coupler switches, $\Delta\beta$ phase reversal, crosstalk characts. 87−12238
directional coupler switches, reversed-$\Delta\beta$, crosstalk 88−33721
directional coupler with grating overlay 85−29641
directional coupler with two level saturable nonlinearity 88−45554
directional couplers, anal. by scalar variational mapping technique 86−58761
directional couplers, configs. operation and appls. *(French)* 86−68279
directional couplers, coupled mode equations 87−25939
directional couplers, forward and backward coupling, bandwidth formula 88−26849
directional couplers, grating-assisted, made of nonidentical asymmetric slabs 87−46479
directional couplers, integrated optical with asymmetrical feeding waveguides, crosstalk 86−2813
directional couplers, nonlinear optical, beam propag. anal. 86−68271
directional couplers, WKB anal. and appl. to optical switches 88−72104
directional couplers, Y-fed multisection switching characts. and broadband modulation 88−58205
directional couplers for LANs, parallel single-mode/multimode fibres config. wave coupling study 87−18627
directional couplers made of nonidentical asymmetric slabs 87−32967

optical couplers continued
directional couplers with gain or loss anal. and appl. to semiconductor slab dielectric guides 87−18644
directional couplers with two level saturable media, parameter tradeoffs 87−74727
directional energy transfer systems, coupled-wave method 85−35536
directional for strictly nonblocking 8×8 integrated optical switchmatrix 86−63685
directional optical couplers *(Italian)* 86−48088
directional-coupler filter using dissimilar opticalfibres 85−62292
directional-coupler wavelength filters made of dissimilar single-mode fibres, bandwidth 87−38740
directory of optical sensor components 86−36111
discontinuity anal. in optical waveguides *(Japanese)* 87−74799
distributed Bragg mirrors, surface light wave emission 85−12645
distributed-index planar microlens and stacked planar optics, coupling of optical fibres 87−18743
domed LED coupling with multimode step-index optical fibre 87−18855
doublecore optical fibres, propagation props. 87−74756
DPSK 565 Mbit/s coherent transmission expt. with phase diversity receiver 88−47164
drawn fibre tapers with spherical microlenses, fabrication and performance 86−22132
dry fit fibre connector 85−14241
dual-channel directional couplers, variational anal. 88−39970
dual-fibre optical rotary joint using GRIN lenses and rhomboid prisms 86−22112
dual/multi-channel graded index lens fiber-optic coupling 85−35470
duplex optical fibre systems, receiver penalty calcs. 88−4039
edge-emitting LED coupling to single-mode fibre, efficiency and sensitivity 88−1956
EHF wideband phased-arrays, fibre optic components appl. 88−72690
electrically variable couplers for integrated optical circuits 88−58217
electro-mechanical and electronic relay devices, appls. 87−11108
electro-optic directional coupler switches, crosstalk due to reversed-$\Delta\beta$ electrode misalignment 87−12221
electro-optic directional coupler switches, operation and design for optical communication system appl. *(Spanish)* 88−13941
electro-optic light modulator, prism coupler performance 88−58242
electro-optic monomode fibre devices with liquid crystal overlays 88−65221
electro-optical tunable filters for WDM optical communication systems, design criteria and charact. *(Spanish)* 88−60160
electro-optical waveguide modulators for high speed diagnostics 88−7985
electromechanical optical scanner, optical fibre coupling 88−58136
electrooptic integrated waveguide modulator for picosecond optical pulse generation 88−2050
electrooptic modulators, digital and quasi-linear, synthesized from directional couplers 87−26080
embedded dielec. optical waveguides and directional couplers *(Japanese)* 88−65334
environmental characterisation of fibre optic hardware, fibre optic connector evaluation, report 85−63703
evanescent couplers, polarisation properties 88−58108
evanescent-wave couplers for single-mode optical fibres 86−36118
expanded beam lens connector for harsh environments 85−12631
F-1.6 G system, optical coupling components *(Japanese)* 87−56115
fabrication, using lithography and etching *(Japanese)* 85−56316
FDDI connector, evolution 88−35176
FDM-FSK star network with a tunable optical filter demultiplexer 88−3972
fiber attachment for guided wave devices , review 88−72021
fiber connector of physical contact using glass capillary 88−33699
fiber devices using polarization-maintaining fibers 88−7869
fiber distributed data interface, ANSI X3T9.5, duplex connector system 88−15478
fiber optic busing scheme in optical communications 88−67431
fiber optic communication technology branching devices, tutorial review 85−50961
fiber optic components for communication applications 87−76811
fiber optic connector types, overview 85−35437
fiber optic coupling system 88−33701
fiber optic data bus, performance 88−67438
fiber optic devices and integrated optics *(Japanese)* 88−2035
fiber optic Ethernet in the factory automation environment 88−41342
fiber optic polarisation controlled recirculating delay line filter and its phase induced intensity noise 88−65272
fiber optic pulse sequencers/desequencers 88−15477
fiber optic switching coupler with electro-magnetic command for hostile environment 88−13867
fiber-optic electronic coupling and packaging technique suitable for VHSIC appls. 86−30802
fibre, beam-expansion systems role in optical data highways 85−14280
fibre, birefringent polarisation-maintaining, mode coupling distrib. meas 87−18668
fibre, charactn. and prediction of crossover wavelength and bandpass in fibre directional couplers 86−63613
fibre, endfaced multi-clad, coupling from misaligned Gaussian beam 86−9506
fibre, fused biconical-taper single-mode, power transfer, external refractive index depend. 85−29524
fibre, polarisation maintaining coupler with ultra-low-crosstalk 88−65271
fibre, polarisation-holding, elasto-optic alignment of birefringent axes 86−63670
fibre, single-mode, evanescent coupling with high-index medium of infinite thickness 86−63667
fibre, single-mode with wide acceptance angle, design using flat disc lens 87−26013
fibre, two-core, wavelength-selective coupling, appl. and design 85−24301
fibre access coupler, modal independent, and related batch production technology *(French)* 86−9569
fibre and cable, history, props., design and appl., handbook 88−55810
fibre cable and associated components for broadband subscriber loops, design 88−47081
fibre cable connection and loss meas. methods *(Japanese)* 87−26049
fibre cable systems for emergency use 88−13874
fibre cables installation, splicing and multiplexing methods *(French)* 87−34566
fibre capacity increase by optical directional coupler use 88−67435
fibre communication techniques, review *(German)* 87−13717
fibre communications and computer networks, conf., Cambridge, MA, USA, (Sept. 1986) 87−65040

fibre coupler, polished, electrically tunable 88−65278
fibre coupler, tapered, fused, optical charact. while undergoing fabrication 87−53949
fibre coupler fabrication method with automatic fusion-elongation processes 87−68091
fibre coupler for fibre optic temp. sensor 85−62367
fibre coupler polarisation-preserving, stress distribs. in cross section 86−42236
fibre coupler/connector testing, instruments and techniques 86−15449
fibre couplers, 3×3 type; meas. method for optical phase shift determ. 88−33608
fibre couplers, connectors and splice technology, conf., Arlington, VA, USA (May 1984) 85−5626
fibre couplers, crosstalk scalar theory for unequal cores 88−39887
fibre couplers, design and charact. for communication appls. *(Japanese)* 85−42595
fibre couplers, design for fibre-optic gyroscopes *(Japanese)* 85−7260
fibre couplers, directional single-mode graded-index, anal. 85−41141
fibre couplers, encapsulated, WDM 88−65279
fibre couplers, long tapered type, polarisation modulation study and propag. 85−46143
fibre couplers, mass-fabrication process using arrayed fibre ribbons 88−72018
fibre couplers, polarisation preserving single-mode, reproducible fabrication method 88−72024
fibre couplers, radiation losses 85−41139
fibre couplers, single- and few-mode, modal cutoffs 85−41144
fibre couplers, single-mode fused tapered, core effects 87−54029
fibre couplers, single-mode fused tapered, simplified design equation 87−12188
fibre couplers composed of unequal cores 87−12115
fibre coupling losses meas., CCD image sensor appl. *(German)* 86−68250
fibre devices, conf., London, UK (June 1988) 88−62904
fibre devices for optical fibre sensors, review 88−65268
fibre devices using polarisation-maintaining fibres 88−13805
fibre directional, polarisation selectivity 86−9517
fibre directional coupler, evanescent, effectively nonreciprocal 85−29553
fibre directional coupler, polarisation-selective 86−22124
fibre directional coupler splicing for duplex communication 87−28549
fibre ends, positioning and treatment *(French)* 87−68116
fibre fused couplers, finite element anal. 86−63614
fibre fused directional couplers function over broad range of wavelengths 88−65182
fibre fusion splice discontinuities finite-element anal. *(Japanese)* 86−29538
fibre fusion splices, allowable loss in multispliced links *(Japanese)* 86−9527
fibre graded-index-rod components, coupling losses 88−26795
fibre half-couplers, polished, directional with variable refractive index overlays 88−33659
fibre hybrid for optimal signal power utilization in communications 88−7846
fibre interferometer with 4×4 coupler quadrature outputs 87−18667
fibre junction loss, anal. with appl. of phase space diagram *(German)* 85−50945
fibre link, single-mode birefringent with imperfect joints, polarisation noise 85−56337
fibre matrices, channel selective for high density WDM systems 88−65281
fibre Michelson interferometer, coherence determ. of single freq. semicond. laser 87−74710
fibre mode field transformer between dissimilar waveguides 87−25972
fibre nonlinear couplers, two-core dual polarisation, coupling instability and power-induced switching 88−33654
fibre nonlinear directional couplers, soliton switching 88−72041
fibre optic, automatic polarisation spectral response meas. systems 88−20390
fibre optic, LAN, active star coupler 88−3541
fibre optic, using plastic fibre, low-cost fabrication technology and loss performance 88−39923
fibre optic and laser sensors, conf., Arlington, VA, USA (May 1984) 85−22054
fibre optic based position sensing on aircraft, time and wavelength division multiplexing 88−48276
fibre optic cable and cabinets design for LANs *(Japanese)* 85−58089

optical couplers continued

fibre optic connectors, cost and standards solns. 85−29562
fibre optic connectors, developments 87−74715
fibre optic connectors, low loss or low cost tradeoff 85−14258
fibre optic connectors, optical component specifications 87−38797
fibre optic connectors, review *(Japanese)* 88−26805
fibre optic connectors and splices, test conditions 85−12554
fibre optic connectors for high power laser energy transfer in ordnance systems, development 87−18738
fibre optic connectors for LAN applications; evaluation 88−13871
fibre optic connectors with spherically convex-polished ends, connection stability *(Japanese)* 87−54065
fibre optic coupler, fused biconic taper, environmental performance 87−12179
fibre optic coupler, WDM, 12-channel Littrow-type, anal. 87−12180
fibre optic coupler for polarisation interferometer for temp. sensing, fabrication 86−9525
fibre optic coupler technology *(Dutch)* 88−3982
fibre optic coupler technology, recent advances 88−13857
fibre optic couplers 87−12175
fibre optic couplers, appl. to diagnostic expt. at Nevada Test Site 87−12177
fibre optic couplers, connectors and splices, conf., San Diego, CA, USA (Aug. 1985) 87−9999
fibre optic couplers, fused, mass production 87−12192
fibre optic couplers, single-mode polarisation maintaining 87−12190
fibre optic diode-pumped recirculating-ring delay line 88−51443
fibre optic directional coupler, polarisation preserving 87−12173
fibre optic directional couplers, biconical taper technology and device appls. 87−12187
fibre optic directional couplers, single-mode 88−13804
fibre optic directional couplers, single-mode asymmetrical tunable wavelength-selective with intermediate layer 87−25997
fibre optic fanout connector for fibre-ribbon cable termination, struct. design 87−60946
fibre optic high perform. field terminable expanded beam connector for harsh environments 88−45108
fibre optic holography with fringe stabilisation and tunable object and reference beam intensities 88−14304
fibre optic interconnects, reliability 87−74790
fibre optic interferometric electrically tunable filter using the thermo-optic effect 87−18793
fibre optic linear data bus for aircraft appls. 88−41675
fibre optic liquid-level sensor, design and appls. 86−53976
fibre optic loops, performance parameters 88−9610
fibre optic low loss tunable coupling ratio multiple tap network perform. 88−47062
fibre optic Mach Zehnder interferometer devices, tunable coupler and filter 86−48199
fibre optic monomode bus, noninvasive collection and distrib. of data 87−48614
fibre optic monomode wavelength division multiplexer/demultiplexer 87−13730
fibre optic multichannel off-axis passive bidirectional rotary joint 88−72061
fibre optic nonlinear coherent coupler 88−1935
fibre optic passive loop resonator gyroscope, depend. on resonator parameters and light source coherence 85−56321
fibre optic polariser and polarising couplers, theoretical/expt. study and realisation 88−65175
fibre optic power divider, 3-dB fabrication for sensor appls. 87−68077
fibre optic proximity probe, theoretical and expt. anal. 85−24283
fibre optic pyrometric sensor for high-temp. meas. 87−29341
fibre optic remote sensing of temp. using interferometric techniques 88−1996
fibre optic rotary connector 88−72004
fibre optic rotary connectors, slip rings 88−45109
fibre optic rotary joint design and miniaturisation 88−47126
fibre optic sensor, multiplexing techniques overview 88−45126
fibre optic sensors, extrinsic, for remote meas., impact on meas. techniques 87−7148
fibre optic sensors, interferometric, using 3×3 integrated optic polariser/splitter 88−67866
fibre optic sensors, waveguide couplers, fabrication by ion exchange 87−35047
fibre optic single mode Y-type directional couplers for narrow spectral linewidth analyser 88−45102
fibre optic sources, high reliability packaging 87−74787
fibre optic star coupler appl. to increase signal dynamic range 85−35421
fibre optic star coupler with high output uniformity *(French)* 86−9570
fibre optic star couplers design and charact. for optical fibre LAN *(Japanese)* 85−56290
fibre optic system advanced components 87−68143
fibre optic systems, low cost components, development 88−35539
fibre optic systems, polarisation splitters and birefringent couplers 85−18686
fibre optic systems, review 87−68138
fibre optic systems, single-directional and two-way communication configs. 85−12555
fibre optic systems for mobile platforms, conf., San Diego, CA, USA (Aug. 1987) 88−37817
fibre optic termini, military spec. 88−7851
optical couplers continued
fibre optic thermally controlled switch 88−33686
fibre optic WDM coupler, six channel LED Littrow-type 87−12181
fibre optical networks, single-mode, effect of modal noise 88−41667
fibre optics, conference, London, England (May 1984) 85−27911
fibre optics appl. in coal mining 85−31023
fibre optics coupling to downhole imaging camera, underground nuclear testing expts. appl. 88−33676
fibre optics in adverse environments, conf., San Diego, CA, USA (Aug. 1984) 85−32880
fibre passive star couplers, reflective, single-mode 88−39882
fibre pigtail for coupling of laser diodes and LEDs to flat dispersion quadruple clad monomode fibres 86−42345
fibre plug connector with LED transmitter, config. and assembly aspects *(German)* 86−36138
all fibre polarisation beam splitter/combiner using low birefr. fibre, fabrication 85−41185
all fibre polarising beam splitter and spectral filter 85−41184
fibre power meters, potential errors in use 88−39930
fibre ring resonator, direct-coupling single-mode 88−72355
fibre ring resonator, low loss 85−24291
fibre ring resonator using ultra low loss directional couplers 85−35404
fibre splice accommodation structure for optical cable joint *(Japanese)* 86−11096
fibre splices, multimode graded-index and GRIN rod lens couplers, misalignment losses 85−35389
fibre splices and connectors, book 87−10019
fibre splicing techniques involving crimping *(German)* 87−68038
fibre star coupler, biconically tapered, fabrication 87−60916
fibre substrates and couplers, core proximity meas. 86−2764
fibre switching elements, displacement of fibre ends *(German)* 88−33615
fibre taper, parabolic model for shape 86−2658
fibre tapers, monomode, wavelength-dependent transmission 85−35384
fibre tapers, single-mode, loss mechanisms 86−63638
fibre technology for commercial and industrial activities *(Spanish)* 88−22114
fibre termination and polishing, response to stresses 88−39956
fibre transmission systems, optical and optoelectronic devices appl. 88−35487
fibre wavelength-selective directional couplers using dispersive materials 88−33662
fibre-optic branching coupler for large core PCS fibres 87−32925
fibre-optic cable terminations and interconnection methods 85−62291
fibre-optic components using periodic coupling, description 86−2697
fibre-optic coupler for direct connection of optical fibers to integrated circuits 87−46586
fibre-optic coupler for VLSI interconnects 86−28850
fibre-optic devices for an optical fibre communicationsystem *(Japanese)* 85−58106
fibre-optic devices for LAN appl., review 85−62311
fibre-optic directional coupler, optically controlled, perturbation anal. for design 86−68274
fibre-optic directional coupler for wavelength multiplexing 85−63637
fibre-optic duplex connecting plug with integrated transmitter/receiver, design and installation *(German)* 87−13700
fibre-optic integrated optical humidity and gas sensors 85−62370
fibre-optic interferometer tunable switch using the thermo-optic effect 85−46141
fibre-optic LAN systems, selection of sources, detectors and couplers 85−42567
fibre-optic modal coupler using periodic microbending 86−36186
fibre-optic passive components for communication systems, review 86−48150
fibre-optic polarisation interferometer for temp. sensing using polarisation rotating coupler 85−62365
fibre-optic polarising beam splitter using birefringent coupler, design and charact. 85−46132
fibre-optic recirculating delay lines, laser phase noise, effect on coupler and loop losses 85−41138
fibre-optic ring resonator, novel type, for wavelength selective transmission 87−53982
fibre-optic single-mode connector, expanded beam 88−72009
fibre-optic star coupler, 9×9 single-mode 85−24310
fibre-optic star couplers for appl. to FOAM expts, evaluation 85−50923
fibre-optics, single-mode, coupler, demultiplexing 87−74750
fibre-photodiode coupling, self-aligned flat-pack assembly 88−67342
fibre-waveguide interconnection technology 88−1953
fibres, abruptly terminated, single-mode, coupling anal. 88−72039
fibres, anisotropic polarisation maintaining coupled modes anal. 88−33626
fibres, coaxial directional coupling 86−22128
fibres, connection techniques *(Polish)* 87−12207
fibres, EM fields at facets 87−54630
fibres, multimode, comparison of optical systems for injection improvement *(French)* 85−29593
fibres, multimode, mode coupling coeff. determ. using nondestructive single pulse reflection technique 86−2817
fibres, polarisation-maintaining, mode couplings due to external forces, eval. 88−26750
fibres, single-mode, asymmetric fused-tapered, power splitting ratio control 88−72043
fibres, single-mode, tapering 87−18625
fibres, single-mode and few-mode, phase velocity meas. using prism output coupling 86−28849
fibres, single-mode connection to high-silica waveguide with fibre guiding-groove 88−26774
fibres, spliced, polarisation preserving, polarisation-mode-coupling meas. using backscattering technique 85−56325
fibres, step-index, fabrication by downward axial vapour deposition, mode coupling 85−50922
fibres, two-core low-loss birefringent single mode optical fibres 85−24300
fibres connector reflection reduction methods using index matching materials *(Japanese)* 86−36140
fibres in compact fibre ribbon, coated, coupling 86−48111
filters, coupler-type grating, contradirectional, anal. 86−2849
finite-element solution of integrated optical waveguides 85−12641
fire feedthrough switching technique, cross-point switch appl. 85−7251
flat waveguide, dispersion, integral visualisation *(French)* 85−2023
flexible fine ferrule for optical fibre connectors 88−58161
focusing grating coupler, high-performance, fabricated by electron-beam writing 85−2081

optical couplers continued
focusing grating coupler, modeling using vector scattering theory 88−33708
focusing grating coupler, physical optics anal. 88−33706
focusing grating coupler design method using holographic optical elements 88−33707
focusing grating coupler in integrated-optic disk pickup device, aberration charact. 88−13928
focusing grating couplers for polarization detection 88−72097
for remote meas. 88−67857
force sensors and weighing systems, coupled by beam waveguide *(German)* 87−70617
FORJ rotary joint for light guide coupling *(German)* 88−65184
four-port fibre-optic ring resonator 88−51447
Fredkin gate array as high-efficiency optical interconnection network 87−62143
free electron IR laser, broadband optical cavities, acousto-optic output coupler 85−2358
free space intrachip optical interconnect technology 88−51703
fused biconical monomode directional couplers, power transfer wavelength selectivity control 87−25920
fused coupler anal. by effective-index method 87−12113
fused couplers, characterisation for multimode optical fibre systems 85−35463
fused couplers, low-loss, overcoupled, fabrication and sensitivity 88−65262
fused couplers of arbitrary cross section, simple expressions 86−9477
fused D-fibre couplers 87−12189
fused fibre couplers, environmental testing 88−45119
fused fibre couplers, practical model 88−65274
fused fibre couplers, transmission charact. and wavelength depend. study for WDM networks 86−36148
fused fibre couplers with parabolic taper shape, analytic coupling model 88−7848
fused fibre in-phase/quadrature measuring multiport 86−2685
fused fibre WDM couplers for multiplexer/demultiplexer devices 88−65280
fused single-mode fibre couplers, modelling 85−46134
fused taper couplers, depend. on external refractive index, theoretical and expt. study 87−12112
fused taper couplers for singlemode propagation 86−48082
fused taper/filter hybrid single-mode wavelength division multi/demultiplexer 88−33716
fused tapered birefringent-fibre coupler, polarisation splitting charact., anal 88−1929
fused tapered couplers, condition for insensitivity to external refractive index 87−38735
fused tapered couplers reliability 87−74788
fused tapered couplers variational analysis; 86−9472
fused tapered optical fibre couplers, overview 88−45097
fused-fibre coupler as quarter-wave device, polarisation charact. in 1.55 μm wavelength region 87−12114
fused-fibre-array structure, appl. to polarising directional coupler 85−2051
fused-taper single-mode fibre couplers, polarisation beam-splitting and combining charact. 86−53959
fused-taper single-mode fibre couplers, spectral response meas. of polarisation ratio 88−3981
fused-tapered asymmetric single mode fibre couplers, behaviour 88−65275
fusion splicing between deposited silica waveguides and optical fibers 85−35451
gain-switched pulse-compressed DFB laser diodes for optical waveform sampling 87−41619
Gaussian beam alignment, coupling between semiconductor laser and single-mode fibre 85−18640
Gaussian couplers for unstable resonators using Gaussian mirrors, large-size Gaussian mode 86−9900
Gaussian reflectivity mirror optical resonators, output beam charact. 85−12890
glass couplers for integrated optics 86−15482
glass fibres, optical switching expts. 88−65839
glass fibres, parallel, near-field light scattering 88−13788
glass waveguides, semiconductor-doped and ion-exchanged 87−25936
gradient index lens for low-loss coupling of laser diode to single-mode fibre 87−18585
gradient index rod lens appl. to low loss coupling of laser diode to single mode fibre 86−42344
gradient microlenses produced by electrically stimulated diffusion method *(Russian)* 85−1968
gradient optical fibres, splice attenuation *(German)* 87−1959
grating beam splitter and polariser, 2-D, coupling, splitting and polarisation of guided waves 86−2844
grating coupler, two-beam coupling into planar waveguide study 87−46551
grating coupler in Pockels light modulator, fast, using guided wave resonance 85−56365
grating coupler on optical fibre 87−12182
grating coupler/demultiplexer for fibre optic LANs using WDM 87−18724
grating couplers, anal. by equivalent current theory 85−35474
grating couplers for diffused waveguides in electro-optical crystals 86−63665
grating couplers for planar dielec. waveguides 85−56315
grating couplers in planar waveguides, analysis for oblique incidence waves 85−29571
grating structures in integrated optics 85−56360
grating-fibre coupler as high-resolution spectrometer 85−46172
gratings in nonlinear optics and optical bistability, coupler realisation 85−56791
GRIN, speckle and modal noise techniques for coupling 87−12133
GRIN fibre lenses, eval. and anal. 88−13815
gRIN lenses for high efficiency coupling of laser diodes to single mode fiber, review 88−1955
GRIN lenses for high efficiency coupling of laser diodes to single mode fiber 88−33618
GRIN rod lens coupler, angular tilt misalignment loss 86−58741
GRIN rod microlens-fibre system for light scattering meas. 88−10017

LAN, fibre-optic, passive, using burst TDMA scheme 85−63661
LAN, low loss optical fibre system and cost optimisation 88−67436
LAN appl., integrated optical fibre datalink transmitter/receiver 85−13962
LAN optically switched, based on transmissive single mode optical star coupler 86−43589
LANs, fibre optic technology appl. 86−30840
LANs, optical couplers and multiplexers *(Spanish)* 87−49104
LANSTAR, monolithic coupler/monitor 85−14318
lapped polarisation-maintaining fibre resonator, develop. and invest. 88−65254
laser and single-mode fibre far field power meas., two dimens., high ang. resolution and dynamic range 87−46529
laser beam splitter, adjustable, appl. as output-coupling device 85−62638
laser cavities employing multipass grating interferometers as output couplers, spectral characts. 88−14234
laser diode and polarisation maintaining fibre coupling by gluing *(German)* 88−45090
laser diode array, injection locking and single-mode fibre coupling 87−54303
laser diode coupled to $LiNbO_3$ chip using optical isolation by orthogonal polarisation, stable operation 88−1985
laser diode module for single-mode fibre based on confocal combination lens method 87−12129
laser diode to multimode fibre coupling, calc. 86−48116
laser diode to multimode fibre coupling, using plano-convex GRIN lens 87−68019
laser diode to single-mode fibre coupling with high efficiency and low optical feedback *(German)* 85−46150
laser diode-single mode fibre coupler high coupling efficiency and low feedback effect 86−9536
laser emitting short pulses, efficiency of coupling out radiation from resonator 86−22433
laser output coupler based on a radially variable interferometer 87−75186
laser package, low-cost connectorised, 1.3 μm, design parameters for subscriber loop using graded-index lenses 87−54309
laser package design, high performance 88−51473
laser package with GRIN lenses for local loop appls. 88−51474
laser resonator, unstable with phase-unifying coupler 88−34064
laser spectral noise meas. technique 88−68049
laser to single-mode lightguide connecting element 88−13838
laser waveguide resonators, single-mode, coupling loss theory 85−46425
laser-diode to multimode-fibre coupling, calc. method 85−56295
laser-diode/multimode-fibre coupling analysis using a planoconvex GRIN lens 87−18616
laser-taper coupling, influence of high-index micro-lens 86−48148
laser-to-fibre couplers in optical recording applications 88−45111
laser-to-fibre coupling, low loss, lens design 85−50926
laser-to-monomode-fibre coupling and encapsulation in modified TO-5 package 86−28809
lasers, coupled, freq. locking, semiclassical theory 85−62633
lasers, coupled, normal modes, derivation 85−56474
lasers, weakly coupled, frequency locking 86−3241
LED, edge-emitting, coupling sensitivity to single-mode fibre 87−32963
LED coupling efficiency to single mode fibres, theory 88−20516
LED to single-mode fibre coupling efficiency analysis 87−12109
LED-based through-wafer optical interconnection coupling characteristics 88−50910
LED/single-mode fibre technology, advances 87−70067
lens coupling of laser diodes to monomode elliptic core fibres 87−12132
lens coupling systems for laser modules and single mode fibres *(German)* 87−74793
lens for laser-fibre coupling, optomechanical considerations 87−26124
lens formation by fiber fusion for terminating optical connectors 87−68031
lens systems for coupling laser diode modules to single-mode fibres 86−68226
lens-ended fibre-fibre connections for power laser appls., coupling efficiency 88−7875
lenses used as fibre couplers, design 85−41120
light emitter array, 1D, output coupling efficiency 86−63603
light source analyses and optical fibre coupling *(Croatian)* 85−18673
link passive components, principles and connection methods *(French)* 88−41713
liquid crystal ferroelec. spatial light modulators for optical interconnection 3D gate array 87−74876
liquid crystalline fibre coupler, electro-optical response 86−28905
liquid-crystal spatial light modulator, coupled to image converter, expt. investig. 87−28973
local area networks with ring topology, low cost clamp-on JAWS coupler 85−8394
local optical fibre data transmission systems *(Danish)* 86−11072
low loss fibre optic directional coupler 85−24286
low loss optical connectors to be used in fiber-optic measurements *(German)* 88−51448
low mode optical fibres, acoustic wave induced modal coupling 88−51492
low-loss 8×8 single-mode star coupler 85−46138
low-loss coupler tapers, design 87−32935
low-loss fibre optic termination system, kit instructions 85−12556
low-loss fused fibre beamsplitters, fabrication and overcoupled operation 88−65217
low-loss joints between dissimilar fibres by taperingfusion splices 86−36147
low-loss mechanical splices and field installation tool *(French)* 86−48141
LP_{01} and LP_{11} modes propagation in coupled fibres 87−68173
Mach-Zehnder interferometer, compact all-fibre, as elec. activated switch 87−53994
Mach-Zehnder interferometer, single-mode guided-wave, optical heterodyne method for evaluating power coupling 88−65328
magneto-optical branching waveguide, appl. in nonreciprocal optical devices 87−33014
manufacturability of 3×3 single-mode fiber optical couplers 88−13860
manufacturing environment, fibre optic LANs 88−66992
matrix of gradient microlenses fabricated by electrostimulated diffusion, optical connectors development 87−18598
measurement system for single-mode fibre communication system *(Japanese)* 86−28781
measurements and tests on optical light guide components *(German)* 87−13701
mechanical connectors for optical fibre cables 87−8290
mechanical crimp for splicing optical cables 88−28851
mesh waveguide optical star coupler, design and characts. 85−46137
mesh waveguide star coupler, loss reduction 88−65316
metal clad dielectric waveguides, mode characteristics study 85−24311
metal strip gratings as submillimetre laser output couplers, power transmission theory 87−26478
metal-dielectric waveguide with corrugated boundary, light radiation 88−33747
micro-lens, design and fabrication, fibre coupling device appls. 85−56347
micro-lenses for storage of information and opt. couplings *(French)* 86−15506
microlens fabrication technique for an efficient laser/single-mode fiber coupling 88−51471
microlens for coupling semiconductor laser to single-mode fibre 86−68273
microlensed fibres coupling to semiconductor laser diodes 88−51476
microlenses, substrate integrated, prep. by plasma CVD, for laser-fibre coupling 85−2078
milled-groove method for fiber-to-waveguide couplers 88−26775
millimetre wave quasi-optical couplers, efficiency 85−36109
miniature optic connectors 88−58129
mirror matching with hollow dielectric waveguide 87−46499
mirrors, front surface and multilayer, as fibre-end reflectors, coupling efficiency 86−48097
mixed contact connectors, PC and fibre optics *(Italian)* 86−62899
mobile platform appls., design issues 88−39926
modal cutoff values, explicit formulae 85−35492
modal field transformer between dissimilar waveguides 88−65341
modal filter, highly selective evanescent, for two-mode optical fibres 87−2008
mode conversion caused by refractive index fluctuations and its effect on directional coupler switches 88−51527
mode coupling coefficients for oblique incidence on grating, determ. 86−2753
mode coupling in multilayered structures, appl. to directional coupler 88−2048
modes of evanescent 3×3 couplers and three-core fibres 87−18612
modified 1×2 directional coupler modulator with low drive voltage 87−46543
modular fiber-optic connector series for multimode and single-mode fibers 85−41179
modulator, all fibre, for signal processing appls., based on Mach-Zehnder interferometer 86−48202
moldable glass, recent developments in integrated optics 88−20421
Molex 'FOCUS' series fiber optic links 85−12632
monolithic optoelectronic ccts. for high-speed optical interconnects 88−4001
monomode active fibre devices, effects of overlay index 86−9582
monomode attenuator with permanent power transmissioncontrol *(French)* 86−9576
monomode fibre evanescent-field coupling with high-index medium of limited thickness 85−46153
monomode fibre half-coupler 3D beam propag. method treatment 88−26787
monomode fibre high perform. optical connector development 85−29538
monomode fibre/integrated optic strip line waveguide junction, theoretical study *(German)* 85−50943
monomode fibres, wavelength multiplexing by power transfer between evanescent fields *(German)* 85−18692
monomode optaball connector form Radiall, construction and characts. *(Dutch)* 87−74792
monomode optical fibre half-coupler, beam propagation method *(French)* 88−51433
monomode planar optical waveguides, distributed coupling, wavelength optical multiplexing study *(French)* 86−11056
monomode star coupler design *(German)* 85−8431
moulded active couplers for optical networks 86−9571
multi-channel telemetry complex using fibre-optic coupling *(Russian)* 88−53564
multi-fibre connector, connection loss rel. to fibre diameter 88−26811
multi-fibre ribbon connectors, plastic moulded, design, fabrication and loss characts. *(Japanese)* 85−46192
multi-purpose optical fibre communication data link for distributed control systems 86−11130
multi/demultiplexers, guided-wave, with high stopband rejection 88−9518
multicore fiber connector with a plastic-molded ferrule 88−26809
multidrop digital video transmission equipment, 8-channel, 3-level optical transmission use 88−4201
multifibre circuit pack to backplane optical connector 87−46563
multifibre plastic connector, high density, fabrication and evaluation 85−56350
multilayered coupler for optical guided-wave devices 86−9531
multimode asymmetric star couplers, coupling limitations 88−45100
multimode biconical fibre coupler as temp. sensor or temp.-independ. coupler, temp. effects 86−58739
multimode channel waveguide, theory of coupling loss of ion exchanged system to optical fibres 85−1984
multimode couplers, real time performance anal. during testing 88−13865
multimode fibre, Y-coupler investigation for fibre optic communication line with end connection 85−18713
multimode fibre couplers, realisation *(French)* 86−9572
multimode fibre directional coupler using GRIN-rod lenses, coupling loss anal. 86−68229
multimode fibre graded-index couplers, coupling ratio depend. on physical characts. of fibre 85−29541
multimode fibre optic connector with mech. clamp, low installation time, cable TV appl. 85−8400
multimode fibre to laser diode coupling charact. using separate lens methods 86−28783
multimode fibres, nonsymmetric behaviour of joint 85−1983
multimode fibres, realisation of mode equilibrium distribution withlimited phase space method *(German)* 86−63662
multimode fused star couplers, temp. and vibr. tests 85−7223
multimode lightguides, losses caused by microbends 86−36210
multimode optical fibre connector losses *(Czech)* 88−58150
multimode SMA connector, ultra-low-loss 88−13876
multimode star coupler uniformity effect in fibre optic subsystems 85−7222

optical couplers continued
multimode three-guide structures, light coupling meas. 86−2757
multimode use of field mountable biconic connectors and tool kit 85−14316
multimode variable directional coupler using electrostrictive element 88−58159
multimode-fiber-type optical directional coupler for OTDR using acoustooptical deflector *(Japanese)* 88−58156
multipass grating interferometers as output coupler fortunable, single-mode operation of large-bandwidthlasers 86−22453
multiple beam fibre optic holography with fringe stabilisation 88−39942
multiple coupled waveguide switches using alternating $\Delta\beta$ phase mismatch 85−46120
multiple fibre optoelectronic connector design 85−2013
multiple quantum well coupling element with losses 88−1962
multiple quantum well waveguide, optical switching from guided mode coupling 88−58213
multiple waveguides, coupled, eigenmodes and wave evolution, continuum analogue 86−42278
multiple-access fibre-optic couplers for enhanced data-link performance 85−56288
multiple-core optical fibres, coupled-mode anal. method 88−72069
multiple-index waveguide struct., core/clad mode coupling 88−65340
multiple-stripe semiconductor injection lasers, coupled-wave theory 88−65816
multiplex optical fibre modules with serial electrical standard interfaces *(German)* 88−35483
multiplexer/coupler with tapered graded-index glass fibres and GRIN-rod lens 86−2835
multiplexing components for optical fibre system transmission capacity improvement 86−30806
multiplexing techniques for future Gbit/s transmission systems 88−73752
multiport coupler for wideband homodyne receiver using phase diversity 86−43862
multiport couplers for polymer fibres, design for vehicle optical data network appls. 86−48151
multiservice subscriber systems, optical cables and connection technologies 88−67420
multistage interconnection networks for large scale multiprocessor systems 88−58285
multiwaveguide systems, coupled mode solutions 86−42262
N×N star coupler based on Fourier optics 88−67346
narrow-band wavelength-selective directional couplers made of dissimilar single-mode fibers 88−13821
near projection DD-P40 TV, high brightness picture technology 87−76978
NEC mini-flat photocoupler, PS2101 *(Japanese)* 86−58774
NEC optical fibre connector, development *(Japanese)* 88−39897
networks, small guided-wave optical, with interconnected directional coupler switches, SNR simulations 88−33765
non-destructive coupler with tunable splitting ratio 87−18728
non-parallel dielectric rod waveguides, coupling analysis 87−53997
nonblocking optical interconnection network using directional couplers 85−42613
nonimaging optical transformers for fiber optic applications 88−45110
nonlinear, directional with diffusive Kerr-type nonlinearity 88−51508
nonlinear, novel effects for use in optical circuitry 88−65331
nonlinear coherent coupler, all-optical switching through nonlinear stationary wave 88−65877
nonlinear coupler, dual core fiber, ultrafast all-optical switching 88−1965
nonlinear couplers, limitations to all-optical switching in presence of absorpt. and saturation 88−33807
nonlinear directional coupler, beam-propag. method anal. 87−18674
nonlinear directional couplers, saturation and loss 87−53953
nonlinear directional couplers, semicond. material figure of merit 88−65289
nonlinear directional couplers with integrating nonlinearities, response anal. 87−38775
nonlinear distributed prism couplers, pulsed excitation 88−33731
nonlinear distributed waveguide couplers 85−35533
nonlinear fibre couplers, optical pulse compression and breaking 86−28844
nonlinear fibre-optic ring resonator, bistability and other effects 88−34111
nonlinear guided wave devices, material trade-offs 88−45201
nonlinear guided-wave phenomena, review 87−33314
nonlinear integrated optics, review 86−48504
nonlinear optical coherent coupling for amplification andmixing 86−48505
nonlinear optical fibre loop closed by a coupler, field fluctuations 87−60911
nonlinear optical waveguide, prism coupling theory, difference freq. generation 85−50977
nonlinear optical waveguide devices 87−46561
nonlinear periodic structures in guided wave optics 85−51273
nonlinear prism coupler, optical bistability 87−60910
nonlinear prism coupling into waveguide 85−18648
nonlinear prism output coupler, theoretical study 87−39207
nonlinear single-mode fiber coupler using liquid crystals 85−29532
nonlinear waveguide couplers 87−32995
NTT wDM transceiver module and push-pull-coupling fiber connectors for subscriber system 87−70058
optical fibre coupling, partial, with detector in coherent light, light power fluctuations at fibre output 88−20358
optical interconnects for intraboard and intercabinet links 88−33908
optical star network, coherent, WDM 88−35495
optimal laser-fibre coupling *(German)* 86−15470
optoelectronic materials, conf., San Diego, USA (Aug. 1987) 88−49335
organic polymeric waveguides, nonlinear 88−51517
overjacketed single-mode fibre taper devices, gap device props. 87−74770
oversized coupling holes in FIR waveguide lasers, refl. coeffs. 86−48094
p-i-n photodetector package, fibre-coupled, hermetic for use in fibre-optic preamplifier circuit 86−31434
parallel dielectric guides, improved coupled-mode eqns. 86−68261
parallel waveguides, coupled mode theory 86−22126
parallel waveguides, normal-mode and coupled-mode analyses 85−18695
party line and bidirectional fiber-optic coupling, low-cost technique 85−29577
passive fibre optic components using dispersion shifted fibre, biconical fusion technique fabrication 87−38843
passive integrated optical components made by ion exchange in glass 87−74833
passive integrated optics components for fiber opticscommunication in moldable glass, fabrication 86−36240
passive optical fibre components props. rel. to network configs. 87−13715
passive optical fibre interconnection methods and devices *(French)* 88−60155

optical couplers continued
PC fibre connector stability, axial compressive force effects 87−32934
PCS cable connector termination, radiation exposure and testing 85−35420
phase-locked array lasers, coupled active waveguide anal., self-consistent and coupled-mode solns. 88−20658
phase-locked array lasers, self-consistent analysis of waveguiding 86−9880
photoconductive detectors and MESFETs, monolithic integration with distributed coupling to optical fibers 85−2144
photocouplers and photoreflectors miniaturisation, appls. 87−7143
photonic backplane for a high capacity time switch 87−73847
photonic knockout switch for high-speed packet networks 88−47124
photonic switching systems, directional coupler-based, crossover minimisation 88−4045
photonic switching technology appls. for telecommunications switching 88−4041
physical contact connectors, low insertion and high return loss, with spherically convex-polished end 86−22090
picosecond light switch, design *(Japanese)* 87−3185
piezoelectric reflecting wedge as tunable reflector and filtering output coupler, for dye laser scanning 85−29886
planar acoustooptic 2×2 commutator switch 87−26112
planar graded-index diffusion waveguides, coupling 85−12605
planar integrated-optic star coupler with cascaded three-ports 87−18725
planar optical waveguide functions, approx. analytical methods investigation 85−35491
planar optical waveguide mode coupling analysis 85−46164
planar waveguide technology solves optical coupling problem 88−45204
planar waveguides, prism coupling, photothermal displacements, optical bistability 87−38784
planoconvex graded-index rod lens for coupling laser diode to single-mode fibre 87−7094
plastic clad SiO_2 fibre terminations, real world optical system usage 85−7225
plastic optical fibre star coupler, fabrication 87−18588
plastics for optical fiber communications in Japan 87−7161
polarisation beam splitter using all-single-mode-fibre Mach-Zehnder interferometer config. 88−45072
polarisation fibre for light coupling, I_2 stabilised laser wavelength meas. appl. 86−22330
polarisation holding directional couplers using D-fibres 85−7215
polarisation instability appl. to optical switching 88−45162
polarisation maintaining fibres, mode-coupling analysis 88−20373
polarisation-maintaining fiber splices and connectors, design and characterisation 88−39937
polarisation-maintaining fibre couplers with low excessloss 87−1945
polarisation-maintaining fibre couplers with misaligned birefringent axes 88−58078
polarisation-maintaining fibres, coupling, boundary elements anal. *(Japanese)* 86−15501
polarisation-maintaining single-mode fibre/semicond. laser optical coupling technique 87−38737
polarising beamsplitter, fused-taper coupler based, theoretical study 85−56298
polarising beamsplitter based on fused-taper fibre coupler spectral response/performance study 85−29560
polarising fibre coupler with high extinction ratio 85−14249
polarization independent coupling in prism- and grating-loaded optical waveguides 88−7934
polished single-mode fibre couplers, loss analysis; 86−2824
polishless field connector for single-mode and multimode fibre systems, design and characts. 86−65013
polycarbonate stacked film star coupler 87−60945
polymer waveguides, efficient grating coupler fabrication by reactive ion beam etching 87−60892
polymer waveguides, plasma-etched for intrachip optical interconnects 88−51706
portable automatic optical fibre splicer *(Danish)* 86−42252
power dividers at optical freqs., directional couplers and symmetrical Y-junctions, theoretical study 88−58210
power dividers based on channel waveguides with a long coupling length 85−46185
Pre-Cap ST connector design, elimination of fibre pistoning 88−39867
pressure tolerant single-mode fiber coupler for sensor appl. 87−53951
prism coupler, right angled, transmission strip and m-line simultaneous excitation *(Chinese)* 85−29566
prism couplers in guided-wave optics, design 87−60893
prism coupling efficiencies by direct meas. of coupling gap in integrated optical structures 87−1972
prism coupling into planar waveguides, self-pulsing 87−60927
prism coupling of IR EM surface waves by Gaussian light beams 86−53969
prism coupling with optical waveguide having cubic nonlinearity 87−46552
prism-waveguide coupler, spherically tapered, design 86−9455
PSK optical homodyne receiver with a six-port fibre coupler 88−3973
pulsed fibre holography technique for interferometry 86−3342
push-on connectors, functions, types and techniques *(German)* 88−12687
push-pull coupling optical fibre connectors, design *(Japanese)* 88−20389
push-pull coupling single fibre and plug-in fibre-optic connectors with high performance 88−13890
radiation freq. switching in medium with quadratic nonlinearity and optical transistor 88−51934
Raman amplification of recirculating pulses in reentrant fibre loop 85−29926
re-circulating optical fibre filter with a 'non-reciprocal' coupler 88−33688
rectangular dielectric waveguides laid in different layers, coupling characts. 86−68259
rectangular-core, directional couplers, anal. by iterated moment method 88−45194
rectangular-core directional, coupling length prediction 85−29594
reflection grating couplers for waves at oblique incidence anal. 87−54009
reliability for components for submarine fibre optic communication systems 87−70055
resonator with variable-refl. output coupler using standard grating and polarising components 87−61187
review of optical fibre couplers 87−25955
rigid contact between a channel $LiNbO_3$:Ti waveguide and single-mode fiber waveguides 87−68113
ring resonator, using 3×3 optical fibre coupler 88−65282
ring resonator fabricated in phosphosilicate glass films deposited by CVD 87−12121
rod lenses, GRIN, optical fibre sensing appl. 88−42117

optical couplers continued
rotary joint, fibre optic, for subsea appls. 86−4685
ruby lens for simplified laser to fibre coupling via optical fibre up-tapers 88−33611
rugged fiber optic connector for the process control industry 88−35468
rural telecom., optical access networks 88−60206
SAW driven directional coupler, integrated optical acousto-optic switching 85−51013
scalar strong coupled mode theory for slowly-varying waveguide arrays 88−72124
secure fibre data networks, multiple-access technique using transmissive star couplers 86−49587
self-biased 1×2 modified directional coupler modulator 88−26875
semicircular core fibres, coupling characts. *(Japanese)* 87−12206
semiconductor active directional coupler, optical switching by saturation-induced phase changes 87−61226
semiconductor coupled cavity lasers, props. 86−3180
semiconductor DFB laser diodes, strongly coupled, 1.5 μm, spectral props. 85−62564
semiconductor doped glass, integrated nonlinear optical device fabrication 87−12585
semiconductor laser, coupling stabilisation to optical fibre *(Japanese)* 87−38837
semiconductor laser, high-power, external-cavity, with single-mode fibre output port 87−54363
semiconductor laser amplifier, gain guiding, coupling efficiency 86−48431
semiconductor laser array, laterally coupled, frequency selectivity 85−56661
semiconductor laser coupling to passive resonator, line narrowing and chirp reduction 88−2247
semiconductor laser diodes and single mode optical fibres, coupling 85−18717
semiconductor laser low loss coupling to single mode fibre using tapered lensed fibres 86−42241
semiconductor laser phased array analysis using distrib. Y-junction analogue, mode discrimination 88−58545
semiconductor laser with external mirror and different levels of coupling, influence on radiation characts. 85−56737
semiconductor laser-to-fibre coupling, all-elec. scheme for dynamic coupling control 88−13908
semiconductor laser-to-fibre couplings, optimisation by electrical control loop 88−45445
semiconductor lasers, integrated etalon interference, waveguiding props. and intermodal coupling anal. 85−29826
semiconductor lasers, optical bistable, optical fibre directional coupled *(Chinese)* 87−54305
semiconductor twin-strip injection lasers, directional coupling and bistability 88−27285
semiconductor waveguides, coupling anal. between rib waveguides and optical fibres 87−12197
semiconductor waveguides, single rib structures and directional couplers, light propag. 86−15475
semiconductor-clad optical waveguide devices, periodic coupling 86−28857
semileaky isolator, multilayer, design 88−51545
Sharp Corp. PC904 photo coupler with optical-IC *(Japanese)* 86−54002
short-distance optical data link fibre development *(Japanese)* 86−4647
side coupler for coupling between laser diode and single-mode fibre 87−68016
Siemens V23800/4 pair, behaviour under extreme conditions *(German)* 87−68040
signal processing components and applications 88−67407
signal processing devices design 87−54053
silica micro lens, coupling of laser diode to single-mode fibres *(German)* 88−1934
silicon multifibre connector and fusion splicer 85−29539
single filter FSK system, characterisation 88−47156
single mode all-fibre switching matrices for broadband systems applications 88−7884
single mode coupler manufacturing 87−12191
single mode coupler sensors 88−67850
single mode fiber microlenses, self-centering using optical levitation 85−1977
single mode fiber optic lightly-fused sharply-tapered 3×3 couplers anal. 88−45103
single mode fibre, dispersive device on polished cladding, coupling-out efficiency 86−63655
single mode fibre, low loss, fabrication 86−2700
single mode fibre, optimised, short wavelength transmission 88−47079
single mode fibre arrays, permanent low loss coupling to waveguides 85−2052
single mode fibre components using GRIN rod lenses 88−45106
single mode fibre connectors, refl. and modal noise rel. to laser system degradation 85−7221
single mode fibre coupler fabrication using Si microelectronic technology 85−7214
single mode fibre couplers, freq. multiplex operation 87−46483
single mode fibre couplers, functions and appls. 86−48198
single mode fibre coupling efficiency with semiconductor laser amplifier 85−41412
single mode fibre directional couplers, limits on frequency selectivity *(German)* 88−1977
single mode fibre lightguide coupling to ILPN-204 commercial semiconductor laser 88−47041
single mode fibre optic connectors and splices, four rod alignment guide concept 85−7218
single mode fibre optic high data rate transmission system perform., optical feedback effects 86−69794
single mode fibre optic resonators, stimulated Brillouin scatt. 88−58173
single mode fibre switch, high-precision multiposition, using magnetic levitation 88−13884
single mode fused couplers insensitive to external refractive index 88−58085
single mode fused-tapered optical fibre couplers, tutorial introduction 87−68075
single mode optical rotary joint utilizing expanded beam optics 88−13877
single mode pushin connector development *(German)* 88−15460
single mode to multimode optical fibre coupler, nonreciprocal behaviour 87−38778
single- to multimode fibre coupler design and technology 86−9535
single-mode, fused couplers, wavelength and polarisation selectivity 88−45192
optical couplers continued
single-mode, polarisation mode coupling coeff. evaluation from polarisation mode dispersion meas. 86−2735
single-mode 5-fibre plastic connector, loss anal. 86−55308
single-mode channel and directional coupler by ion-exchange in glass 88−45182
single-mode connector, high performance, development 87−12195
single-mode connector for broadband network appls. 87−18727
single-mode couplers and Y junctions, modal props., variational approximations 86−9509
single-mode data buses for LAN appls. 85−63657
single-mode directional, developments 85−56328
single-mode evanescent-wave optical fibre couplers 86−36119
single-mode fiber-optic demultiplexer, props. 87−76771
single-mode fibre, laser coupling using gradient-index lenses and compact disc package 86−63619
single-mode fibre, polarisation splitting 86−42340
single-mode fibre, power oscillations in tapering 86−42341
single-mode fibre 1×50 switch for 10 fibre ribbon, config. and characts. 87−76807
single-mode fibre and LED, coupling efficiency, sensitivity 87−7093
single-mode fibre arc-fusion splicing machine using cladding mode scattered power monitor 86−53978
single-mode fibre array permanent attachment to waveguides, insertion loss 86−2726
single-mode fibre components using GRIN rod lenses, coupling efficiency 88−39873
single-mode fibre connector, low loss, design and fabrication 85−7217
single-mode fibre connector design, long-haul system appls. 86−4666
single-mode fibre connectors, design consideration 85−7216
single-mode fibre coupler, design parameters, determ. from loss meas. 86−2738
single-mode fibre coupler, fabrication and appls. *(Japanese)* 87−1970
single-mode fibre coupler, twist-etched, polarisation characts. *(Japanese)* 86−28875
single-mode fibre coupler technology, fused-taper fabrication, review 85−7212
single-mode fibre couplers, completely fused, effects of taper and variable aspect ratio 86−42246
single-mode fibre couplers, fused tapered, perturbation anal. 87−68035
single-mode fibre couplers, performance evaluation 85−7213
single-mode fibre couplers, wavelength selectivity limits 88−7887
single-mode fibre couplers and tapers, design limitation 86−42337
single-mode fibre coupling to LED, efficiency and alignment tolerances 87−74724
single-mode fibre device overview, polarisation-preserving props. 85−2050
single-mode fibre directional coupler, polished, automatic manufacture 86−2673
single-mode fibre directional coupler with narrowband Bragg refl. filter 86−53955
single-mode fibre directional coupler with strong coupling, mode excitation theory and expt. 86−48105
single-mode fibre optic components for conversion of laser phase noise to intensity noise 88−1970
single-mode fibre optic WDM 87−13729
single-mode fibre optical couplers 88−65260
single-mode fibre optical focusing beam system design using GRIN rod lens 87−62942
single-mode fibre optical focusing-beam system using GRIN rod lens *(Japanese)* 86−53981
single-mode fibre resonant cavity calcs. *(French)* 87−25918
single-mode fibre taper filters, wavelength response, fine tuning 87−46636
single-mode fibre to laser diode coupling using phase conjugate mirror 88−1931
single-mode fibre waveguides for low-loss Y-type directional couplers 86−28833
single-mode fibre Y-junction beam-splitter, fabrication, operation and performance 87−74682
single-mode fibre-coupler blocks, core-to-surface spacing determ. 87−38780
single-mode fibre-laser diode coupling with ball lenses 88−65189
single-mode fibres, high-Δ, small core, nonlinear optical props. study 88−65176
single-mode fibres, optical couplers multi/demultiplexer development *(Japanese)* 88−41658
single-mode fibres, splicing and connecting techniques, recent development 85−12627
single-mode fibres, taper drawing for high efficiency coupling of lasers 85−35446
single-mode fused biconical couplers for wavelength division multiplexing 88−45135
single-mode fused coupler for undersea opticaltransmission systems 86−59906
single-mode GRIN waveguide structures, propag. props. 87−46438
single-mode laser diode, coupling to optical waveguide via gap, theoretical study 87−53971
single-mode low-loss high-silica directional couplers, fabrication technique 86−36149
single-mode multi-fibre connector, ferrule hole diameter 88−26810
single-mode optical coupler, wavelength-flattened 8×8 star config., design and performance 87−12111
single-mode optical fibre, 34 Mbit/s bidirectional transmission using 1.3 μm LEDs and directional couplers 85−58092
single-mode optical fibre coupling to InGaAsP 1.3 μm mesa-struct. surface-emitting LED 85−46288
single-mode optical fibre coupling to laser diode, packaging technique 88−1954
single-mode optical fibre ring resonator with nonlinear coupling 87−74754
single-mode optical fibre wavelength-tunable WDM coupler, design and performance 87−56127
single-mode passive fibre components, automated coupler manufacturing system development 86−63681
single-mode star couplers for optical switchingapplications, LOCNET design 86−42326
single-mode strongly and weakly fused fibre tapered couplers, polarisation anal. 85−50909
single-mode ten-fiber connector, very small 88−33645
single-mode-fibre fused coupler, propagating-beam model 87−46461
single-mode-fibre passive components made in the fused-head-end technique 87−49032

optical couplers continued
single-model fibre, mode coupling, advantage of using higher-order spatial-distortion-function harmonics 87−18666
singlemode connector and attenuator with slantingly polishing of fiber end-faces 88−7885
six-port fibre couplers, vector modes 87−74678
SL undersea fibre optic cables, design and testing 85−37022
slab three-guide, power-transfer efficiency limitations 86−58762
soliton coupler for optical waveguides 88−65292
soliton propagation in optical fibres 88−45131
source-fiber optical coupler, excitation by light source 87−60954
spatial sampler using integrated optic techniques, electrooptic directional couplers 87−18748
spectral characts. of single mode optical fibre coupler with quadratically variable spacing *(Czech)* 85−29551
spectral inverse problems for optical waveguides and couplers 87−74802
splice/connector for multimode optical fibres 88−13873
splicing, arc fusion, spare length minimization *(Japanese)* 88−51480
splicing and connectors for optical fibres 88−72016
splicing of optical fibres *(German)* 87−32942
ST connector design approach for optical glass fibre 88−39954
ST style connection system with optimal performance 88−65247
standardisation *(German)* 85−62301
star coupler, development *(Japanese)* 88−41657
star coupler, fibre, small loss-deviation, for LAN, design and fabrication 85−62312
star coupler, ion exchanged, for multimode fibre communications 86−9598
star coupler and optical accessor composed of planar gradient-index glass waveguide 86−42361
star coupler fabrication by stacking polymer films 88−72011
star coupler used in 32 Mb/s star-configured LAN *(Japanese)* 85−57772
star couplers, transmissive, for full duplex channels 86−43870
STC connector from OFTI, design enhancements 88−45107
step- and graded-index optical slab waveguides coupling, anal. *(Japanese)* 88−33753
storage head, focusing grating coupler type, aberration minimisation under wavelength shift 87−61268
storage head, focusing grating coupler type, physical optics 87−61004
strip gratings on dielectric substrates as outputcouplers for submillimeter lasers 86−36365
strongly-coupled mode theory appl. to integrated optical devices 87−46465
submarine fibre optic transmission systems, high performance couplers 88−47187
submarine optical fibre cable to repeater connection, repeater design 86−69751
submarine optical fibre transmission systems, optical components reliability 88−67393
submarine optical repeater housing design *(Japanese)* 85−25873
submarine optical transmission systems, laser diode redundancy system using polarisation components 85−37043
submarine systems, optical components, reliability testing 88−73932
subscriber cables, optical systems, splicing and connecting techniques 85−3243
subscriber cables, splice enclosure for optical cables 85−3244
subscriber loop systems, high-performance optical connectors 85−3239
Sumitomo Electric fibre optic components for FDDI LAN 88−35561
surface polariton metal-optical waveguide, prism coupling theory 86−36216
surface-emitting LED, coupling efficiency to single-mode fibres 88−20515
surface-emitting phase-locked array of diode lasers, 300 mW operation 87−33158
surface-plasmon polaritons, waveguide coupling system 85−24263
switch, N×N coupled waveguide 85−7263
switch using piezoelectric actuated evanescent-wave directional fibre coupler 87−49037
switching matrix, wavelength selective all-fibre 88−39917
switching technology developments, use of optical and electrically controlled switching matrix *(Czech)* 86−4677
symmetric directional coupler switches 86−68311
symmetric parallel waveguide couplers, eigenmode analysis 88−7920
symmetric three-guide optical coupler with nonidentical center and outside guides, power transfer efficiency 87−46463
synchronous optical hypergraph, integration of voice communication 88−53310
tactical fiber optic assembly requirements 86−69800
tactical multichannel fibre-optic connector design and optimisation *(French)* 88−41714
taper coupler for integrated optics formed by ion-exchange under nonuniform electric field 87−26001
tapered buffer layer for lightwave coupler 88−65287
tapered coaxial couplers, external refractive index response and sensor appl. 86−42296
tapered diffused optical waveguide, output coupling device 85−35510
tapered fibre star coupler with mixer rod, small loss deviation 85−7232
tapered monomode fibre's for optical communication appls. *(Spanish)* 88−60159
tapered optical fibres for solar energy appl. 88−7868
tapered single mode fibres, external refr. index depend. 86−68224
tapered waveguide beam radiation 87−7103
telecommunication systems, optical components, use 88−9597
telecommunications using integrated optics including wave conductors and electro-optical couplers *(German)* 87−26069
thermal receiver with optical coupling channel, fundamental parameters calcs. 86−50104
thermo-optic coupler for multimode optical fibres 85−50902
thick lenses optimisation for single-mode fibre microcomponents 85−46170
thin-film waveguide-optical fibre coupling element, narrowing edge of planar waveguide 85−12601
third order nonlinear integrated optics , review 88−72146
three channel waveguide directional coupler, coupling characts. 86−15490
three channel waveguide directional couplers, anal. by variational and weighted residual method 88−65326
through-wafer optical interconnects for multi-wafer wafer-scale integrated architectures 88−2144
time division space switches using time-struct. directional couplers, optical communication appls. 85−58093
time-division digital switching using bistable laser diodes and optical switches 85−42612
transient attenuation in connectors to PCS fibers and in glass-on-glass fibers induced by pulsed X-rays 85−35423
transient behaviour of optical coupling constants of materials 87−75224

optical couplers continued
transmissive star couplers, design for full-duplex multiple access optical networks 86−37874
transversal filters realisation with optically coupled CCDs *(German)* 87−5957
transverse coupling between single-mode fibre and thin film waveguide 87−54026
tree-structured optical waveguide switches for switching networks *(Japanese)* 87−8320
triple ridge waveguide directional coupler as integrated optics switch, anal. and performance study 88−20426
tunable directional coupler fabrication and characteristics *(Korean)* 88−45087
tunnel prism coupled to active optical waveguide, EM waves, amplitude, space-time behavior 85−50976
tunnel-coupled fibre optic waveguides, nonlinear light transfer 86−48119
TV adapter-link between telescope and spectrometer 86−50033
twin-rectangular-cored fibre couplers, fabrication and characts. 87−53976
two state optical systems, three-space representation of phase-mismatch switching 86−68315
two-way communication system using rotary coupler 85−62284
underwater and deep sea appls., fibre optic couplers and connectors 85−8399
V-type fibre-optic couplers with low losses for duplex communication lines 87−68041
variable coupler fiber optic sensor 88−53711
variable transmission output coupler and tuner forring laser systems 86−15744
VHSIC/VLSI interconnections, fibre-optic coupler 87−16968
vibration sensor using planar integrated interferometric circuit on oxidised Si substrate 85−62401
video communication networks, multi mono couplers 86−37891
VLSI, optical interconnection technology 86−47757
VLSI, optical interconnections for higher speeds 86−47758
VLSI interconnections technology, status and prospects 88−50975
VLSI interconnects, integrated fibre optic coupler 86−48303
waveguide, equivalent current theory, coupling eqns., grating coupler and metal-clad optical waveguide 88−1989
waveguide attenuation measurement, compensatory method 87−74773
waveguide attenuation measurements using prism coupler 88−51531
waveguide coupler, phase mismatched, with optical amplifier, anal. 88−26848
waveguide couplers, ion-exchange processes in glass for fabrication 88−58202
waveguide devices, normal mode anal. appl. to device output and crosstalk 88−72100
waveguide devices, spectral parameter determ. by polarisation mode distrib. investig. 86−2755
waveguide four-channel multi/demultiplexer for optical FDM transmission 88−35503
waveguide interconnection problems, finite element solns. 88−65327
waveguide laser mirrors, coupling efficiency, formula 85−56752
waveguide Y-junctions, single mode asymmetric, transmission characts. 85−35489
waveguide-fibre coupling element construction 86−9513
waveguides, coupled, nonlinear TE wave propagation when bounded by nonlinear media 88−72093
waveguides, parallel, weak coupling mode theory 88−33743
waveguides, planar, with external grating couplers as integrated optical bistable devices 88−72121
waveguides, silica based, appl. to guided-wave optical interferometers 88−72095
waveguides, single-mode, field distrib. near abrupt bend, model 86−15441
waveguides, single-mode, magneto-optical mode conversion using end-fire coupling 86−42310
waveguides, single-mode and rectangular cross-section directional couplers, simple anal. method 88−72105
waveguides degenerate coupling between guided waves, geometric representation 86−22161
wavelength dependence of devices fabricated in single-mode fibre 87−46538
wavelength division multiplexers/demultiplexers using fused taper couplers, insertion loss and isolation 88−45098
wavelength flattened 8×8 single-mode star coupler 88−65241
wavelength multiplexer, six channel single mode, with waveguide concentrator 85−3478
wavelength multiplexing by means of low loss single modefused taper couplers 86−37890
wavelength selective cross-coupling for distributed fibre sensors 88−74458
wavelength selective diffused-channel triple-waveguide couplers for λ-duplexers, propagating beam anal. 85−46121
wavelength-dependent coupling in single-mode fused biconical taper couplers 88−13858
wavelength-flattened fused couplers 85−62295
wavelength-insensitive couplers using dispersive materials 87−60929
wavelength-insensitive fibre couplers 86−48196
WDM active, bidirectional transmission on single fibre 87−8308
WDM fibre with minimised insertion loss 86−65000
WDM multi/demultiplexers, for two-channel single-mode transmission systems 85−14266
WDM narrowband wavelength-selective optical fibre tap and combiner 87−53981
WDM system using 3 wavelength-selective fused single-mode fibre couplers as multiplexers 88−67410
wide-channel passive single-mode directional couplers in glass with adjustable power transfer 88−65343
wideband homodyne phase diversity receiver, coherent transmission experiments 87−49073
wideband transmission characts. *(German)* 85−58104
WSI and intrachip communication, optical interconnects use 88−26861
(Al,Ga)As-GaAs MQW planar waveguides, optical props., reactive ion etching of rib waveguides and directional couplers 87−60959
Al waveguides, planar dielectric coated for 10.6 μm radiation, attenuation characts. 86−58776
AlGaAs laser rib-waveguide, gain- to index-guiding transition 87−18955
AlGaAs lasers coupled to external cavity, intensity fluctuation 85−29866
AlGaAs vertical guided-wave nonlinear coupler, all-optical modulation 88−45175
AlGaAs/GaAs low-drive-voltage low-loss 2×2 switch 88−65298
AlGaAs/GaAs optoelectronic devices and GaAs digital ICs, high-speed optical interconnects development 87−44003

optical couplers continued
AlGaAs/GaAs phase couplers for optical IC appls., design and fabrication 85−46197
AlGaAs-GaAs DFB laser, surface emitting MQW type with broad-area grating coupler, fabrication/charact. 88−34003
AlGaAs-GaAs combined laser and photodetector in monolithic integrated-optics module utilising coupled waveguides 86−36248
AlGaAs-GaAs distributed feedback laser and grating coupler, surface emission 88−2229
AlGaAs-GaAs, double heterostructures, active symmetric mesastripe couplers, phase-locked radiation generation 88−34041
AlGaAs-GaAs, nonlinear directional coupler, response calc. 87−68029
AlGaAs-GaAs phase couplers for optical integrated-circuit appls., design and fabrication 86−22181
$BaTiO_3$, beam coupling at 442 nm 85−50891
$BaTiO_3$ photorefractive fibre coupler, anal. 88−13875
CO_2 laser resonators employing multipass interferometric output couplers, strong frequency pulling obs. 86−42606
GaAS-GaAlAs MQW waveguides, nonlinear propag. 87−12234
GaAlAs fast optical couplers transmit data at 1 Mbit/sec *(German)* 88−45317
GaAlAs/GaAs low-loss strip-loaded waveguides with high coupling efficiency to single-mode fibres 85−56293
GaAlAs-GaAs guided wave devices, growth by MBE 85−49560
GaAlAs-GaAs stripe laser arrays, phase locking of stimulated emission using active directional couplers 87−75104
GaAs - 88−7937
GaAs detectors, direct backside connection of optical fibres 88−65205
GaAs directional coupler devices, design 88−13901
GaAs directional coupler optical switches, switching charact. 86−53996
GaAs directional coupler optical waveguides, long-term γ-ray effects on propagation characteristics 88−58190
GaAs electro-optical interferometric modulator 85−2093
GaAs, epitaxial layer, photoelectrochem. etching of tapers for waveguide interconnections 85−40650
GaAs integrated optical components for optical fibre communications *(German)* 86−2845
GaAs inverted rib waveguide Mach-Zehnder modulators with three-guide couplers 88−45223
GaAs lossy nonlinear directional coupler, numerical study 88−26860
GaAs material requirements for optoelectronic appls. 85−29731
GaAs optical directional couplers with short coupling lengths, anal., fabrication and charact. 88−45176
GaAs rib waveguide totally refl. mirrors, reactive ion etching fabrication and appl. 86−9594
GaAs waveguide components, self-adjusted permanent attachment of fibres 86−54000
GaAs, waveguide interferometers and couplers for high-speed electro-optic modulation and switching 87−38818
GaAs waveguides, coupled MQW, anal. including quadratic electro-optic effect 88−72087
GaAs/AlGaAs MQW structure for monolithically integrated optical gate 2×2 matrix switch 88−2028
GaAs/AlGaAs planar waveguides, nonlinear optical coupling 86−36131
GaAs/GaAlAs planar MQW structure, nonlinear coupling of guided waves 87−7075
GaAs/GaAlAs rib waveguide tapered couplers, fabrication 88−33715
GaAs-$Al_xGa_{1-x}As$ low-loss DH directional coupler 85−2073
GaAs-AlGaAs directional complex switch, design and fabrication using MBE and RIE 87−12246
GaAs-AlGaAs, waveguide, grating coupler, selective superlattice intermixing 87−74797
GaAs-GaAlAs Y-branch interferometric modulator 86−9622
GaAs-GaAlAs directional coupler switches with optical gain 86−58793
GaAs-GaAlAs multiple quantum well waveguides, nonlinear propag. 85−41190
GaAs-InGaAs strained-layer superlatt. directional couplers, nonlinear effects 88−13905
GaAs-based semiconductor coupled-waveguide optical modulators, high frequency modulation charact. 85−2039
GaInAsP VIPs lasers, 1.3 μm, high-power output coupling to single-mode fibre 87−68460
GaInAsP integrated directional couplers with photodetectors by hydride vapour phase epitaxy technique 88−72136
HCN laser CW RF excited, operational charact., effect of coupling hole in output-side mirror 85−35680
He-Ne laser, internal amplification freq. depend. meas. by heterodyne method 85−56534
$In_{0.52}Al_{0.48}As$ electro-optic directional coupler grown on InP by MBE 87−74866
InGaAsP 1.55 μm optical fibre ring laser 86−29185
InGaAsP DFB laser at 1.5 μm coupled to fibre resonator, FM noise and linewidth reduction 88−45520
$In_{1-x}Ga_xAs_yP_{1-y}$/InP, narrow bandwidth optical waveguide filters 86−2802
InP epitaxial layer, photoelectrochem. etching of tapers for waveguide interconnections 85−40650
K^+ and Ag^+ ion-exchanged directional couplers, multiplexing charact. 88−7949
K^+-doped borosilicate glass monomode ring coupler, fabrication 87−54043
KH_2PO_4 coated glass fibre optical coupler modulator 87−74669
$LiNbO_3$ 32 switch-elements integrated low-crosstalk 4×4 optical matrix switch 86−42359
$LiNbO_3$ blazed grating couplers and appl. to integrated optics 87−12122
$LiNbO_3$ device appl. to photonic switching systems 88−2044
$LiNbO_3$ directional coupler optical switch at 1.3 μm, compact design and performance 87−38855
$LiNbO_3$ directional coupler optimisation, appl. to Mach-Zehnder interferometer modulator 86−9599
$LiNbO_3$ directional coupler switch, digital video signal space switching 87−38867
$LiNbO_3$ directional couplers, time depend. photorefractive effects 85−46200
$LiNbO_3$ electro-optic guided-wave modulators for single-mode transmissions 88−33754
$LiNbO_3$ high speed integrated optics modulators and switches 85−50992
$LiNbO_3$ integrated optical components for optical communication networks 87−54095
$LiNbO_3$ integrated optical components for optical communication appls. *(German)* 87−18754

optical couplers continued
$LiNbO_3$ integrated optical freq. shifters coupled to high birefringence fibres using ion-milled grooves 86−68323
$LiNbO_3$ integrated optics technology under Joint Opto-Electronics Research Scheme 88−33761
$LiNbO_3$ intersecting diffused channel waveguides, anal. for TE and TM polarisations 86−22095
$LiNbO_3$, ion-milled alignment grooves, efficient fibre-chip coupling at 1.3 μm 85−2076
$LiNbO_3$, low-voltage polarisation-independent guided-wave direction-coupler switch 88−51525
$LiNbO_3$ modulators for high speed digital transmission 88−41688
$LiNbO_3$, optical components for modulation and switching 87−7173
$LiNbO_3$ optical modulators, Mach-Zehnder and directional coupler, photorefractive effect 88−72161
$LiNbO_3$ optical waveguide switches, low-drive-voltage and low-loss polarisation independent 88−1971
$LiNbO_3$ proton exchanged waveguide, extraordinary refr. index, prism coupling temp. depend. 85−41111
$LiNbO_3$, tapered waveguide for directional coupler, proton exchange form., interf. effects 86−9588
$LiNbO_3$ traveling-wave optical couplers and interferometric modulators, power requirements 87−32943
$LiNbO_3$ waveguides, single-mode fibre attachment 85−7231
$LiNbO_3$:T indiffused optical directional couplers at 1.3 μm, photorefractive effect. 86−68313
$LiNbO_3$:Ti 4×4 directional coupler switch with permanently attached polarisation maintaining fibre array, low crosstalk 87−18759
$LiNbO_3$:Ti 4×4 nonblocking interconnection network for test bed, video switching 87−12240
$LiNbO_3$:Ti X- and Z-cut directional coupler and BOA switches, voltage-length product 87−26082
$LiNbO_3$:Ti, X-cut, integrated optical 4×4 star coupler, low-loss planar design 85−18743
$LiNbO_3$:Ti, channel waveguide connector to polarisation maintaining fiber at 820 nm 88−51475
$LiNbO_3$:Ti channel waveguide interferometric modulators and directional couplers, thermal stability 86−36226
$LiNbO_3$:Ti channel-waveguide bend-branch structure, coupling 85−1971
$LiNbO_3$:Ti channel-waveguide devices, pyroelectric effects 86−48079
$LiNbO_3$:Ti components for fibre optic gyroscopes 88−16131
$LiNbO_3$:Ti directional coupler optical switches and switch arrays, long wavelength 85−41212
$LiNbO_3$:Ti directional coupler switch/modulator for time-division multiplexing and data encoding 85−41195
$LiNbO_3$:Ti directional coupler switches, crosstalk caused by Ti conc. fluctuations 86−68314
$LiNbO_3$:Ti directional coupler switches, miniaturisation, theoretical and expt. charact. study *(Japanese)* 88−7991
$LiNbO_3$:Ti directional coupler transmission system for optical fibre communication, BER performance study 87−8276
$LiNbO_3$:T. directional couplers, appl. of coupled-mode theory to design with non-parallel sections 87−12116
$LiNbO_3$:Ti directional couplers, coupling charact. 86−2661
$LiNbO_3$:Ti directional couplers, design using WKB technique 85−18740

lens design innovations 87−26116
lens systems for coupling laser diode modules to single-mode fibres 86−68226
lenses, aspherical plastic, optical performance for compact disc use 87−26122
lenses used as fibre couplers, design 85−41120
light baffles, design and construction 88−20476
lightguide technology for adverse industrial environments 88−13856
longitudinal image restoration, inverse filtering 88−34737
low-light-level imaging systems, design optimisation, spectral matching 85−56429
magneto-optical disc design, normal incidence performance of multilayer structures 88−8003
manufacturability of 3×3 single-mode fiber optical couplers 88−13860
Meoplan laser transmitter of illuminated plane *(Czech)* 88−72362
metal grid reflectors, laser mirrors and filters at sub-MM wavelength, equiv. cct. formulas 85−24351
micro-disc subsystem, magneto-optical, system design 88−65135
micro-lens, design and fabrication, fibre coupling device appls. 85−56347
microlithographic projection lens quality 88−19883
microscope objective designs for high power laser applications 88−40288
mirror with variable curvature, using bimorph piezoelectric plate 87−18787
modulation transfer function for the display engineer 87−21173
Moire electro-optical displacement meter *(Russian)* 85−29650
monomode fibres, synthesis 86−9502
multi-reflector offset antenna, two subreflectors shaping technique *(French)* 85−46629
multielement homogeneous thin-film lens design 87−46582
multiple aspheric systems for lithography of VLSI circuits 87−46629
night viewing systems, active, design optimisation 85−64037
nonlinear fibre waveguides, second harmonic generation, efficient designs using radiation modes 88−40343
nonpolarising edge filter design 85−7296
ocean-optical studies, design, testing and calibration of semiconductor laser-based instrumentation 87−77890
optomechanical systems engineering, conf., San Diego, CA (Aug. 1987) 88−49334
paraboloidal lighthouse lamp reflectors, aberrations, system design 86−13158
passive integrated optical anisotropy-based devices 88−65349
perturbed aspherics, use in broad band optical systems, design 87−46627
phased array system, zero opt. path difference, Ar laser spectral content effect 87−63273
planar optical waveguides, synthesis 88−7957
planar waveguide refractive waveguide lenses: a new design 87−38846
plastic bi-aspheric lens, design and use for compact disc players *(Japanese)* 85−46234
plastic lens for photocopiers, design 87−26128
point of sale hologram scanner, optical design 87−12634
polarisers, multiwavelength thin-film, for high-power laser systems, design 85−7472
polarisers, thin-film cubic-type, for high power lasers, design parameters 87−61200
pregroove disc dimensions, design considerations 87−28825
prism couplers in guided-wave optics, design 87−60893
prism-waveguide coupler, spherically tapered, design 86−9455
programmable logic arrays, optical design, regular free-space interconnects 88−51621
pulse optical quantum generators, optical components geometry *(Czech)* 85−7470
pupil-function design for bipolar incoherent spatial filtering 87−19859
push-broom linear array scanner, design of all-reflective flat-field objective 87−29918
radiometry and the military 87−29074
ray matrix method for analysis of opt. resonators with image rot. 87−26474
receiver design, characteris. 86−17407
recursive techniques for design of holographic optical elements 88−51954
reflective optics, conf., Los Angeles, USA (Jan. 1987) 88−31267
reflector CAD and numerical methods *(German)* 86−33852
reflectors geometrical parameters optimisation for automobile headlamps *(Czech)* 85−10204
refracting system design for annular laser beam transform. 87−61213
remote sensing of Earth resources, imaging spectropolarimeter-photometer for satellite 87−29916
rib waveguides, universal design curves 88−72107
ring lasers, planar, with mirror misalignment, stability 88−2312
SDI driving optics development 87−26115
selective resonators with angular dispersion, pass bands 86−9893
single mode fibre designs for telecommunications 86−48177
single mode fibres, bend-optimised dispersion-shifted designs 86−22108
single-mode fibre CAD 86−28791
single-mode fibre collimating system using rod lenses, design considerations, coupling losses *(Japanese)* 85−2036
single-mode fibre connector, low loss, design and fabrication 85−7217
single-mode fibre connectors, design consideration 85−7216
single-mode fibres suitable for subscriber cables, design 87−8297
single-mode fibres with zero total dispersion at wavelengths 1.3 and 1.55 μm *(Japanese)* 86−9526
single-mode optical fibres, CAD calc. method *(French)* 87−68030
SLAM, program for vectorized calc. of refraction and reflection at nonlinear interface 88−34106
Solc equivalent filters in single mode fibre, practical design and manufacture 87−61007
Southwest optics conf., Albuquerque, NM, USA (March 1985) 86−26479
star coupler, fibre, small loss-deviation, for LAN, design and fabrication 85−62312
storage head, focusing grating coupler type, aberration minimisation under wavelength shift 87−61268
symmetrical slit electron lens, three-slit design 87−45547
thermal scanner optical design 85−58608
thin-film coating synthesis 86−28937
thin-film waveguide lenses, design procedure 86−36247
truncated Gaussian laser beam optical system image quality 85−56754
unified linear analysis of optics and electronics, transformation 85−46210
variable focus, single lens, 3 CRT dichroic color graphics projector 87−20950
wavefront sensor, integrated optical, lens focusing onto detector array 87−12241
optical design techniques continued
wavefront sensor error estimation using Cramer-Rao lower bound 86−50237
waveguide component design using beam propag. techniques 87−46535
waveguide fibres, single-mode design with reduced dispersion at min. attenuation wavelength 85−41154
waveguide isolator with form-birefringent top-layer, design and anal. 86−2814
waveguides, branching, spatial resolution requirements for fabrication 88−45173
waveguides, planar, design with prescribed propagation constants 87−74774
wavemeter, CW laser wavelength meas. using travelling Michelson interferometer, design and operation 85−4135
WDM optical filter design and performance optimisation *(Chinese)* 86−68367
wide angle distortion free holographic head-up display 87−19095
zone plates for optical sensors 87−61002
zoom lens design for thermal IR 85−56391
zoom lens system for CO_2 laser, precalc. and final design 87−68569
zoom range lenses, chromatic aberration affecting colour TV picture quality *(Russian)* 88−58329
AlGaAs/GaAs phase couplers for optical IC appls., design and fabrication 85−46197
AlGaAs-GaAs phase couplers for optical integrated-circuit appls., design and fabrication 86−22181
Ar laser based system, setting up requirements 85−18836
Ar laser based systems, fundamentals and integrated mirror designs 85−12767
CO_2 compact laser receiver lens for rangefinder, design, interferometric test 87−68570
CO_2 lidar systems, design considerations 88−41752
GaAs Fresnel waveguide grating lenses, aberration corrected, simulation 87−12237
GaAs-AlAs semiconductor waveguide bends, low-loss 88−45193
InP-$In_{0.53}Ga_{0.47}As$-InP photodetectors for 1200-1600 nm range, single layer antireflection coating design 88−58331
KrF laser, kJ, optical design for Aurora project 86−29078
$LiNbO_3$, ion-milled alignment grooves, efficient fibre-chip coupling at 1.3 μm 85−2076
MgF_2-TiO_2 color interf. filter optimal construction, multivariate optimisation 88−13995
Nd:YAG, unstable laser resonator with super-Gaussian mirrors 88−45493
SiO_2 based fibre, radiation effects, design tradeoffs for radiation environments 87−1964

optical detection of ENDOR *see ENDOR; optical double resonance*

optical detection of magnetic resonance (EPR) *see microwave-optical double resonance*

optical detection of magnetic resonance (radiofrequency) *see magnetic double resonance; optical double resonance*

optical difference frequency generation *see optical frequency conversion*

optical diffraction *see light diffraction*

phase change optical disc materials, laser recording/erasure *(Japanese)* 87−38717
phase change rewritable optical disc, erasure condition using circular beam irrad., numerical study *(Japanese)* 88−45066
Philips systems, technology, recording techniques and playing equipment *(Italian)* 85−14473
photo-curable casting acrylic resin as optical disc substrate 88−65149
photomagnetic disc drives, optical head *(Japanese)* 86−2898
pick-up lenses and optics 88−45256
pit scatt., numerical calcs. using boundary element method 88−45053
pit shape at overwriting of thermal magneto-optical recording 88−65154
plasmon optical discs, volume production 86−42216
plastic moulding for high recording density disk 87−8464
plastic substrate for high performance magneto-optical disc 88−65396
plastic substrate for optical memory disk 86−42217
plastic substrates of magneto-optical discs, birefringence eval. 88−45237
point-of-purchase market, use of optical media 88−41878
polycarbonate magneto-optical disc substrates, birefr. change under operating environments 88−45038
polycarbonate substrate for magneto-optical disc, optical anisotropy effect on CNR 87−38725
polycarbonate substrates for magneto-optical discs 87−60992
polymer substrates for optical discs 88−45036
polymeric optical disk recording media 86−66863
polyurethane resin subbing layer for optical disc recording medium 85−6028
pre-groove writer for optical disc replication master fabrication 88−65147
pregroove disc dimensions, design considerations 87−28825
pregroove-shape design based on light diffraction anal. 85−20364
pregrooved disc form. by dry etching 88−45049
principal markets and applications 86−38102
optical disc storage continued
principles and systems *(Dutch)* 85−63877
product design developments 86−17645
prognosis of the storage of data and programs for the computer technology *(German)* 88−63678
R&D sputtering system for memory disk development 88−31857
radiation hardening of optical disc memories 88−65167
rapid access system, design, construction and performance 87−26101
rare earth-transition metal amorphous alloy thin films for magneto-optical recording, props. 86−28919
read path of magneto-optical storage devices, modelling 88−65141
readout power dependence on thin-film magneto-optic media properties 87−54134
real time video recording on magneto-optic disk 87−56406
recordable laser videodisc: a technical perspective 88−35719
recording disc technology, recent trends *(Japanese)* 87−32871
recording disc using organic dye medium 86−42213
redundancy design considering bit-error characts. *(Japanese)* 88−45067
Reference Technology Inc., videodisc appls. 85−47708
retardation, optical double pass, automated measurement 88−65150
retardation effects in magneto-optic readout 87−46605
reversible optical recording, phase change media and magneto-optics comparison 85−50892
rewritable phase-change type optical disk, recording material characts. required *(Japanese)* 88−33601
S/N ratio anal. using polarisation simulator 87−54137
Sanyo 3-beam semiconductor laser, struct. and characts. *(Japanese)* 88−40238
Sanyo Electric 3-beam semiconductor laser, development 88−2265
sector alternation methods, performance evaluation 88−58062
sector servo data file optical disc memory 85−52547
self-coupled optical pickup (II) and its application 85−41383
semiconductor compounds, laser induced phase transition, possible reversible optical disc use 85−50896
semiconductor laser diodes, optical problems rel. to appls. *(Japanese)* 85−35939
semiconductor lasers, design and characts. for optical disc appls. 85−37078
semiconductor lasers, optical fibre communication and beam appls. 88−58552
semiconductor lasers for optical discs *(Japanese)* 86−48404
semiconductor lasers for WORM, erasable and rewritable memory disks 88−2262
semiconductor lasers with high output and low noise for optical memory discs 88−2259
servo technology, high-speed 88−65136
servomechanism resonance, elimination using bridged-T compensator 85−34110
Sharp semiconductor laser for optical disks 88−2264
silicone overcoat for optical disc recording 85−10833
single-mode optical fibre heads for optical discs 86−42351
spaceborne optical disc recorder development by NASA 88−65165
sputtering system, in-line, for magneto-optical data storage media 88−65152
sputtering techniques for optical disc storage 87−49352
stamper process for optical discs 88−65148
standardisation activities for optical discs in Japan 87−28824
state-of-the-art 85−37321
substrate, moulding compounds, minimal birefringence 87−38722
substrate birefringence, magneto-optical compensator 87−54136
survey of optical disc technology *(Japanese)* 87−41250
switchable time-domain filter for disc drives 87−10955
t error correcting and t-byte error locating codes *(Chinese)* 88−59011
technical implementation of an international video encyclopaedia *(Russian)* 88−60468
techniques review 86−55468
technology, historical developments, commodity products *(Japanese)* 85−58437
technology, materials and techniques *(Japanese)* 87−32872
testing optical discs and drives 87−51854
thermosetting resin substrate for computer-useoptical memory disks 86−42218
threshold-triggered filter for read channel 87−852
Toshiba high-power semiconductor laser for optical information processing 88−2258
tracking ccts. calibration 86−44028
tracking guide for optical disks formed by photodarkening of As-Se-S-Ge amorphous films 86−4865
trends in optical media 88−20332
TV picture and sound recording appls. *(Russian)* 87−41258
twin beam laser diode for optical disk memory 88−27176
two-beam optical head 87−46631
two-beam optical head with hybrid two-wavelength laser array for magneto-optical recording 88−45051
US Army's Intermediate Forward Test Equipment 88−36697
video disc, motion video, still frames, digital audio and data compatible recording 87−34880
video disc capacities and advantages *(Japanese)* 86−69942
video discs vs. optical discs *(German)* 87−13970
video disk data storage and retrieval, arrangement 86−24168
videodisc and optical memory systems, book 85−60650
videodisc industry, review 86−49856
videodisc player design, laser-based 85−63864
videodisk technology in information service: visual image database in construction industry, case study 88−22340
videotape and magnetic storage media, competition with optical disks 88−53463
videotext and laser disks, production and recall times reduction *(German)* 86−59607
videotext and videodisk image bank for municipal information, cultural dimension *(German)* 86−59606
visual performance testing with stereoscopic TV displays, use of optical videodisk system 87−34821
wavelength-multiplexed-recording materials, Japanese research 87−60879
WORM media read signal dependence on optical imperfections of optical memory system 88−65143
WORM technologies and future developments 88−7844
write and read many times optical media, unified theory for sensitivity function 88−51428
write once media and erasable magneto-optic media technology from 3M 88−20455

optical disc storage continued
write once optical disc memory *(Japanese)* 87−41251
write once optical memory using 130 mm disc, techniques for fast data retrieval 88−45060
write-once optical discs, reliability tests 88−45044
write-once phase-change media 87−53942
Ag-Zn optical discs, erasing charact. using induction heating *(Japanese)* 88−51431
Al-polymer-Al trilayer optical disc, high performance 85−14465
AlGaAs lasers, high-power buried coarctate-mesa structure, development 86−3165
AlGaAs monolithic two-beam LD photodiode array fabricated by RIBE *(Japanese)* 88−65525
AlGaAs-GaAs high-power tapered-SAN lase for an optical pick-up 88−45428
AlN/GdTbFe/AlN/Al magneto-optical disc 87−38881
Al_2O_3-based mixed oxide protective layer for magneto-optical disc 88−58263
$Bi_{2.84}Y_{0.48}Fe_{3.50}Ga_{1.18}O_{12}$ garnet films on glass substrates, prep. by RF sputtering 88−31833
CS_2-Te optical disk, high-density recording 87−74648
Fe-Tb multilayers, magnetic properties and structural charactn. 87−60878
Ga-Se-Te film erasable optical disc, crystn. props. and operative regions 88−45048
Ga-Se-Te optical disc, erasable laser recording characteristics 88−26745
GaAlAs laser array, monolithic, for optical disc appls. 87−68480
Gd-Tb-Fe magneto-optical discs, recording sensitivity and lifetime estimate 88−65389
GdTbFe four-layer magneto-optical disc, recording charact. 86−68352
GdTbFeGe based disks, readout charact. and coercive force 86−42381
GeTe-Sb_2Te_3 amorphous films, high speed overwritable phase change optical disc material 88−45046
In thin-film optical memory device reflectance and transmittance variation obs. *(Korean)* 87−46433
In-Sb, optical disc medium, write-erase mechanism 88−13787
In-Se phase-change optical recording film, crystn. kinetics, effect of Tl and Co additions 88−45047
In-Se-Tl-Co phase-change erasable disc, one-beam overwriting method 88−45054
In_2O_3 on glass, optical data discs, master fabrication using reactive ion-beam etching 86−9450
InO_x thin-film optical memory device reflectance and transmittance variation obs. *(Korean)* 87−46433
Nd-Dy-Fe-Co amorphous film, magneto-optical disc appls. 88−45232
Nd-Dy-Fe-Co amorphous film magneto-optical discs, read/write charact. 88−58261
Sb-Se-Bi film, erasable optical disc media 87−38726
Sb_2Se_3 film with amorphous-crystalline transition, optical disc recording medium *(Chinese)* 88−26743
Sb_xTe_{1-x} films, reversible phase change of optical discs 88−45065
Se-In-Sb alloy film for erasable optical disc media 85−50894
SeInSb alloy erasable optical disks using crystal phase change film 88−58058
SeInSb alloy film for erasable phase change optical disc 88−65156
Sn thin-film optical memory device reflectance and transmittance variation obs. *(Korean)* 87−46433
Sn-Te-Se amorphous-cryst. phase change recording film for optical discs 85−50895
SnO_x thin-film optical memory device reflectance and transmittance variation obs. *(Korean)* 87−46433
Tb-Co amorphous thin film magneto-optic disk, improved oxidation and crack resist. 86−42382
Tb-Co erasable magneto-optical disc, 130 mm *(Japanese)* 87−8487
Tb-Co thin films preparation for erasable optical memory disk *(Japanese)* 87−5510
Tb-Fe-Co amorphous film magneto-optical discs, read/write charact. 88−58261
Tb-Fe-Co magneto-optical disc, erasable, struct. and charact. 85−35557
Tb-Fe-Co magneto-optical disc, real-time recording/erasure by optical head with laser diode array 88−65390
TbCo film, optical disc memory struct., mag. props., underlayer film treatment effect 87−25757
TbCo films for erasable optical disk memory 86−42156
TbCo magnetooptical disc, film struct. 88−51598
TbFe, magneto-optical recording medium improvement by alloying *(Japanese)* 85−46226
TbFe, submicron domains for high density magneto-optic data storage 88−51591
TbFeCo amorphous film disk, magneto-optical recording 86−28918
TbFeCo magneto-optical disc overwriting by mag. field modulation heads 88−58268
TbFeCo magneto-optical disc testing system 86−68351
TbFeCo magneto-optical disks, development of protective Tb-SiO_2 film 87−68220
TbFeCo magneto-optical recording bit shift rel. to crosstalk and overwrite noise 88−58266
TbFeCo recording media for magneto-optical disk, development *(Japanese)* 87−1890
TbFeCo/Si_3N_4 magneto-optical video discs on plastic substrates 88−58269
Te low oxide and alloy films, optical disc memory materials, charact. and props. 85−35379
Te-CS_2 optical films, for direct-read-after-write optical discs, fabrication materials and processes *(Japanese)* 85−58385
Te-Ge-Sn-Au phase change recording film for optical disk 87−38724
Te-Se-Ga films, erasable optical disc crystn. props. 88−26744
Te-TeO_2:Pd write-once media for optical discs 87−38718
$Te_{87}Ge_8Sn_5$ films, reversibility and stability for optical data storage appl. 85−41100
TeO_x thin films, reactively sputtered, optical disc recording appl. 88−58049

fibres, single-mode, dispersion limited production tolerances 88−13819
fibres, single-mode, dispersion meas. using optical sampling with mode-locked laser diode 86−48135
fibres, single-mode, four photon mixing and dispersion 86−58780
fibres, single-mode, in PSK coherent optical transmission system, bandwidth 88−35501
fibres, single-mode, mode diameter and cutoff wavelength meas. 87−54077
fibres, single-mode, with various index profiles, chromatic dispersion 85−41145
fibres, single-mode low-dispersion graded-index, numerical method for anal. 86−2734
fibres, single-mode multiple-clad dispersion flattened low loss, long lengths for cables and links 86−37915
fibres, single-mode nonlinear pulse distortion at zero-dispersion wavelength 86−36190
fibres, single-mode operating at few-mode wavelengths 88−65201
fibres, single-mode with arbitrary index profiles, dispersion calc. 87−12143
fibres, single-mode with elliptic cores, higher mode dispersion charact. 88−20362
fibres, spectral charactn. 88−51533
fibres, ultra low loss, scattering and other parameters 85−18659
fibres dispersion anal. by effective-index method 86−36123
fibres Gaussian profile dispersion shifted, VAD 86−36241
fibres geometrical and optical parameters meas., using refracted near field method *(Czech)* 88−28846
fibres single-mode, characterisation 85−41115
fibres single-mode, nonlinear propag. at zero dispersion wavelength 87−7150
fibres single-mode dispersion flattened, plasma CVD, performance and design optimisation 86−36242
filter, prism based spectral filtering, for ultrashort pulses, group velocity dispersion correction 87−18791
fluoride glass fibre, 2.55 μm, transmission props. 86−58758
fluoride glasses and fibres, optical props. 88−20323
four-layer thin-film waveguide, generalised dispersion props. 87−38732
four-photon mixing processes, phase matched, in birefringent fibres 85−2400
frequency doubling of subpicosecond light pulses, effect of dispersion of nonlinear wave coupling 86−58970
gain-guided lasers, mode partition noise, effect on multimode fibre-optic system 86−15667
gas lasers, Doppler broadened, freq. stabilisation using anomalous dispersion effect 88−65557
gaseous media, laser-controlled optics using near-reson. nonlinear dispersion 85−19023
gases, low-pressure, in light guides, as high-power forward Raman amplifiers 87−12563
gases dispersion meas., using automatic laser interference refractometer 88−42304
gate based on spatial-dispersion effect, resonance frequencies 86−36562
graded index fibre link, pulse dispersion anal. 86−37880
graded index optical fibres, dispersion anal. 86−9532
graded-index film waveguide, exponential-like profile, nonlinear waves study 87−39202
GRIN planar waveguides with nonlinear cover medium, guided waves 87−25922
GRIN waveguides, guided nonlinear TE waves 87−74728
heavy metal fluoride glass fibres, chromatic dispersion charact. 88−58113
heavy metal fluoride single-mode mid-IR fibres for telecommunications, design 88−58112
high bitrate optical transmission systems using single mode fibre 88−41685
holographic reconstructive images using incoherent multimode optical fibres, deformation meas. appl. 88−34157
III-V semiconductors, optical props. 88−25889
image wavefronts propagation through turbulence, wavelength effects obs. 88−40581
injection laser, single-frequency with external dispersive resonator, intensity fluctuations 87−54371

computer interface for incremental transducer *(German)* 85−42978
concentrators, two-stage photovoltaic with dielectric second stages, optics 87−46675
conducting polymers, appl. in electronic and optoelectronic devices 87−53940
conference, London, England (June 1988) 88−55851
conference, optical metrology and optical component manufacture, Delhi, India (Feb. 1985) 86−13257
conical cavities of thermal radiation receivers, absorption characts. analysis 85−64153
controllable nonreciprocal optical phase shifter 85−35857
correlelogram stereo display, computer simulations 88−16264
depolariser, single-mode fibre optic, using Mach-Zehnder interferometer 86−42281
diaphragms, controllable apodizing, based on Pockels effect, transmission spatial distrib. calc. 85−46214
directory of optical sensor components 86−36111
disk drive flat optics, design factors in manufacturing and volume cost 88−33833
double-ring optical devices, bistable behaviour 88−65876
eye protection against nuclear flash blindness, liq. cryst. device 86−65475
eye protection against nuclear light flash, device tech. requirement calcs. 86−65474
fibre gates, induced Kerr phase shifting at diode laser pump powers 88−58322
fibre optic components, in-line filter, switch and attenuator 86−59908
fibre optic components, review 86−63609
fibre optic Kerr shutter for optical sampling 85−35852
fibre optic nonlinear coherent coupler 88−1935
fibre optic power divider, 3-dB fabrication for sensor appls. 87−68077
fibre optic sensors, optical component limitations to development 85−41159
all fibre polarisation beam splitter/combiner using low birefr. fibre, fabrication 85−41185
fibre polarisation state controller, using linearly birefringent fibre and piezoelectric transducer 88−33684
all fibre polarising beam splitter and spectral filter 85−41184
focal plane optics in far-infrared and submillimeterastronomy 86−43930
focusers for laser ophthalmic surgery, planar axially asymmetric 85−59338
free electron laser short wavelength coated optics, damage processes 87−54386
functional alignment of tilted and decentred optical trains, optical tooling, antares laser 85−18999
glasses, magneto-optics, for optical elements, light transmission, chemical resist. 88−13780
glasses, monolithic, and fibre-optic elements, microhardness 85−12539
heavy metal fluoride glasses, intrinsic instabilities 85−18627
hemispherical reflector for laser processing 85−29880
heterodyne detection, signal/nose ratio, effect of beam splitter thickness *(Japanese)* 85−18765
heterodyne interferometer combining collinear-beam Bragg cell and polarising beam splitter 86−68359
hybrid quantum/thermal solar concentration systems using spectral selectivity 87−22756
hybrid solar energy conversion systems, optical beam splitting for increased conversion efficiency 88−23810
image relays, hard optic, fibre optic and electro-optic comparison in ground combat vehicle sighting system 85−56389
inductive grids in resonant region, theory and expt. 86−2905
insertion device beam line optics, review 87−26117
integrated microwave magnetostatic wave devices 87−25865
IR linescan configuration optimisation technique 85−58610
IR window coatings for sensor systems 85−46239
laser accessories, deformation energy influence on laser damage threshold 88−40289
laser beam splitter, adjustable 85−62638
laser beam splitter, electrooptical appls. 85−46216
laser beam waist-locating device for convergent beams 85−29891
laser components, damage considerations 87−46948
laser damage testing of optical components, test planning 86−9927
laser damage threshold measurement of optical components at 1.06 μm 85−7503
laser developments, special optics for UV and IR laser light *(Dutch)* 88−51874

Mach-Zehnder modulators and optical switches on III-V semiconductors 88−72139
measurement system for single-mode fibre communication system *(Japanese)* 86−28781
microoptical components for optical communication, microlenses *(Japanese)* 87−38889
microscope attachment, for planar structures fabrication of micron size 86−28394
multilayer components for soft X-ray laser cavities 87−12524
multilayer mirrors and beamsplitters for X-ray laser cavity, TEM and X-ray anal. 88−2332
multilayered foils as entrance windows and spectral filters for image convertors in ultrasoft X-ray region 88−23017
multiple assembly combination optical device for high power lasers 85−7473
multistability, thermally induced with beam splitter in degenerate two-beam interferometer configuration 86−48500
multistage laser amplifier alignment with periodic spatial filtering of beam 85−2263
nanosecond light shutters in coupled video systems, microchannel plate image intensifier tubes 87−53130
nanosecond optical shutters for microchannel plate image intensifier tubes 87−14148
negative group-velocity dispersion using refraction, structures to provide adjustable group-velocity dispersion 85−7292
nuclear-radiation-induced absorption in opticalmaterials 86−28779
orthogonal transparencies, use in recording and synthesis of holograms 88−14289
parallel interconnections, N^4 weighted 88−58317
passive components, materials and technology, conf., Paris, France (Nov. 1987) 88−31310
passive film shutters with thiopyrilocyanine dyes for picosec. IR lasers 86−29208
passive TE/TM mode splitting device by the ion-exchanged $LiNbO_3$ waveguide 85−35518
phase corrector plate for single-lobed phased array far field pattern generation 86−68590
phase plates for changing laser wavefronts 88−45521
phase shifter for IR lasers *(Chinese)* 86−22446
photointerrupter with high resolution encoder function moire stripe appl., Sharp GP1A35R *(Japanese)* 88−2080
photonics diagnostic systems using fibre optics 88−58131
planar meshes with discrete loads, circuit modelling, equiv. mesh impedances 87−33023
plane glass plate, parallel laser light meas. 85−7487
PMMA, real time laser damage detect. by Strehl intensities 86−29218
pneumatic shutter for high power arc lamps, optical annealers appl. 87−72565
polarisation switch, monochromatic light, of high angular aperture 85−24340
polariser based on buried waveguide in glass 88−20430
polariser integrated on SiO_2 planar waveguide with metallic coatings, high extinction ratio 85−2054
polishing of optical components for CO_2 lasers *(Japanese)* 86−29203
polycarbonate-based variable retardation plate with graded-birefringence 88−58330
polyethylene thin film as window for pulsed TEA CO_2 lasers 88−51867
portable TV cameras, electromechanical devices for optical components control *(Russian)* 87−76984
power-stabilisation system, beam splitter reflectance fluctuations 88−14246
pyroelectric compact vidicon camera, stable picture using orbiting optical element *(Chinese)* 86−67637
quasi-optical components, MM waves propagation *(Dutch)* 88−27470
reliability, effects of solder creep 87−10212
ruby laser, passive shutters using radiation-coloured leucosapphire 85−18992
sapphire window, cylindrical for laser Doppler velocimetry, incident beam polarisation 85−58940
semiconductor optical bistability, towards the optical computer 87−46995
shaft encoder, high resolution design 85−40136
shutter transmission, electro-optic crystal misalignment effect 85−46218
shutter with controllable exposure time 87−61202
single-layer-coated dielectric surface, simultaneous light reflection and refraction without polarisation change 85−29682
single-mode fibre device overview, polarisation-preserving props. 85−2050
single-mode fibre-horn beam expander 88−26761
single-mode integrated-optical polarizers in $LiNbO_3$ and glass waveguides 85−24336
soft X-ray laser cavity components, beamsplitters and dispersive multilayer mirrors 88−2331
soft X-ray optics and technology, conf., Berlin, Germany (Dec. 1986) 88−18302
Southwest optics conf., Albuquerque, NM, USA (March 1985) 86−26479
spectral multiplexing beam combiner for diode lasers 88−27178
spectrally selective shutter in proximity to focal plane 87−14158
squeezed light, effects of optical processing on nonclassical props., review 87−2662
Stark-induced birefringence and dichroism, turnable optical filters, modulators and limiters appl. 86−36255
static and adaptive elements of power optics 86−15746
submarine optical fibre transmission systems, optical components reliability 88−67393
subMM technology, quasi-optical components 87−45219
switch based on dielectric liquid film displacement *(French)* 88−58328

alignment-tolerant optical fibre tips for laser transmitters 86−2718
all-fibre modulators for fibre optic systems, reviews 86−2772
all-fibre networks intro. by Southern Bell 88−4033
all-optical devices based on third-order nonlinearity of birefringent fibres 86−28845
all-optical regenerator using self-electrooptic effect devices 88−60140
all-optical synchronous multiple access fibre networks, design 87−28580
allowable fusion splice loss in multi-spliced opticaltransmission lines *(Japanese)* 86−9527
ALOHA for local area networks 87−55782
aM transmission in fiber 88−41609
Amid IR fibres, test facility design for propag. charact. meas. 88−58123
amplified nonlinear dispersive systems, energy trapping into solitary waves 88−20371
amplified spontaneous Raman scattering in fibre Raman amplifiers 87−12124
amplifier chains, linear optical, noise accumulation 86−3288
amplifiers, British Telecom development initiatives 88−3966
amplitude distortion correction, modal dispersal and phase conjugation method 88−20745
analog amplification by Raman scattering 88−7874
analog amplification by Raman scattering in optical fibers 88−58135
analog communication by PWM 87−40921
analog FDM signal transmission on optical fibre links, system performance parameter 87−49107
analog FDM signals on single-mode fibre optic links, multichannel transmission considerations 87−40965
analog measuring line, design 85−8442
analog microwave fiber optic communications links 85−20243
analog optical fibre transmission system, development 85−63691
analog to digital to analog channel with DC to 1 MHz analog signal bandwidth and high voltage isolation 85−3476
analog video transmission using laser diode module 85−3768
analogue CATV signals, phase modulated optical fibre transmission 88−47149
analogue multichannel cable TV distribution system, single mode fibre optic technology appls. 85−42760
analogue transmission in optical fibre systems *(German)* 88−73911

optical fibres continued
analogue transmission system, low-coherence laser design 85−63670
analogue video transmission over optical fibres, pulse modulation study *(French)* 85−3462
analogue video transmission using optical frequency modulation with heterodyne detection 87−20542
anisotropic, cylindrical polar axes 87−25934
anisotropic, depressed-cladding profile 87−38788
anisotropic, single mode, stimulated Raman scatt. 88−26814
anisotropic fiber couplers with nonaligned optical axes 88−39886
anisotropic fibers with elliptical deformed core , numerical investig. 88−72012
anisotropic optical fibre with arbitrary index distribution, numerical anal. 88−2016
anisotropic polarisation maintaining coupled modes anal. 88−33626
anisotropic single-mode, degree of polarisation including random-mode-conversion effect 85−7248
anisotropic single-mode fibres, polarisation dispersion spectral depend. 86−2823
anisotropic with nonaligned optical axes, light propag. 86−58769
ANSI fibre optic LAN standard, future 86−16883
antenna beamforming using optical processor 88−2855
antenna phased array elements, optical control 88−34505
antenna phased arrays, optically derived signal set 88−27670
anti reflection coating design for fibre optic communication equipment, production run simulation 87−12287
APD receiver, digital PPM over optical fibres 87−8279
apparatus for measuring the refractive index profile of an optical fibre 87−21267
applications, as sensors *(Korean)* 85−14806
applications, conf., Warsaw, Poland (Feb. 1986) 87−72668
applications in US Navy 86−53964
applications of *(German)* 88−9540
applications of fiber optic communications 85−63677
applications of tele-information and telematics for important users *(Italian)* 87−34018
AQ-6310 optical spectrum analyser, broadband range meas. with speed and accuracy 88−42009
aramid fibre, stress-strain properties 88−26824
arbitrary cross section, mode dispersion 87−32941
arbitrary fibre optic LANs−performance and designissues 86−17042
arc fusion splice machine, fully automatic design 85−18675
arc fusion splicing process, optimisation 87−74772
arc fusion splicing techniques *(Japanese)* 87−8255
arc welding, using controllable power supply source 86−40898
arc-fusion method for high strength optical fibre splicing 86−68243
arc-fusion splicing of single mode fibres 88−20391
architecture for residential telephone services 86−49627
ARCNET on-fibre, factory automation alternative 88−41343
army communications, future of fibre optics 86−37881
array interconnection, optical beam steering using dynamic holography 86−42325
ARTIS integrated services videocommunication and telecom cabled network 88−9779
ARTIS integrated services videocommunication andtelecommunication cabled network 86−30180
As_2Se_3 chalcogenide glass fibres, IR radiation attenuation determ. by tunable diode laser 86−42268
ASK heterodyne detect. for semiconductor laser linewidth var. 86−30786
ASK modulation in optical fibre data transmission systems *(Chinese)* 88−41652
ASK polarisation diversity and standard coherent optical heterodyne receivers, comparison 88−22070
ASK two-channel heterodyne detection system with non-negligible laser linewidth, crosstalk penalty 88−15448
assemblies and accessories, applications *(Japanese)* 85−41131
assembly and meas. *(Polish)* 86−43839
asymmetric fiber optic coupler for LAN applications 88−13863
asymmetric fibre optic coupler for LAN appls. 87−20503
asymmetrical elliptical preforms or fibres, index profile meas. 87−25956
asynchronous fiber optic local area network using CDMA and optical correlation 88−9564
AT&T land-to-sea FO cable jointing system 87−13737
AT&T rectangular polarisation-maintaining fibre, props. 88−39935
AT and T miniaturised types and ODL50/200 transmitters *(German)* 87−70038
attachment for guided wave devices, review 88−72021
attenuation at low temperatures, anal. 85−58133
attenuation by periodic microdistortions of sensor fibre 86−22160
attenuation changes due to OH ions diffusion meas. *(Czech)* 86−9494
attenuation due to H interaction with fibres causing aging 88−39891
attenuation meas. in UV region 88−65208
attenuator, programmable, for fibreoptic test environments, design approach 87−40901
attenuator, tension adjusted, in-line 85−2021
Australia, rural optical communication program 88−60203
Australia's telecommunication services, appl. 85−25889
Australia fibre-optic projects 87−70096
Australian optical fibre trunk network, power systems 88−62455
Australian optical fibre trunk network, rack power system using rectifiers and recomb. batteries 87−30820
Australian rural communications, optical systems 88−60205
Australian telecommunications, appl. of optical fibre technology 85−63718
Australian telecommunications, digital radio and fibre optics 88−46857
Automated environmental simulation model for analyzing wound fiber optic bobbins 88−45117
automated fusion splicing technique for highly birefringent fibres 88−72080
automated office connection multipurpose cabling systems *(French)* 87−48836
automated spectrophotometric system with fibre-optic link, construction 87−74771
automatic fusion splicing machine for single mode fibres *(French)* 86−9580
automatic high-speed fusion splice machine for single-mode optical fibre ribbon 88−45139
automatic mounting and adjustment method *(German)* 86−48124
automatic polarisation control schemes, overcoming finite-range limitation of certain state of polarisation control devices 86−23857
automobile appls. 88−7890
automobile electronic innovations *(Spanish)* 87−22876

optical fibres continued
automobile electronic wiring system using bidirectional optical fibre config. 86−52017
automobile electronics, appl. of microprocessor, optical fibres and display technology 86−26381
automobile electronics, diagnostic equipment interfacing using fibre-optic link 87−9931
automobile multiplexing system for digital transmission and processing *(Japanese)* 86−71115
automobile multiplexing system using optical fibre network 87−13498
autonomous decentralised double loop network system 87−20488
avalanche photoreceiver, pulse recording, investigation of spectral and temporal errors 85−29721
axial lateral plasma deposition (ALPD) technology for optical fibre manufacture 85−29536
axial residual stress measurement 85−18678
axial strain evaluation based on stimulated four-photon mixing process 86−2684
axially coupled waveguides in integrated optical devices and fibre cables, coupling coeff., calc. *(German)* 85−50942
axially nonsymmetric fibres, modal spot size of fundamental modes 86−28794
axially nonuniform, soliton propagation 88−51458
axially strained few-mode optical fibres, mode-mode interference effects obs. 88−39946
axially symmetrical graded core type, finite element anal. using mag. field vector *(Japanese)* 88−39950
azimuthally inhomogeneous circularly birefr. fibres, modal analysis and design criteria 88−65264
B-ISDN implementation using optical fibres 88−35209
backscatter diagrams of lightwave conductors, attenuation meas. *(German)* 86−28838
backscattering under double-mode conditions 88−26790
backscattering-attenuation measurement technique for glass fibre cables *(German)* 85−25894
backward wave couplers and reflectors 88−39916
balanced line codes for optical fibre transmission systems *(Spanish)* 87−70108
ball-bed mode mixer for fiber evaluation and micro-optic device assembly 87−46533
band-limited systems, microprocessor controlled regenerator 85−58085
bandwidth and rel. to system design 88−20345
bandwidth meas. 86−15509
bandwidth meas. instrument *(Italian)* 87−68042
bandwidth measurement, pulse spectrum analysis method 87−34588
bandwidth measurement using pulse spectrum analysis 86−42231
bandwidth measurements with single and multilongitudinal mode lasers operating at 0.8, 1.3 and 1.5 μm 85−62326
bandwidth variation with wavelength in 850 nm region, meas. using mode-locked styryl-9 dye laser 88−65181
baseband video signals using analog high-performance transfer-stabilised fibre-optic transmission system 85−3438
basic principles and component requirements 86−36135
beam length calc. in fibre lightguide bundle *(Russian)* 86−28869
beam propagation method 86−28790
beam propagation method approx. of Helmholtz eqn., anal., report 87−46553
beam propagation method results in integrated optics, semiconductor laser theory and fibre optics 85−56361
beam splitter, polarising, using surface plasmons 88−65277
beam transformers for obtaining low-loss splices between dissimilar single-mode fibers 87−54010
beam-expansion systems role in optical data highways 85−14280
beamforming and optical fibre gap devices fabrication 88−65237
beat length meas. using non-modulating elasto-optic point perturbation technique 88−39936
beat-length meas. through stress-induced scattering 88−58072
Bell system lightguide cable interconnectionequipment, central office to customer premises 85−58129
bend-optimised, dispersion-shifted step-shaped-index fibres 87−18608
bending, fracture mechanics evaluation of static fatigue life 85−62393
bending, static fatigue lifetime 88−1932
bending and twist stress 88−13868
bending effects, mode coupling 85−12571
bending loss characterization in single-mode fibres 88−45161
bending loss formula explaining bends on loss curve 88−1969
bending loss meas. of LP_{11} mode using heterodyne interferometer 86−9470
bending strain of fibre in cable *(Japanese)* 87−54066
bent, birefringent, coupled mode anal. 87−60926
bent, few-modes, stimulated four-photon mixing 88−39901
bent, single mode, beam instability 85−7275
bent, single-mode, birefringence formula 88−39885
bent birefringent fibre, retardation characteristics, fibre-optic sensing appl. 87−68106
bent multimode fibre waveguides, light transmission, temperature influence 85−41171
bent optical fibre cable, strain meas. 86−28878
bent waveguides, exact ray path calc. 88−72082
benzene filled capillary waveguides as stimulated Brillouin scattering mirrors 87−75238
BER degradation in multimode fibre optic link, modal noise anal. 87−28582
BERKOM−a broadband ISDN project 88−59843
BERKOM project, ISDN broadband network *(German)* 88−73682
Berlin IV project for optical communications 86−17390
Berlin IV project for optical communications transmission *(German)* 85−25890
Bermuda Tel's digital modernization project 85−8055
Berne-Neuchatel optical fibre link *(French, German)* 87−3189
Biarritz broadband multiservice network, first results from operation 88−28902
Biarritz broadband multiservice network trials *(French)* 88−8941
Biarritz optical multiservice subscriber network, experience 86−30765
Biarritz trial optical fibre network, first lessons 87−20548
biconic fiber to fibre rotary optical coupler 88−26806
biconic fibre optic connector sleeve, interferometric characterisation 88−26825
biconical couplers, single-mode, fused for wavelength diffusion multiplexing, channel spacing between 100 and 300 nm 88−33630
biconical fused taper low-loss coupler, fabrication and characts., temp. meas. appl. 87−26061
optical fibres continued
biconical taper coaxial coupler filter, characts. and fabrication from single-mode fibres 86−9469
biconical taper coaxial optical fibre coupler 86−4633
biconical taper coupler, multimode, coupling efficiency 85−62328
biconical tapered couplers, automated manufacture and charactn. overcoupled operation 87−68137
biconically tapered fibre star coupler, structure and fabrication 85−46142
bidirectional 2 Mbit/s transmission over a single fibreusing electrical echo cancellation 86−49585
bidirectional communication link for optical fiber payout from a remotely operated vehicle 85−14317
bidirectional data transfer via optical fibres *(German)* 87−3192
bidirectional digital optical fiber system with transmitters synchronized with receivers 87−76769
bidirectional fibre optic links using refractive modulation, design 88−67389
bidirectional fibre-optic link using reflectivemodulation 86−49583
bidirectional fibre-optical transmission using amultiple-quantum-well (MQW) modulator/detector 86−49584
bidirectional full-duplex single fibre link with semicond. junction transceiver 87−28591
bidirectional link, single-wavelength, interf. canceller 85−3449
bidirectional optical fibre links *(French)* 86−30832
bidirectional optical fibre transmission systems using Raman amplification 88−35500
bidirectional optical rotary joint, low-loss, for fibre-optic appls. 85−8398
bidirectional optical transmission using polarised light waves, 100 Mbit/s 1.55 μm signal over 13.6 km fibre 87−56134
bidirectional single optical fibre links and components 87−56109
bidirectional single-mode fibre subscriber line far-broadband ISDN using WDM 85−3446
bidirectional transmission at 1.3 μm over single-mode fibre using biconical tapered couplers 85−3444
bidirectional transmission on single-mode fibre using edge-emitting LED and optical couplers 88−47131
bidirectional transmission systems using single glass fibre *(German)* 86−4616
bidirectional wideband local network using optical cables, for subscribers *(German)* 85−20203
BIGFON, general description *(German)* 87−76056
BIGFON, power supply of optical subscriber system 86−61640
BIGFON and BSS system architecture, development method 86−49424
Bigfon and its possibilities, comparison with B-ISDN system *(German)* 85−19983
BIGFON broadband network, situation in Western Germany *(German)* 86−49117
BIGFON fibre optic networks, design and operational results 86−11117
BIGFON fibre optical network development *(German)* 85−30555
BIGFON network in West Germany *(German)* 85−25247
Bigfon project, 140 Mbit/s trunk network and videotelephone trial network *(German)* 85−36875
BIGFON signals reception, digital PCM tuner appl. 85−52335
BIGFON tuner for sound broadcast reception *(German)* 85−52484
biotechnology appls. of laser light scattering instrumentation 88−42543
bipolar fibre-optic receiver, 250 Mbit/s, single-chip device using ASPECT technology 88−9616
bipolar high-gain limiting amplifier IC for optical fibre receivers, design and characts. 87−65866
bipolar integrated circuits for broadband communications systems *(German)* 87−40917
bipolar tap implementation using incoherent optical source 87−74735
bipulse regenerators for optical communications systems 86−30812
birefringence characterization of fibres without polarizer 88−45151
birefringence determ. by normalised second-order factorial moment meas. 87−25933
birefringence meas., rotating linearly polarised light source appl. 87−14576
birefringence meas., using rotating light source 86−24806
birefringence meas. in single-mode optical fibre, using circularly polarised light 86−11760
birefringence meas. method 88−58077
birefringence meas. with external stress method and heterodyne polarisation detection 88−13818
birefringent, anal. 87−32965
birefringent, beat-length meas. 88−13835
birefringent, longitudinal coherence props. of light waves 87−54027
birefringent, modulational polarisation instability 88−72040
birefringent, nonlinear polarisation changes 88−1992
birefringent, nonlinear power coupling, intensity discrimination 86−63607
birefringent, polarisation-dependent chromatic dispersion 87−38792
birefringent, self-induced polarization changes 85−56786
birefringent, single-mode, polarisation-mode interferometry 87−68132
birefringent, soliton stability 87−68130
birefringent, soliton stability 88−33652
birefringent effect in optical fiber, longitudinal coherence loss, orthogonally polarised HE_{11} modes 88−1988
birefringent fibre, nonlinear mode coupling, optical pulse reshaping 85−7208
birefringent fibre, optically nonlinear, polarisation state stabilisation 87−46453
birefringent fibre alignment with laser diode 85−20183
birefringent fibre lightguide, four-wave mixing, freq. tuning obs. 85−12615
birefringent fibre waveguide with elliptic borosilicate cladding, polarisation characts. study 87−32973
birefringent fibres, angular alignment by interferometric technique with broadband source 87−68025
birefringent fibres, intensity-depend. polarisation changes, theory 86−48172
birefringent fibres, single-sideband freq. shifting 85−24289
birefringent launching fibres for reducing backscattered power fluctuations in polarisation-sensitive OTDR 86−9491
birefringent monomode pulse transmission *(Spanish)* 88−33664
birefringent optical fibre, polarisation instability, obs. 87−18596
birefringent optical fibre with very fine layered dielectrics 86−42347
birefringent polarisation-maintaining, mode coupling distrib. meas 87−18668
birefringent polarisation-maintaining fibres, polarisation mode coupling with broadband source 85−46152
birefringent single mode fibres, nonlinear pulse propag. 87−38759
birefringent single-mode fibre, sequence-freq. three-wave mixing emissions 86−22515

optical fibres continued
birefringent single-mode fibre link with imperfect joints, polarisation noise 85−62338
birefringent system under forced vibration, polarisation fluctuation characts. 88−51456
bistable laser diode memory for optical time-division switching network, operational characts. *(Japanese)* 87−76803
bit rate limiter for 'dark' fibre communication 88−4013
bit rate limiting as an alternative to facility bypass 88−4022
bit-rate-repeater spacing product of optical fibre communication systems 88−4053
blank and fibre waveguide parameters, MCVD prod. method with jacket dia. automatic control 86−9499
Blazenet: A high performance wide-area packet-switched network using optical fibers 87−69744

components, standardisation *(German)* 86−23895
components and special appls. *(Italian)* 87−49047
components and techniques for LAN 86−49579
components based on LEDs and multimode fibres for 40 channel WDM for short haul communications networks 86−43872
components for fibre optic appls., conf., San Diego, USA (Aug. 1987) 88−43565
components for fibre optics *(Italian)* 88−35484
components for multimode fibre-optic networks, manufacturing technique 86−63634
components for submarine fibre optic communication systems, reliability 87−70055
components for systems *(German)* 85−63645
composite cable containing optical fibre and multipairs, design 88−22155
composite fiber-optic ground wire for power lines 86−56448
composite fibre optic overhead ground wire, laboratory and field tests 87−28590
composite fibre-optic ground wire, development 85−36892
composite fibre-optic ground wire communication systems for power transmission facilities appl. 85−58120
composite fibre-optic overhead ground wire, communication capabilities use, field trial 85−57923
composite fibre-optic overhead ground wire, optimum design 88−68998
composite fibre-optic overhead ground wire, superior performance 88−67392
composite ground wire, long-term reliability 86−49647
composite ground wire, optical fibre, development *(Japanese)* 85−37083
composite ground wire with optical fibre, develop., spacers to prevent crushing *(Japanese)* 87−60934
composite impact monitor 87−56681
composite metal/glass fibre polarisers, high-performance, fabrication 88−65218
composite multicore fibre-optic overhead ground wire development with tape-coated fibres 88−60184
composite optical fibre overhead ground wire 87−76764
composite optical fibre/copper LAN cable for mining appl. 86−49662
composite optical fibres, polarisation maintaining, cutoff charact. 88−65196
composite overhead ground wire, insulation charact. *(Japanese)* 86−64965
composite overhead ground wire containing optical fibres, mechanical and electrical testing 85−59805
composite overhead wire 85−42409
composite power and fibre optic cables, design and appl. 88−9609
composite submarine cable containing optical fibers and pilot pairs, construction and charact. 87−48837
compound glass fibre with low loss, large core and high numerical aperture *(Japanese)* 87−60936
compression of optical wave packets 88−33690
computational analysis of realistic scalar optical fibre models 85−50900
computer communications using fibre optics and lasers 85−14239
computer coupling using volstrons 88−65206
computer data links, transmitter availability improvement using monolithic laser arrays 88−46581
computer data links with monolithic laser arrays, transmitter availability improvement 88−35177

optical fibres continued
computer graphics appls. of fibre optic links 85−25864

connectors and interconnection technology, conf., Anaheim, CA, USA (Oct. 1986) 87−16279
optical fibres continued
connectors and splices, test conditions 85−12554
connectors for high power laser energy transfer in ordnance systems, development 87−18738
connectors for LAN applications, evaluation 88−13871
connectors for military/aerospace appls., market survey 85−40293
connectors for near perfect long haul transmission 87−3187
connectors for optical fibre transmission lines *(German)* 85−1997
connectors for optical fibres *(Italian)* 86−9480
connectors for subscriber cables 87−34592
connectors in LED systems, mode mixing effects 87−12186
connectors using flexible fine ferrules 87−7141
connectors with low insertion loss 85−56289
connectors with spherically convex-polished ends, connection stability *(Japanese)* 87−54065
construction technology, materials, technique and future prospects *(Italian)* 87−1955
continuous phase FSK optical heterodyne transmission through 200 km single-mode fibre at 2 Gbit/s 87−40885
continuous skull-melting of glass 86−13851
contrast resolution function of flexible fiber elements 88−72045
control system appl. 85−46157
converter with recorder, electrical switches displacement meas. 87−74769
cooling rate of drawing process, effect on 630 nm absorption 88−39894
Copenhagen, fibre optic packet-switched network for power cable and district heating supervision 88−73966
copper wire verses optical fibre, for communication/data transfer *(German)* 85−14281
core centering for optical fibre connectors *(German)* 88−7917
core centering in optical fibres 88−51470
core dopant profiles in weakly fused single-mode fibres 88−26760
core glass for double crucible optical fibres with high numerical apertures 85−18635
cores, depressed refractive index, mode propagation effects 86−68263
correlations between optical fibre parameters 85−2024
Cossor's FMS, use of fibre-optic links 87−3170
Cossor flexible manufacturing system, using fibre optic links 87−8249
coupled, LP_{01} and LP_{11} modes propagation 87−68173
coupled mode formulations, error considerations 87−74684
coupled mode theory 87−38748
coupled single-mode fibre communication links 87−49065
coupler, bidirectional, active, compact for fibre optic transmission 87−3196
coupler, fibre directional, polarisation selectivity 86−9517
coupler, fused biconic taper, environmental performance 87−12179
coupler, liquid-crystalline, voltage-controlled pulsations 86−28913
coupler, low cost clamp-on JAWS, for ring topology local area networks 85−8394
coupler, polished, electrically tunable 88−65278
coupler, tapered, fused, optical characts. while undergoing fabrication 87−53949
coupler, WDM, 12-channel Littrow-type, anal. 87−12180
coupler, WDM active, bidirectional transmission on single fibre 87−8308
coupler between laser diode and single mode fibre, high coupling efficiency and low feedback effect 86−9536
coupler for VLSI interconnects 86−28850
coupler polarisation-preserving, stress distribs. in cross section 86−42236
coupler technology, recent advances 88−13857
couplers, 3×3 type; meas. method for optical phase shift determ. 88−33608
couplers, automatic polarisation spectral response meas. systems 88−20390
couplers, connectors and splice technology, conf., Arlington, VA, USA (May 1984) 85−5626
couplers, connectors and splices, conf., San Diego, CA, USA (Aug. 1985) 87−9999
couplers, crosstalk scalar theory for unequal cores 88−39887
couplers, design and characts. for communication appls. *(Japanese)* 85−42595
couplers, directional single-mode graded-index, anal. 85−41141
couplers, encapsulated, WDM 88−65279
couplers, fiber optic 87−12175
couplers, fibre optic systems, single-directional and two-way communication configs. 85−12555
couplers, fused, mass production 87−12192
couplers, fused biconical-taper single-mode fibre, power transfer, external refractive index depend. 85−29524
couplers, generalised coupled-mode equations 86−36145
couplers, long tapered type, polarisation modulation study and propag. 85−46143
couplers, mass-fabrication process using arrayed fibre ribbons 88−72018
couplers, moulded active, for optical networks 86−9571
couplers, multi mono for video communication networks 86−37891
couplers, polarisation preserving single-mode, reproducible fabrication method 88−72024
couplers, radiation losses 85−41139
couplers, single mode fibre, low loss, fabrication 86−2700
couplers, single- and few-mode, modal cutoffs 85−41144
couplers, single-mode fibre, polarisation splitting 86−42340
couplers, single-mode fibre, power oscillations in tapering 86−42341
couplers, single-mode fused tapered, core effects 87−54029
couplers, single-mode fused tapered, simplified design equation 87−12188
couplers, single-mode polarisation maintaining 87−12190
couplers between one and several multimode fibres, realisation *(French)* 86−9572
couplers composed of unequal cores 87−12115
couplers for fibre optic systems, review 87−68138
coupling, laser diode to multimode fibre calc. 86−48116
coupling, partial, with detector in coherent light, light power fluctuations at fibre output 88−20358
coupling between coated fibers in compact fiber ribbon 86−48111
coupling between fibre cores, critical examination 87−12123
coupling conditions of hololens-optical fibre system, optimisation of output signal 88−58137
coupling efficiency analysis, LED to single-mode fibre 87−12109
coupling efficiency in gain guiding semiconductor laser amplifier 86−48431
coupling efficiency of semiconductor laser source *(Japanese)* 87−38837
coupling element construction between waveguide and fibre 86−9513
coupling integrated optical polarizers to optical fiber sensors and systems 88−7870
coupling laser diode to single-mode fibre, combination lens method 85−35390

optical fibres continued
coupling loss between semiconductor lasers and single-mode fibre using tapered lensed fibres 86−42241
coupling losses meas., CCD image sensor appl. *(German)* 86−68250
coupling of laser diode to multimode using plano-convex GRIN lens 87−68019
coupling of laser diodes and LEDs to flat dispersion quadruple clad monomode fibres 86−42345
coupling of light from single-mode semiconductor lasers into single-mode optical fibres, review 87−7068
coupling of semiconductor laser diodes and single mode optical fibres 85−18717
coupling system 88−33701
CPFSK differential detection, linewidth requirement eval. and 290 km transmission expt. 86−63612
CPFSK heterodyne transmission, wavefront distortion evaluation 88−15470
crimp splice for multi- and single mode fibre networks installation 88−33696
cross phase modulation meas. 88−1960
cross-phase modulation in optical fibers 87−68134

fibre-optic and satellite networks design 88−15488
fibre-optic ASK heterodyne receiver sensitivity measurements. 86−11067
fibre-optic broadband interactive distribution network development 87−40109
fibre-optic cable losses, technological defects effect 87−70041
fibre-optic communication lines, optical fibres grouping methods 87−70040
fibre-optic communication systems, transmission charact. and capacity *(German)* 85−42580
fibre-optic communications lines, nonlinear distortions of signals 87−70042
fibre-optic communications system, noise immunity, photoreceiver bandwidth, lower limit effect 88−4004
fibre-optic components for long-distance and local networks *(German)* 88−73990
fibre-optic components using periodic coupling, description 86−2697
fibre-optic electric-power umbilical cable and optical feedthrough for ocean mining, development 85−58132
fibre-optic link, sync. cct. 85−14279
fibre-optic link using GaAs external modulator and diode laser coupled to external cavity 86−42317
fibre-optic links for microwave signal transmission, charact. 88−28885
fibre-optic metropolitan area network for multiple Gb/s 87−28631
fibre-optic networks, random access strategies 87−56195
fibre-optic star configured 32 Mbit/s, design and performance 85−63662
fibre-optic systems for subscriber network *(Japanese)* 87−28587
fibre-optic transmission, high-speed technology *(Norwegian)* 87−49114
fibre-optic transmission lines, digital signals receiving error probability and distortions 87−13712
fibre-optic transmission routes, service channels 87−70097
fibre-optic transmission systems 87−20563
fibre-optic transmission systems, chromatic dispersion/mode partition noise effects on bandwidth *(German)* 86−37908
fibre-optic video distribution system, configuration and characteris. 87−49332
fibre-optic wavelength-division single-mode multiplexer/demultiplexer 86−23855
fibre-optical data gathering network, construction 85−8441
fibre-optical systems, wavelength division multiplexing 85−63683
fibre-optics in the US, technological issues 88−15440
fibre-photodiode coupling, self-aligned flat-pack assembly 88−67342
fibre-to-the home, network transition 88−35523
fibres, birefringent, increase of minor field component 87−32962
fibres, frost-resistant noncrystallised silicone coating, loss reduction 85−62298
fibres, new transparent material for reduced optical attenuation *(Italian)* 88−39856
fibres, optical losses influence of light reflecting polymer cladding 86−36169
fibres, single mode, Raman and four photon mixing amplification 86−3305
fibres, vapour axial deposition, developments 87−7113
fibres coated at 10 m/s speed, optical and mechanical props. 86−22116
fibrescope using phase conjugate waves 88−26749
Fibrespan, STC overhead fibre-optic cable, development, construction and installation aspects *(French)* 88−73936
Fibreway: a high speed backbone LANfor distributed processing 86−69480
FibreWay fibre optic LAN, development 87−69685
field deployable fiber optic cables, secondary buffer coatings 88−28911
field instrumentation system using optical fibres 86−2837
field test equipment 88−60168

optical fibres continued
field-installable antireflection coating for optical fibre connectors 88−65188
field-use portable flame-retardant fibre optic cable with connector 86−49660
filters, optical fibre, pulse compression 85−35391
fine oxide particle VAD for optical fibre preforms *(Croatian)* 87−12204
FINEX system, high speed networking (FDDI) standard implementation 88−21742
finite-cladding lightguides, core-mode cutoff 87−18624
finite-element analysis, spurious modes elimination by using divergence-free fields 86−54327
fission product γ-irradiation, effect on transmission props. 86−42352
fixed transition coding, high speed timing recovery in fibre optic networks 88−4020
Fizeau fringe interferometer for fiber outside diameter measurements 88−39934
flame resistant optical fibre cable with corrosion protective painted stainless steel sheath *(Japanese)* 88−41704
flame retardant, low smoke, halogen free cable insulation for ships 87−21941
flame retardant cables for ships development, low smoke, halogen free types 86−49434
flame-retardant optical fibre cables, low smoke, halogen free, development 87−8328
FLAN, fiber optic local area networks 87−2896
flat bunch fibre format, fundamental studies 85−42584
flaw detection by diffr. ellipsometer 86−52570
flexible fine ferrule for optical fibre connectors 88−58161
flexible interconnect LAN (FILAN), fibre optic implementation 85−13968
flexible production systems, optical fibre assemblies *(German)* 87−76778
flexible system link FSL, optical token ring method for high speed transmission *(Japanese)* 87−62628
FLM-1 for multiplexing local data on single fibre 87−76721
Florida Keys lightguide project, design 85−14289
fluorescent lamps, dimming control using optical fibre cables 85−32778
fluoride, removal of Fe, Co, Ni and Cu from Zr 85−18633
fluoride fibre drawing with improved tensile strength 88−473
fluoride fibre glasses, absorpt. loss due to Fe ions, reduction using oxidation technique 85−56299
fluoride fibre optical transmission systems 88−45168
fluoride fibres, crystallisation free, core-clad composition 85−62313
fluoride glass, optical props. 88−20323
fluoride glass, ZBLAL, strength, toughness and fracture initiation 85−18631
fluoride glass fibre, 2.55 μm, transmission props. 86−58758
fluoride glass fibre, data transmission at 2.6 μm, $LiNbO_3$:Ti modulator use 86−48160
fluoride glass fibre drawing, optimisation with respect to mechanical strength 88−39911
fluoride glass fibre links for 2.5 μm wavelength, performance 87−8265
fluoride glass fibre optic links, system performance estimation 88−41671
fluoride glass fibres, reduction of impurities by starting material purification 85−12533
fluoride glass fibres, single-mode and multimode, fabrication by double-crucible technique 86−15462
fluoride glass fibres, stimulated Raman multi-Stokes scatt. and Raman amplification 85−62652
fluoride glass fibres for infrared transmission systems, optical and mech. props. 88−58149
fluoride glass IR fibres for light transmission up to 5 μm, numerical aperture meas. 85−18663
fluoride glass IR optical fibres, low-OH-absorption design 85−1995
fluoride glass IR optical fibres in medicine and biology 87−41950
fluoride glass optical fibre, impurity analysis by selectively excited photolum. 88−1924
fluoride glass optical fibre, interferometric meas. of nonlinear refractive index 88−45166
fluoride glass optical fibre, low OH and low loss, fabrication 85−12552
fluoride glass optical fibre, Pr^{3+} impurities, photoluminesc. anal. 87−18648
fluoride glass optical fibres, nonlinear refr. index, direct interferometric meas. 88−45147
fluoride glass optical fibres, scattering loss peaks 86−58770
fluoride glass optical fibres, synthesis by CVD process 88−58141
fluoride glass single-mode fibre, preform fabrication technique and transmission loss charact. 87−7087
fluoride glass single-mode fibres, spectral attenuation meas. by fourier transform spectroscopy 87−38744
fluoride glasses, noble metals as source of continuous scatt. 88−39857
fluoride glasses, OH molar extinction coeffs. considering molecular water influence 88−1918
fluoride glasses for optical fibres, reduction of OH absorpt. 85−12534
fluoride IR optical fibres with high numerical aperture, preparation *(Chinese)* 88−39865
fluoride optical fibres, 0.5 μm photoluminesc. 86−63651
fluoride optical fibres, 2-5 μm wavelength *(Japanese)* 88−13811
fluoride optical fibres, elevated NA, preparation 86−63650
fluoride optical fibres, scattering characteristics 87−38731
fluoride optical fibres, scattering loss and O content 86−22137
fluoride-glass single-mode fibres, ultralow-loss, design 87−7142
fluorohafnate glasses, Rayleigh and Brillouin scattering 85−18629
fluorozirconate glass preforms and optical fibres, manufacturing processes 88−45071
fluorozirconate glasses, Rayleigh and Brillouin scattering 85−18629
FM, fibre optic analog-digital signal transmission 85−47514
FM fibre optic audio link 86−49601
FM fibre-optic analogue/digital hybrid signal transmission, expt. study *(Japanese)* 85−14290
FM transmission of multichannel TV and digital signals over optical fibre 87−20538
FM-FDM optical transmission for HDTV in broadcasting station *(Japanese)* 87−20568
FMS, data transmission *(Japanese)* 88−9552
FOCOM 1800 Series fibre optic communications network 86−37899
FOCON, fibre optical communication network for military environments 87−49128
FOG-M missile, optical fibre spool testing 88−33703
force measurement in optical fibres using fibre optic sensor 87−56633
FORJ rotary joint for light guide coupling *(German)* 88−65184
FORTIS, fibre optic based distributed information network, architecture 87−40952

optical fibres continued
FOT 140/34, 140 and 34 Mbit/s monomode optical fibre transmission system, development 88−60131

FOTDR for optical cable fault finding 86−9459
four channel bidirectional data link using WDM 87−13728
four-diode polarisation diversity coherent receiver, excess sensitivity 88−35482
four-level PWM optical fibre system, error mechanisms 88−22064
four-photon mixing processes, phase matched, in birefringent fibres 85−2400
four-port fibre-optic ring resonator 88−51447
four-wavelength-division multiplex transmission system, config. and equipment, videoconferencing appl. *(Japanese)* 85−8430
Fourier analysis of complex envelope of echos in optical freq. domain reflectometer 86−44443
France fibre optic network for cable TV, development 85−25885
France optical broad-band networks, introduction 86−64982
free electron laser light guiding by electron beam-light coherent interaction 85−41421
French broadband networks integrating telecommunication services *(French)* 88−8942
French wideband communication local networks, present and future 87−27849
frequency broadening by self-phase modulation 85−62329
frequency chirping of external modulation and its reduction 86−10240
frequency doubling, review 88−58688
frequency doubling in single-mode optical fibres 88−40353
frequency doubling of 1.319 μm radiation in optical fibre by optically written grating 88−33610
frequency response meas., universal setup 87−74763
frequency shifter, twin-core optical fibre 88−1967
frequency shifter using linearly birefringent monomode fibre 87−74892
frequency shifter using SAW at oblique incidence, fibre-optic 86−28852
frequency translators, electro-optic, coherent optical fibre system appls. 87−54117
frequency-domain reflectometry, modulation freq. sweeping, for fibre diagnostics 87−8754
frequency-doubling processes, anal. using Raman spectroscopy 87−74733
friction coefficient between cable and duct 88−22150
friction coefficient between coated optical fibres and stranded loose-tube, meas. technique 86−44484
frost-resistant fibre optic modules 86−28834
frost-resistant noncrystallised silicone coating, loss reduction 85−62298
FS-400M optical fibre submarine transmission system, supervisory system 86−30822
FS-400M optical submarine transmission system, power feeder 86−30823
FS-400M submarine optical fibre system in Japan 85−37015
FS-400M submarine optical transmission system 86−30820
FS-400M submerged optical repeater 86−30821
FSK coherent optical fibre transmission system using polarisation diversity, dynamic operation study 88−15454
FSK fibre optic coherent transmission expt. using 1.5 μm external waveguide Bragg reflector laser 87−56133
FSK heterodyne detection system, long span transmission experiment 88−67404
FSK heterodyne dual filter detect. system, 300 km transmission 87−8271
FSK heterodyne transmission experiment over 100 km single-mode optical fibre 88−67403
FSK heterodyne transmission expt. using 1520 nm DFB laser transmitter 88−9555
FSK optical heterodyne receiver sensitivity stabilisation using automatic fibre polarisation control system 87−13693
FSK subcarrier multiplexed optical fibre communication system, 20 channel config. for video distrib. 88−67341
FSK transmission, 400 Mbit/s, over 270 km of single-mode fibre 86−30777
FSK transmission and heterodyne detection at 1.53 μm 86−49691
FSK transmission experiment using 10.5 kmpolarisation-maintaining fibre with 400 Mbit/s operation 86−30784
FSK transmission system using phase-diversity receiver, config. and operation 87−76757
FT4E 432 Mb/s optical fibre repeater line system, charact. and operation 85−20222
Fuji Electric fibre-optic field instrumentation system *(Japanese)* 88−28546
Fuji Electric remote terminal telemetering and telecontrol systems using optical fibres 86−17854
full-response digital optical fibre communication systems, optimal receiver transfer function *(Chinese)* 85−46124
fully-regenerated 2 Gbit/s, 90 km optical transmissionsystem using a commercial GaAs master-slave D-typeflip-flop 86−49674
fully-reversible moving fibre switch for enhanced appls. 88−45104
fundamental mode field-radius definition usable for non-Gaussian and noncircular field distribs. 85−50928
fused biconical monomode directional couplers, power transfer wavelength selectivity control 87−25920
fused coupler anal. by effective-index method 87−12113
fused coupler switch using a thermo-optic cladding 88−47029
fused couplers, characterisation for multimode optical fibre systems 85−35463
fused couplers, finite element anal. 86−63614
fused couplers of arbitrary cross section, simple expressions 86−9477
fused D-fibre couplers 87−12189
fused fibre couplers, environmental testing 88−45119
fused fibre couplers, practical model 88−65274
fused fibre couplers, transmission charact. and wavelength depend. study for WDM networks 86−36148
fused fibre couplers with parabolic taper shape, analytic coupling model 88−7848
fused fibre in-phase/quadrature measuring multiport 86−2685
fused fibre WDM couplers for multiplexer/demultiplexer devices 88−65280
fused silica flexible imaging device, optical performance obs. 88−39945
fused single-mode fibre couplers, modelling 85−46134
fused taper couplers, depend. on external refractive index, theoretical and expt. study 87−12112
fused taper couplers for singlemode propagation 86−48082
fused tapered birefringent-fibre coupler, polarisation splitting charact., anal 88−1929
fused tapered couplers, condition for insensitivity to external refractive index 87−38735
optical fibres continued
fused tapered couplers reliability 87−74788
fused tapered couplers variational analysis; 86−9472
fused tapered optical fibre couplers, overview 88−45097
fused tree WDM with high wavelength isolation over wide wavelength range 88−13859
fused-fibre coupler as quarter-wave device, polarisation charact. in 1.55 μm wavelength region 87−12114
fused-fibre-array structure, appl. to polarising directional coupler 85−2051
fused-taper single-mode fibre couplers, polarisation beam-splitting and combining charact. 86−53959
fused-taper single-mode fibre couplers, spectral response meas. of polarisation ratio 88−3981
fused-tapered asymmetric single mode fibre couplers, behaviour 88−65275
fusion mass splicing *(Japanese)* 85−41136
fusion mass-spliced fibres, rapid reinforcement using low-power induction heating 85−50904
fusion mass-splicing 86−28866
fusion neutron damage, effective life in fusion reactor environment 88−33728
fusion neutron damage, induced loss meas. 88−58096
fusion splice discontinuities finite-element anal. *(Japanese)* 86−29538
fusion splice loss meas. using light injection 88−1945
fusion splice losses for single-mode fibres, statistical analysis 85−1975
fusion splice packages, high-speed, using internal heat sources 85−12562
fusion splicers, portable, development trends 85−29535
fusion splices, loss and mech. strength 85−18687
fusion splicing, microprocessor controlled power supply and fibre manipulation 87−26059
fusion splicing between deposited silica waveguides and optical fibers 85−35451
fusion splicing of graded-index fibres, low-loss 85−41143
fusion splicing of multimode and single mode fibres 87−12210
fusion splicing of polarisation-preserving fibres *(Japanese)* 86−58756
future communication needs by planned optical fibre networks 85−14310
future transmission medium, conf., Bad Nauheim, Germany (Oct. 1985) 86−13261
FXNET: a backbone ring for voice and data 87−34117
gain-guided lasers, mode partition noise, effect on multimode fibre-optic system 86−15667
gamma-ray irradiation induced loss in optical fibres, estimation 88−45159
gas-tight dam using resin for optical fiber cables, structural design 88−35470
Gauss approximation for light-wave propag. in system calcs. *(German)* 87−20513
Gaussian beam alignment, coupling between semiconductor laser and single-mode fibre 85−18640
Gaussian profile dispersion shifted, VAD 86−36241
Gaussian-profile dispersion-shifted, VAD manufactured, design and performance 87−7109
Gb/s optical fibre systems, review of electro-optic and electronic components 85−20219
Gbit/s fibre transmission expts. using 1.3 μm high-speed surface-emitting DH LED 86−11121
Gbit/s monomode fibre systems in the 1.55 μm wavelength window 85−25909
Gbit/s optical fibre system development in the United Kingdom 87−34618
generic reliability assurance from Bellcore, overview 88−4032
geometric birefringence in fibres due to asymmetriccladding 86−53952
geometric charact. meas., using semiconductor emission source 88−33620
geometric charact. meas. by diffraction method 87−63517
geometrical parameters meas. using array CCD camera *(French)* 86−9578
geometry, computerised meas. and refractive index profile 86−53991

glass fibres, physics of light transmission *(German)* 85−50916
glass fibres, stress crack corrosion, nonlinear stress-strain ratio *(German)* 88−26755
glass fibres, UV-radiation induced colour centres 87−7065
glass fibres for optical transmission, mechanical props. *(German)* 86−42242
glass fibres of the future *(Dutch)* 88−3983
glass optical fibres, efficient SHG 87−26007
glass optical fibres, recovery characts. after irradiation, influence of H_2 treatment and water content 88−72051
glass optical guided-wave technology, review 87−38842
glass review, science, technology and appls. 88−56333
glass-based guided-wave optical components for telecommunications 87−70046
glass-fibre-overlay networks to broadband, telephone networks, strategy and system components *(German)* 86−30243
glass-metal seals, light detection obs., optical fibre light detector appl. 85−35432
glass-polymer optical fibres, polymer optical props., thermal changes 86−48146
glasses, monolithic, and fibre-optic elements, microhardness 85−12539
graded index, total acceptance angle 87−7151
graded index fibre diameter measurement using diffr. pattern 87−46517
graded index fibre link, pulse dispersion anal. 86−37880
graded index fibres, longit. strain meas. techniques 87−26030
graded index lens for simplifying alignment to optical fibers, design and fabrication 85−7253
graded index multimode fibre, selective excitation of annular zones 85−12545
graded index optical fibre cable, design and characts. for emergency use *(Japanese)* 87−34547
graded index optical fibre cables for public telecommunications 85−37084
graded index optical fibre transmission up to 18 km, decision feedback equalization *(German)* 86−30751
graded index optical fibres, dispersion anal. 86−9532
graded profile fibers transmitting at 34 Mbit/s in Berlin, long term characteristic changes *(German)* 85−52354
graded single-mode lightguides, equivalent step parameters determ. 88−45130
graded-core, stress-applied polarisation-maintaining, single-mode, characts. 88−39895
graded-core stress-applied polarisation-maintaining fibres, polarisation characts. 86−42244
graded-index, dispersion-optimised, phase integrals 87−46532
graded-index, electric field of laser pulse, meas. 86−48478
graded-index, error rate degradation depend. on excitation state 86−28810
graded-index, mode coupling, investigation 85−50950
graded-index, mode coupling investigation 86−2672
graded-index, mode excitation by laser beam 85−7245
graded-index, phase integral solns. 86−9492
graded-index, refractive index profile meas. by interference microscope using fringe scanning 86−36179
graded-index, single-mode, with Gaussian dip, calcs. 88−2014
graded-index fibre, dopant flow variation determ., math. treatment 85−56274
graded-index fibre preforms, wholly synthesised, high-rate fabrication by multiframe vapour deposition using $SiHCl_3$ 86−15461
graded-index fibre waveguide with extremely low losses, CVD fabrication 85−12610
graded-index fibres, methods to obtain mode equilib. distrib. *(German)* 87−25993
graded-index fibres, semi-automatic meas. of geometrical data *(German)* 86−9482
graded-index fibres, solid laser pulse compression using self-phase modulation 85−35882
graded-index fibres for given bandwidth, single-mode operation, synthesis 87−32984
graded-index lightguides, reliability 85−18710
graded-index multimode fibre arc-fusion splice machine, automatic 86−28879
graded-index multimode fibres, mode excitation by holographic filter *(Japanese)* 88−7882
graded-index multimode fibres, selectively excited tubular mode coupling efficiency 86−22079
graded-index multimode optical fibre waveguides for on-premise appl., proposed Federal standard 88−65186
graded-index multimode Z 85−12575
graded-index optical fibres, light propag. theory *(Polish)* 87−61390
graded-index polycrystalline fibre for IR light transmission, fabrication method and characts. 86−36142
graded-index-rod components, coupling losses 88−26795
gradient index fibre meas. technology, microcomputer appl. *(German)* 86−63661
gradient index lens for low-loss coupling of laser diode to single-mode fibre 87−18585
gradient index optical fibres, field strength calc. *(German)* 86−63663
gradient index rod lens appl. to low loss coupling of laser diode to single mode fibre 86−42344
gradient index type fibre-optic subscriber cables, development, construction and characts. 87−49110
gradient lightguides, matching, optical losses at joining 85−46183
gradient optical fibre eigenvalue calculation *(German)* 87−32990
gradient optical fibres, splice attenuation *(German)* 87−1959
gradient-index, fibres, multiple-beam interference fringes appl. to charact. determ. 86−22069
gradient-index multimode, refr. index profile, meas. system 86−60365
gradual fibre introduction for metallic loop carrier replacement 87−49116

Hi-Fi sound transmission via optical cables *(German)* 88−35485
Hi-OVIS, Highly Interactive Optical Visual Information System, design 85−25902
hierarchical packet switched local subscriber loop for broadband ISDN 88−28563
high birefringence, optical multistability and phase conjugation, comment 88−65291
high bit rate, fibre link, line code error detection cct. design 87−63001
high bit rate fibre-optic transmission using bipolar pulsing and duo-binary signalling 87−76767
high bitrate optical transmission systems using single mode fibre 88−41685
high capacity coherent optical fibre transmission techniques 86−43852
high capacity fibre optic systems, London, England (Feb. 1987) 87−36346
high capacity hydrogen absorber, optical cable losses 88−67388
high capacity optical fibre systems, tolerant WDM 87−40977
high capacity unrepeatered optical transmission systems, design and performance aspects 85−63717
high dose radiation field environment effects 86−48139
high fibre density optical connector for use in electronic packaging systems 88−33670
high impact resistant sheath for telecommunication cable *(Japanese)* 88−51481
high lateral-load resistance ofliquid-crystal-polyester-jacketed optical fibers 86−68285
high performance couplers for optical fibre systems 88−72073
high performance LAN applications 85−47239
high power laser light transmission through optical fibres 88−33697
high power light transmission 87−46539
High Quality Image Data System, optical video network system 87−49050
high refractive index interlay switches 88−72071
high return loss connector design without using fibrecontact or index matching 86−58757
high speed, long distance transmission on optical fibres 88−60152
high speed (5 m/s) coating of long length fibres, strength behaviour 85−7239
high speed communications appl., review 88−13789
high speed DDC system for steel and iron plants using optical dataway 86−54911
high speed differential protection of Teed circuitsusing wideband communication techniques 85−64972
high speed fiber optic backbone LAN system for various appls. 88−59680
high speed fiber optic links for short-haul microwave applications , comparison with coaxial interconnects 88−73955
high speed LANs, QPSK and FDDI-II performance study 88−73642
high speed LANs based on fiber optics 88−15072
high speed loop network system for distributed computer control 87−20489
high speed optical fiber datalink transmitter/receiver using 1.3 μm LED and PIN-PD 88−4067
high speed optical fibre transmission, appls. 88−28879
high speed optical line transmission at 2.4 Gbit/s 88−22082
high speed parallel link based on a ternary linecode 88−9615
high speed token ring network 88−73653
high strength, long length, proof tests 86−28868
high strength, long length fibres *(Japanese)* 86−9462
high temperature optical signal transmissions using InGaAsP/InP 1.3 μm laser 87−62988
high tensile strength fibres 87−38811
high transmission rate data communications 86−11064
high- and low-loss fibres, sorting out their roles 88−7865
high-bandwidth fibre optic system using laser diode transmitters 87−20516
high-birefringence, fabrication by preform deform. 85−12574
high-birefringence fibres, dichroism eval. using crosstalk meas. 87−12117
high-birefringence polarising fibre with flat cladding 86−2719
high-bit-rate optical fibre transmission using single freq. lasers, computer simulation 88−22095
high-definition TV signal transmission, optical fibres, analogue intensity modulation 85−47694
high-density optical fibers with multiple fibres, jointing technique 86−55317
high-dispersion regime, nonlinear propagation 88−39899
high-gain, Raman-gain coeffs. 88−33622
high-performance integrated receiver circuit for optical fiber transmission of wideband FM video signals 88−15466
high-power CO_2 laser beam transmission 85−35511
high-power Nd:YAG laser beam transmission *(Czech)* 86−48373
high-power picosecond pulse dispersion 88−20366
optical fibres continued

multigigabit fiber-optic communication 88−67421
multigigabit-per-second lightwave systems research for long-haul applications 88−53264
multigigabit/second fibre transmission system, optical time-division multiplexing/demultiplexing 87−40876
multihub distribution systems for cable TV appl. 88−41861
multilayer fibres with complex refr., index profiles, fabrication using multicrucible technology *(Polish)* 85−1999
multilayer metal and dielectric coatings, selective radiation shielding and solar control appls. 88−45267
multilayer multimode fibres, pulse broadening for different layer-width distribs. 88−65172
multilayer radially nonuniform lightguides, natural modes method calculation 85−18715
multilayered, narrow probing beam refraction 86−28863
multilayered dielectric cylinder, plane wave diffraction 88−27583
multilevel secure LAN development for military C^3I systems 86−10819
multimode, and single-mode fibres, practical fusion splicing 86−48155
multimode, bandwidth meas. in frequency domain 87−68110
multimode, bandwidth meas. techniques comparison 86−63629
multimode, bandwidth measurements, factors affecting accuracy 86−36199
multimode, correction of polarisation and model scrambling by phase conjugation 87−60924
multimode, degradation due to H_2, model 86−42256
multimode, effect of refractive index profile variation on dispersion 85−56343
multimode, graded-index, mode coupling due to periodic microbends expt. investig. using computer-generated spatial filters 86−9516
multimode, graded-index fabricated by modified CVD or VPE, bandwidth, launching condition depend. 85−62315
multimode, gradient index, LED bandwidth as fn. of laser bandwidth and LED spectral charact. 86−48108
multimode, GRIN, core diameter meas. by side launch excitation technique 88−72029
multimode, H aging model 88−33639
multimode, image distortion and restoration by polarisation-preserving phase conjugation 87−61237
multimode, impulse dispersion from far-field radiation pattern 85−18643
multimode, influence on pulse width and divergence of laser beams *(Chinese)* 88−65173
multimode, irradiation induced attenuation investig. 88−33693
multimode, light beam spiral interference patterns 85−35507
multimode, mode coupling coeff. determ. using nondestructive single pulse reflection technique 86−2817
multimode, polaris.-modulated signals transmission and holographic multiplexing 87−18735
multimode, pulse propag. and interference 85−50915
multimode, pulse propagation, scattering effect 86−28789
multimode, realisation of mode equilibrium distribution withlimited phase space method *(German)* 86−63662
multimode, slow fluctuations of group delay and intensity of coherent optical signals 87−25995
multimode, speckle noise investig. 86−28881
multimode, speckle structure of optical field 88−20369
multimode, transfer charact., theory 86−22168
multimode, wide-band Stokes-anti-Stokes optical frequency conversion 88−51436
multimode and monomode fibres, automatic meas. system for dimens. charact. and numerical aperture 86−9575
multimode and monomode fibres, refractive index profile determ. *(German, French)* 85−35512
multimode and monomode fibres for telecommunication appls. *(German)* 85−35485
multimode and monomode optical fibres, matrix eigenvalue calc. *(German)* 85−50944
multimode and single mode, radiation response at 1.3 μm 85−35429
multimode and single mode fibres, status and trends 88−7888
multimode and single mode optical fibre cable assemblies, loss meas. in short lengths 88−9527
multimode and singlemode fiber splicing in BellCanada 86−2836
multimode asymmetric star couplers, coupling limitations 88−45100
multimode band-limited fibre transmission, with and without return to zero *(Czech)* 86−59910
multimode bandwidth, frequency domain meas. 87−70078
multimode biconical fibre coupler as temp. sensor or temp.-independ. coupler, temp. effects 86−58739
multimode cabled coated optical fibres, graded-index, losses at low temp. 87−25927
multimode channel waveguide, theory of coupling loss of ion exchanged system to optical fibres 85−1984
multimode circular optical fibres, polarisation preservation meas. by speckle method 85−7242
multimode concatenation modal group analysis 86−42314
multimode concatenation modal group analysis 88−26776
multimode couplers, real time performance anal. during testing 88−13865
multimode cylindrical and ribbon fibre light guides, polarisation charact., deform. and mag. field effects 85−29589
multimode dispersion behavior in optical fibers at high resolution 87−74695

optical fibres continued

polarisation fluctuation in terms of probabilities 87−74734
polarisation holding directional couplers using D-fibres 85−7215
polarisation holding fibres, boundary element anal. 86−68808
polarisation holding fibres, elliptical core, boundary-element anal. *(Japanese)* 85−12618
polarisation holding fibres, refr. index distrib., vector anal. *(Japanese)* 86−22173
polarisation insensitive coherent lightwave system using wide-deviation FSK and data-induced polarisation switching 88−41622
polarisation instability appl. to optical switching 88−45162
polarisation maintaining, PANDA fibres, low loss and crosstalk characts. for communication appls. 86−2681
polarisation maintaining, used for laser diode redundancy system in submarine optical repeater 85−35436
polarisation maintaining and rectangular polarising fibres, properties 88−13879
polarisation maintaining coupler with ultra-low-crosstalk 88−65271
polarisation maintaining fibres, crosstalk 88−65226
polarisation maintaining fibres, long length and low loss, characts. 88−65225
polarisation maintaining fibres, mode-coupling analysis 88−20373
polarisation maintaining fibres, refractive index determ. 88−58075
polarisation maintaining fibres and preforms axial stress and effect on strength 85−50925
polarisation maintaining optical fibre, MCVD produced, optical performance *(Korean)* 88−45088
polarisation maintaining optical fibre develop. 87−74686
polarisation maintaining type with crescent-like vacuum pits, numerical anal. *(Japanese)* 85−41180
polarisation maintaining with three layer elliptical cross section, transmission characts. 87−1943
polarisation noise reduction using birefr. launching fibres, OTDR appl., performance 88−51485
polarisation preserving, highly elliptical submicron core, charactn. 88−72008
polarisation preserving fibres, discharge fusion splice optimum method 87−18590
polarisation retaining, for optical transducers *(Swedish)* 85−20587
polarisation rotation, path depend. 87−18671
polarisation rotator and mode interchanger, fibre in-line 88−1927
polarisation stability of radiation 85−24322
polarisation state azimuth control, Faraday rotation appl. 88−72022
polarisation state of transmitted optical wave, influence of external vibrs. *(Japanese)* 87−54063
polarisation states and group delay difference meas. 88−45150
polarisation-holding, internal rotation of birefringence axes 87−26008
polarisation-holding fibre, elasto-optic alignment of birefringent axes 86−63670
polarisation-insensitive heterodyne detection technique using polarisation scrambling, optical fibre communication appl. 87−56126
polarisation-maintaining, fabrication using VAD 86−9540
polarisation-maintaining, for fibre optic gyroscopes 88−65252
polarisation-maintaining, investig. of birefringence with stress-applying parts by means of photoelasticity 88−65190
polarisation-maintaining, low-loss, low-crosstalk, design and fabrication 87−7120
polarisation-maintaining, mode couplings due to external forces, eval. 88−26750
polarisation-maintaining, strain birefringence characts. 86−48122
polarisation-maintaining, three-layer elliptical cross-section, transmission characts. *(Japanese)* 85−29606
polarisation-maintaining, with circular pits outside circular core *(Japanese)* 86−28874
polarisation-maintaining, with random perturbations, power coupling coeff. *(Japanese)* 85−7280
polarisation-maintaining birefringent, polarisation cross talk ultimate limit 87−12135
polarisation-maintaining fiber splices and connectors, design and characterisation 88−39937
polarisation-maintaining fiber used as temp. sensor, phase sensitivity 86−28819
polarisation-maintaining fibre, 26-km length 87−32937
polarisation-maintaining fibre, spliced, 100 km long, crosstalk characts. 88−53250
polarisation-maintaining fibre couplers with low excessloss 87−1945
polarisation-maintaining fibre couplers with misaligned birefringent axes 88−58078
polarisation-maintaining fibre devices 88−7869
polarisation-maintaining fibre for coherent optical transmission, mode coupling eval. method *(Japanese)* 88−22121
polarisation-maintaining fibre for submarine repeater, structural parameter design 87−62986
polarisation-maintaining fibres, alignment by temp. modulation 88−26753
polarisation-maintaining fibres, alignment using nondestructive temp. modulation technique 87−53983
polarisation-maintaining fibres, coupling, boundary elements anal. *(Japanese)* 86−15501
optical fibres continued
polarisation-maintaining fibres, loss and dispersion characts. 87−38746
polarisation-maintaining fibres, low-loss design with low crosstalk, communication system appls. 85−29552
polarisation-maintaining fibres and their appls., review 87−7118
polarisation-maintaining fibres with Al_2O_3 stress-applying parts 88−51445
polarisation-maintaining fibres with circular pits outside circular core 87−53969
polarisation-maintaining long-length low-loss 88−13813
polarisation-maintaining optical fibre development *(Japanese)* 86−2690
polarisation-maintaining optical fibres, submarine optical repeater laser diode redundancy system appl. *(Japanese)* 86−58754
polarisation-maintaining optical fibres with circular pits in core, numerical anal. 85−7267
polarisation-maintaining optical fibres with crescentlike hollow pits around circular core 87−1944
polarisation-maintaining single-mode fibre design using stressed fibre with inhomogeneous core 88−13907
polarisation-maintaining single-mode fibre/semicond. laser optical coupling technique 87−38737
polarisation-maintaining with hollow circular pits 87−18639
polarisation-mode props. of elliptical stress-cladding fibre 85−56349
polarisation-preserving, power spectrum of fibre output fluctuation 85−7230
polarisation-preserving, Raman amplification at 1.4 to 1.5 μm 85−41155
polarisation-preserving, sum-frequency generation 85−50932
polarisation-preserving fibre, efficient multiple visible light generation pumped by 1.064 μm Nd:YAG laser 85−7508
polarisation-preserving fibre, submarine optical system with LD redundancy, structural parameters design *(Japanese)* 86−58755
polarisation-preserving fibres with stress-induced birefr., nonlinear optical effects 88−45556
polarisation-state control device, rotatable fibre cranks using single-mode fibres 86−2678
polarised singlemode laser light phase modulation in monomode fibre by transverse pressure 88−51488
polarised-ray optics theory 87−68071
polariser and polarising couplers, theoretical/expt. study and realisation 88−65175
polarising anisotropic fibres and their leaky modes 86−15459
polarising beam splitter using birefringent coupler, design and characts. 85−46132
polarising beamsplitter, fused-taper coupler based, theoretical study 85−56298
polarising beamsplitter based on fused-taper fibre coupler spectral response/performance study 85−29560
polarising fibre coupler with high extinction ratio 85−14249
polarization charact. of fundamental mode 88−72035
polarization maintaining optical fibre components for advanced sensor systems 88−74464
polarization phenomena in optical fibers 88−7899
polarization-independent integrated electro-optical cross-point switches 85−42611
polarization-maintaining, stresses and material birefr. calc., analytical method 85−12577
polarization-maintaining fibers 85−1958
polarization-maintaining optical fibers used for a laser diode redundancy system in a submarine optical repeater 87−62985
polarization-maintaining optical fibre, alignment by frequency-swept laser diode *(Japanese)* 85−50973
polished, D-shape, geometrical birefringence 87−32980
polished single-mode fibre couplers, loss analysis; 86−2824
polishing, automated, of terminations 85−56338
polishing technique 88−65276
polishing with motor-driven abrasive wheel, technique and fibre characts. 88−58082
polishless field connector for single-mode and multimode fibre systems, design and characts. 86−65013
polycarbonate stacked film star coupler 87−60945
polycrystalline, micropores, expt. obs. 88−39902
polycrystalline fibres, light scattering by voids 88−58122
polydimethylcomethylphenyl siloxane coatings for high strength optical fibres, fast curing low-modulus 86−42335
polyetherurethane coatings for high strength optical fibres, fast curing low-modulus 86−42335
polymer, anal. of molecular features for telecommunications appl. 88−39912
polymer clad silica optical fibres, γ-irrad., transmission losses 87−38831
polymer coatings, influence on low-temp. optical losses 86−2748
polymer coatings for optical fibers 87−7164
polymer jacketed, thermal drift in phase of coherent radiation 86−15504
polymer optical fibre development, loss mechanisms and fabrication 87−46446
polymer optical fibres, manufacture, optical props., performance , review 88−72037
polymer optical-fibres, progress, props. and possible applications *(French)* 85−50906
polymer-coated optical fibres, mechanical reliability considerations 87−74783
polymeric textile fibres, birefringent, Fourier transforms 88−13827
polystyrene, plastic optical fibres, for near IR transmission, prep. 87−38771
porosimetry on optical fibres 88−20337
portable automatic optical fibre splicer *(Danish)* 86−42252
positioning and treatment of optical fibre ends *(French)* 87−68116
powder mixing rate instrumentation system *(Japanese)* 87−63228
powder process use for fibre manufacture, LAN appls. *(German)* 87−74722
power cable fault detect. system *(Japanese)* 85−48637
power delivery systems 88−13855
power distribution between transverse modes, spatial filter anal. 85−35501
power distributors use for control and monitoring *(Danish)* 88−35334
power dividers based on channel waveguides with a long coupling length 85−46185
power grid automation; communication techniques, distribution line systems 86−17179
power industry appl. *(French, English)* 87−7078
power limits due to stimulated Brillouin scatt. in optical communication systems 88−51455
power loss, modal noise and distortion due to microbending 85−56277
power meas. techniques and instrumentation 86−15510
power measurements, accuracy 87−38774
power meter calibration, effect of connectors 87−49971

optical fibres continued
power meters, potential errors in use 88−39930
power meters, round robin test of uncertainty 86−42230
power meters, round robin testing results 86−65287
power overhead cables with optical fibres, for power and data transmission *(German)* 85−31037
power station optical fibre data transmission reliability *(German)* 88−17235
power supply for controlled environment vaults for optical communication equipment 87−4817
power system meas. using optical fibre techniques 86−39247
power system optical fibre communications network *(Norwegian)* 87−76760
power system utilisation of optical fibre cables, Cabloptic SA experience *(German French)* 85−59741
power systems communications appl. of optical fibres 86−37909
power tester, portable, for fibre and component light loss meas. 85−41157
power transfer matrices used in system loss prediction, parabolic and step index fibres 87−25954
power transmission, remote actuation 87−40919
power transmission networks, optical telecommunication appls. *(German)* 86−12364
power utility appls. 88−73973
power-dependent enhancement in repeater spacing fordispersion-limited optical communication systems 86−59895
power-dependent polarization of optical pulses 88−33653
Pre-Cap ST connector design, elimination of fibre pistoning 88−39867
pre-ISDN integration of data and fibre optics voice networks, topological and architectural considerations 87−27853
pre-ISDN integration of fibre optic voice and data networks, topology and architecture 87−28571
preamble size for FDDI-II network distributed clocking 87−28617
preamplifier, fast-response photoreceiver for fibre optic communication lines, noise charact. 86−63722
precoated optical fibre cable for −55 to 125°C temp. range *(German)* 86−23908
preform collapse process, influence on props. of PICVD fibres with pure SiO_2 core 88−20356
preform deflection function display by spatial filtering, refractive index profile meas. 85−7240
preform deflection function measurement 86−28871
preform fabrication, CVD in microwave produced plasmas 88−20354
preform fabrication, double-flame VAD process 85−18680
preform fabrication, temp. meas. system using IR pyrometer 85−24312
preform fabrication by surface-plasma CVD process 88−65210
preform fabrication by vapour-phase axial deposition, inner pressure control method 88−45080
preform fabrication using MCVD process control technique 87−12127
preform fabrication using plasma technology, review 88−20353
preform manufacturing, homogeneous heating technique in MCVD 87−18635
preform meas. by focused laser transverse illum. technique, resolution model 88−58089
preform measurements and their industrial application 87−38816
preform possibilities for manufacturing optical fibres 88−13897

single-mode fibre ends, polished, reflections 87−12193
single-mode fibre evanescent polariser/amplitude modulator using liquid crystals 86−36266
single-mode fibre for digital optical communication, techniques *(German)* 87−70031
single-mode fibre for long-haul telecommunications, drawing ratio tolerance requirements 87−28558
single-mode fibre for network, NTT development plan and economic perspectives 88−4035
single-mode fibre for temp. and pressure simultaneous meas. 88−67879
single-mode fibre freq. shifter using locally induced birefringence and travelling acoustic wave 87−7189
single-mode fibre link, 140 Mbit/s, external cavity BH laser 86−17374
single-mode fibre link using edge-emitting diodes, transmission study at 1.3 μm 85−42577
single-mode fibre links, bandwidth enhancement by correcting chromatic dispersion 87−49077
single-mode fibre links, dispersion reduction 86−17368
single-mode fibre links using multi-longitudinal-mode lasers, end-to-end dispersion 86−49678
single-mode fibre long lengths, polarisation dispersion determ. using multilongit. mode lasers 88−20350
single-mode fibre loss-limited transmission using 1.3 μm LED 86−4632
single-mode fibre meas. and standardisation 87−26021
single-mode fibre measurements 87−62938
single-mode fibre optic communication systems, high performance, development 87−49074
single-mode fibre optic components for conversion of laser phase noise to intensity noise 88−1970
single-mode fibre optic transmission in France, long distance high bit rate appls 87−49072
single-mode fibre optic WDM 87−13729
single-mode fibre optical couplers 88−65260
single-mode fibre optical focusing beam system design using GRIN rod lens 87−62942
single-mode fibre optical focusing-beam system using GRIN rod lens *(Japanese)* 86−53981
single-mode fibre polarisation beam splitter/combiner, fabrication and performance 85−29561
single-mode fibre props. at 1.3 μm and 1.5 μm 87−46518
single-mode fibre refractive index profiles, determ. from near-field radiation patterns 85−41119
single-mode fibre resonant cavity calcs. *(French)* 87−25918
single-mode fibre spectral attenuation precision meas. 87−46481
single-mode fibre splices anal., spectral loss charcts. eval. 88−65220
single-mode fibre splicing 85−52372
single-mode fibre splicing, local launch and monitor 86−48157
single-mode fibre standardisation 86−22091
single-mode fibre systems, effective cutoff and modal noise 86−9547
single-mode fibre systems, narrowband position-tuned multilayer interference filter 85−63642
single-mode fibre taper filters, wavelength response, fine tuning 87−46636
single-mode fibre tapers, loss minimisation quantification 86−68248
single-mode fibre to laser diode coupling using phase conjugate mirror 88−1931
single-mode fibre transmission, high bit rate long span using DFB DC PBH laser diode 86−49695
single-mode fibre transmission, long-range, power dependent bandwidth variation due to self-phase modulation 88−65872
single-mode fibre transmission at 560 Mb/s and 140 Mb/s using 1300 nm LEDs 86−49696
single-mode fibre transmission charcts. prediction from mode field dia. 86−42324
single-mode fibre transmission expts., 2 Gbit/s and 600 Mbit/s using 1.3 μm edge emitting LED 87−56132
single-mode fibre transmission of 140 Mbit/s signals using surface- and edge-emitting 1.3 μm LEDs 85−47505
single-mode fibre transmission over 30 km using LED source 86−49677
single-mode fibre transmission system, development 88−7873
single-mode fibre transmission system, WDM expt. using 1.31/5 μm LEDs 88−47142
single-mode fibre transmission systems, development at British Telecom Research Labs. 85−63634
single-mode fibre transmission systems, modal noise observation 85−20181
single-mode fibre transmission systems, modal noise 86−11107
single-mode fibre transmission systems, recent developments at BTRL 86−37868
single-mode fibre transmission systems, signal quality *(German)* 88−35509
single-mode fibre transmission systems refl.-induced power penalties, practical meas. method 87−25947
single-mode fibre transmission using 1.3 μm edge-emitting diodes, design considerations 86−4641
single-mode fibre transmission using 1.3 μm mesa-structure surface-emitting LEDs 86−49697
single-mode fibre waveguide, chromatic dispersion determ. by interf. method 87−25984

single-mode fibre with axis having periodic perturbation, cutoff wavelength meas. technique 87−7097
single-mode fibre with smooth joints, birefringence 88−20361
single-mode fibre with wide acceptance angle, design using flat disc lens 87−26013
single-mode fibre Y-junction beam-splitter, fabrication, operation and performance 87−74682
single-mode fibre-coupler blocks, core-to-surface spacing determ. 87−38780
single-mode fibre-horn beam expander 88−26761
single-mode fibre-laser diode coupling with ball lenses 88−65189
single-mode fibre/laser diode pigtailed modules for digital communications, Toshiba TOLD 300 series 87−40937
single-mode fibres; modal field and far field intensity distribs., accurate empirical formulae 86−22133
single-mode fibres, 1.3 μm, OTDR, loss meas. 85−12621
single-mode fibres, accurate estimation of characts. from near field meas. 85−1991
single-mode fibres, asymptotic effective cutoff condition 87−46473
single-mode fibres, bending losses 86−9497
single-mode fibres, birefr., chromatic and polarisation mode dispersion, interferometric meas. 87−32938
single-mode fibres, butt coupling efficiency of long-wavelength edge-emitting LEDs 87−74936
single-mode fibres, characterisation 85−41115
single-mode fibres, characterisation by means of equalisation wavelength meas. 85−35447
single-mode fibres, chirp reduction in intensity-modulated semicond. laser for max. transmission capacity 87−8250
single-mode fibres, chromatic dispersion meas., comparison of spot-size and pulse delay methods 85−24266
single-mode fibres, chromatic dispersion meas. technique using WDM 87−7122
single-mode fibres, chromatic dispersion test 85−41116
single-mode fibres, circular and polarisation-maintaining, 2D index distrib. determ. from near-field meas. 87−7088
single-mode fibres, circular birefr. 86−28795
single-mode fibres, core tapering by controlled thermal diffusion, feasibility study 88−33605
single-mode fibres, cut-off wavelength and mode-field diameter meas. 86−36136
single-mode fibres, cut-off wavelength and mode-field diam. meas., standardisation issues, trends 87−46524
single-mode fibres, cut-off wavelength and mode-field diameters meas. techniques 86−63680
single-mode fibres, cut-off wavelength meas. technique *(Slovenian)* 87−53986
single-mode fibres, depressed index substrate tubes to eliminate leaky-mode losses 86−22105
single-mode fibres, desensitisation of US response 86−22113
single-mode fibres, direct meas. of chromatic dispersion using streak camera 85−48116
single-mode fibres, dispersion characts. study *(Japanese)* 88−7876
single-mode fibres, dispersion meas. using LEDs, modulation freq. shift technique 87−74680
single-mode fibres, dispersion-determined limits on production tolerances 87−7089
single-mode fibres, dispersion-modified, review 88−26797
single-mode fibres, dispersion-optimised, highly accurate charactn. 87−46498
single-mode fibres, dispersion-shifted, characts. 87−68083
single-mode fibres, dispersion-shifted, chromatic dispersion meas. in 1.5 μm wavelength region 87−12110
single-mode fibres, dispersion-shifted and dispersion-flattened designs 87−12209
single-mode fibres, dispersion-shifted convex-index 86−15467
single-mode fibres, effective cut-off condition 86−42348
single-mode fibres, effective cutoff wavelength determ., interlaboratory comparison 85−41146
single-mode fibres, equivalent-step-index parameters, meas., appls. 85−41117
single-mode fibres, fabrication of tapers by controlled core diffusion 88−33606
single-mode fibres, field to dispersion relationships 85−18674
single-mode fibres, fundamental mode field, non-Gaussian model 87−18613
single-mode fibres, fusion splice loss 85−7219
single-mode fibres, GeO_2 doped, H_2-induced loss increases 85−18685
single-mode fibres, high-Δ, small core, nonlinear optical props. study 88−65176
single-mode fibres, long-range 1.5 μm optical time-domain reflectometry using lasers 85−46145
single-mode fibres, mass fusion splice method 87−60951
single-mode fibres, meas. 85−63689
single-mode fibres, microbending loss, upper and lower limits 86−28813
single-mode fibres, microbending loss eval. 88−65234
single-mode fibres, microprocessor controlled splicing equipment *(German)* 86−22151
single-mode fibres, mode field dia. and chromatic dispersion meas. techniques 85−58919
single-mode fibres, mode field dia. determ. approaches 87−38750
single-mode fibres, mode field diameter eval. by transmitted field pattern methods *(Japanese)* 87−68161
single-mode fibres, mode field diameter meas., transmitted field pattern method *(Japanese)* 87−1940
single-mode fibres, mode field radius meas., harmonics detection appl. 87−18601
single-mode fibres, mode field radius meas. using near field pattern technique *(Japanese)* 85−48118
single-mode fibres, mode-field dia. meas. using fibre probe far-field technique 88−20339
single-mode fibres, multiple-clad dispersion flattened low loss, long lengths for cables and links 86−37915
single-mode fibres, non-Gaussian intensity distrib. and dispersion compensation 85−62299
single-mode fibres, one-end splice loss meas. method using OTDR 86−50234
optical fibres continued
single-mode fibres, optical couplers multi/demultiplexer development *(Japanese)* 88−41658

single-mode fibres, polarisation dispersion, influence of core ellipticity and birefringence, theoretical study *(Polish)* 85−1998
single-mode fibres, polarisation dispersion, model and anal. 87−7086
single-mode fibres, propag. const. and beat length meas., prism coupling technique 86−63617
single-mode fibres, randomly perturbed, light depolarisation, statistical description 86−22154
single-mode fibres, refr. index profile determ. by far-field power meas. at 1300 nm 87−1950
single-mode fibres, RF phase shift depend. on microbending loss 85−46173
single-mode fibres, self alignment effect in V-groove method, splice characts. study *(Japanese)* 88−39949
single-mode fibres, self-imaging transverse offset meas. 86−28797
single-mode fibres, self-phase modulation and stimulated Rama scattering 87−74725
single-mode fibres, single-clad, Petermann spot-size meas. interpretation 86−22081
single-mode fibres, small-core, high refr. index anisotropy for efficient nonlinear optical effects 86−63618
single-mode fibres, soliton propag. in presence of source chirping and mutual interaction 87−38742
single-mode fibres, source spectral width rel. to coherence length, effect of modal noise 86−2826
single-mode fibres, space-curved and twisted, coupled-mode approach to field anal. 88−20959
single-mode fibres, splicing and connecting techniques, recent development 85−12627
single-mode fibres, spot size meas., optical processing technique 85−18684
single-mode fibres, standardisation issues, review 85−41114
single-mode fibres, step index, radiation from circular bend, theoretical anal. 87−53961
single-mode fibres, step-index, radiation from circular bend *(Japanese)* 86−15500
single-mode fibres, stress-induced scattering polarisation detection and beat length meas. 88−45149
single-mode fibres, stuffing-pulling mass fusion splice techniques *(Japanese)* 87−68159
single-mode fibres, taper drawing for high efficiency coupling of lasers 85−35446
single-mode fibres exposed to H_2, loss increase over long term *(French)* 87−25919
single-mode fibres in ribbon, optimum number determ. *(Japanese)* 88−39948
single-mode fibres jacketed with loose jelly-filled tube, loss mechanisms 87−7130
single-mode fibres polishing-induced birefringence 86−36122
single-mode fibres suitable for subscriber cables, design 87−8297
single-mode fibres testing, equivalent-step-index parameters determ. 87−3203
single-mode fibres with arbitrary index profiles, cutoff freq. calc. using Chebyshev polynomials 86−2686
single-mode fibres with index well profiles, leaky-mode loss of second propag. mode 85−50903
single-mode fibres with low dispersion and low loss for LED-signals 87−68139
single-mode fibres with material/linear profile dispersion; relationship between field and dispersion 88−65177
single-mode fibres with modified dispersion characts., review 87−7106
single-mode fibres with zero total dispersion at wavelengths 1.3 and 1.55 μm *(Japanese)* 86−9526
single-mode fluoride fibres, dispersion-flattened, design for optimum performance from 1.5 to 2.9 μm 88−65178
single-mode fused coupler for undersea opticaltransmission systems 86−59906
single-mode glass, nanosecond pulse generation by stimulated Brillouin scattering 86−9955
single-mode graded-index fibres; trial field for non-Gaussian field distribs. 87−7091
single-mode graded-index triple-clad for 1.55 μm system operation, transmission props. 85−62314
single-mode helical fibres, losses 88−1968
single-mode helically-wound optical fibres, field and propag. aspects, perturbation anal. 86−22099
single-mode in-line fibre polarisation controllers at 1.55, 1.30 and 0.63 μm 85−29526
single-mode lightguide for fibre-optic communication line with carrying capacity of 400 Mbit/s 85−20206
single-mode lightguide system, guided-wave reflectometry with micrometer resolution 87−68018
single-mode lightguide systems, modal noise probability 86−48165
single-mode lightguide systems, modal noise probability 86−63644
single-mode limit of optical fibres from spotsizeparameters 86−28787
single-mode linearly birefringent fibres with zero polarisation-modedispersion 86−2680
single-mode low-dispersion graded-index, numerical method for anal. 86−2734
single-mode low-loss, simultaneous forward and backward Raman scattering 86−48483
single-mode low-OH-content, fabrication by particle size control sol-gel method 86−15464
single-mode multi-fibre connector, ferrule hole diameter 88−26810
single-mode multiple connector *(German)* 86−23918
single-mode multiple-clad fibres with dispersioncompensation and low microbending loss 86−2670
single-mode nonlinear fibres, direct obs. of optical wave breaking of ps pulses 88−58083
single-mode nylon coated fibre in cable, length depend. of cutoff wavelength study *(Japanese)* 85−18726
single-mode operating at few-mode wavelengths 88−65201
single-mode optical cable production and installation on 39 km route without repeaters, EMI conditions 88−22149
single-mode optical coupler, wavelength-flattened 8×8 star config., design and performance 87−12111
single-mode optical fiber ribbon splicer 88−22138

optical fibres continued
single-mode optical fibre, 34 Mbit/s bidirectional transmission using 1.3 μm LEDs and directional couplers 85−58092
single-mode optical fibre, pure silica core, struct. and charact., transmission cable appl. 87−46545
single-mode optical fibre, spectral loss and cut-off wavelength meas. by variable wavelength *(Korean)* 86−53965
single-mode optical fibre, statistics of Rayleigh backscatter 85−35440
single-mode optical fibre cable, high performance, covering whole of Japan 86−4658
single-mode optical fibre cable splicing and jointing techniques *(Japanese)* 86−2689
single-mode optical fibre charact., refractive-index gradient effect 88−20386
single-mode optical fibre coupling to InGaAsP 1.3 μm mesa-struct. surface-emitting LED 85−46288
single-mode optical fibre coupling to laser diode, packaging technique 88−1954
single-mode optical fibre excited by LED, impulse response and transfer function *(Italian)* 88−13831
single-mode optical fibre for long distance links *(French)* 88−28904
single-mode optical fibre heads for optical discs 86−42351
single-mode optical fibre link, expt. system for narrowband and broadband services *(German)* 86−43824
single-mode optical fibre preforms, dimension control in VAD process 87−7082
single-mode optical fibre propagation charact. approx. 86−15458
single-mode optical fibre ring resonator with nonlinear coupling 87−74754
single-mode optical fibre spot size meas. using strip integration of far field 85−56291
single-mode optical fibre Stokes components of stimulated Raman scatt. meas. 88−27308
single-mode optical fibre submarine cable, polarisation fluctuation during and after ocean installation 87−40886
single-mode optical fibre switch *(Japanese)* 86−28876
single-mode optical fibre systems, evolutionary potential 85−37066
single-mode optical fibre systems, transmission distance and capacity limitation due to polarisation dispersion 88−41621
single-mode optical fibre tapers for self-alignedbeam expansion 86−53956
single-mode optical fibre wavelength-tunable WDM coupler, design and performance 87−56127
single-mode optical fibres, CAD calc. method *(French)* 87−68030
single-mode optical fibres, equalisation wavelength meas. technique 87−38738
single-mode optical fibres, four-wave mixing, system limitations 86−64971
single-mode optical fibres, interferometric meas. of polarisation mode dispersion 88−65229
single-mode optical fibres, matched and depressed cladding, fabrication, CVD 87−38766
single-mode optical fibres, Oslo-Drammen fibre cable link *(Norwegian)* 88−15492
single-mode optical fibres, quasi-matched and depressed-cladding, design and fabrication 88−65239
single-mode optical fibres, tunable backscattering in 1.1 to 1.6 μm region 86−15451
single-mode optical fibres, waveguide dispersion, enhanced ESI approx. 85−12561
single-mode optical fibres far-field meas. by integrating sphere *(French)* 86−58771
single-mode optical isolator at 1.3 μm usingall-fibre components 86−53957
single-mode optical piezoceramic phase modulator, anal. 87−68121
single-mode optical time domain reflectometer, long-range performance and potential uses 86−5504
single-mode optical-fibre switch 87−56124
single-mode or multimode, alignment using automatic alignment station 85−18657
single-mode Oslo-Drammen fibre lint, meas. *(Norwegian)* 88−15494
single-mode OTDR 85−12587
single-mode passive fibre components, automated coupler manufacturing system development 86−63681
single-mode polarisation for multi-layered optical fibre 88−60153
single-mode polarisation maintaining, modal birefringence meas. by heterodyne interferometry 87−54002
single-mode polarisation maintaining fibre, birefringence and polarisation mode dispersion, expt. study 87−38736
single-mode ribbon cable and array splicing 85−63692
single-mode short fibres, direct meas. at second order dispersion using interferometry 85−1986
single-mode single-polarisation, residual polarisation coupling effects 86−15480
single-mode single-polarisation, resonant absorption effect and appl. 88−72031
single-mode single-polarisation fibre using resonant absorbing effect, theoretical study 87−25943
single-mode slightly elliptical optical fibres, freq. charact. 85−46188
single-mode splice, optimisation 85−63684
single-mode splice loss, effect of eccentricity 87−74693
single-mode splicing machine with splice protection, miniature package and screen-test 88−72081
single-mode star couplers for optical switchingapplications, LOCNET design 86−42326
single-mode step-index fibres, core radii calc. for min, total dispersion 86−48092
single-mode step-index fibres, implementation and manufacturing technology *(French)* 85−12617
single-mode strongly and weakly fused fibre tapered couplers, polarisation anal. 85−50909
single-mode subscriber loop systems, fibre, cable and interconnect technologies 88−46775
single-mode system between Liverpool and Preston, England, 50 km at 140 mbit/s 85−58143
single-mode tactical fiber optic cable assemblies 88−28910
single-mode tapered fibres, oscillatory transmission *(French)* 88−51434
single-mode ten-fiber connector, very small 88−33645
single-mode three-layer elliptical, polarisation charact. calc. 85−62336
single-mode to multimode fibre power transfer, study using coupled-mode theory 87−7160
single-mode transmission lines, chromatic dispersion, far-end meas. technique 85−31065
single-mode transmission trends 86−17384

SL undersea fibre optic cables, design and testing 85−37022
SL undersea lightwave system, digital fibre optic transmission system 85−37014
SL undersea lightwave transmission system 86−30838
slack fibre accommodation block for 800-fibre fusion splices 86−69785
SLC 96 subscriber loop carrier system, fibre SLC carrier system 85−30755
slotted core optical fibre cable manufacture 88−9577
small diameter cables, relation between sheath thickness and lateral load charact. *(Japanese)* 86−55306
soft glass fibres with large thermal expansion differences 88−58177
soft X-ray radiation transport 88−13843
sol-gel and other fourth generation processes 88−45163
sol-gel procedure for optical fibres production with high SiO_2 percentage *(Croatian)* 87−12203
sol-gel processing 87−74823
solar cell power supply system for overhead telecommunication systems with optical fibres 86−61438
solar radiation transmission using heavy-duty optical fibres 88−39877
Solc equivalent filters in single mode fibre, practical design and manufacture 87−61007
solitary thermal shock-waves and optical damage, numerical modelling 88−58176
solitary waves in femtosecond regime, theory 85−56281
soliton amplification and reshaping with dispersive wave suppression 86−2761
soliton communication systems, bandwidth limits due to mutual pulse interaction 86−36185
soliton communication with WDM 87−13731
soliton evolution from non-transform limited pulses 86−58777
soliton formation, noise effects 87−46489
soliton generation, 1.37-1.49 μm 87−54394
soliton generation at 1·5 μm, femtosecond single-pass cascade Raman scatt. 87−74679
soliton interaction 88−20364
soliton interaction, effect of third-order dispersion 85−35441
soliton interaction in presence of loss and periodic amplification 87−54023
soliton laser, computational two-cavity model 87−54288
soliton laser, laser, simplified model 88−45382
soliton laser, pulse stability and compression using optical fibre 86−54068
soliton laser, theoretical model, role played by optical fibre 86−42467
soliton laser stabilisation, feedback from pulse-shaping fibre 87−26351
soliton logic elements for all-optical processing 88−51638
soliton nonlinear transform. in fibre lightguide by induced Raman scatt. 86−15772
soliton propag., numerical anal. 87−60925
soliton propagation in optical fibres 88−45131
soliton propagation rel. to laser fluctuations 85−12560
soliton pulse compression and splitting at 1.32 μm in a single mode fibre 87−68048
soliton pulse generation and stabilization in amplified nonlinear Schrodinger equation 88−33651
soliton pulse nonlinear interaction 87−54057
soliton Raman fibre-ring oscillator 88−45495
soliton Raman process, femtosec. pulse generation in single mode optical fibres 88−40333
soliton reconstruction through synchronous amplification 88−45081
soliton self-frequency shift in optical fibre 87−18661
soliton self-frequency shift in optical fibre 87−18662

optical fibres continued
soliton self-frequency shift suppression by bandwidth-limited amplification 88−65192
soliton shaping by stimulated Raman process 87−74729
soliton solution for optical fibre communication networks 88−22116
soliton transmission in nonlinear inhomogeneous graded-refractive index media 88−13807
soliton transmission over 4000 km fibre with loss compensated by Raman gain 88−72042
solitons, axial inhomogeneity effect near zero dispersion point in fibres 88−39880
solitons, optical, amplification and reshaping in a glass fibre using stimulated Raman process 85−2412
solitons, propagation and properties in optical fibres *(German)* 88−33657
Sonet, standard optical interface emergence 88−41702
SONET, synchronous optical network 86−55326
source linewidth criteria for heterodyne communication with PSK modulation 86−37883
source-fiber optical coupler, excitation by light source 87−60954
sources, high reliability packaging 87−74787
sources, optical power meas. *(German)* 87−70833
sources and detectors., conf., Cannes, France (Nov. 1985) 87−36302
sources for fibre optic transmission systems, quantum noise *(French)* 86−9704
sources in single mode fibre system, diode lasers versus LEDs 87−34575
sources in single mode fibre system, diode lasers versus LEDs 87−34576
sources/detectors, market survey and selection criteria 85−37060
South Holland electricity company use of glass fibres for telecommunication *(Dutch)* 87−62959
Southern Bell telephone company, fibre optic appls., current and future 85−42178
Southwestern Bell tries dispersion-shifted fiber 87−70103
space appls., MMIC-based large aperture arrays, system architecture 87−76672
space appls. of fibre optics 88−73903
space division optical switching system of medium capacities 87−20540
space station, distributed antennas 87−76796
space transmission module, development *(Japanese)* 88−41335
space-fed architecture, optical distribution manifolds for phased array antennas 88−72695
spaceborne systems, thermal control using fibre optic waveguides 85−48368
spacecraft antennas development using optical technology 88−41678
spacecraft applications 88−13854
spatial coherence anal. of light propag. by interferometry 86−63649
spatial filtering method of oblique slit for measurement of refractive-index profile of optical-fibre preforms 87−74671
spatial image transmission characteristics in the graded-index optical fiber 88−28894
spatial noise suppression, holographic phase conjugation method 88−26801
special designs, appls. and technology 88−73961
special shaped fibres for distributed sensors 86−48188
specialised fibres, current status 88−20382
spectral analysis of sampling optical time-domain reflectometer 88−72934
spectral attenuation, FT IR spectrosc. investig. 87−46443
spectral attenuation meas. using cut-back method 87−46448
spectral attenuation props. after γ-irrad. up to 32 kGy 85−62339
spectral charactn. 88−51533
spectral characts. of single mode optical fibre coupler with quadratically variable spacing *(Czech)* 85−29551
spectral domain, scattering anal. 85−12626
spectral filters using concatenated dual-core fibres, design and characts. 86−28799
spectral linewidth meas. of semiconductor lasers, for use in coherent optical communication systems 88−14257
spectral-temporal encoding for picture transmission over optical links 88−45912
splice, mechanical, for permanent fibre optic installation 87−12184
splice, multimode mechanical, low-loss for field environments 86−11099
splice accommodation structure for optical cable joint *(Japanese)* 86−11096
splice closure for subscriber optical fibre cable 87−62987
splice loss, local meas. by light launching at spliced point 85−46174
splice loss from one-way OTDR measurements, probability model 88−26815
splice loss meas. using local launch and detect technique 88−26770
splice meas. by OTDR from single fibre end 88−39893
splice/connector for multimode optical fibres 88−13873
spliced, polarisation preserving, polarisation-mode-coupling meas. using backscattering technique 85−56325
spliced multistage profile fibres, 1.1 to 1.6 μm, backscatter meas. *(German)* 86−22146
splicer develop. using profile alignment system 87−74687
splicer for single-mode fibres, field use using direct core obs. technique 87−12194
splices, arc-welded, monomode made using local injection and detection of blue light 87−7134
splices, fibre, multimode graded-index and GRIN rod lens couplers, misalignment losses 85−35389
splices, high-strength, strain required in proof test 85−50929
splices, low-loss mechanical *(French)* 86−48141
splices, mechanical, design and performance 87−7136
splicing, arc fusion, spare length minimization *(Japanese)* 88−51480
splicing, automatic alignment 87−53989
splicing, in the field, practical aspects *(Spanish)* 85−3467
splicing and connector technology 87−62928
splicing and connectors for optical fibres 88−72016
splicing by fusion method 87−8288
splicing in factory environment of optical waveguide fibre 85−58131
splicing method for high quality connections *(German)* 87−68117
splicing methods, fusion and mech. splices 85−50959
splicing single mode optical fiber 85−42601
splicing techniques 87−34591
splicing using arc-fusion method, expt. and theoretical study *(Japanese)* 85−12619
splicing using fusing technology with integrated attenuation meas. techniques *(German)* 87−76759
spontaneous light scatt. in pulsed excitation of fibre optic waveguides 85−46189
spontaneous Raman scatt. and polarisation mode coupling 88−1937
spread spectrum fiber-optic local area network usingoptical processing 86−64341
spread spectrum fibre optic LAN using optical processing 86−64751
spread-spectrum multiple-access communication system, dimensioning 87−56172
spurious mode anal. using finite-element or finite-difference technique 86−2676
squeezed light, effects of optical processing on nonclassical props., review 87−2662
squeezed light in alternating attenuators and amplifiers, low-noise props. 88−60169
SSB acousto-optic FM in single-mode birefringent fibre 86−68358
ST connector design approach for optical glass fibre 88−39954
stabilised light sources for optical fibre loss meas. *(Japanese)* 88−26993
standardisation activities 88−35528
standardisation efforts, results 87−70076
standardisation of optical fibre links *(French)* 86−11128
standardised measurement techniques, NBS programme 85−18691
standardization efforts in fiber optics 86−23868
standards, compatibility of natural international organisations 85−29616
standards role in technology 87−74786
star configured LANs, token passing protocol for voice transmission 85−52077
star connected optical fibre gateway LAN 86−43572
star coupler, 9×9 single-mode 85−24310
star coupler, biconically tapered, fabrication 87−60916
star coupler, development *(Japanese)* 88−41657
star coupler, fibre, small loss-deviation, for LAN, design and fabrication 85−62312
star coupler, fibre optic with high output uniformity *(French)* 86−9570
star coupler, ion exchanged, for multimode fibre communications 86−9598
star coupler fabrication by stacking polymer films 88−72011
star couplers, fused biconical tapered, signal dynamic range increase appl. 85−35421
star couplers design and characts. for optical fibre LAN *(Japanese)* 85−56290
star LAN using optical fibres, performance study 87−69735
star networks, semaphore-based access protocol 87−62679
sTAR-configured fiber-optic networks for integrated services 88−73985
static fatigue in bending 88−13844
static fatigue of optical fibres in bending, humidity and proof stress effect 88−47083
static wire for loose buffered fibres, helically channelled solid Al construction, design, performance 87−49054
station bypass in fibre optic LANs 85−47245
station online network system in Hanshin Electric Railway for centralised train control *(Japanese)* 88−31113
Statue of Liberty rewiring with fibre optic cable 87−20564
STC connector from OFTI, design enhancements 88−45107
STC integrated fiber optic data transmission subsystem for MIL-STD-1553B 88−35565
steel industry, length and profile measurement using lasers and optical fibres 87−77419
step-index, fabrication by downward axial vapour deposition, mode coupling 85−50922
step-index, nondegenerate solution of TE and TM modes using power-series expansion 85−62316
step-index, TE and TM mode cutoff frequencies, comment on calc. 86−63647
step-index fibre, perturbed, mode props. 86−22080
step-index fibres, effective cutoff freq. of LP_{11} mode, theoretical study 88−13797
step-index fibres, geometrical birefringence calc. 87−68079
step-index optical fibres, modal delay reduction 87−38796
step-index optical fibres, uniformly curved, effective cutoff freq. of LP_{11} mode *(Japanese)* 87−38836
step-index radiation-resistant fibres, optical characterisation 85−35409
step-index single-mode fibers, EM radiation from circular bends 86−68286
step-index single-mode fibres, radiation from circular bend, theoretical study *(Japanese)* 85−50971
step-index used for point source scanning, lateral offset power loss meas. 87−68129
Stepanov's method to grow two-layer single-crystal fibres 88−39908
stimulated Brillouin scatt. in fibre, single-mode excited with multimode pump laser 88−34112
stimulated Brillouin scattering, mode conversion 85−62387
stimulated Brillouin scattering switching in mid IR fibres 88−58298
stimulated four photon spectra generated by picosecond pulses, intensity effects 88−27295
stimulated four-photon mixing in birefringent fibre, Stokes and anti-Stokes spectra, frequency shift 87−68024
stimulated Mandelstam-Brillouin scatt. for optical signal commutation 86−3278
stimulated Raman pulse, induced phase modulation 88−2359
stimulated Raman scattering, distortion-free transmission design 87−7439
stimulated Raman scattering, effects of pulse walkoff 87−12120
stimulated Raman scattering, ultrashort pulse generation 86−58787
stimulated Raman scattering amplification, bandwidth enhancement 88−72056
stimulated Raman scattering and self phase modulation, pump and Stokes spectra, pulse walk-off influence 88−20753
stimulated Raman scattering and self-phase modulation numerical study 87−12136
stimulated Raman scattering with nonconstant losses, two-wavelength model 86−58959
stimulated Raman spectra generated by ps-pulses in single-mode fibre 85−56813
stimulated scattering, effect of depolarisation on conjugation quality 86−58974
stimulated scattering, line broadening and pulse narrowing 85−12944
Stokes and anti-Stokes light gains in stimulated four-photon mixing *(Chinese)* 88−72401
Stokes wave frequency tuning for stimulated four-photon mixing by temperature-induced birefringence change 85−29924
straight-tip optical fibre up-tapers for single-mode hardware applications 88−26762
strain effects on highly elliptical core two-mode fibers 87−74737
strain measurement, automated meas. system for single and multimode fibres 85−29624
strainmeter for fibres and test of its stability 88−65261
stranding, machine concept 85−35400

optical fibres continued
strandless optical cable design, mathematical model 88−28908
strength, dynamic and static fatigue 87−25969
strength, effect of glass/coating interface, pulsed NMR study *(Japanese)* 86−9490
strength and fatigue, Weibull probability function 87−32997
strength assurance for deep-submarine cable using proof testing method 85−52342
strength in layer-type tight structure cable, long-term reliability 87−7131
strength measurement by bending 87−25971
stress-applied, with inhomogeneous core *(Japanese)* 87−26050
stress-applied polarisation maintaining type, birefringence calc. using vector anal. 87−74681
stress-applied polarisation-maintaining, vectorial wave anal. *(Japanese)* 86−42302
stress-applied polarisation-maintaining, vectorial wave anal. 87−53972
stress-applied polarisation-maintaining fibres, vectorial wave finite element anal. 86−42274
stress-applied polarisation-maintaining optical fibres, design and fabrication *(Japanese)* 85−18730
stress-induced birefringence fibres with lossy stress-applying sections, single-polarisation single-mode guidance 87−46456
stress-induced polarisation-holding fibres, strength assurance 88−1940
stressed-cladding polarisation-preserving fibre, microlens fabrication technique 85−56306
subcarrier multiplexing systems employing multiple optical carriers, optical interf. 88−22069
submarine cable, 1.5 μm, sea trial 88−35499
submarine cable, 8000 m deep sea environment, polarisation fluctuation 87−34549
submarine cable, design and charact. of optical fibre unit 85−42585
submarine cable, polarisation fluctuations in 6000 m deep sea trial 88−53251
submarine cable, transmission charact. meas. device development *(Japanese)* 86−64992
submarine cable and satellite systems transmission technology, trends 88−60074
submarine cable coupling, polarisation charact. under periodic variable tensile force 88−22125
submarine cable coupling, polarisation fluctuation under tension 88−3980
submarine cable for international communication 86−49442
submarine cable production using arc fusion splicer with profile alignment system 87−7132
submarine cable splicing using self-core-alignment arc-fusion splicer 87−7133
submarine cable system 85−8408
submarine cable system technology, new developments *(Japanese)* 87−62969
submarine cable systems; technology and future developments 86−30787
submarine cable systems, intercontinental links 86−4679
submarine cable systems of 1.55 μm *(Japanese)* 88−28848
submarine cable tension during laying, study 87−8315
submarine cables, characteristics and long-term stability 88−28912
submarine cables, cut-and-hold grapnel 88−53249
submarine cables, development 85−58087
submarine cables, developments 86−59884
submarine cables, dynamic polarisation fluctuation charact. under various environmental conditions 88−53274
submarine cables, effect of hydrogen on transmission loss *(Japanese)* 87−8306
submarine cables, hydrostatic/tensile test facilities *(Japanese)* 85−37079
submarine cables, laying, burying and maintenance procedures *(Spanish)* 85−30848
submarine cables, loss stability assurance against H_2 88−35497
submarine cables, optical fibre strength improvement 87−38812
submarine cables, struct. and transmission line config. 86−4672
submarine cables development for international telecommunications *(Japanese)* 85−20202
submarine cables for medium voltage connections, conductors, insulation, telemetry cones, optical fibres and cable laying 87−15288
submarine cables under various stress states, polarisation fluctuation charact. *(Japanese)* 88−41653
submarine communication systems planning using optical fibre cables 85−31075
submarine fibre cable, water propag. blocking props. 85−63641
submarine fibre optic cables, Lake Constance Project 88−53305
submarine fibre optic transmission system, development *(Japanese)* 87−40907
submarine fibre systems of NTT 86−59904
submarine lightwave cable, 147 km, polarisation dispersion and principal states 88−73925
submarine links, optical transmission systems, development perspectives *(Italian)* 86−17177
submarine optical cable, lateral pressure charact., empirical formula *(Japanese)* 85−31063
submarine optical cable, spare fibres requirement study *(Japanese)* 85−31062
submarine optical cable splicing 86−30825
submarine optical cable termination *(Japanese)* 85−42414
submarine optical cable transmission, digital interconnection between UK and Europe 87−34620
submarine optical cable transmission system, design and performance 86−49612
submarine optical fibre cable, armoured, fibre strength study *(Japanese)* 88−35525
submarine optical fibre cable, high-strength fibre splice 86−23875
submarine optical fibre cable, raising from sea floor, cut and hold grapnel equipment *(Japanese)* 87−28350
submarine optical fibre cable, reliability design *(Japanese)* 85−25896
submarine optical fibre cable joint box, structural design and sea trial results 85−8422
submarine optical fibre cables, lateral and hydraulic pressure charact. 85−46195
submarine optical fibre cables with repeaters, field trial results *(Japanese)* 85−25872
submarine optical fibre digital telephone links, line signals charact. 85−37046
submarine optical fibre transmission systems, optical components reliability 88−67393
submarine optical fibre transmission technologies *(Japanese)* 85−52340

optical fibres continued
submarine optical repeater, design and testing of optical fibre feedthrough 85−37029
submarine optical repeater, optical-fiber feedthrough in pressure housing 85−37030
submarine optical repeater housing 86−49613
submarine optical repeater housing design *(Japanese)* 85−25873
submarine optical transmission systems, conf., London, UK (March 1988) 88−43605
submarine repeater link, S280 system, config. and equipment/cable design *(French)* 85−14284
submarine single mode optical fibre cable, sea trials 88−9608
submarine transmission system, unrepeatered, expts. at 1.3 and 1.5 μm 86−17415
submarine transmission systems *(Japanese)* 87−28561
submersion sensor fibre, optical fibre cable 88−28916
subpicosecond pulse generation using two-stage optical compression technique using optical fibre grating pair 85−56599
subpicosecond solitonlike optical pulses generation by induced modulational instability 86−68230
subpulse formation of long optical pulses in monomode fibres 87−74732
subscriber, optical fibre cable, construction techniques under various environmental conditions 86−30803
subscriber cable, high density, design and performance *(Japanese)* 86−4628
subscriber cable length distribution, selective connection design 86−69765
subscriber cable network, high reliability construction with optical fibre loops on main routes *(Japanese)* 87−76222
subscriber cable system, design and charact. of optical cable installation components 85−3242
subscriber cable technologies in Japan 87−70054
subscriber cables, design and performance of optical cables 85−3240
subscriber cables, measuring equipment *(Japanese)* 87−8258
subscriber cables, optical systems, splicing and connecting techniques 85−3243
subscriber cables, selective connection design *(Japanese)* 85−20216
subscriber cables, splice enclosure for optical cables 85−3244
subscriber communication systems in Japan, status and trends 87−28625
subscriber connection with monomode fibre and LED *(German)* 86−23901
subscriber distribution system for fiber optic videocommunication network 87−20549
subscriber fibre-optic cable network, design method for installation/operating cost minimisation *(Japanese)* 85−31060
subscriber line, coherent bidirectional four channel broadband 86−49698
subscriber line network, introduction of optical fibre technology 86−4682
subscriber lines, cable jointing techniques *(Japanese)* 86−4629
subscriber lines, WDM use, field trials in Sweden 86−43612
subscriber link using single-mode fibres and LEDs 86−49688
subscriber loop, experimental network system demonstrating laser power sharing 87−76743
subscriber loop, optical system for business premises and local area appls., overview 85−3234
subscriber loop, optical system for business premises and local area appls., field trial 85−3235
subscriber loop, polarisation/wavelength multiplexed bidirectional single fibre 87−28589
subscriber loop appls. 86−64798
subscriber loop architecture using WDM arrangement 85−36800
subscriber loop design optimisation 87−8293
subscriber loop networks, low operating current LED sources 88−47076
subscriber loop prospects and trends 87−56110
subscriber loop system, optical, for local area appl. 85−3237
subscriber loop systems, minimum channel spacing of wavelength division multiplexing transmission 87−8260
subscriber loop systems, WDM, min. channel spacing *(Japanese)* 85−25599
subscriber loop systems for integrated services, strategy for fibre introduction into network 88−28555
subscriber loops, features and appls. 87−70068
subscriber loops, field trial results in Tokyo 85−20239
subscriber loops, optical coherent multichannel techniques 88−67158
subscriber loops, optical fibre cable bandwidth design 86−17087
subscriber loops, optical fibre cable development and introduction 87−8289
subscriber loops for broadband interactive distribution system 86−43865
subscriber network, glass fibre, picture transmission path using FM *(German)* 85−2963
subscriber network components 88−9523
subscriber networks, broadband signals appl., fibre optic analog transmission techniques 85−3238
subscriber networks, optical coherent technology implementation 88−46768
subscriber networks and LANs, recent status and trends 86−49685
subscriber optical cable networks, economical construction method *(Japanese)* 86−4627
subscriber optical feeder cable network, multi-stage concentrated distribution system construction 87−8314
subscriber optical fiber cables for feeder and distribution lines *(Japanese)* 87−8254
subscriber optical fiber cables for feeder and distribution lines 87−34590
subscriber optical fibre cable network, aerial multi-pipe distrib. system design and installation *(Japanese)* 87−28614
subscriber optical fibre cable network, construction 86−49609
subscriber optical fibre cable network, installation cable size determ. and ratio of common fibres to total fibres 86−69766
subscriber optical fibre cable network, plant expansion *(Japanese)* 85−25593
subscriber optical fibre cable network, plant expansion design 85−37059
subscriber optical fibre cable network, plant expansion design 87−8313
subscriber optical fibre cable networks, line distrib., plant administration, operations system *(Japanese)* 87−8253
subscriber optical fibre cable technology, developmental history and present status 85−20197
subscriber optical fibre cable technology development 87−40899
subscriber optical fibre technology review, appl. to Tsukuba Expo'85 85−20232
subscriber optical fibre transmission system, statistical design method for loss compensation *(Japanese)* 86−49628
subscriber optical line distribution method and plant administration and operations system 87−34589
subscriber systems, main distributing frame *(Japanese)* 87−76725
subscriber transmission systems for supporting I-series interface *(Japanese)* 88−9314

trunk cable network of West German Post Office, devices assembly *(German)* 86−23916
trunk fibre optic transmission system, development *(Japanese)* 87−40905
trunk line systems, 565/680 Mb/s multiple encoder/decoder, LSI device 86−11141
trunk line transmission system using high-capacity optical fibre transmission 85−25903
trunk links installed by Mountain Bell between Billings and Bozeman 88−15495
trunk network, integrated LAN for distributed computer control 88−46606
trunking and local distribution or bypass appls., digital lightwave system 85−14314
Tsugaru Strait railway communication equipment using optical fibres *(Japanese)* 88−31146
Tsukuba Expo '85 information service system *(Japanese)* 87−3194
tubular modes dispersion 85−1960
tubular structure large-diameter fibre, TE_{01} mode operation 85−56326
tunable directional coupler fabrication and characteristics *(Korean)* 88−45087
tunable eight-channel wavelength demultiplexer using acousto-optic. light deflector, fibre communication appls. 86−55288
tunable fibre Fabry-Perot interferometer filters 87−68037
tunable holographic second-harmonic generators in high-birefringence optical fibres 88−45547
tunable lasers, 10 μm, guided transmission 87−74785
tuned-port twin biconical fibre splitters, fabrication from dissimilar low-mode-number fibres 85−24309
tunnel-coupled, self-switching obs. 88−20363
tunnel-coupled fibre optic waveguides, nonlinear light transfer 86−48119
tunnelling loss in fibres with distorted refr. index profile 85−7265
TV25GF optical TV transmission system, review *(German)* 88−60450
TV channel optical fibre transmission system using LEDs *(Japanese)* 88−28842
TV distribution networks using coaxial cables 86−31022
TV industry, use of fibre optics for video transmission 88−67381
TV lecture connecting two campuses by optical fibre cable, eval. *(Japanese)* 87−28823
TV link LED module with multiple output fibers *(Japanese)* 88−28893
TV networks, optical fibre, satellite or both 88−53401
TV networks, replacement for coaxial cable system *(Italian)* 87−70044
TV reception, wideband subscriber station for high rate optical lines *(German)* 86−24060
TV relays appl. *(Japanese)* 88−53268
TV signal, digital, transmission using fibre optic link *(Russian)* 87−8316
TV signal, digital transmission on coaxial and optical cables 88−4192
TV signal, pulse analog transmission 87−76956
TV signal transmission via fibre-optic lines *(Russian)* 85−26042
TV signals, FM transmission over optical channel 87−49292
TV studio centers, optical fibres for digital video interconnection 87−20535
TV transmission, program distribution via glass fibres *(German)* 88−15731
TV transmission, program distribution via glass fibres *(German)* 88−22311
TV transmission systems 86−49635
TV transmitter links for AM directional broadcasting, Ludwigshafen specialty *(German)* 85−8524
TV-transmission on optical fibres 85−37200
twin grating wavelength multiplexer in single-mode fibre 88−67412
twisted, birefringent, nonlinear polarisation evolution and instability 86−63669
twisted birefringent fibres, intensity discrimination 87−18664
twisted fibre lightguides, attenuation charact. calcs. 87−62952
twisted single mode fibres, intensity-dependent polarisation optics 88−65228
twisted single-mode fibres, polarisation charact., expt. study 85−29607
twisted single-mode optical cable fibres, dispersion calcs. 87−62950
two channel heterodyne type fibre optic transmissionexperiments at 825 nm 86−11101
two dimensional fibre array, fabrication and characterisation 85−7205
two-channel ASK heterodyne detect. system, laser linewidth effect on cross-talk penalty 88−60138
two-channel fibre Raman amplification 88−41640
two-channel heterodyne-type transmission experiment 85−20184
two-channel multimode, crosstalk investig. 86−63653
two-channel video transmission, coherence modulation and multiplexing 88−47134
two-core, wavelength-selective coupling, appl. and design 85−24301
two-core low-loss birefringent single mode optical fibres 85−24300
two-core singlemode bunch fibre, crosstalk charactn. 88−65223
two-dimensional transmission system, with wavelength division multiplex *(Czech)* 85−3469
two-fiber tactical fiber-optic connector 86−49659
two-layer single-mode fibre waveguides, chromatic dispersion, determ. and calc. 88−45085
two-mode, periodic microbends, intermodal coupling 87−38789
two-mode fibre, elliptical core strain gauge with heterodyne detection 88−67873
two-mode fibre devices using highly elliptical core fibres 87−74736
two-mode optical fibres, optical frequency shifting by flexural acoustic waves 87−68169
two-wavelength transmission for optical token ring LANs 88−9215
two-way communication system using rotary coupler 85−62284
U-Net, unidirectional fibre bus network 85−13963
U-shaped curved multimode fibre sensor for process refractometry and temp. meas. *(German)* 87−8617
UHF analog optical communication systems, intensity noise sources 87−13713
UHF and microwave frequencies, signal processing 85−25194

Al_2O_3-P_2O_5-SiO_2 based fibres, Nd^{3+}(Er^{3+}) doped, fabrication, assessment, optical props. 88−51461
Ar fibre laser, stimulated Brillouin scattering, single-mode and multimode pumped, spontaneous mode locking 87−2083
Ar laser ablation of myocardium electrophysiological correlates and thermal charact. 88−23111
ArF_4 based fluoride glass single-mode fibre fabrication 85−12569
As-Ge-Sb glass hollow fibres, drawing and attenuation meas. 86−28825
As-Ge-Se-Te chalcogenide glass fibres for thermal IR transmission 87−18719
As-S fibre, CO_2 fast axial flow electric discharge laser power transmission 85−56556
As-S fibres, optical losses at 0.8 to 1.6 μm 86−28837
As-S glass IR fibre, Teflon clad, optical loss due to water diffusion 87−32923
As-S glass IR fibre, Teflon-clad, low-absorption losses 86−42269
As-S glass fibre, Nd:YAG and CO laser beams, simultaneous delivery 88−20336
As-S glass, fibre, multimode step-index, pulse waveform distortion temp. depend. 88−26812
As-S glass fibre power transmission capacity on CO laser delivery 88−58097
As-S glass fibres, bundled, IR image guide 85−56276
As-S glass fibres, high-power CO laser transmission 85−1992
As-S-I chalcogenide glass for optical waveguides 88−39861
As-Se and As-Se-Te IR chalcogenide tube waveguides 87−18720
As-Se chalcogenide glass optical fibres, IR range, plasma-chemical deposition 86−36137
As-Se glass hollow fibres, drawing and attenuation meas. 86−28825
As-Se-I chalcogenide glass for optical waveguides 88−39861
$As_{38}Ge_5Se_{57}$ unclad glass fibres, transmission loss charact. 85−29583
As_2S_3 IR glass fibre, for CO laser power delivery 85−1973
As_2S_3 IR glass fibre with Teflon cladding, CO laser power delivery for medical appls. 87−41998
As_2S_3 fibres, IR, optical and mechanical props. 88−33643
As_2S_3 glass fibre, Faraday effect temp. depend. 85−56275
As_2S_3 glass fibres, optical power transmission of CO laser beam 86−48077
As_2S_3 glassy fibres, radiation absorpt. charact. in 1 to 8 μm range 85−24321
$As_{40}S_{60}$ unclad glass fibres, transmission loss charact. 85−29583
$As_{2-x}Se_{3+x}$ glass fibres, chalcogenide IR, prep. and optical props. 86−521
As_2Se_3 IR optical fibre, improved 88−58116
As_2Se_3 fibres, IR, optical and mechanical props. 88−33643
$As_2Se_{3-x}Te_x$ chalcogenide glass system, mech. and optical props. 88−20322
$As_2Se_{3-x}Te_x$ glasses and optical IR fibres, prep., struct., opt. and mech. characteris. 88−1926
Au echelette gratings as wavelength demultiplexers in fibre optics, optimisation 85−37011
B_2O_3-SiO_2 glasses, α irradiation damage studied by thermolumin. 88−71994
BaF_2 single crystal fibres, laser-heated pedestal growth method 85−16903
$BaTiO_3$ photo refr. cryst., four-wave mixing, real-time complex field imaging through fibre bundles 85−35883
$BaTiO_3$ photorefractive fibre coupler, anal. 88−13875
$Bi_{12}SiO_{20}$ cryst. appl. as voltage sensor in optical fibres 87−68043
$Bi_{12}SiO_{20}$ fiber-optic electric field sensor 86−36218
Br liquid filled, Teflon clad IR waveguides 88−58124
C coated hermetic optical fibre, mechanical reliability 88−72076

optical fibres continued
CO_2 laser radiation transmission through hollow fibres and waveguides 88−13913
CaF_2 single crystal fibres, laser-heated pedestal growth method 85−16903
CsBr IR fibre waveguides, optical characts. 87−74709
CsBr-AgBr fibres, growth by Stepanov's method 87−18628
CsBr-CsCl two-layer single-crystal fibre waveguides, fabrication, optical loss reduction 86−48121
CuCl, IR single crystal fibres fabricated by travelling-zone melting 85−18668
D_2 gas-in-fibre Raman lasers, 1.5 μm, single-pass mode-locked or Q-switched pump operation 85−56529
Er doped fibre laser, gain modulation using pulse pumping 88−58644
Er^{3+} doped single-mode fibre laser, AlGaAs diode laser pumped operation 87−75047
Er: GeO_2-SiO_2 fibre laser, 1555 nm, low-threshold CW operation 87−75045
F doped glass optical fibres, new materials could supersede quartz glass *(German)* 88−53259
F doped single mode optical fibres, transmission characteris. optimisation 85−35481
F doping techniques for VAD 86−9556
F-glass IR lightguides in fibre-optic sensors, sensitivity 86−15492
F-glass optical fibre fusion splicing with CO_2 laser 88−58079
GaAlAs IR LEDs for optical fibre communications *(Japanese)* 86−58843
GaAlAs injection lasers, props., effects of fibre external cavity *(Chinese)* 88−40267
GaAs BH waveguides with high coupling efficiency for single-mode fibres 87−60942
GaAs FET oscillators optical injection locking using fibre optics 87−6148
GaAs FET-PIN fibre-optic-receiver, flicker noise effect on sensitivity, calc. 87−56131
GaAs ICs, high speed, performance and reliability 87−73418
GaAs active components, reliability considerations in radiation environment 87−74378
GaAs based optical wideband data transmission system signal processing 88−60150
GaAs circuits for fast fibre optic links *(Swedish)* 88−47043
GaAs detectors, direct backside connection of optical fibres 88−65205
GaAs error detection IC, high-speed type for fibre optic transmission systems 88−73920
GaAs integrated optical components for optical fibre communications *(German)* 86−2845
GaAs multiplexer and demultiplexer ICs for fibre optics data transmission systems *(German)* 87−2984
GaAs optical/elec. input monolithic transmitter chip, 1 Gbit/s 87−8326
GaAs photoconductive detectors and MESFETs, monolithic integration with distributed coupling to optical fibers 85−2144
GaAs standard digital ICs in fibre-optic systems 88−47044
GaAs waveguide components, self-adjusted permanent attachment of fibres 86−54000
GaAs/GaAlAs heterojunction bipolar transistor/phototransistor monolithic photoreceiver for 0.85 μm fibre links 86−43812
GaAs-AlGaAs laser, external cavity stabilisation of linewidth and frequency by fibre-optic ring resonators 86−48464
GaAs-SiO_2, MBE photoconductive detectors on SiO_2 fibres, optoelectronic integration 88−51695
GaInAs p-i-n photodetector, ultra-low-capacitance flip-chip bonded 85−56431
GaInAs planar avalanche photodiodes for 1 μm region of optical fibres 85−14270
GaInAsP VIPs lasers, 1.3 μm, high-power output coupling to single-mode fibre 87−68460
GaInAsP-InP pigtail laser modules, 1.3 μm, for monomode long haul communications *(French)* 86−9876
$Gd_{3-x}Bi_xFe_5O_{12}$ IR micro-isolator for fibre-optic communications, fabrication 86−42346
$Gd_{3-x}Bi_xFe_5O_{12}$ fibre-embedded micro-Faraday rotator for IR 85−35385
Ge Hi-Lo APD for 1.5 micron wavelength single mode optical fibre communication 85−50948
Ge-As-Se-Te chalcogenide glass fibres for transmission in the 8 to 12 μm range 87−18718
Ge-As-Se-Te low loss chalcogenide glass fibre with core-cladding struct. 88−72013
Ge-Sb-Se IR chalcogenide tube waveguides 87−18720
Ge-Sb-Se glass, acrylate coated, strength in various environments 88−475
Ge-Sb-Se-Te glasses for optical fibres, appl. to power transmission at 10.6 μm, optimum composition 87−54005
Ge-Se chalcogenide glass optical fibres, low loss IR, fabrication 86−9542
Ge-Se-I chalcogenide glass for optical waveguides 88−39861
Ge-Se-Te glasses for optical fibres, appl. to power transmission at 10.6 μm, optimum composition 87−54005
Ge-Se-Te(-Tl) glass fibres, chalcogenides, transmission loss 88−26783
GeO_2 core single-mode fibres with small-pure-core for efficient nonlinear optics 88−58652
GeO_2 doped, single-mode, dispersion-shifted, splice, microbending and Rayleigh losses, anal. 86−42321
GeO_2 fibre Raman laser, appl. to chromatic dispersion meas. 86−58781
GeO_2 glass IR lightguides in fibre-optic sensors, sensitivity 86−15492
GeO_2 glass characterisation for hollow-core mid-IR fibres 86−22058
GeO_2 glass fibres, fibre Raman laser emission 88−65656
GeO_2 hollow optical fibres, low-loss transmission in IR wavelength range *(Japanese)* 88−7858
GeO_2 optical fibre, single-pass Raman generation and appl. to chromatic dispersion 86−58781
GeO_2:F-GeO_2, doped cladding-pure core single-mode fibre, dispersion study 87−25944
GeO_2:Sb glass optical fibre prepared by VAD, loss values 85−12570
GeO_2-SiO_2 fibres, laser tuning by stimulated four-photon processes 88−14259
GeO_2-SiO_2 optical absorptions due to H_2 *(Japanese)* 86−68238
GeO_2-SiO_2 optical fibre preforms, defect center conc., densification effects 85−29584
GeO_2-SiO_2 optical fibres, photochromic dynamics and nonlinear transmission 88−65183
GeO_2-SiO_2 single-mode fibres with depressed claddings, interplay between GeO_2 and Fl concentrations 86−9545
GeO_2-core optical fibre efficient linearly polarised Raman generation 88−13802
GeO_2-core/SiO_2-cladding optical fibres, modified CVD deposition and stimulated Raman appl. 87−25935

optical fibres continued

GeO_2-doped single-mode, Raman gain depend on relative index difference 85−56336
GeS and GeSe, chalcogenide glasses for IR fibres, plasma deposition 87−18717
GeSbSe chalcogenide glass IR optical fibres, properties and applications 87−38777
H diffusion in glass optical fibres: effects, long term behaviour and preventive measures *(German)* 86−59905
H treatment effect on radiation hardness 88−13845
H_2 degradation reduction in optical cables, materials selection 87−8333
H_2 diffused into optical fibres, loss increase characts. 86−9563
H_2 diffusion, reversible, in optical fibres, time constant determ. 88−1943
H_2 generation by materials related to submarine optical cables 86−63664
H_2 generation from optical fibre cable, eval. 88−22153
H_2 generation from optical fibre cable materials 87−8331
H_2 generation from optical fibre coatings UV curable acrylated resins 87−8332
H_2 influence on optical fibre loss *(French)* 86−9574
H_2 reversible diffusion in optical fibres, expt. determ. of time constant 88−58073
H_2-induced loss, drawing condition dependence anal. 86−36146
He-Ne 1500 nm stabilised transverse Zeeman laser, expt. for coherent communication 87−38976
He-Ne laser, performance at 1.523 μm, IR fibre-optic communication system appls. 85−41310
HgCdTe, devices for fibre optics communications, ion implantation technique optimisation 88−57448
$Hg_{0.3}Cd_{0.7}Te$ APD for fibre optic transmission systems at 1.3 μm *(French)* 86−9692
$Hg_{0.3}Cd_{0.7}Te$ avalanche photodiode foroptical-fiber transmission systems at λ=1.3 μm 85−58105
InGaAs p-i-n photodiode detectors, design and performance, optical fibre communication appls. 86−49604
InGaAs/InP photodiodes for optical fibre communication, design with sensitivity improvement *(Japanese)* 86−54043
InGaAs-APDs and DFB-LDs for 4 Gb/s long span transmission expts. 88−67417
InGaAsP 1.55 μm mode-locked laser with single-mode fibre output 87−26476
InGaAsP 1.55 μm optical fibre ring laser 86−29185
InGaAsP DFB laser at 1.5 μm coupled to fibre resonator, FM noise and linewidth reduction 88−45520
InGaAsP DFB lasers, effect of Rayleigh backscattering from optical fibres on wavelength 86−63822
InGaAsP, diode laser transmitter modules, trace gas detection at 1.3 μm 88−29689
InGaAsP edge emitting LEDs, design for 1.3 μm 180 Mbit/s transmission over single-mode fibre 85−56449
InGaAsP fibre-extended-cavity distributed-feedback lasers, linewidths meas. 86−48453
InGaAsP laser, 1.55 μm, active mode locking, single-mode-fibre output port 85−29814
InGaAsP laser in lightwave communication systems, performance, TE-TM mode kinks effects 87−12644
InGaAsP laser with optical fibre-ring feedback, spectral characts. 88−45453
InGaAsP lasers, single mode fibre composite cavity, active mode-locking characts. 86−42598
InGaAsP semiconductor lasers, intensity and phase noise, fiber-far-end reflections effects 85−2294
InGaAsP tunable fibre-extended-cavity laser 87−39158
InGaAsP/InP DC-PBH LD for long wavelength optical fibre communications 86−3166
InGaAsP/InP LED, integral lenses, ray-tracing program, optical fibre communications appl. 85−29640
InGaAsP/InP dual mode laser/detectors in 7.5 km bidirectional single-mode optical-fibre link 85−46395
InGaAsP/InP long wavelength edge emitting LED for single mode fiber optic communication 88−33894
InGaAsP/InP semiconductor lasers for monomode fibre systems *(German)* 86−15713
InGaAsP/InP spontaneous DH end-emitting LED for 200 μm diameter fibre-optics communications 85−62459
InGaAsP/InP spontaneous double heterostruct. end-type emitters for optical fibres 86−22265
InGaAsP-InP high-speed electroabsorption modulator, monolithically integrated with DFB lasers 88−65375
InGaAsP-InP, single freq. semicond. laser, 1.3 μm with fibre external resonator 88−40228
InP individually addressable monolithic 1×12 LED array aligned with 12 fibre ribbon 86−22255
InP/GaInAsP long wavelength lasers, design for high reliability 85−35802
InP/InGaAsP/InGaAs avalanche photodiode with frontillumination for optical fiber transmission at Gbitrates in the 1-1.6 μm wavelength region 86−42443
K^+ and Ag^+ ion-exchanged directional couplers, multiplexing characts. 88−7949
KBr-KCl IR fibres, characts. 88−72005
LaF_3 for fluoride optical fibres, synthesis, ultrapurification and anal. 87−74660
$LiNbO_2$ single domain crystal fibres, laser pedestal growth method 85−16903
$LiNbO_3$ Mach-Zehnder interferometric freq. translators for coherent optical fibre systems 86−9627
$LiNbO_3$ electro-optic freq. translators for coherent optical fibre systems 87−12254
$LiNbO_3$ fibre polarization control system based on electro-optical effect *(Japanese)* 85−35514
$LiNbO_3$ guided-wave devices for single-fibre video and bidirectional voice/data transmission 88−73923
$LiNbO_3$, integrated optic devices for coherent optical fibre systems 86−2850
$LiNbO_3$, integrated optical devices, technology 87−54088
$LiNbO_3$ integrated optical freq. shifters coupled to high birefringence fibres using ion-milled grooves 86−68323
$LiNbO_3$ integrated-optic wavelength multiplexers based on two-mode interference 88−72145
$LiNbO_3$, ion-milled alignment grooves, efficient fibre-chip coupling at 1.3 μm 85−2076

optical fibres continued
$LiNbO_3$ optical quality single crystal fibres, laser assisted growth 85−29542
$LiNbO_3$, single cryst. fibre growth and nonlinear optical use 87−39246

compensation of field-angle-dependent illuminationvariations in imaging and illuminating opticalsystems in photocopiers 86−13229
components testing, development trends 87−74944
concatenated tapered coaxial couplers, narrow passband filter synthesis 86−48195
concatenated tapered coaxial couplers as all-fibre wavelength filters 87−54148
contrast enhancement techniques for sunlight viewabledisplays 86−49991
correlation filters, rotationally invariant for multiple images 86−63699
correlation filters for distortion-invariance anddiscrimination 86−10535
correlation rotationally invariant filters performance, in pattern recognition, effect of expansion center choice 88−52568
corrugated dielectric waveguide, external light reflection, narrow band filter fabrication 87−1965
corrugated waveguide filters, design by Gel'fand-Levitan-Marchenko inverse-scattering method 86−15544
cosmic rays composition meas., light attenuators for plastic scintillation detectors 87−77566
coupled lightguides, filter operation, parameters choice 87−18747
coupled passive and active waveguides, wavelength and noise filtering characts. 88−20482
coupler-type optical grating filters, contradirectional, anal. 86−2849
couplers, tunable single-mode fibre, anal. 86−48099
CRT antireflection filters, quantitative eval. of effect 87−8692
CRT contrast-enhancement, active filter using liquid-crystal pi-cells 87−8696
CRT PLZT frame-sequential electronic color display filters 86−38263
crystalline powder IR dispersion filters, nonlinear laser radiation scatt. 85−56392
design of optical filter made from coupled lightguides with periodically modulated parameters 86−2765
dichroic filters for colour TV cameras, spectral props. depend. on incidence angle, theoretical study *(Slovak)* 85−2115
dichromated gelatin filters, secondary holograms 85−12992
dielectric interference filter for 4.4 μm, sapphire substrate, mech. and optical props. *(Slovenian, English)* 87−54147
dielectric multilayer coatings for quantum electronic devices *(Russian)* 86−48242
dielectric narrow-band transmitting interf. filters, thin-film coating synthesis 86−28937
differential, computer-generated electron-beam holograms *(Chinese)* 86−58978
differentiation filter synthesis, digital method 88−72194
digital processor circuits using nonlinear interference filters, demonstration 88−8012
diode laser beam scanning using local deflector integrated with mode filter 88−20690
directional couplers, forward and backward coupling, bandwidth formula 88−26849
directional-coupler filter using dissimilar opticalfibres 85−62292
directional-coupler wavelength filters made of dissimilar single-mode fibres, bandwidth 87−38740
dispersion compensation in coherent-fiber-optic communications 87−68133
displacement sensors based on spectral filtering, sub-carrier interferometry 87−49952
display contrast-enhancement filters, optimisation 87−8694
display readability improvement using filters and anti-reflection coatings *(German)* 86−5379
dithiene bleachable filter for I laser, Q-switching and decoupling of amplifiers 85−2381
duplexer with hybrid integrated light emitter and detector, crosstalk reduction with interference filter 86−4688
dye laser, colliding pulse mode-locked, stabilisation using spectral filter 88−58475
dye laser, simultaneously tunable three-wavelength, using intracavity filters 85−62522
dye laser, tunable, narrow-line high spectral purity, using reflecting interference filter 85−56743
dye laser, tunable ps pulse generation using ruby laser pump and grating spectrometer 87−39018
dye lasers, spectral dynamics, new picosecond source 86−15784
edge detection and width estimation algorithms 88−46214
edge filters made of single-mode fibers 86−22203
edge-detection schemes highly suitable for hardware implementation 88−73195
electro-optic tunable filter 86−54023
electro-optical tunable filters for WDM optical communication systems, design criteria and characts. *(Spanish)* 88−60160
electro-optically tunable narrow-band wavelength filter, polarisation-independent operation 88−65367
electrooptic tunable filters, active guided wave devices, coupled mode anal. 87−32983
electrooptic waveguide filters/mode converters, transfer efficiencies, electric field effects 85−12579
EMG telemetry device using upper-line-shift diode and IR radar *(Japanese)* 85−26774
epitaxial semiconductor optical interference devices 88−7966
epitaxial semiconductor optical interference filters 88−65454
etalon filters, multiple angle-tuned for optical channel selection in WDM and FDM systems 88−73931
eye safety protection for field use of laser rangefinders 87−57252
Fabry-Perot filters for wavelength demultiplexing, optical monitoring method during growth 87−54150
FDM distribution systems with optical tunable filters, design 87−28577
FDM-FSK star network with a tunable optical filter demultiplexer 88−3972
FDM-FSK star network with a tunable optical filter demultiplexer 88−47166
fiber optic polarisation controlled recirculating delay line filter and its phase induced intensity noise 88−65272
fibre, charactn. and prediction of crossover wavelength and bandpass in fibre directional couplers 86−63613
fibre, monomode filter, polarisation anisotropy, fibre communication line appl. 85−12602
fibre, single-mode, channel-dropping filter using high-index overlay waveguide 87−38790
fibre band-pass filter using concatenated fused-taper couplers 85−29559
fibre matrices, channel selective for high density WDM systems 88−65281
fibre optic components, in-line filter, switch and attenuator 86−59908
fibre optic components, in-line filter, switch and in-line attenuator 87−12178
optical filters continued
fibre optic hydrophone with dual in-line resonant cavity 87−29985
fibre optic interferometric electrically tunable filter using the thermo-optic effect 87−18793
fibre optic Mach Zehnder interferometer devices, tunable coupler and filter 86−48199
fibre optic Solc filter for use in Raman amplification of light 85−24644
fibre optic transversal filters, single-mode, HF narrow band, design and anal. 87−34569
fibre optic transversal filters for RF direction finding 87−34676
fibre optic transversal filters for wide-band electro-optic direction-finding processor 87−25957
fibre optic wavelength filter with sharp cut-off charact. 87−74815
fibre optics, single-mode WDM systems using Fabry-Perot interferometers, wavelength-selective filters appl. 87−34529
all fibre polarising beam splitter and spectral filter 85−41184
fibre reflective grating filter, tunable single-mode 88−13822
fibre ring resonator, using 3×3 optical fibre coupler 88−65282
fibre signal processing appls., tapped delay line filters 85−29638
fibre transmission systems, optical and optoelectronic devices appl. 88−35487
fibre-optic acousto-optic tunable filter 87−2007
fibre-optic directional coupler for wavelength multiplexing 85−63637
fibre-optic ring resonator, novel type, for wavelength selective transmission 87−53982
fibre-optic spectral filters using concatenated dual-core fibres, design and characts. 86−28799
fibre-optic wavelength filter from successive biconical tapers 87−18665
fibre-optics matched delay filter for RF direction finding 85−51019
fibres, periodically twisted, polarisation instability, all-optical switching and intensity discrimination 87−38787
filters for correcting fluorescent and high-intensity discharge lamps 88−65448
FIR band-pass filters with two resonant grids, spectral characts. 86−42398
focal plane optics in far-infrared and submillimeterastronomy 86−43930
four-channel optical branching filter 86−48241
Fourier spectrum in coherent optical system, zero-order filtering 85−13611
frustrated total reflection filters, multiple reson., for nonpolarising band-pass filters 85−7295
FSK heterodyne-single filter detect. expts. using directly modulated DFB laser diode 86−11103
glare filters display quality obs., for CRT terminals 85−20515
grating structures in integrated optics 85−56360
gyroscope, bias drift reduction by polarisation dispersion, theoretical anal. 86−22082
high-pass filter, simple nonpolarising design 85−35574
Hilbert transform using polarisation filters 86−64349
hologram recording with filter, glass fibre dia. meas. 87−19091
holographic filter for mode excitation of graded-index multimode fibres *(Japanese)* 88−7882
holographic filters, dichromated gelatin, spectral bandwidth 85−12991
holographic filters, position tunable, in dichromated gelatin, use in single-mode-fibre demultiplexers 85−46241
holographic filters, tunable, in dichromated gelatin, operating in near IR 86−9646
holographic filters in dichromated gelatin position tuned over near IR 86−3351
holographic mirrors, notch filter use 86−9992
holographic notch filters and filter stacks development for specific spectral transmission 87−68661
holographic optical configurations for eye protection against lasers 87−63855
holographic optical elements in dichromated gelatin 86−10001
holographic processor, astigmatic, for local pattern recognition 88−40360
holographic reflection filters, narrow band, construction methods 88−34162
holographic technique for imaging through fog 88−34169
holography, far-field in-line, and diffr. pattern analysis of particulates, filtering effects 87−19069
holography, far-field in-line, nonblocked zero-freq. filtering 87−26566
hybrid coherent optical and electronic filtering 88−3259
hybrid quantum/thermal solar concentration systems using spectral selectivity 87−22756
hybrid solar energy conversion systems, liq. and thin-film filters 87−51100
image information transmission, storage, and acquisition using an acousto-optic cell and optical matched filters 87−13053
image transmission, high rate, using picosecond laser and electronic streak camera *(French)* 85−36272
in-line optical fibre filters using dispersive materials 87−40882
incoherent spatial filtering techniques, generalisation 86−37116
inductive grids in resonant region as multielement filter stacks 86−2905
infrared filters fabricated from submicron loop antenna arrays 88−27650
infrared mesh filters, fabrication by electron beam lithography 85−35578
integrated optical filter, design *(Korean)* 87−46576
integrated optical filter, fabrication and improvement *(Korean)* 87−46577
interference filter demultiplexing system, light scattering from surface irregularities, crosstalk study *(French)* 88−60123
interference filter for HDTV, light valve projector, with 1600 lm light output using 400 W lamp *(German)* 86−4815
interference filters, narrowband, position tuned, for WDM systems 88−13992
interference filters, nonlinear, for optical computing architectures 88−65428
interference filters, optically bistable, for array processing, optimisation 86−48498
interference filters, optically bistable, optimisation 86−36571
interference filters, rejection rates meas., optical demultiplexing appl. *(French)* 88−60122
interference filters as nonlinear decision-making elements for associative memories 88−65432
interference filters for SiC LED controllable-spectrum optical radiation source 85−2164
interference filters for spectral response measurement apparatus for large areasolar cells 87−4877
interference polarisation filter, spectrally tunable, for near-IR spectral region 86−22204
IR detection in closed working areas, filtering techniques for light interference suppression 87−49767
IR diffractive filters fabricated by electron beam lithography, spectral and polarising characts. 87−33025
IR image processing for a combined staring and scanning IR sensor 88−28064

piezoelectric reflecting wedge as tunable reflector and filtering output coupler, for dye laser scanning 85−29886
planar meshes with discrete loads, circuit modelling, equiv. mesh impedances 87−33023
plane metal-dielectric waveguide polarisation filter, spectral width 86−48243
polarising filters for conveyor belt reflective optical monitors with high interference rejection *(German)* 86−55730
polarising interference filter, for dye laser spectrum narrowing and tuning 86−29205
polyimide filters for radiation with quantum energies 0.1-1.5 keV 86−58359
polymer light filters with specified spectral characteristics for circular polarisers 85−24355
position tuned filters for 1200-1600 nm, performance review 88−65456
prism based optical frequency filter for ultrashort pulses 87−18791
processor, coherent, spatial frequency spectrum, effect of non-sinusoidal vibrations 85−30296
programmable time-delay devices using fibre and integrated optics combination 85−12635
pseudo-colour coding using gratings 87−19911
pulse compression in optical fibre filters 85−35391
quarterwave multilayers, optical monitoring of thickness *(French)* 87−56832
quartz glass, doped, luminescent filter for Nd laser 85−56758
quartz glass, Eu activated, luminescence optical filters for laser, efficiency 87−68244
quasi-optical filter element, reflective polarising interferometer 88−7024
re-circulating optical fibre filter with a 'non-reciprocal' coupler 88−33688
receiver optimisation for optical communication 88−47113
reflecting narrow-band filter based on reson. nondegenerate four-wave interaction 86−9953
reflection filter, metal film, for InGaAsP laser single mode operation 85−62569
reflection holographic gratings as Fourier filters, transfer function 85−7552
reflectively tapped optical fibre transversal filters 87−53977
reflector, single-mode fibre evanescent grating, backward wave coupling 86−22114
Reoksan, 3-D hologram as a narrow-band spectral selector 85−56873
resonator memories and optical novelty filters 87−61257
RF band-pass filter, multimode fibre cavity 88−26930
RF Fabry-Perot-type filter for intensity modulated sensors 86−48161
rib waveguide grating resonator filters, anal. *(German)* 87−74906
ring laser, unidirectional operation using absorbing Fabry-Perot filter 87−54372
ring laser with nonlinear filter, coherence props. 86−48461
ring laser with nonlinear filter, stationary generation 86−48460
rotating linearly polarised light source, appl. to optical meas. 86−42394
rotationally invariant matched filters: Fourier plane on input plane encoding 88−8859
scale, rotation, and shift invariant image recognition 86−69102
self-scanning CCD image sensors operating as optoelectrical transversal filters 88−42160
semiconductors, II-VI, optically nonlinear and bistable behaviour 86−9944
a-Si:H film, fibre optic temperature sensor appl. 88−42137
signal processing components and applications 88−67407
signal processing devices design 87−54053
single mode fibre taper filters, wavelength response fine tuning methods 87−38844
single-mode fibre, mode-field radius meas. based on harmonics detection 86−22078
single-mode fibre device overview, polarisation-preserving props. 85−2050
single-mode fibre directional coupler with narrowband Bragg refl. filter 86−53955
single-mode fibre systems, narrowband position-tuned multilayer interference filter 85−63642
single-mode fibre taper filters, wavelength response, fine tuning 87−46636
single-mode-fibre/LED communication systems, dispersion-limited transmission and spectral filtering 87−3198
slab waveguide electrooptic filters, modal dimensionality and dephasing effects 88−1984
slowing down far from the limit points in optical bistability 87−75247
solar-blind effect in ultraviolet lidars *(Japanese)* 88−74978
Solc equivalent filters in single mode fibre, practical design and manufacture 87−61007
spatial filters, polarisation, Jones formalism suitable for intermediate course on waves *(Spanish)* 88−58336
spatial light modulator, interference filter, electron-beam-tunable 88−51652
spatial light modulator constraints in optical processing 88−8021
spatial matched filtering using holograms on amorphous mag. films *(Japanese)* 88−14308
spatial-spectral scanning optical correlator, large-capacity real-time 86−38295
spectral characteristics of optical filters and spectrum analysers based on acoustooptic reflectors 86−15537
spectral filtering analogue and digital extrinsic optical fibre sensors 85−24275
Stark-induced birefringence and dichroism, turnable optical filters, modulators and limiters appl. 86−36255
stratified flow characts. meas., by colour-shadow method 85−48144
tapered monomode fibre's for optical communication appls. *(Spanish)* 88−60159
ternary and multinary compounds, electronic, acoustic and optical devices 85−18535
thin film, instability due to moisture adsorption *(Chinese)* 85−62422

thin-film reflection filters, survey of charact. and appls. 85−18770
thin-film reflection filters having nonuniform multiperiodic interface corrugations 87−46557
thin-film ring resonator in optical filtering device, filtering props. 86−9645
tri-colour electrodeposited filter for use in full-colour LCD 88−40045
tunable acoustooptic filter, angular aperture 88−13960
tunable birefringent wavelength-divisionmultiplexer/demultiplexer 85−58094
tunable fibre Fabry-Perot interferometer filters 87−68037
tunable filter, rotating linearly polarised light source appl. 87−14576
tunable optical band pass filter using optically active and biaxial crystals 87−61008
TV video and sound filters adjustment and testing, using wobulator *(Spanish)* 87−49781
twisted-nematic liquid-crystal full-color display panelwith reduced rotary dispersion 86−31513
ultrashort pulse generation by laser mode locking using stimulated Raman scattering filter 86−54179
UV radiometers, detector optical characteristics 87−29114
variable high-power laser beam attenuator 88−20710
variable optical filter optimisation in hybrid optical correlator 88−8019
VDT filter effectiveness against diffuse and specular reflections *(Japanese)* 87−41577
vibration meas. using graded optical filters 86−11704
volume grating with variable depth modulation as spatial filter 86−28940
waveguide, TM-mode selective filter using a high refractiveindex lossy layer cladded optical waveguide 87−7144
waveguide grating filter, guided wave coupling for normal incidence 85−2059
waveguide holograms for matched filtering systems 88−45568
waveguide-optic spectral filter 85−62423
waveguides, planar corrugated, diffraction charact. and appl. as narrowband reflection filters 86−63666
wavelength division multiplexers for optical telecommunication *(French)* 85−20200
wavelength multiplexing components for fibre optics communications systems *(German)* 86−4615
WDM filters, 4-channel transmission of 2×565 Mb/s and 2×140 Mb/s on single-mode fibre 86−11115
WDM multi/demultiplexers, for two-channel single-mode transmission systems 85−14266
WDM optical filter design and performance optimisation *(Chinese)* 86−68367
wide band pass filters, multiple Fabry-Perot interference filter struct. *(Korean)* 87−12286
wide-bandwidth sharp-cutoff bandpass optical filter for WDM with optical fibres 86−2904
Wiener restoration of sampled image data 88−52526
Zeiss activities in laser technology 85−46357
Ag thin film optical filters using DC magnetron sputtering 86−36291
AgCl emulsions as adaptive optical filters for image processing 85−12691
$AgGaS_2$ multilayer struct., LPE, electro-optic tunable filter fabrication and performance 86−34319
AlAs/GaAs Bragg reflectors for photodetector appl., MOCVD growth 85−46277
AlGaAs lasers, index guided with mode filter, local normal mode analysis 87−68459
AlGaAs/GaAs wavelength-dividing photodiode with multi-layer filters grown by MOCVD 86−9686
AlGaAs-GaAs index-guided lasers with mode filter, props. study 87−7349
AlGaAs-GaAs tunable multilayer interference optical modulators, MBE growth 88−51561
As_2S_3 based antireflection coatings for IR filters 87−54149
As_2Se_3 based antireflection coatings for IR filters 87−54149
$Bi_{12}SiO_{20}$ 2D optical temporal bandpass filter using four-wave mixing, dynamic schlieren imaging system 87−54392
$Cd_xHg_{1-x}Se$ optical filter, spectral transmission distrib. 86−2907
CdS_xSe_{1-x} doped filters, femtosecond nonlinearities using opt. Kerr effect 87−26546
CdSe bistable filters, performance investig. 88−65452
Co:MgF_2 laser, Q-switched, frequency tuning using quartz etalon and birefringent filter 85−41365
Cs filter resonant operation of Nd:$LiYF_4$ laser 87−46844
$Ga_{1-x}Al_xAs$ optical filters, thermo-optical effects 87−38728
GaAs directional coupler devices, design 88−13901
GaAs/AlAs, electrically tunable multilayer interference filter, light modulation 88−20434
GaAs-GaAlAs Bragg grating filters, rib waveguide type for 1.5 μm wavelength 87−53978
$GaP/GaAs_xP_{1-x}$ multilayers, optical interference filters and integrated high reflector/photodiode fabrication 86−68363
$GaP\text{-}GaAs_{0.2}P_{0.8}$ superlattices, optically tuned optical interference filter 88−8024
$GaP\text{-}GaAs_{0.35}P_{0.65}$, optical interference filter, photodiode, single-crystal integration 87−77285
H_2O adsorption reduction in optical thin films *(Japanese)* 88−13996
He cooled spaceborne spectrometer and telescope for IR limb scanning 88−68636
He-Ne laser tuned with birefringent filter 88−33941
HgCl, acoustooptic devices, fabrication and charactn. 88−13957
Hg_2Cl_2 vapour-phase-grown crystals, acousto-optic tunable filters and optical signal processing 87−54139
InGaAsP 1.55 μm optical fibre ring laser 86−29185
InGaAsP/InP waveguide reflection grating filters 85−24353
InGaAsP/InP waveguides, narrowband grating resonator filters 86−68362
$In_{1-x}Ga_xAs_yP_{1-y}/InP$, narrow bandwidth optical waveguide filters 86−2802
InGaAsP-InP integrated optics wavelength filter for WDM communication 86−42354
InGaAsP-InP integrated optics wavelength filter 86−36294
InGaAsP-InP waveguide grating filters for 1.5 μm 85−2116
In_2O_3:Sn transparent films as IR filters 87−46640
LiF filter, nonlinear, for pulse duration reduction of Nd: glass laser 88−51906
$LiNbO_3$ electro-optical polarisation converter/tunable filter, performance study 88−33772
$LiNbO_3$:Fe IR filter, highly selective holographically formed 86−2903
$LiNbO_3$:Ti electro-optically tunable narrowband wavelength filter 87−54086
$LiNbO_3$:Ti guided-wave devices for long wavelength telecommunications 85−2068
$LiNbO_3$:Ti optical waveguide couplers, MUX/DEMUX designs for WDM transmission systems 88−9567
$LiNbO_3$:Ti tunable directional coupler filter for simultaneous modulation and wavelength multiplexing 85−46202
$LiNbO_3$:Ti waveguide Bragg cells, anisotropic surface acoustic wave, appls. 85−29671
$MgF_2\text{-}TiO_2$ color interf. filter optimal construction, multivariate optimisation 88−13995
Nd:glass laser amplifying system, pulse profile by saturable filters 87−26495
Nd^{3+}:YAG laser, CW, mode locking by filter containing F_2^- centres 86−48377
Rb optical filter for Nd:YAG frequency-doubled radiation detection 88−58335
SF_6 solution in liquid Ar as nonlinear cryogenic filter, investigation of processes using CO_2 laser pulse shape 85−29680
Si Fabry-Perot interferometers, micromachining manufacture 87−76752
Si filters for radiation with quantum energies 0.1-1.5 keV 86−58359
Si integrated colour filtering element with enhanced wavelength tunability 88−65449
Si single-chip colour imager with integrated colour filters 87−34965
Si-GaAs-GaAlAs coupled solar cells, high conc. photovoltaic 100 W module using spectral splitting filters 86−19505
SiO_2/TiO_2 hard multilayers, reactive sputtering *(Polish)* 85−2114
$SiO_2\text{-}GeO_2$:Ho very high-rejection optical fibre filters, design and charact. 87−7095
SiO_2-Si edge filter, nonpolarising, for near-IR, prep. for opt. communication systems 88−8026
$Ta_2O_5\text{-}SiO_2$ narrow-band optical waveguide Bragg filter 88−51655
TeO_2 acoustooptic filter, ang. aperture 85−62427
TeO_2, p-tellurite, acoustooptical tunable filter for spectrometer 86−42395
Ti:$LiNbO_3$ stripe waveguide Bragg reflector gratings filters 88−58332
TiO_2/SiO_2 multicavity filter stability 87−68247
Tl_3AsSe_3 IR acousto-optic tunable filter for multi-gas stack emission monitoring 87−77896
Tl_3AsSe_3 acousto-optic tunable filter, role in commercial stack analyser 88−40027
ZnS, ZnSe interference filters, simultaneous optical bistable switching on adjacent pixels, pattern recognition 87−33311
ZnS bistable etalons, design parameter effects 88−8288
ZnS interference filters as nonlinear decision-making elements for three-spot pattern recognition and associative memories 88−51629
ZnS interference filters for parallel nonlinear optical signal processing 85−56842
ZnS interference filters for symbolic substitution 87−39220
ZnS(Se) interference filters, microsecond room temp. optical bistability and crosstalk 85−18767
ZnSe, bistable interference filters, nanosecond switching at room temp. 87−7436
ZnSe bistable interference filters, switching processes, steady-state model 87−26512
ZnSe filters as bistable logic elements in visible and IR, and cascadable digital, all-optical circuit demonstration 86−54199
ZnSe interference filter triple bistable-element loop circuit for digital parallel all-optical computer 87−33300
ZnSe interference filters for symbolic substitution 87−39220
ZnSe interference filters, switching of thermal-optical bistable devices 88−65863
ZnSe interference filters, thermally induced optical bistability 86−22496
ZnSe interference filters: room temp., visible wavelength optical bistability 85−24648
ZnSe nonlinear interf. filter white light switching, spatial light modulator design 87−33307
ZnSe nonlinear interference filters, fast switching and slowing down 88−27305
ZnSe nonlinear interference filters for logic gates for optical computers using bistable devices, digital optical circuits 86−3300
ZnSe nonlinear visible interf. filter, critical slowing down 87−33310
ZnSe-BaF_2 molecular beam deposited multilayer interference filters, optical bistability 88−65450

VUV radiation, broadly tunable, generated by freq. mixing in gases 85−7510
VUV radiation generation by antiStokes Raman laser process 87−7430
wave amplitude spatial evolution, soln. stability, bifurcations in sum and difference freq. generation processes 86−29233
wavefront reversal in four-photon parametric interaction with rotation, quality 85−56800
wavefront reversal of laser radiation with intermediate frequency conversion to a different wavelength range 85−46491
waveguides, planar, nonlinear optical excitation of modes 88−20409
waveguides, thin film, nonlinear-optical mode conversion efficiency, fabrication 86−15778
XUV generation, tunable coherent by four-wave mixing in Kr 85−41457
XUV generation in pulsed free jets 85−7511
$AgGa_xIn_{1-x}S_2$, mixed chalcopyrite crysts., potential for nonlinear laser devices 86−36582
$AgGaS_2$, phase-matching meas. for 10 μm upconversion 85−2396
$AgGaS_2$ tunable IR detection of CO_2 laser radiation, by frequency upconversion 88−72415
$AgGaS_2$, tunable picosecond pulse generation in medium IR by down conversion 85−29915
$AgGaS_2(Se_2)$, IR freq. generation 87−39245
$AgGa(S_xSe_{1-x})_2$, mixed chalcopyrite crysts., potential for nonlinear laser devices 86−36582
AlGaAs nonlinear waveguides, difference-frequency generation of IR waves *(Japanese)* 88−72416
Ar excimer laser, high-power in VUV, tunable oscillation, frequency conversion by SRS 86−9764
Ar, laser plasma, continuous antiStokes Raman laser oscillation 88−45505
Ba atomic vapour, pumped by tunable ultrashort light pulses, electron stimulated Raman scatt. and four-wave interaction 86−9948
β-BaB_2O_4, nonlinear optical material, props. *(German)* 88−2370
β-BaB_2O_4, second harmonic and sum frequency generation *(German)* 88−2369
BaF_2-ThF_4 glass, Yb^{3+}, Tm^{3+} doped, efficient freq. upconversion 88−58656
$Bi_{12}SiO_{20}$ photorefr. crystals, moving grating erasure, expt. study 87−7437
CO, laser-induced processes, coherent vacuum UV radiation generation 85−35872
CaF_2:Er^{3+} crystals, upconversion for IR imaging appls. 88−8278
Cd vapour, coherent VUV generation by reson.-enhanced freq. mixing 87−26514

optical frequency conversion continued
Cd vapour, used in generation of continuously tunable VUV radiation 85−7535
Cr^{3+}:$BeAl_2O_4$ crystals, growth and laser performance 87−12421
Cr^{3+}:$BeAl_2O_4$ tunable alexandrite lasers, nonlinear freq. conversion processes 86−22349
Cs atoms, nonlinear susceptibility for frequency upconversion from 10 μm to visible 88−40326
Cs vapour, four-wave difference mixing, effects of phase matching on efficiency *(Japanese)* 88−8300
Er^{3+}:YAG laser, picosecond at 2.94 μm with active mode locking 86−68499
Er^{3+}:$YAlO_3$, green Ir-pumped upconversion laser 88−20598
GaAs Schottky diode, 52nd order harmonic mixing 87−61233
GaP LEDs, high-speed IR-to-visible up-conversion by free-to-bound transitions 86−15586
GaP LEDs, high-speed photoconductivity and IR to visible up-conversion 85−7325
GaSe double resonator system, optical hysteresis and multistability 88−2371
H, Lyman-alpha radiation, nonresonant transformation, conversion efficiency, Kerr effect limitation 86−3315
H_2 Raman cell, XeCl laser pumped, efficient energy conversion 85−41475
para-H_2 Raman laser, polarisation enhancement of anti-Stokes emission 85−29768
H_2 XUV generation in pulsed free jets appl., rot.-vibr. levels, time of flight detection 85−7511
H_2, compressed, laser frequency conversion in presence of stimulated Raman scattering 88−72420
p-H_2 laser radiation frequency conversion by four wave mixing 87−75250
H_2, pulse compression with externally pumped intracavity Raman oscillators, high efficiency 85−7536
H_2, stimulated Raman scatt., Ar_2 excimer laser tunable intense radiation generation 87−12553
HCl superfluorescent laser frequency converter, overtone pumped 86−63751
HF laser radiation, resonance laser-collisional conversion efficiency 86−29057
He-K, XUV laser radiation generation by stimulated Raman scattering 87−46971
He-Ne laser frequency synthesis at 88 THz, beat signals of harmonic mixing *(Chinese)* 85−46455
He-Ne transverse Zeeman laser, nonlinear freq. mixing *(Chinese)* 88−27276
Hg vapour VUV source, high-efficiency, energy-scalable 88−72417
Hg vapour, four-wave mixing, 130 nm radiation generation 88−45537
Hg vapour, two-photon-resonant four-wave mixing optimisation, 130.2 nm generation 88−65838
$HgGa_2S_4$, absorpt. and freq. conversion efficiency 87−33279
InGaAs/InP multiple quantum wells, self-electro-optic device and modulation converter 88−26878
InGaAsP/InP DH laser for short-wavelength to IR conversion 85−51189
InGaAsP-InP, multi-electrode DFB laser diode with saturable absorber, tunable wavelength conversion 88−20773
K atoms in He-K discharge afterglow, multiple Raman scattering from XUV generation 87−12574
K vapour, four-photon reson. parametric sum-freq. generation using coherent and noise pumping 85−12977
K vapour, parametric conversion of tunable IR radiation freq. to UV range 85−24669
KDP type crystals, fast water-soluble growth for high-aperture optical freq. convertors 88−27291
KH_2PO_4 and isomorphs, electro-optical, linear and nonlinear optical props., devices, research areas, review 87−60872
KH_2PO_4 cryst., freq. doubling for UV laser system 87−33288
KH_2PO_4 crystal in CW ring dye and YAG laser cavities, CW-intracavity difference generation 86−22519
KH_2PO_4 crystal, laser-induced bulk damage, effect of organic impurities 88−40292
KH_2PO_4 crystal, nonlinear freq. conversion of Cu vapour laser radiation 88−58663
KH_2PO_4 type crystals, tunable laser source down to 218.3 nm, freq. doubling and summing *(Chinese)* 87−33263
$KNbO_3$ crystals, freq. conversion of laser beams 85−51286
$KNbO_3$ crystals, noncritically phase-matched sum freq. generation, image up-conversion 87−39205
$KTiOPO_4$, generation of blue CW coherent radiation by sum freq. mixing 88−27278
$KTiOPO_4$, sum freq. mixing in Nd:YAG laser cavity, blue light generation 88−27279
Kr, VUV tunable coherent radiation generation below 100 nm 85−7514
(LaCeTb)$MgAl_{11}O_{19}$ system, electron energy excitation, radiationless conversion 86−54217
Li vapour, freq. up-conversion by stimulated hyper-Raman scatt. 86−42629
$LiIO_3$ Raman laser for optical range, quasi-CW high power 87−12441
$LiIO_3$, high power difference freq. generation at 4.4-5.7 μm 85−35864
$LiNbO_3$ waveguide, parametric fluoresc. amplification and oscill. 87−12584
$LiNbO_3$:Ti channel waveguides, difference frequency generation of tunable coherent mid-IR radiation 88−2387
$LiNbO_3$:Ti channel waveguides, difference-frequency generation of tunable coherent IR radiation 88−40341
$LiNbO_3$:Ti proton exchanged waveguides, collinear acoustooptical mode conversion 88−72090
$LiNbO_3$:Ti waveguides, nonlinear optical wavelength conversion 86−42643
$LiNbO_3$:Ti waveguides, nonlinear-integrated optical devices appl. 85−51282
$LiTaO_3$ broadband guided-wave TE-TM mode converter 88−26877
Mg, vapour, high-power VUV ultrashort pulse generation by four-wave mixing 85−62662
NH_3 pumped by continuously tunable CO_2 laser, MIR generation 88−45541
Na, IR radiation parametric upconversion under incoherent pumping, influence of dispersion 85−46472
Na Rydberg states, continuously tunable sum freq. generation 85−2403
Na atoms, nonlinear susceptibility for frequency upconversion from 10 μm to visible 88−40326
Na vapour, CW frequency mixing and UV generation 85−12943
Na vapour, IR signal freq. up-convertor by two-photon pumping, parametric noise 86−22523
Na vapour, UV coherent radiation generated by four-wave parametric processes *(Chinese)* 86−22474
Na, vapour, optical pumping conversion into IR region under two-photon reson. conditions 85−46473
optical frequency conversion continued
Na vapour, tunable UV emission, nonlinear wave mixing mechanism study 88−8301
Na vapour, ultrashort optical pumping pulse conversion into UV region 85−56835
Nd:$KGd(WO_4)_2$ laser crystal, stimulated Raman scattering of nanosecond pulses 88−34126
Nd:YAG dual frequency laser, nonlinear optical crystal study applications 88−27125
Nd:YAG laser, diode-pumped intracavity doubled, large amplitude fluctuations due to longitudinal mode coupling 87−7320
Nd:YAG lasers to generate 473 nm radiation 88−65650
Nd:YAG pulsed laser and appl. to holographic material investig. 88−33983
Nd:YAG slab oscillators, amplifiers and optical phase conjugation 88−20622
Nd:YAG-diode laser summation in KTP for a high modulation rate blue laser at 459 nm 88−65820
Nd^{3+}:YAG CW laser, nonlinear optical effects 87−39057
$Nd_xY_{1-x}Al_3(BO_3)_4$, excited emission and self-frequency-doubling effect 87−12426
Ne-like X-ray laser schemes, scaling to short wavelength 88−40114
O_3, efficient four-wave mixing using vibr.-rot. reson. 86−48491
Pb vapor heat pipe as stimulated Raman convertor for XeCl lasers 87−68629
Pb vapour heat-pipe as stimulated Raman convertor for XeCl lasers, performance evaluation 86−42628
SiO_2 fibre, multimode, freq. conversion by stimulated Raman scatt. and four-photon mixing 86−15793
SiO_2:GeO_2 fibres, wideband frequency tuning by phase-matched stimulated four-photon mixing 86−42292
SiO_2:Yb^{3+}, Er^{3+} optical fibres, multiphoton effects 87−54074
Tl, anti-Stokes Raman laser, tunable UV radiation generation 85−51121
W-Ni MIM diode as difference frequency IR detector, long-term stability 87−21085
W-Ni point contact diode, frequency-mixing at 32 THz, beat note S/N ratio 88−34122
XeCl discharge laser, high power Raman conversion 86−15640
XeCl excimer laser radiation, frequency up-conversion using anti-Stokes stimulated Raman scattering *(Japanese)* 88−27282
XeCl laser pulses, conversion efficiency to Stokes beams 88−40145
XeCl laser radiation conversion to first Stokes at high pump energy 88−72395
XeCl laser radiation frequency conversion by stimulated Raman scattering in compressed H_2 86−9950
XeCl laser radiation, tunable VUV generation by anti-Stokes stimulated Raman conversion 87−68608
$YAlO_3$:Er^{3+} lasers, blue and green using frequency upconversion to generate 550 nm radiation 88−65650
$YLiF_4$:Er^{3+} lasers, blue and green using frequency upconversion to generate radiation at 550 nm 88−65650
$ZnGeP_2$, freq. transform. of nontraditional 4.3 and 10.4 μm CO_2 laser radiation bands 88−58662
ZnSe-$ZnS_{0.6}Se_{0.4}$ rotationally twinned layer waveguide, frequency-conversion efficiency 88−65329

optical frequency doubling *see optical harmonic generation*

optical gap *see energy gap; optical constants*

optical glass
8329 glass film, refractive index and thickness meas., by guided wave method *(Chinese)* 86−60364
acoustooptic 88−13959
As_2Se_3 chalcogenide glass fibres, IR radiation attenuation determ. by tunable diode laser 86−42268
BGG 31, new glass for multimode waveguide fabrication 88−72133
birefringent glass rods as new class of waveguides 88−39969
book, optical fibres 87−13
borosilicate glass, antireflecting coatings produced by neutral soln. processing, surface damage threshold meas. 85−7502
buried single-mode channel waveguides in BK 7 byfield assisted Cs-ion exchange 86−9591
buried waveguide with symm. index profile, Ag^+-Na^+ ion exchange fabrication 86−9592
buried waveguides, symmetric index profile, Ag^+-Na^+ ion exchanged 86−28786
chalcogenide fibres, optical and mechanical props. 88−58115
chalcogenide glass appl. to IR filters *(Czech)* 88−71993
chalcogenide glass fibres, with low optical losses, fabrication 85−18665
chalcogenide glass fibres for mid-IR transmission, loss characts. 85−12537
chalcogenide glass for IR, fibre fabrication 85−18664
chalcogenide glass IR optical fibres, optical loss, time dependence 86−36192
chalcogenide glass multichannel fibres for IR range, polarisation conservation 85−29604
chalcogenide glass optical fibres, fabrication by crucible technique, attenuation losses, IR transmission props. 85−41127
chalcogenide glass optical fibres, loss mechanisms 88−39905
chalcogenide glass optical fibres, waveguide channel form. by laser irrad. 85−41176
chalcogenide glass waveguide holograms for information processing, fabrication 85−41526
chalcogenide glass-like films, integrated optical components in medium IR band 85−18745
chalcogenide glasses for optical applications, review 85−62281
chalcogenide glasses in integrated and fibre optics, review 87−18572
chalcogenide hollow fibres for IR energy transmission 85−41107
chalcogenide vitreous semicond. photoconductor-liquid crystal type transparencies, optically controlled, basic characts. 86−22190
channel waveguide, depolarisation meas. 86−2729
channel waveguides, depolarisation 86−42282
channel waveguides, glass, depolarisation due to sidewall roughness 85−2048
CMZ coverglass optical and physical characteristics for solar arrays 88−5894
coatings of solar cells, charged state stability 86−51899
composite metal/glass fibre polarisers, high-performance, fabrication 88−65218
conference, optical material basic props., Gaithersburg, MD, USA (May 1985) 86−13294
conference, Puerto de la Cruz, Canary Islands, (Apr. 1984) 85−60670
conference, San Diego, CA, USA (Aug. 1984) 85−32881

conducting polymer, 1D semiconductor, nonlinear optical susceptibilities 88−72422
conference, St. Andrews, Scotland (Sept. 1987) 88−37806
continuous tuning of coherent radiation in the 117.6-119.2nm range 86−54213
critically phase matched SHG, electrooptic tuning 87−26503
crystals, SHG by differently polarised pumping waves 85−12963
CW-laser spectroscopy, principles, techniques and apparatus 88−27218
cyclodextrin inclusion complexes, optically nonlinear organic mols., second harmonic radiation generation 86−9938
dye CW ring laser, injection locking, SHG in $NH_4H_2PO_4$ 86−54103
dye laser, cavity dumped, pumped by CW mode locked Q-switched Nd:YAG laser, picosec. pulses 87−39028
dye laser, CW synchronously pumped pulse shape asymmetry 87−75025
dye laser, I_2 stabilised, freq. meas. at 520 THz using harmonic generation, freq. mixing chain 86−36435
dye laser molecules adsorbed on optical surface, SHG and THG *(Chinese)* 87−33264
dye laser optically pumped, tunability over 217 to 3100 nm light generation characts. 86−54106
dye laser third harmonic, tunable VUV emission for spectroscopic light source *(Russian)* 85−56897
dye lasers, femtosecond, synchronously pumped, cavity-length detuning effects 88−27097
dye lasers, synchronously pumped, high power with diffraction and transform-limited performance 86−68477
dye lasers, synchronously pumped, pulse parameters determ., correl. methods *(German)* 85−12818
dye solutions, nonlinear susceptibility meas. using third order harmonic generation of mode-locked Nd-glass laser 85−19019
extreme UV radiation generation using pulsed free jets 85−19024
FEL in Compton regime, XUV harmonic enhancement by magnetic fields 87−75152
FEL klystron, superradiant harmonic emission, 3D modelling and numerical anal. 87−75151
femtosecond laser pulse charactn. by single shot interferometric autocorrelation *(French)* 88−20727
femtosecond optical pulse measurement *(Japanese)* 88−8274
fibers, SHG from quantum noise owing to fifth-order nonlinearity 88−72419
fibre, non-polarisation preserving, nonlinearities, spectral and temporal meas. 86−48502
fibre connectors, harmonic distortion 85−56324
fibres, conf., London, England (June 1988) 88−55851
fibres, crystal cored, nonlinearity effects 88−58144
fibres, frequency-doubling processes, anal. using Raman spectroscopy 87−74733
fibres, glass, second harmonic generation model and test 88−45546
fibres, nonlinear, single-mode, picosecond steps and dark pulses 87−60923
fibres, polarisation-preserving, with stress-induced birefr., nonlinear optical effects 88−45556
fibres, second harmonic generation investig. 88−58178
fibres, second-harmonic generation optimisation 88−51451
fibres, SHG, long-coherence length, prepared using mode locked pulses 88−58671
fibres, SHG, self-organised phase-matched 87−75245
fibres, single mode, frequency doubling 88−40353
fibres, single-mode, nonpolarisation preserving, nonlinearities 87−18595
fibres, single-mode, SHG 88−8281
fourth-harmonic generation of high-power Nd laser radiation *(Japanese)* 85−19016
free electron lasers, harmonic generation, feasibility study 85−12960
free electron lasers, storage ring design, props. of higher harmonic operation *(Chinese)* 88−72337
free electron lasers, superradiant harmonic radiation, 3D model 87−12510
free electron lasers even-harmonic generation mechanism 87−26440
free-electron lasers, harmonic generation, nonlinear formulation study 88−14220
frequency doubling of subpicosecond light pulses, effect of dispersion of nonlinear wave coupling 86−58970
frequency doubling of tunable lasers, broad band intracavity 85−51277
GEKKO XII high power Nd:glass laser, harmonic conversion 87−26372
glass fibres, frequency doubling, review 88−58688
glass fibres, prep. process, second harmonic generation 88−58067
glass fibres, second-harmonic generation 88−40342
glass filters, materials design for large aperture freq. converted laser systems 85−41104
glass optical fibres, efficient second harmonic generation, direct testing of model 88−72014
glass optical fibres, efficient SHG 87−26007
guided waves appls. to nonlinear optics 85−46479
gyroscope with gated two-harmonic phase modulation, effect of second harmonic and duty cycle 88−53709
hemicyanine/nitrostilbene dye bilayer Langmuir-Blodgett films for nonlinear optics 87−46988

optical harmonic generation continued
inert gases, multiple-harmonic conversion of 1064 nm radiation 88−34121
injection and switchout scheme for multipass laser amplifiers 87−46944
intracavity SHG, light intensity fluctuations in fundamental mode 87−54413
intracavity SHG, mode-locked laser pulse temporal and spectral characts. 87−19034
intracavity SHG using optimal pump laser focusing 85−35867
irregular multimode optical fibre, laser rad. propagation 88−58111
isotropic media, optical harmonic generation efficiency, Kerr nonlinearity influence 85−56804
KDP single crystals, laser damage threshold at 1.053 μm 88−34107
KH_2PO_4, brightness increase in freq. doubling of laser radiation 85−41505
klystron, UV coherent generation 86−3201
klystron or undulator, Monte Carlo simulation of harmonic generation 87−75153
Langmuir-Blodgett film, nonlinear, use as coating for opt. fibres 88−72066
Langmuir-Blodgett mono-molecular layers, surface enhanced SHG study 85−56810
Langmuir-Blodgett multilayers containing preformed polymers optical second harmonic generation 88−34108
Langmuir-Blodgett superlattices containing two active components, SHG 86−42625
laser frequency doubling by thin film waveguide structure 86−54194
laser light anal. and polarisation using SHG 87−33261
laser multiplication steps at PTB, frequency synthesis from 10 μm to 657 nm 86−22536
laser radiation depolarisation and SHG 86−22462
laser second harmonic generation technique for process monitoring and inspection appls. 86−15819
laser technology, overview of theory and operation 85−56468
LD nonlinearity appl. to optical injection locking of microwave oscillators 88−71035
liquid crystalline polymers, side-chain, for nonlinear optics, SHG 88−2380
matched waveguide resonators, second harmonic generation 88−65771
materials with absorpt. loss and amplification gain, SHG *(Chinese)* 86−9939
MBBA nematic liq. cryst., second harmonic generation theory 85−62664
merocyanine dye Langmuir-Blodgett films, optical third-harmonic generation 87−12557
merocyanine dye Langmuir-Blodgett monolayer, second-harmonic generation 85−29899
meta-nitroaniline for molecular optoelectronics, prediction of second order susceptibility 87−61231
metals, free-electron-like, SHG, nonlocal semiquantum theory 85−29909
2-methyl-4-nitroaniline, optical SHG in tapered slab-type optical waveguide 85−2398
2-methyl-4-nitroaniline, second order nonlinear optical coeff., dispersion 88−65853
miniature optics and lasers, conf., Los Angeles, USA (Jan. 1988) 88−62857
mirror with intensity-dependent reflection coeff., laser mode-locking appl. 88−34103
mode-coupling in intracavity SHG 85−7534
molecular crystal powders, freq. interval of phase-matched nonlinear conversion 86−63864
molecular gases as coherent tunable XUV radiation source 85−24646
molecules, DC electron field induced second harmonic generation 85−35854
molybdates, optical SHG 85−19028
near UV CW coherent radiation generation 87−39234
nematic liquid crystal, SHG, fluctuation mechanism 85−19014
nematic liquid crystal, SHG, nonlinear susceptibility, struct. aspects and statistical phenomena 85−29898
N-(4-nitrophenyl)-(L)-prolinol mol. cryst., chirality and H bonding for second harmonic generation 85−12952
noncollinear second-harmonic-generation-based ultrafast optical signal processing for optical digital computing 88−13979
nonlinear fibre waveguides, second harmonic generation, efficient designs using radiation modes 88−40343
nonlinear optical resonators, bifurcation under third harmonic generation *(Russian)* 86−22535
nonlinear optics and laser spectroscopy in the VUV, review 86−3317
nonlinear waveguide, five-layer, for optical SHG 86−3284
nonsymmetric quantum systems, nonlinear susceptibility 86−14896
Nova laser three wavelength optical alignment 85−18997
ocean surface organic films study, appl. of reflected optical second harmonic generation technique 88−61658
optical klystron, XXUV laser harmonic generation, effects of wiggler errors 87−2159
optical third-harmonic generation from polydiacetylene thin films deposited by vacuum evaporation 87−54400
organic compounds, second harmonic generation, π electron contrib. 87−7440
organic crystal cored fibre design of parametric interactions, phase matching requirements 87−54417
organic films in nonlinear integrated optics structs. 88−2043
organic media, nonlinear optical processes, large non-resonant third order electronic responses in liq. cryst. polymers 87−12587
organic molecules and crystals, nonlinear optical props., book 88−62862
organic nonlinear crystals and high power frequency conversion 88−51946
organic nonlinear materials for integrated optics 86−28773
organic single crystal thin film waveguides, second harmonic generation *(Japanese)* 88−7927
organic-inorganic double halides, SHG meas. 87−26526
parametrically generated light second-order coherence obs. 87−19045
partially coherent beam, SHG 87−68627
phase mismatch for SHG, interferometric meas. 85−62650
phase-matched SHG of surface polariton along Ag layer on slab optical waveguide 87−68599
picosecond cascadable inverter gate using second harmonic pumping 87−61234
picosecond laser pulses, optical freq., intermodulation, harmonic generating cryst. use 86−42611
point contact diodes, sensitivity and stability 85−1554
polar molecular crystal Pockels effect obs. 88−58658
poly-p-phenylene vinylidene thin films, optical third harmonic generation study 87−75232
polydiacetylene, solns., elec. field induced optical SHG 88−8287
polydiacetylenes, electronic, opto-electronic props. 88−27304
polymers, doped amorphous, second harmonic generation 88−58682
pulse compression and MW picosecond pulse generation 87−53952

optical harmonic generation continued
pulse generation, UV and red femtosecond, by intracavity frequency doubling 88−40336
pulse props. of dye laser meas., using microcomputer-based SHG correlator 86−22470
quadratic and cubic nonlinearity media, three-freq. interactions of high-intensity light waves 85−41503
rhodamine 6G coated substrates, SHG and sum freq. generation 87−33276
rhodamine 6G laser, passive mode locking in yellow region 86−29089
rhodamine 6G laser pumped by Nd:YAG laser pulses frequency doubled in glass optical fibre 86−68488
rhodamine B dye laser, CW, passive mode locking 86−48364
ring laser with nonlinear element, regular and stochastic self-modulation 85−35835
ring laser with nonlinear filter, coherence props. 86−48461
ring laser with nonlinear filter, stationary generation 86−48460
rotational crystals, phase matching of SHG 87−33256
second harmonic emission from a picosecond laser-produced plasma 88−40348
second harmonic generated signal, induced phase modulation 88−20741
second harmonic generation in laser irradiated microtube targets 88−58669
second harmonic generation pump depletion and diffraction effects 85−29934
second harmonic wave from broad- and narrow-band laser irrad. on targets *(Chinese)* 85−62642
self-induced mismatch in nonlinear optical interactions, thermal and bandwidth effects 86−3289
self-organised $\chi^{(2)}$ gratings in optical fibres, light-induced erasure 88−58672
semiconductor laser, picosecond pulse duration meas. by internally generated SHG 86−9915
semiconductor laser diode SHG *(Japanese)* 88−40347
semiconductor lasers, directly-modulated, second harmonic distortions due to spatial filtering 87−54344
SHG, classical light statistics, evolution 85−41470
SHG, high efficiency, phase matching limitations 85−7525
SHG, IR frequency doubling efficiency 85−51259
SHG, multiple reflection effects 88−65854
SHG, phase-matched, by surface polariton along Ag layer on optical waveguide 86−9935
SHG, surface, picosecond pulse duration meas. appl. 85−35855
SHG by long-range surface plasmon polaritons excited by finite 1D beam 85−41451
SHG in external cavity, efficiency 85−51266
SHG in multimode laser cavity 88−14273
SHG in optical fibre by second order susceptibility grating 87−54082
SHG in optical fibre by self-written susceptibility grating 87−39208
SHG using partially coherent light 85−2407
SHG with focused broad-band and high-order transverse mode lasers 88−34109
SHG within optical cavity, interference effects 85−46458
single-crystalline organic thin films for quadratic nonlinear optics 86−42210
single-mode fibre, mode-field radius meas. based on harmonics detection 86−22078
slab lasers, second harmonic generation 88−20752
slab-type waveguide, SHG using 2-methyl-4-nitroanaline as high index top layer 87−54399
slab-type waveguide, SHG using 2-methyl-4-nitroaniline as high index top layer *(Japanese)* 85−19040
solid-state slab geometry lasers as tunable sources 87−39067
squeezing spectra for nonlinear optical systems 86−15787
subpicosecond laser pulse monitoring system using second harmonic spatial autocorrelation method and CCD image sensor 86−15783
surface enhanced SHG in dielectric deposited over Ag grating 88−45552
surface microscopic roughness meas. by second harmonic intensity variation anal., appl. to Si and Ag surfaces 87−70800
surfaces and composite materials, nonlinear optical props. 87−46994
ternary and multinary compounds, electronic, acoustic and optical devices 85−18535
third harmonic generation meas. in liquids 88−20771
third harmonic of mode-locked Nd^{3+}:YAG laser, generation 86−36574
third harmonic stabilised laser, emission freq. shifts due to refr. index saturation 85−24660
tunable holographic second-harmonic generators in high-birefringence optical fibres 88−45547
tunable resonant enhancement in freq. mixing 85−7512
two-photon absorption process by multiple SHG, light fluctuation filtering 85−12964
ubitron, third harmonic, expt. design 88−27207
ultrashort laser pulse time-to-space mapping by nonlinear methods 85−56829
ultrashort laser pulses, intensity profile anal. using four-wave mixing or third harmonic generation 87−12577
ultrashort light pulse shape and duration, nonlinear optical register 86−3313
ultrashort pulse characterisation, direct Young interferometric technique 87−56866
ultrashort pulse length meas. by nonsynchronous noncollinear harmonic generation 88−14272
ultrashort pulse length meas. by second harmonic beam method 86−9940
urea crystal, SHG by Ar^+ laser light *(Chinese)* 87−33265
urea optical parametric oscillator, widely tunable 85−46457
vector synchronism of diverging laser beams, second harmonic generation 86−9969
vinylidene fluoride/trifluoroethylene copolymer film, SHG of pulsed YAG laser 87−39214
VUV radiation generation using pulsed free jets 85−19024
VUV single mode pulse tunable laser system, Lyman α transition, high resolution Stark spectroscopy 88−8294
wavefront correction of laser radiation after multimode lightguides 87−74726
waveguides, fibre, nonlinear, amplification and second harmonic generation 88−65202
waveguides, nonlinear effects, propagating beam method analysis 85−12965
wing-suppressed IR sampling, technique 87−46990
XUV coherent source, frequency tripling into 720-1025 Å region 87−75249
Ag grating, surface-enhanced second-harmonic generation 86−9967
Ag gratings of various groove depths, SHG study 87−33230
Ag surface, polycryst. and single cryst., anionic adsorpt., second harmonic generation studies 85−7518
Ag thin film electrodes, second harmonic generation via software polaritons 85−12951
optical harmonic generation continued
Ag-mica capacitor, second harmonic generation via surface polariton 85−12951
$AgGaS_2(Se_2)$, IR freq. generation 87−39245
$AgGaSe_2$, 10-μm radiation, efficient optical SHG 86−9936
AlGaAs DH laser, optical SHG 87−75102
AlGaAs laser diode, second harmonic generation at 0.78 μm, expt. study *(Japanese)* 88−8219
AlGaAs-GaAs integrable optical correlator, surface emitting second harmonic generation 88−72134
Ar^+ laser, second harmonic mode-locking 88−27023
Ar^+ mode-locked laser, pulse width meas. by SHG method at low temp. *(Chinese)* 86−3263
Ba atomic vapour, pumped by tunable ultrashort light pulses, electron stimulated Raman scatt. and four-wave interaction 86−9948
Ba vapour, efficient conversion of picosec. Nd^{3+}:YAG laser to visible and UV range 85−46490
β-BaB_2O_4 SHG crystal, characts. in femtosecond region 87−54412
β-BaB_2O_4, femtosecond UV pulse generation 88−65827
β-BaB_2O_4 frequency doubling crystal, autocorrelation meas. of Ar^+ mode-locked laser pulses *(Chinese)* 87−54382
β-BaB_2O_4 nonlinear optical phase-matching properties 88−2368
β-BaB_2O_4, second harmonic and sum frequency generation *(German)* 88−2369
β-BaB_2O_4 single crysts., flux growth, SHG appl. 87−31483
β- BaB_2O_4, third harmonic generation of narrowband dye laser, 200 nm region 88−2355
BaF_2, SHG and laser-induced desorption at the surface 88−20755
$Ba_2NaNb_5O_{15}$ crystals, freq. doubling of light, temp. matching *(Chinese)* 85−29905
CO_2 laser, PTB frequency synthesis extension to visible 85−56789
CO_2 laser irradiated targets, higher order harmonics emission *(Chinese)* 87−54214
CO_2 laser radiation, nanosecond pulse, second harmonic generation 88−51904
Cd vapour, coherent VUV generation by reson.-enhanced freq. mixing 87−26514
$CdGeAs_2$, SHG of single and multilongit. mode CO_2 laser emissions 87−26502
$CdGeAs_2$ crystals, SHG of NH_3 laser radiation 87−75240
$CdGeAs_2$, high efficiency SHG, wavelength dependence 85−19017
$Cd_{1-x}Mn_xTe$, IR SHG and nonlinear susceptibility 86−9945
CdSe logic gate, NOR, using frequency doubling 88−65420
CsH_2AsO_4, CsD_2AsO_4, SHG characteristics under thermal self-interaction conditions 85−19036
GaAlAs laser diode, blue light source using guided-wave frequency doubler 88−65709
GaAlAs surface-emitting SH LED with very low nonlinear distortion characts. 86−42450
GaAs, SHG in reflection under intense picosec. laser irrad. 85−19008
GaAs logic gate, NOR, using frequency doubling 88−65420
GaAs, second harmonic waves generated from surfaces for picosecond laser pulse width meas. *(Chinese)* 88−72373
GaAs surface structure, SHG and sum frequency generation in reflection probing, laser induced phase transitions 85−29907
GaAs-AlGaAs waveguide cavity, surface emission of coherently generated second harmonic wave 88−34104
Ge, SHG, cryst. orientation depend. 87−26528
H, Lyman-alpha radiation, nonresonant transformation, conversion efficiency, Kerr effect limitation 86−3315
H_2-F_2 laser, atmospheric pressure, feasibility of short radiation pulse generation 87−12389
Hg, third-harmonic generation, four-photon-resonant 85−56817
Hg vapour, VUV generation of Nd laser radiation by eighth-order nonlinearity 88−2376
Hg vapour, nonlinear optical phenomena, Nd:glass pulsed laser study 85−24657
Hg vapour, seventh harmonic generation of Nd-laser emission, interference effect 86−9957
$HgIn_2Te_4$, linear and nonlinear properties in mid infrared 87−68628
I laser Iskra-4 installation, second and third harmonics 86−15624
I laser radiation, high-order harmonics generation 87−75236
KH_2PO_4, KD_2PO_4, wide-aperture freq. multipliers of IR lasers 87−33291
KH_2PO_4 Q-switches and SHG, for high power solid state lasers 86−3277
KH_2PO_4, cascade third harmonic generation in strong wave-interaction approx. 85−62656
KH_2PO_4 crystal frequency doubling for 160 fs XeCl amplifier system 87−68335
KH_2PO_4, crystal growth for optical harmonic generation appls., use of seed cryst. *(Japanese)* 86−13736
KH_2PO_4 crystal, nonlinear freq. conversion of Cu vapour laser radiation 88−58663
KH_2PO_4 crystals for freq. doubling components, fine diamond turning 86−58731
KH_2PO_4, fourth harmonic generation of a large-aperture Nd:glasslaser 86−15761
KH_2PO_4, optical SHG, electro-optic and thermo-optic tuning sensitivities 85−41464
KH_2PO_4, second harmonic, efficient generation with broadband laser pulses 85−24653
KH_2PO_4 single crystal growth for optical harmonic generation, seed cryst. 87−52092
KH_2PO_4 single crysts. for high power harmonic generation, growth by temp. decrease method *(Japanese)* 87−58909
KH_2PO_4, type II crystal, second and third harmonic generation, phase-matching angles 86−48489
KH_2PO_4 type crystals, tunable laser source down to 218.3 nm, freq. doubling and summing *(Chinese)* 87−33263
$KNbO_3$ crystals, freq. conversion of laser beams 85−51286
$KNbO_3$, crystals, high-efficiency intracavity freq. doubling of styryl-9 dye laser 85−46450
$KTiOPO_4$, KTP, prep. and use as harmonic generator for Nd:YAG lasers 86−15777
$KTiOPO_4$ SHG crystals, hydrothermal growth technique 87−36690
$KTiOPO_4$ crystals, efficient SHG 86−54211
$KTiOPO_4$, flux-grown, SHG and accurate index of refr. meas. 87−61224
$KTiOPO_4$ frequency doubler and YAG laser for quasicontinuous picosecond light pulse generator 88−14271
$KTiOPO_4$ nonlinear optical convertors 86−22520

optical harmonic generation continued
$KTiOPO_4$ optically biaxial cryst., SHG of light from AIG-Nd^{3+} laser 87−68609
$KTiPO_4$ frequency doubling for Nd:YAG laser 87−68415
$KTiPO_5$ crystal growth for high efficiency SHG devices *(Chinese)* 87−5390
$LiIO_3$ Raman laser for optical range, quasi-CW high power 87−12441
$LiIO_3$, angle-tuned SHG with low losses due to index matching 88−8279
$LiIO_3$, coherent 440 nm light source by freq. doubling of phase-locked high power laser array 87−54391
$LiIO_3$ crystal, efficient excitation of parametric picosecond continuum 86−9962
$LiIO_3$, crystals, SHG by differently polarised pumping waves 85−12963
$LiIO_3$ crystals, freq. doubling of CW ring dye laser radiation 86−29223
$LiIO_3$, optical frequency doubling of a single-mode dye laserin an external ring resonator 86−54203
α-$LiIO_3$, tunable UV radiation generation, intracavity freq. doubling of ring dye laser output *(Chinese)* 87−75229
$LiIO_3$ used for intracavity SHG, conversion efficiencies 85−24670
$LiNbO_3$, Czochralski grown, current induced periodic ferroelec. domain structs., nonlinear optical freq. mixing appl. 86−15762
$LiNbO_3$, congruent, second harmonic generation 88−45533
$LiNbO_3$ crystal, SHG study of anomalous props. near 75°C 86−29226
$LiNbO_3$ crystals with regular domain struct., light diffr. in volume phase grating, SHG 87−54409
$LiNbO_3$ frequency-doubling crystals, SiO_2 antireflection coating exam. *(Chinese)* 88−33843
$LiNbO_3$ integrated optical substrates, Maker fringe anal. 87−12227
$LiNbO_3$, negatively birefringent crystal, optical SHG 88−27297
$LiNbO_3$, parametric processes, SHG example 86−9971
$LiNbO_3$, plate homogeneity, SHG anal., optical substrate appls. 87−68602
$LiNbO_3$ proton-exchanged waveguides, SHG with GaAs laser diode 88−65871
$LiNbO_3$, stoichiometric single cryst. fibres, vapour transport prep., nonlinear optical appls. 88−13810
$LiNbO_3$, temperature tuned optical parametric oscillation, coherent light generation *(Korean)* 86−3115
$LiNbO_3$ waveguides, guided mode effective index meas. using Cherenkov SHG 87−54034
$LiNbO_3$:H^+ waveguides, SHG 88−58684
$LiNbO_3$:MgO monolithic external resonant cavities, efficient SHG of diode laser pumped CW Nd:YAG laser 88−65835
$LiNbO_3$:MgO,Ti channel waveguide, frequency doubling 88−39966
$LiNbO_3$:MgO,Ti channel waveguides, SHG 88−2022
$LiNbO_3$:Ti channel waveguide resonators, second harmonic generation 88−40340
$LiNbO_3$:Ti optical waveguides, photorefractive effect during ultrashort ultrashort laser pulse propag. 86−53973
$LiNbO_3$:Ti resonant integrated optical parametric devices, SHG and parametric oscill. 86−48503
$LiNbO_3$:Ti waveguide, SHG, indiffusion proton exchange fabrication 87−12583
$LiNbO_3$:Ti waveguides, SHG, phase matching via periodic structures 87−54415
$LiNbO_3$:Ti waveguides, nonlinear optical wavelength conversion 86−42643
$LiNbO_3$:Ti waveguides, nonlinear-integrated optical devices appl. 85−51282
$LiNbO_3$:Ti,MgO waveguide charact. 88−39965
$Li_3Nd(PO_4)_2$ laser, semiconductor-pumped, intracavity SHG 88−34123
$LiTaO_3$, Czochralski grown with modulated struct., periodic laminar ferroelec. domains, SHG 87−31479
$LiTaO_3$ crystals with modulated struct., optical SHG 86−58964
Mg vapour, resonant generation of even harmonics 85−46489
Mg vapour, resonant generation of even-order harmonics 85−19020
ND:YAG picosecond laser with efficient conversion to second, third and fourth harmonics 88−27293
$NH_4H_2PO_4$ crystal, extracavity SHG of Ar^+ lasers *(Chinese)* 85−29902
$NH_4H_2PO_4$ crystals grown by fast method, parametric frequency conversion, Nd laser pumped 85−35890
Na vapour, tunable UV emission, nonlinear wave mixing mechanism study 88−8301
Nd laser, in KDP crystal optical harmonic generation, limiting performance 85−19010
Nd^{3+} laser with intracavity SHG, output characts., α-$LiIO_3$ radiation defect effects *(Russian)* 87−46847
Nd:$KGd(WO_4)_2$ laser, intraresonator stimulated Raman scatt. 86−68504
Nd:$LiYF_4$ laser, 1.047 μm, pumped by GaAlAs diode laser, with intracavity doubling to 523.6 nm 86−42511
Nd:$LiYF_4$ laser, flash-lamp-pumped acousto-optically Q-switched, intracavity doubling of 0.527 μm output 87−68607
Nd:YAG CW laser, in-resonator SHG, amplitude fluctuations 88−45392
Nd:YAG CW mode locked lasers, operating specifications 87−39052
Nd:YAG dual frequency laser, nonlinear optical crystal study applications 88−27125
Nd:YAG fourth harmonic generation in KD_2PO_4, KT_2PO_4, half watt average power at 25 kHz 86−22513
Nd:YAG, freq. doubling using $Ba_2NaNb_5O_{15}$ device 88−34131
Nd:YAG frequency-doubled mode locked laser, synchronous pumping of femtosec. dye laser 87−18931
Nd:YAG laser, 70.9 radiation generation in Ne by freq. tripling the fifth harmonic 88−45527
Nd:YAG laser, 946 nm continuous wave, laser diode array pumping and intracavity freq. doubling 88−20608
Nd:YAG laser, CW, diode pumped, MgO:$LiNbO_3$ external reson. cavity, second harmonic generation 88−20743
Nd:YAG laser, SHG in four-layer waveguide struct. using 2-methyl-4-nitroaniline in high index top layer *(Japanese)* 87−26538
Nd:YAG laser acousto-optic modulator/frequency doubler *(Chinese)* 85−62637
Nd:YAG laser cavity with freq. doubling cryst., losses due to optical isolators 86−54182
Nd:YAG laser, diode-pumped, SHG using externally resonant cavity 88−65870
Nd:YAG laser, frequency doubled to produce green light 88−14276
Nd:YAG laser, harmonic mode-locked generating 53 ps pulses at 1.32 μm 88−40301
Nd:YAG laser, intracavity-doubled 946 nm radiation, efficient blue emission 88−33982
Nd:YAG laser, phase-matched SHG in 2-methyl-4-nitroaniline thin film waveguide *(Japanese)* 87−54424
Nd:YAG laser radiation phase modulation with SHG of ultrashort pulses, correlation meas. 87−75199

optical harmonic generation continued
Nd:YAG laser, semiconductor-pumped, intracavity SHG 88−34123
Nd:YAG lasers, freq. doubled, diode laser array pump sources 87−39053
Nd:glass Nova laser 87−46980
Nd:glass laser, active mirror system for TW output powers 87−46843
Nd:glass laser, double-pulse, use in holographic interferometry 87−7460
Nd:glass multimode laser radiation, second harmonic lasing process optimisation 86−15771
Nd^{3+}:YAG laser, multibeam operation with second harmonic conversion, use in laser anemometry 85−18908
Nd^{3+}:YAG laser second harmonic pump for $LiNbO_3$ quasi-CW picosecond optical parametric oscillator 86−48494
Nd^{3+}:YAG laser with active mode locking, intracavity SHG 85−19030
Nd^{3+}:YAG single freq. CW laser with narrow linewidth and intracavity freq. doubling 85−46371
Nd^{3+}:$YAlO_3$ laser with efficient THG and SHG 88−27120
Nd-glass laser, Q-switched, broad-band SHG 88−72404
$Nd_xY_{1-x}Al_3(BO_3)_4$, multifunctional crystal, self-freq. doubling from 1.06-0.53 μm 88−58651
Ph_4X compounds for optical second harmonic generation 85−7526
Si, SHG, cryst. orientation depend. 87−26528
SiO_2:Ge optical fibres, SHG with mode-locked Kr^+ laser 88−2362
Te, noncollinear SHG, subnanosec. pulse meas. of 10.6 μm radiation 88−51922
Tl vapour, nonresonant third harmonic generation 85−2414
W-Ni point contact diode, far infrared harmonic generation and mixing 87−46973
W-NiO-Ni point contact diode at laser frequencies 85−29716
Xe, VUV high energy pulse generation by freq. conversion 85−7517
Xe, coherent vacuum ultraviolet generation by freq. mixing in glass hollow waveguides 88−45174
Xe, third-harmonic generation in pulsed jet and gas cell 88−45536
YAG laser radiation used in atm. sounding, wavefront reversal of second harmonic 87−75242
YAG quasi-CW pumped laser, intracavity freq. doubling 88−14141
$ZnGeP_2$, CO, CO_2 laser radiations conversion to 2.3 to 31. microns spectral range 86−22524
$ZnGeP_2$, efficient generation of the second harmonic of tunable CO_2 laser radiation 85−24667
$ZnGeP_2$, freq. transform. of nontraditional 4.3 and 10.4 μm CO_2 laser radiation bands 88−58662
ZnS polycrystalline waveguide thin film; nonlinear optical effects *(Chinese)* 85−46452

optical hole burning
colour centre laser, CW, single-frequency, single-knob tuning, hole burning mode suppression 85−41364
CSP laser arrays, phase locked, coupled mode anal. 88−8194
data storage, optical, electric field selective, using persistent spectral hole burning 85−35850
DFB laser, gain-coupled, time-depend. semiclassical theory, spatial hole burning effect 85−7339
DFB laser, linewidth broadening due to longitudinal spatial hole burning 88−45400
DFB lasers, asymmetric mirror struct. type, low front facet refl. longit. mode selectivity anal. 88−40207
DFB lasers, single mode, stability, facet effects 87−39130
directly modulated semicond. lasers, gain nonlinearity effects calcs. 87−12449
disc storage, high-density frequency-domain optical recording 87−46431
dye DFB lasers, spatially-hole-burned, single ps pulse production 88−72281
dye laser, tunable, CW, Ar^+ laser-pumped, spectral props. 87−2093
dye lasers, FM, comparison on standing-wave and ring configuration 86−63770
frequency domain data storage using persistent spectral hole burning, technological aspects 87−7432
frequency domain optical storage, persistent spectral hole-burning, review 86−48484
frequency-domain optical storage system, single photon processes, material props. study 85−51251
gated spectral hole-burning for frequency domain opticalrecording, materials 86−58971
high density storage scheme 88−45061
holeburning storage materials capable of room temperaturecycling 86−58733
holographic spectral hole burning, image storage appls. 88−45062
holographic storage using spectral hole burning 88−8306
holography, picosec. time- and space-domain, by photochem. hole burning 86−48509
holography, picosecond time- and space-domain 88−40385
laser light-induced physical processes in optical materials, persistent spectral hole burning, freq. domain storage appls. 86−48074
mass storage of 1 Gbyte capacity *(German)* 85−26074
molecular electronics, conference, Varna, Bulgaria (Sept. 1986) 88−69994
organic photomemory materials, characts., appls., review *(Japanese)* 88−51430
picosecond light signals, associative space-and-time domain recall via photochemical hole burning holography 88−33595
picosecond light signals, compression and recovery of profiles by spectral hole-burning holograms 88−65894
polarisation coupled resonators, spatial hole burning suppression 87−7431
polymer film, laser beam modulator and pulse former using electro-optic spectral hole burning 87−12533
ring due laser CW, phase-conjugate feedback, spatial hole burning 85−56822
semiconductor DFB lasers, gain nonlinearities 87−68477
semiconductor Fabry-Perot lasers, optical feedback, influence on spectral behaviour 88−45437
semiconductor laser, external cavity, longit. mode coupling, theory 85−51163
semiconductor laser arrays with high-intensity uniformity, anal. 88−34011
semiconductor laser frequency chirping in presence of optical feedback, anal. 88−2273
semiconductor laser wavelength chirping, nonlinear gain reduction effects 86−36468
semiconductor lasers, index-guided, self stabilisation of fundamental lateral mode 87−33166
semiconductor lasers, spectral hole-burning and gain saturation, strong-signal theory 88−34030

optical hole burning continued
semiconductor lasers, spectral linewidth, injection-current fluctuations effect 88−45434
single-photon materials for spectral hole-burning, search 85−46117
spectral hole burning, picosecond optical data processing appls. 88−27306
spectral hole-burning optical store, laser heat pulse erasing technique 85−24689
storage, wavelength-multiplexed-recording materials, Japanese research 87−60879
storage using freq. domain, photon-gated materials 87−60880
two-level atom, pulse compression by spectral hole 87−33274
wavelength-multiplexed optical recording, materials research in Japan 88−33581
AlGaAs high-power channeled-substrate-planar laser 86−9823
AlGaAs high-power channelled-substrate-planar laser, hole-burning evidence 86−42582
$Al_{0.2}Ga_{0.8}As$, femtosecond hot carrier energy relax., absorpt. spectral hole burning 88−12933
$BaClF:Sm^{2+}$ for photon-gated optical holeburning storage 86−58732
CO_2, TE laser, two colour oscills., appl. to two photon process of optically pumped FIR laser 88−40128
CdTe phase-transformation-based optical storage using multilayer metal film and mW laser 85−41463
GaAs, femtosecond hot carrier energy relax., absorpt. spectral hole burning 88−12933
GaInAsP-InP lasers, phase-adjusted DFB, stability in single longitudinal mode operation 87−68469
InGaAsP 1.3 μm and 1.5 μm injection lasers, externally applied (100) uniaxial stress, electro-optical effects 88−51790
InGaAsP semiconductor laser, nondegenerate four-wave mixing, spectral hole burning 87−68598
InGaAsP-InP DFB lasers optimally designed for stable single mode operation at 1.3 μm 88−14167
Nd:glass laser amplifiers, broad-band and multiple-freq. energy extraction modelling 86−68496

point source with misalignment, holographic image 88−45559
Poisson image distorted by atm., statistical synthesis of algorithms for optimal processing 85−46949
polyfocal systems, method of matched images 88−13990
polyvinyl carbazole electrophotographic layers, developed colour image retention *(Russian)* 85−46252
post-objective scanning, new image acquisition technique 85−58566
PRIZ space-time light modulator transmission function 87−38865
propagation through heterogeneous aerodynamic flows, wind tunnel expts. 88−40580
pseudocolour encoder for medical imaging, using microcomputer 88−10341
pseudostereo images, creation from monocular images by processing systems 85−30346
psychophysical approach to image quality 86−23158
psychophysical scaling of picture quality 87−21168
psychophysics of spatial sampling, image quality assessment 88−68342
quantised images quality criteria 88−66679
quantitative fidelity criterion for image processing applications 88−52552
radiation scanning for image recording 88−73200
radiography, digital images, SNR and threshold contrast 86−69187
rainbow and image-plane hologram fabrication , image matching theory of two lens astigmatic system *(Chinese)* 88−72435
rainbow hologram recording 88−58715
rainbow holographic image reconstructed by spatialextended white light source 85−56850
rainbow holography system, amount of information 85−56853
raster-type holographic projection of 3-D images in natural light 85−29954
real and achromatic imaging with planar holographic optical elements 86−63882
real time IR image processing techniques, enhancement methods 86−10476
real-time radiographic imaging using photographic documentation 88−22523
recognition at low light levels using rotation-invariant filtering 86−64343
recognition in presence of laser speckle 86−64344
refocusing in optical system having optically controlled transparencies employing MIS-LC structures 86−63696
remote sensing, meas. of Thematic Mapper data quality 86−18550
reoxan, holographic gratings recording using copropagating beams 87−39251
restoration, maximum-likelihood for noncoherent optical imaging 88−52533
retrieval, colour, from coherent light speckles by white-light processing without colour filters 85−36366
sample optimisation, transinformation measure 85−46672
scanning optical system for laser printers, image quality *(Chinese)* 88−65445
shift-invariant imaging of photon-limited data using bispectral analysis 85−30352
skin, structure anal. using holography and four wave mixing 86−18321
slab waveguide refractive index profile, automatic meas. by interferometric fringe processing 87−56872
slit-ray projection method for high accuracy distance and inclination meas. 88−42293
Sodern visualisation system, geometrical resolution improvement 86−31243
soft copy display of electro-optical imagery 87−77136
space to frequency convertor, piezoelec.-elastooptic, for incoherent imaging system 85−12653
space-frequency characteristic of image-formation channel, scattering medium 88−34334
space-time light modulators, transverse Pockels effect, image readout theory 86−68338
spatial filters, modified, matched, optimality considerations 86−15545
spatial frequency filtering in an optical imaging system with anextended incoherent light source 86−69104
spatially sampled staring imagers, static performance modelling 86−69186
speckle noise degraded, information content 86−59334

conference, optical techniques in image and signal processing, London, England (Jan. 1985) 85−27955
conference, Orlando, FL, USA (April 1986) 87−43746
conference, San Diego, CA, USA (Oct.-Nov. 1984) 85−22056
confocal feedback systems for optical analog solutions for partial differential and integral equations 85−36371
conjugate gradient algorithm on optical linear algebra processors 87−33733
contact screens, precompensated, design, algorithm 85−63084
continuous order derivative for optical signals and images 88−66646
continuous tone pictures, redundancy reduction, variable size block coding scheme 87−75893
contour mapping of chest wall shape change with breathing 86−32293
contour mapping of recumbent patient 86−32292
contour-based recovery of optical flows by iterative improvement 87−47973
contrast-invariant pattern recognition using circularharmonic components 85−57456
control functions using stimulated light scatt. 86−36579
control of σ^+ beam propagation by a σ^- beam 87−33327
control operator digital optical computer concept, review 87−47950
conversion of optical analog signals to light pulse density signals for fibre-optic sensor, device 86−22115
convolution in inhomogeneously broadened absorber, optical signal mixed binary multiplication 86−43283
convolution-based framework for signal recovery and applications 88−73196
convolver-based optical systolic processing architectures 85−30299
convolver-based optical systolic processing architectures 85−36373
coordinate transformations with multiple computer-generated optical elements 88−2393
corrugated waveguide filters, design by Gel'fand-Levitan-Marchenko inverse-scattering method 86−15544
coupled-wave device arrays, systolic lattice processing and ultrafast pulse shaping 85−46201
covariance matrices for adaptive processors 88−73220
crop monitoring, satellite image enhancement using colour perception 86−25405
crossbar for multiprocessor networks and telephone switching systems 87−62975
crossbar interconnections using variable grating mode devices 87−26094
crossbar network analysis 88−60172
crossbar network in parallel computer architecture *(French)* 88−8018
crossbar signal processor, design 87−13093
crossbar switch, generalised optical, and reconfigurable fibre optics 88−51640
crossover networks and their optical implementation 88−72183
CT images reconstruction by electrooptical computer 87−3983
CT projection data redundancy, appl. to improving reconstructed image quality 86−69154
CT videography, electrooptical system for video-rate image reconstruction 86−24414
cyclic number codes for optical computing 85−30307
cyclic shifting for optical data processing 88−27996
cylindrical pixels, bistable response characts. 87−39222
data coding and processing by optical methods 88−45251
data processing, recent trends and future prospects 88−28014
data processing, transverse, offset for Petermann strange mode field diameter eval. 88−51465
data rate reduction techniques for high time-bandwidth AO processors 88−27948
deformable mirror device, for spatial light modulation 88−58237
deformable mirror device for phase encoding and filtering, optical correlation 88−59268
deformable mirror nearest neighbor optical digital computer 86−37140
depth pseudocolour encoding using white light processing 88−52524
deterministic logic processing, two-level neural network 88−65129
device developments for optical information processing 88−59329
devices, review 88−13978
DFT-based modeling of acousto-optic information processors 87−55299
diagnostic processor for flight control 87−77778
dielectrics for optoelectronic device applications on the III-V compounds, review 88−57307
differentiating spatial light modulator based on nematic liquid crystal, for optical preprocessing and pattern recognition 87−68218
diffraction grating masks for information processing, digital prod. 88−72194
diffraction pattern processing with charge-coupled device photodetector 88−29380
diffraction pattern sampling using a computer-generatedhologram 86−42648
diffraction-limited high-contrast imaging systems, image construction, iterative approach 85−46921
digital composition of images with increased depth offocus considering depth information 85−57457
digital computer design 88−65421
digital computing and optical parallel logic gate *(Japanese)* 86−29985
digital computing in holography and imageprocessing 86−23148
digital high productivity computing equipment design prospects *(Russian)* 85−57460
digital image processing for optical measurement and inspection *(German)* 88−65888
optical information processing continued
digital incoherent optical interconnections 87−49080
digital moire-effect processing of holographic interferograms 87−69255
digital optical adder based on spatial filtering 87−7193
digital optical arithmetic processor based on symbolic substitution 88−51643
digital optical circuit technology, conf., Schliersee, Germany (Sept. 1984) 85−54048
digital optical circuits, fan-out considerations 87−46963
digital optical circuits, operation 88−72187
digital optical circuits, optical components 88−65417
digital optical computation of algorithms of high regularity 88−2408
digital optical computer, basics *(German)* 88−33812
digital optical computer, comparison to digital electronic computers *(German)* 88−33811
digital optical computer appl. of classical optics 86−54196
digital optical computing 86−9970
digital optical computing, adder delays reduction 87−13090
digital optical computing, architectures, appls. and research activities *(Italian)* 88−20463
digital optical computing, nonlinear optical devices, symbolic substitution logic 88−58288
digital optical computing, overview 87−69352
digital optical computing, possibilities and pitfalls 87−13091
digital optical computing with ferroelectric liquid crystals 88−58302
digital optical computing with symbolic substitution logic 87−7797
digital optical data processing hardware *(German)* 88−33808
digital optical iterative pattern recognizer 88−66657
digital optical linear 3×3 bit combinatorial systolic multiplication array 87−55298
digital optical logic using a pulsed Sagnacinterferometer switch 86−36578
digital optical matrix multiplication based on a systolic outer-product method 88−26914
digital optical multiplier using modified signed-digit number representation, encoding schemes 87−47949
digital optical parallel computing 85−51746
digital optical processors, characts. 85−42614
digital optical switching and logic devices *(Japanese)* 86−28889
digital optics, progress towards practical appls. 87−55283
digital optics and optical computing 86−54548
digital parallel all-optical computer using ZnSe interference filter triple bistable-element loop circuit 87−33300
digital parallel processors, optical interconnection systems 87−38853
digital processor circuits using nonlinear interference filters, demonstration 88−8012
digital pulse convolver, acousto-optical 86−15540
digital reconstruction methods for three-dimensionalimage visualization 85−51742
digital restoration of object distorted by linear system 85−57442
digital signal processor optical crossbar interconnected, with basic algorithms 86−37141
digital truth table look-up processing system 85−36372
digital TV speckle interferometry technique for dynamic motion meas. 86−24162
digital-optical matrix multiplication with magneto-optical spatial light modulators 88−8004
diode laser for interferometric optical processors, pulsed single-mode, temporal coherence props., meas. 85−56891
diode lasers for information transfer in computers, MOVPE *(German)* 88−40209
direct surface reconstruction from a moving sensor 86−48985
direct-detection optical PPM channel, convolutional codes performance 87−40949
direct-gap semiconductors, band-edge nonlinearities, optical bistability and optical computing 88−27294
directed graph optical processor 88−33822
displacement sensor, temporally separated signal and reference channels 88−47535
distorted image reconstruction, digital spatial filter mask calc. 88−13994
distributed fibre sensors, signal processing 86−2773
dynamic response of bistable devices, graphical anal. 87−7438
dynamic scene anal., optical flow field determ. 88−3192
dynamic stereo from multiple image flows 85−46915
early images processing, parallel computations of optic flow 85−2888
early-late bit synchronizer, tracking performance, optical fibre with low received signal power 86−55320
ego-motion complex logarithmic mapping 85−46900
electro-optic Bragg processors, digital convolution and correlation 85−30300
electro-optic data communication system for the Delft parallel processor 88−41610
electro-optical intensity modulation of near-surfacelight for optical signal processing applications 85−50998
electro-optical logic operations with two-electrode distributed feedback injection lasers 88−13973
electro-optical processing of signal transforms 87−55285
electro-optical sensor with pre- and post-detector, post-detector only, comparison 85−30483
electro-optical switch for TDM and data encoding, digitally controlled 87−18755
electrocapillarity modulators and large screen projection displays 88−7981
electron image recording, dynamic luminance increment 85−36383
electronic speckle pattern interferometry fringes, anal. by phase stepping 88−46262
electrooptic system components for phased array radar applications 88−72689
electrooptical processing of signal transforms 87−39868
electrophotographic image quality, computer model 86−23161
encoder for precision meas. *(Japanese)* 86−24536
energy parameters of optical-radiation spatial searchsystems 86−10478
engineering aspects of optics, book 86−61887
error detection and correction in multilevel algebraic optical processors 88−58294
etalon optical logic devices, parallel operation and crosstalk meas. 86−54206
EXCLUSIVE OR processing, binary image subtraction, using thick Fourier holograms 85−7543
expert system, real-time probabilistic 88−33823
expert systems, optical, spatial light modulators appl. 87−54833
Fabry-Perot bistable device, biased multibeam cascadable type, optimum control beam angle 87−54401

optical information processing continued
Fabry-Perot resonator, optically bistable, with surface excitation *(German)* 88−33810
Fabry-Perot semicond. laser amplifier, high-speed all-optical gate switching expt. 87−75230
factored look-up tables for residue number system computations 88−73219
factorised extended Kalman filter 88−51650
factorized extended Kalman filter 87−13092
false-alarm probability, noise distrib. depend. of optical-signal detector 87−19695
fan-in and fan-out with optical interconnections 86−29998
Faraday effect light modulator for digital/optical computing 88−8020
fast binary random number arrays generator using speckle, parameters optimisation *(French)* 88−58283
fast digital optical matrix-vector multiplier, implementation 88−13971
fast optical crossconnect for parallel processing computers 88−47132
feature extraction by hierarchical data structure 85−2895
feature extraction using median filtering technique 88−34779
feature extraction via Radon transform 85−13614
feedback for iterative processing 88−58301
femtosecond pulses, encoding and decoding 88−46186
ferroelectric liquid crystals, optical computing and image processing appls. 87−60984
ferroelectric liquid crystals, props. and appls. 87−60983
ferroelectric single crystal devices based on electro-optical effect 86−54008
fiber-optic crossbar switch with broadcast capability 88−58128
fibre coupled phase conjugate mirror, polarisation and spatial information recovery 88−20744
fibre delay for space-to-time conversion of optical signal, accelerator beam profile monitoring appl. 85−12551
fibre dispersion compensation by active predistorted signalsynthesis 86−2727
fibre gates, induced Kerr phase shifting at diode laser pump powers 88−58322
fibre optic bipolar tap implementation using incoherent optical source 87−74735
fibre optic delay line appls. 87−48249
fibre optic digital communication systems baseband equalisation, optimisation *(German)* 86−55285
fibre optic distributed sensors and sensor networks 87−26032
fibre optic gyro, heterodyne, drift reduction 88−67868
fibre optic gyroscope signal processing schemes 88−10002
fibre optic logic elements 87−32930
fibre optic matrix multiplier using 2d systolic-array architecture 88−13985
fibre optic modulator and logic gate using nonlinear refr. and absorpt. 87−18676
fibre optic monomode sensors, optical processing schemes for phase and polarisation state information recovery 87−25963
fibre optic proximity probe response, reflectivity compensation and linearisation 85−56339
fibre optics CDMA, fundamental principles 88−3309
fibre signal processing appls. 85−29638
fibre twisted, birefringent, nonlinear polarisation evolution and instability 86−63669
fibre-optic logic gate 85−29531
fibre-optic multichannel correlation/convolution 87−38747
fibre-optic recirculating delay lines, used in signal processors, laser phase noise 85−41138
fibres, high-speed data transmission using byte-wide WDM system 88−73926
fibres, one-way image transmission by degenerate four-wave mixing in photorefractive BSO crystal 88−72060
fibres, single-mode, mode field radius meas., harmonics detection appl. 87−18601
filtered photodetector signal, numerical analysis of distribution function 88−35493
filters, digital, acousto-optic, architecture 85−35559
fingerprints theorems for zero crossings 85−46922
finite element processor, design 87−13094
finite element processor, high-accuracy, error-source effects 86−43284
fixed-point arithmetic 87−13095
flip-flop operations in coupled element bistable device 88−58290
flip-flop using LEDs and photodetectors 86−62517
flow visualisation using high speed optical tomography based on HOEs 86−24832
Foley-Sammon transform for image classification 86−64352
FOSPAN, fibre optic based signal processor using recirculating delay line techniques 87−56559
Fourier anal. for high speed inspection 88−56050
Fourier hologram, one-dimens., parallel heterodyne binary data reading *(Russian)* 85−2424
Fourier objectives, application of mirror systems in information processing devices *(Russian)* 85−35570
Fourier phase retrieval when image is complex 87−33762
Fourier spectrum, amplitude distribution, phase objects parameters meas. using a priori information 88−28033
Fourier spectrum extrapolation, fast algorithm for implementing minimum-negativity constraint 88−73174
Fourier transform matched filtering, acoustooptically addressed 85−36312
Fourier transforms and convolution/correlation 88−8839
Fredkin gate array as high-efficiency optical interconnection network 87−62143
Fredkin gates appl. to optical computing 86−54202
frequency domain reflectometry for fibre/integrated optic systems, high resolution distrib. fibre optic sensing 87−18688
Fresnel transforms and optical computing 88−8005
Fresnel transforms implemented by Bragg cell processors 86−16501
Fresnel zone transforms in spatially incoherent illumination 85−36311
functional optical devices *(Japanese)* 85−12644
fundamental optical logic gates, optical bistability *(Chinese)* 88−58292
gate based on spatial-dispersion effect, resonance frequencies 86−36562
gate matrix switch with silica-based waveguide 88−33821
gate-controlled photodiode for optical matrix multiplication applications 87−54189
generalised matched filter orientation variability 86−16533
generalized Laplace's operators realized by computer-generated spatial filters 88−34786
geometric moments calc. using Fourier plane intensities 86−43287
geometric moments from optical cosinusoidal transform, hybrid optical/digital method 87−55264

optical information processing continued
geometrical image transformations as a means to improve thequality of high-energy pictures in bubble chambers 86−3980
Givens rotation device, integrated-optical, using electro-optic grating diffraction and shifting 86−54529
glass fibres, optical switching expts. 88−65839
gradient lenses for compact optical data processors 86−36288
Gram-Schmidt orthogonalisation of data matrix, RNS optical adaptive processing use 88−73218
grating for information processing, optical prod. *(Japanese)* 88−72193
gray level images, expt. derived fuzzy membership function 88−41038
grey-valued pictures, coding method using density contour lines 86−68987
guided-wave optics appl. 88−28071
gyroscope, fibre optic, with linear scale factor using phase detect. 85−24295
gyroscope, fibre-optic, wide-dynamic-range signal-recovery schemes 86−2696
halftoning, analytic description of 1D error diffusion technique 85−25164
Hartley transform intensity, nonrecursive generation of image moments 88−59187
Hartley transform intensity for image reconstruction 87−19865
heterodyne acousto-optic spectrum analyser, investigation 85−14687
heterodyne interferometry, coherently illuminated objects, images recording and reconstruction 88−21327
heterodyning schemes having diffraction optical mixer 85−51722
heterogeneous structures, defect detectability, optical synthesis of X-ray photograph tomograms 86−540
high bandwidth triple product processor using a shearinginterferometer 86−3960
High Quality Image Data System, optical video network system 87−49050
high-contrast optoelectronic logic device using waveguide MQW optical modulator 87−38891
high-definition image processor and filer, config. and appls. *(Japanese)* 86−38301
high-resolution image fiber system using an image separating/reconstructing method 87−46548
high-speed optical computer for CT image reconstruction 86−3954
highly parallel signal processing architectures, conf., Los Angeles, USA (Jan 1986). 87−19702
Hilbert filtering of EM signals, to identify spatial structure 88−59198
Hilbert transform using polarisation filters 86−64349
historical perspective on optical computing 86−3994
Hitachi semiconductor lasers for optical information processing systems 85−18935
holo-interferograms, windowing technique for automated anal. 88−34149
hologram, in-line, digital decoding 86−3318
holographic and nonlinear optical elements for digital optical computing applications 88−2406
holographic associative memories, digital and analogue 88−33597
holographic associative memory employing phase conjugation and symbolic processor 88−8325
holographic associative memory using phase-conjugate resonator 87−19102
holographic coordinate transformations and optical computing 88−2399
holographic data processing, phase stabilisation system 85−57459
holographic film scanning machine in the bubble chamber HOBC 86−3334
holographic image converter for optical information processing 85−29943
holographic interference fringe processing by microcomputer-based spatial phase detection 86−54228
holographic interferometry, automated data reduction 86−3360
holographic mapping filters for geometric coordinate transforms., resolution limits 88−34136
holographic optical element, astigmatic, for parallel multichannel information processing 85−35902
holographic optical processing for submicrometer defectdetection 86−3344
holographic pattern recognition using resonance atomic media 87−39257
holographic phase retrieval and digital reconstruction 87−47023
holographic recognition system modelling using theoretical-numerical convolution transform. 85−7554
holographic shape determination of reflecting objects 86−15798
holographic spectrum reconstruction method for display of spectrum and image in one plane, lensless coherent optical processor appl. 87−75260
holographic stereograms generated with liquid crystal spatial light modulator 88−74534
holographic tandem component, signal processing appls. 86−16496
holographic telescope arrays for optical computing 88−65883
holographic tomography 86−58983
holographically recorded displacements, unambiguous determ. by fringe carrier technique 86−3348
holography, multiplexed, for display purposes, NOE hybrid method 86−3336
holography, picosecond time- and space-domain 88−40385
holography appls., conf., Beijing, China (July 1986) 88−37818
holography in computing *(French)* 87−33340
Hopfield neural network model, holographic implementation 88−65443
Hopfield neural network model with discrete weightings, holographic implementation 88−33803
horizons in optics, conf., Besancon, France (May-June 1985) 86−54
Hotelling trace criterion for image classification, optical implementation 85−25175
Hough and Fourier optical processors for product inspection 88−59227
Hough transform achievement at video rates 86−69109
Hough transform optical implementation by matrix of holograms 87−27560
Hough-transform-based circle detection using multimode fibre array 87−39909
Hughes CCD-addressed liquid crystal light valve, status 87−60985
human visual system, microcomputer controlled display to probe signal processing 86−25182
hybrid analog-digital linear algebra processors 88−8841
hybrid approach to optical computing 88−65435
hybrid coherent optical and electronic filtering 88−3259
hybrid computer-optical processing with inexpensive liquid crystal television 87−55287
hybrid electronic/optical digital adder, construction 87−46720
hybrid holographic-digital processing system for three-dimensional displacement measurement 87−47016
hybrid image processing *(Japanese)* 87−69287
hybrid image processing, conf., Orlando, FL, USA (Apr. 1986) 87−36303
hybrid image processor, Net Flou, automatic detect. of visual defects *(French)* 85−33531
hybrid method for relative orientation determ. between displaced images 85−13607

optical information processing continued
hybrid mixer and digital correlator for high precision spectroscopy 88−28068
hybrid optical system for linear transformation processing 87−55302
hybrid optical-digital texture processing based on Laws' energy measure 87−55286
hybrid optical/digital approach to machine vision, techniques 87−77154
hybrid optical/digital image pattern recognition, review 86−23147
hybrid optical/digital processing system for phase determ. using holographic filter 85−25163
hybrid optoelectronic processors, superconvergence 88−20458
hybrid pattern recognition by features extracted from object and Fraunhofer diffr. patterns 87−27562
hybrid pattern recognition by features extracted fromobject patterns and Fraunhofer diffraction patterns 86−3959
hybrid polarisation encoding shadow casting for optical computing, logic operations 87−2558
hydrostatic pressure measurements with multimode optical fibers 87−70854
IC photomask defect detection using white light spatial filter processor *(Chinese)* 87−38332
IC photomask inspection using optical data processing techniques 86−47679
III-V semiconductor integrated waveguides as all-optical logic devices 87−12579
ill-posed problems and remote sensing 88−10034
image, speckle noise degraded, information content 86−59334
image analysis system for quantitative metallography, microprocessor and minicomputer-based 87−2559
image and scene recognition with invariant momentsand edge features 86−30044
image chain model, human visual system components, for imaging systems design and anal. 86−69184
image communication services in LAN *(Japanese)* 87−41202
image correlation at low light levels, computer simulation 85−2873
image data compression, brain mechanism of vision 88−59276
image deblurring by spectrum analysis *(Korean)* 87−33756
image differentiation, real-time, by degenerate four-wave mixing 85−19018
image differentiation using an optical filter *(Japanese)* 87−2573
image digitizer system comparison with coherent and incoherent light, speckle size influence 87−62171
image information processing systems *(Japanese)* 85−8758
image plane holography for holographic presentation ofa three-dimensional data base 86−65406
image plane processing approaches 85−57425
image processing, direct problem, Wiener's method 85−2892
image processing, Gel'fand-Levitan inverse problem 85−2891
image processing, prospects and illustrations 85−51747
image processing, scanning optoelectronic systems with sequential-parallel processor *(Russian)* 85−14715
image processing by orthogonal transformation, mathematical model and pattern recognition appls. *(German)* 85−51706
image processing in the reconnaissance revolution 87−27606
image processing systems using computers, optical inspection *(German)* 87−70354
image quality, psychophysical approach 86−23158
image quality eval. using S/N ratio meas. 85−2894
image quality evaluation aspects, integral criteria 86−16528
image quality overview, conf., Arlington, USA (Apr. 1985) 86−19716
image raggedness, effective measure, num. procedure 86−23160
image reconstruction investig. from autocorrelation function 87−13143
image restoration, fast 2D Kalman filters 86−30051
image restoration by multiple regression analysis approach 85−30393
image restoration by the shift-and-add algorithm 85−46942
image restoration filter evaluation for machine classification 85−25179
image retrieval, colour, from coherent light speckles by white-light processing without colour filters 85−36366
image science, conf., Helsinki, Finland (June 1985) 85−54014
image sensors, MTF theoretical bases and meas. methods 86−24375
image sharpness enhancement using adaptive 3×3convolution masks 86−3982
image subtraction by phase grating at Fourier freq. plane *(Chinese)* 85−57461
image subtraction by spatial filtration technique using three diffr. gratings 85−46939
image subtraction techniques review 87−39936
image synthesis technique using extended incoherent source 87−47928
image-gathering system design for information and fidelity 86−69177
image-plane processing of visual information 85−2874
images representation, genetic functions and stylised images synthesis use 87−19912
imaging connector for parallel fibre optic data bus 86−11137
implicit binarization procedures in 1-D 85−46697
imprecise sequency processing problems *(German)* 87−39907
incoherent holography and active Michelson interferometry methods for processing light fields 86−58989
incoherent image processing, optical/digital method for extended depth of field 88−14746
incoherent light optical processing and holography appls. 87−62190
incoherent optical fiber signal processing constraints 88−28072
incoherent optical signal processing system, real-time 85−30303
incoherent spatial filtering techniques, generalisation 86−37116
incoherent spatial filtering with a scanning heterodyne system 85−19491
incoherent spatial filtering with gratinginterferometers 86−2902
information/communication systems, optical technology *(German)* 85−57492
infrared speckle data, ID, bispectrum anal. for phase recovery 88−52530
inhomogeneously broadened absorbing materials, convolution correlation and storage of optical data 87−46430
integrated and guided-wave optics, conf., Kissimmee, FL, USA 85−26
integrated bistable optical devices, construction, review 88−8011
integrated electro-optic Bragg processors for digital real-time signal processing 85−46215
integrated fibre optical signal processing systems 86−48203
integrated optical architectures and implementations 85−46893
integrated optical architectures for matrix multiplication 85−36369
integrated optical circuit engineering, conf., Cambridge, MA, USA (Oct. 1984) 85−44368
integrated optical circuit engineering conf., San Diego, USA (Aug. 1987) 88−49339
integrated optical data processing circuits, review 88−20467
integrated optical device developments 86−15592

optical information processing continued
integrated optical modulators for high-speed signal processing technology and designs 85−56357
integrated optical pattern recognition device, matched spatial filter and correlating device 85−12638
integrated optical pipeline processor 88−2041
integrated optical signal processing devices employing magnetostatic waves 85−2102
integrated optical signal processors consisting of collinear acousto-optic switches 88−51608
integrated optical spatial light modulator, electrooptic grating based, for analogue computation 85−12652
integrated optical threshold gates for digital image processing 87−13109
integrated optics appl. 86−49572
integrated optics appls. 88−13975
integrated optics development, signal processing, logic functions and digital optical computer appls. 86−2848
integrated optics for computing, fundamentals 88−26869
integrated optics take lightwave processing to microscopic levels 88−13926
integrated optoelectronic signal processing devices, high speed 85−3933
integrated SAW acousto-electro-optic device for signal processing 87−46296
integrating digital post-processor, design and development 87−47953
intelligent robots and computer vision, optical processing techniques 87−13105
interconnect and self-electrooptic effect device technologies 88−65414
interconnection network using polarisation-based ferroelec. liq. cryst. gates 88−51631
interconnections, holographic and fibre-optic approaches 87−17193
interconnections, optical, flexible, two-way, in layered computers 87−68302
interconnections optical, conf., Cannes, France (Nov. 1987) 88−55790
interconnects for computing, review 88−58311
interference filters, nonlinear, for optical computing architectures 88−65428
interference filters, optically bistable, for array processing, optimisation 86−48498
interference fringe shifting based optical computing 86−37142
interferometer, multistable, switching waves, potential appls. 88−20738
interferometric Bragg-cell spectrum analyser, high-dynamic-range 86−31291
interferometric Bragg-cell spectrum analyser, theoretical model 86−31292
interferometric signal processing scheme, extended range dual-wavelength FMCW 87−46567
interferometric spectrum analysis, spatial and temporal spectra of reference signal 85−19489
interferometric triple product processor 87−46618
invariant image processing based on multipurpose low-level visual processing 85−30395
inverse filter transfer function optimisation in blurred image restoration with incoherent light 87−47934
inverse optics, conf., San Diego, CA, USA (Aug. 1985) 87−31116
inverse problems of optics 87−55312
ion-exchanged waveguides for optical signal processing 88−72132
IR all-optical information processing in semiconductors 86−3981
IR background data presentation, consistency in time and freq. domains 85−57496
IR imaging signal calibration and processing *(French)* 88−9852
IR remote sensing, deconvolution processing of images *(Chinese)* 86−16503
IR search and track system signal processing concepts and techniques 88−21312
isotropic Hilbert transform by anisotropic spatial filtering 87−27559
iterative damped least-squares method with non-negativity constraint for image restoration 85−36308
iterative image enhancement procedure with dynamic range constraints 85−13617
iterative restoration algorithms for nonlinear constraint computing 88−6404
Kalman filter, factorized extended, for optical processing 86−54530
laboratory matrix-vector processor, direct finite element soln. 88−40033
Landsat Thematic Mapper, operational MTF 86−25403
Landsat Thematic Mapper, underflight calibration 86−25406
Landsat TM data radiometric calibration and image processing, thermal signature assessment improvement 85−48454
laser applications in China, progress (1974-1984) *(Chinese)* 85−29963
laser beam applications, progress in China, 1974-84 86−3388
laser diode PCM and appl. to high-speed electrooptical time multiplexer 88−20656
laser Doppler velocimetry, real time signal processor *(Japanese)* 86−24446
laser phototypesetting, benefits and development on Lasercomp 85−5595
laser pulse spatial modes, direct measurement 87−2050
laser pulses with constant false alarm rate probability, detection *(Spanish)* 85−13602
laser radar field processing, optical methods 85−52439
lasers, nonlinear optics and optical computers 85−56807
lasers and electro-optics, conf., Baltimore, MD, USA (April-May 1987) 87−65065
LCD video display, low-cost, for optical processing 86−42374
LDV signals real time processor with acoustooptic light deflector and position sensitive device 86−2897
learning networks, multilayer, based on holographically interconnected nonlinear Fabry-Perot etalons 88−33825
least mean-square adaptive filter, acousto-optic cell/liquid cryst. light valve implementation 85−7298
least squares phase estimation from the phase difference 88−52531
lens and mirror systems synthesis for optical data processing 85−12687
lenslet array processor, appls. 87−13098
LIDAR, Mie diffusion and differential absorption, signal processing *(French)* 86−23094
lidar data processing for stratospheric aerosol meas. 88−28955
light crystal TV spatial light modulator, modulation depth characts. 88−65383
light intensity distrib. meas. system, image processing unit *(Japanese)* 87−3454
light-controlled memory structure using switchable chalcogenide films 88−58056
lightwave communications and computation appls. 88−40034
lightwave transmission, signal conditioning 88−28082
line art binarisation, resolution requirements 86−23162
linear algebra processor, banded-matrix high-performance algorithm and architecture 85−46885
linear algebra processors, high accuracy, bipolar biasing 86−43290

optical information processing continued
linear algebra processors, Lanczos and conjugate gradient algorithms realisation 88−28074
linear algebra processors, matrix preconditioning 87−74853
linear algebra processors, noise and error-source modelling 85−46945
linear algebra processors, preconditioned Lanczos and conjugate gradient algorithms, realisation 88−72182
linear analogue optical systems, digital multiplication by analogue convolution algorithm 87−7800
linear antenna array, optical fibre sensor processing of signals 87−47920
linear coherent optical removal of multiplicative periodic degradations, processor theory 85−25178
linear dimensions meas. by means of matrix signal convertors 85−58880
linear filtering for image distortion correction 85−57501
linear heterodyne matrix-vector processor, design 88−72190
linear shift invariant processing of two-dimens. signals via sequence convolution 85−30392
liquid crystal ferroelec. spatial light modulators for optical interconnection 3D gate array 87−74876
liquid crystal light valve, binocular pseudostereo representation of intensity images, clinical processing appl. 85−35556
liquid crystal light valve, CCD addressed 88−58252
liquid crystal light valve performance 88−33786
liquid crystal light valves, optical computing appl. 87−12271
liquid crystal light valves for medical imaging 87−8928
liquid crystal space-time light modulator, high resolution 88−72166
liquid crystal spatial light modulator, nMOS addressed 85−29655
liquid crystal spatial light modulators, high speed, photoaddressing 88−33785
liquid crystal structure with fibre optic input, information characts. 86−47420
liquid crystal television display as spatial light modulator for optical processing 87−46600
liquid crystal television for speckle metrology 88−65382
liquid crystal TV, appl. to optical parallel logic gates 88−58304
liquid crystal TV, low-cost appl. to white-light optical signal processing 87−18764
liquid crystal TV as spatial light modulator, optical data processing props. 86−22189
liquid crystal TV as spatial modulator for optical data processing 87−12270
liquid crystal TV real-time pseudocolour-encoding, X-ray transparencies appl. 87−38875
liquid crystals for optical imaging processes, nonlinear optical props. 86−42375
liquid-crystal spatial light modulator, coupled to image converter, expt. investig. 87−28973
liver echotexture classification using coherent optical-digital computer 86−32300
Lloyd's mirror as an optical processor 86−16536
local spectrum display, pseudocoloring approach 87−69246
localization of weak point sources of light, stat. estimation technique 86−3942
logic architectures, optical threshold, for hybrid binary/residue arithmetic processors 85−46897
logic based spatial light modulators 88−65438
logic circuit based on semiconductor laser 88−20326
logic circuits using bistable elements, prospects for significant processing rates 88−65418
logic design, optical triple-product processing 87−7801
logic devices, all-optical, for waveguide optics 85−51275
logic devices and arrays, scaling 88−65425
logic element, multiple-output, based on optical interf. system 85−35880
logic elements based on bistable thin-film interferometers 87−68610
logic elements for optical processing 88−40036
logic elements in integrated optical waveguides 85−46209
logic gate, light triggered, high-speed config. with laser diode, optical computer appl. 85−29733
logic gate, optical, using single-mode waveguide and Mach-Zehnder inteferometer 85−56358
logic gate based on magneto-optical spatial light modulator 87−74886
logic gate design considerations 88−51642
logic gate using spatial light modulator and interference fringe shifting 87−26078
logic gate using windowless etalon array, recovery time, streak-camera obs. 86−42621
logic gates, all-optical, with external switching by laser and incoherent radiation 85−56843
logic gates, multiple-valued, complement and literals 87−74880
logic gates and flip-flops based on polarisation-bistable InGaAsP/InP semiconductor lasers 86−48411
logic gates arrays, bistable, appl. to all-optical digital parallel processing 86−54198
logic gates for optical computers using bistable devices, digital optical circuits 86−3300
logic gates using ferroelectric liquid crystals 88−7997
logic gates using liquid crystal optical switches 87−26095
logic gates using photoconducting elements and electroluminescent cells 88−58312
logic operations, optical digital by two-beam coupling in photorefractive material 86−54201
logic operations, real-time using grating filtering 88−33832
logic parallel processor using polarisation states 86−54200
logic processing based on scattering 2D spatial filtering method 85−25166
logic processor using anisotropic scatt., large data array handling in parallel 85−46940
logic switches, amplifiers and memories 86−54197
logic-gate surface-emitting-type optical threshold device operation, anal. 88−51636
logical signal processing with optically connectedthreshold gates 86−37138
long-span high-capacity optical transmission system research, progress, review 87−49071
longitudinal image restoration, inverse filtering 88−34737
lower bounds on the computational efficiency of optical computing systems 87−69249
lumped threshold logic, optical implementations 87−13096
Mach-Zehnder all-fibre interferometer, demonstration of optical Kerr effect at laser diode powers 88−40032
magnetic bubble domain devices, review 87−7038
magneto-optical thin film devices for image and signal processing in real time 85−29481
optical information processing continued
magnetooptic spatial light modulator, edge enhancement of coherent images 86−43285
magnetooptic spatial light modulator appl. to white-light optical processing 85−12672
magnetostatic wave optical Bragg cell devices 86−36274
Mangin mirror performance for optical processing with feedback 85−56388
mapping applications of holography 88−65431
Marr-Poggio algorithm optical parallel implementation, $Bi_{12}SiO_{20}$ spatial light modulator appl. to stereo vision 85−57453
matched filters, conventional and composite, with error correction, for pattern recognition 88−8807
materials, review 87−60875
materials for fast switching and logic devices 88−58307
materials requirements for optical processing and computing devices 85−36368
materials requirements for optical processing and computing devices 85−46896
matrix equations, optical methods for linear and nonlinear eqns. soln. 85−2871
matrix partitioning for optical computing 85−7934
matrix processors 88−8842
matrix triangularization using arrays of integrated optical Givens rotation devices 88−26911
matrix vector multiplication by four-wave mixing in photorefractive media 87−26534
matrix-matrix multiplication, optical, using multi-color four-wave mixing 88−65440
matrix-matrix multiplier based on Kronecker product decomposition 87−33730
matrix-multiplication techniques for advanced matrix algebra operations 85−13587
matrix/vector processors, variable accuracy, speed/accuracy tradeoffs 88−34776
maximum entropy image reconstruction, general algorithm 85−8499
maximum likelihood symbol synchronization for the direct-detection optical on-off-keying channel 87−61540
median filters−optical implementation using symbolic substitution 88−59293
medical image optical and electronic processing, book contrib. 86−25223
medium accuracy optical computing, highly redundant number representation 87−7804
Mellin transform, holographic appls. *(Chinese)* 86−63875
membrane spatial light modulator, optically addressed, incoherent to coherent image conversion 85−12649
Michelson interferometer, phase conjugate, appl. to parallel image subtraction and logic operation 86−49005
micro-waveguide transformers for coherent opticalsignals 86−30815
microchannel spatial light modulator, development 88−67368
microchannel spatial light modulator, electron-beam-addressed 85−12650
microchannel spatial light modulator, optical transfer characts. 88−65439
microchannel spatial light modulator, response time consideration 88−33777
microchannel spatial light modulator, vacuum-demountable, X-ray imaging characts. 86−44613
microchannel spatial light modulator having the functionsof image zooming, shifting, and rotating 86−68326
microcomputer-based programmable optical signal processor 86−65153
microelectronics, optical interconnections 85−46894
microlens array, planar, monolithically integrated, appls. 88−65356
micromechanical light modulators for data transfer and processing 85−12686
micromechanical light modulators on silicon 85−35534
microprocessor-based simulation of coherent optical processor 86−3947
microwave antenna beamforming using optical processing 88−72697
microwave applications of optical technology, conf., Arlington, USA (Apr. 85) 86−33905
microwave frequency/broadband signal processing, single-mode optical fibre delay line technique 85−35465
miniature optics and lasers, conf., Los Angeles, USA (Jan. 1988) 88−62857
minibench acousto-optical signal processors, construction and performance 88−26906
minicomputer interface for magneto-optic spatial light modulator 88−9884
minimum variance synthetic discriminant functions, constraint phase optimisation 88−34736
mirror surfaces, high performance, spectral and parameter estimation problems in metrology 87−19929
MIS devices for optical information processing 86−24429
mode conversion device using magnetostatic surface wave 88−13955
model for optical flow from spatiotemporal filters 87−62328
modified composite filter for pattern recognition, noise with nonzero mean, experimental results 87−75876
modified signed-digit addition and subtraction usingoptical symbolic substitution 86−69107
modified signed-digit number representation, addition and subtraction coding scheme 88−51617
modulated interference gratings for image reconstruction, classification for holographic methods *(Spanish)* 86−68646
modulator, self-linearized using quantum-well self-electro-optic effect device 85−18753
modulators, electro-optic spatial-temporal, for optical information processing systems, review 85−56369
modulo (6 ± 5i) inner product computer 88−72189
moire pattern beat anal. 88−51637
moire signal spatial filtering and anal. *(Chinese)* 87−7834
molecular devices, electrically modulated optical signals 85−41216
molecular electronic devices based on electrooptical behavior of heme-like molecules 88−1290
molecular electronics and biocomputers, symposium, Budapest, Hungary (Aug. 1987) 88−55777
monolithic LD optical matrix switches 88−45462
monomode nonlinear waveguides, power-transfer effects 87−74743
monomode optical fibres, Faraday rotation appls. 88−13888
monte Carlo methods in optics 85−56264
Monte Carlo procedures implementation 85−36376
morphological optics and hypotheses role in image analysis 87−55262
motion constraint equation for optical flow 85−30369
moving object, recovery of three dimensional structure from orthographically projected optical flow *(Japanese)* 85−13626
moving object tracking and extraction in successive frames 86−43286

optical information processing continued
MSD logic modules implementation, circulating packet threshold logic designs 87−52537
multi-classed images buried in additive noise 87−55284
multiaperture optics pattern recognition process 87−47967
multidimensional band-limited functions, phase ambiguities and zeros 85−46923
multidimensional-signal sample dependency at Nyquistdensities 86−37036
multilayer optical learning networks based on holographically interconnected nonlinear devices 88−20461
multiple 3-D velocity vector fields in optical flow, orthographic projection analysis 86−4042
multiple bit-rate per photon detection and symbol synchronisation 85−31069
multiple degree of freedom object recognition using optical relational graph decision nets 88−52503
multiple imaging and multichannel optical processing with split lenses 88−27994
multiple matrix product, real-time processing, optical system 85−41951
multiple object recognition and tracking techniques 87−70300
multiple quantum well-based spatial light modulators 88−58236
multiple-valued logic for optoelectronics, optical bistability advances 86−36577
multiple-valued logic using integrated optoelectronics 86−58795
multiplex holograms, high-efficiency, optimisation by Fourier space formalism 88−2396
multiplexing holography, information display, 3D 88−40371
multiplicative time and space integrating acoustooptic architectures for real time spectrum processing 88−26907
multiprocessor, optically connected Schur's algorithm perf. 87−62268
multistage 2D interconnection networks in parallel computing systems 88−33828
multistage interconnection networks for large scale multiprocessor systems 88−58285
multitarget sub-pixel detection and track initiation 88−66656
multitarget tracking, measurement/target pairing probabilities 88−65441
n-i-p-i doping superlattices, light generation, modulation and amplification 86−41581
NDT by holographic interferometry with automatic fringe evaluation 87−47011
NDT IR thermographic techniques for assessing flaw delaminations in flight hardware, new developments 85−47849
nearest-neighbor non-iterative error correcting optical associative memory processor 87−39938
neural computer connection to improve recognition 88−3144
neural computers, information processing capabilities and component requirements 88−20473
neural computers, learning algorithms 88−58313
neural net, optoelectronic analogue, self-organization and stochastic learning architectures and methodologies 88−58314
neural nets, self-programming, optoelectronic analogues, architecture for fast stochastic learning by simulated annealing 88−20462
neural network, competitive, with optical feedback 88−58320
neural network architectures 87−54206
neural networks, conf., Los Angeles, USA (Jan. 1988) 88−62855
neural networks, simulated using optically connected multiprocessors 88−65442
neuro-optic processors, interconnectability 87−55296
neurocomputer for implementing the Marr-Poggio stereo algorithm 88−58318
neurocomputer implemented using deformable mirror arrays 88−58321
neuromorphs, adaptable interconnects, photorefractive projection operator 88−58315
neuromorphs, optical, using spatial light modulators 88−58300
neuron computers, disturbance generator for recognition rate improvement 88−58293
Nimbus-7 CZCS: electronic overshoot due to cloud reflectance 88−30171
NMOS VLSI array for adaptive liquid-crystal spatial light modulator, evaluation 86−28490
noise updating repeated Wiener filter and other adaptivenoise smoothing filters using local image statistics 86−69101
noncoherent-object, hologram, reconstruction and optical processing, complex valued spatial-coherence fn. 88−2394
noncollinear second-harmonic-generation-based ultrafast optical signal processing for optical digital computing 88−13979
nondegenerate two-photon optical multistability, theoretical study 88−26909
nonlinear and holographic optical elements for all-optical digital processing 88−33818
nonlinear coherent coupler, all-optical switching through nonlinear stationary wave 88−65877
nonlinear diode laser amplifiers in optical processors and interconnects 87−68616
nonlinear etalon, optical bistability, signal processing and computing appls. 85−35877
nonlinear etalons and optical computing 88−8292
nonlinear etalons and optical computing 87−54418
nonlinear guided waves, third-order nonlinearities and all-optical signal processing *(Romanian)* 88−51947
nonlinear integrated optics, appl. to optical signal processing 86−68324
nonlinear interference filters, critical interpixel separation 87−19042
nonlinear interference filters, loop narrowing and critical slowing down 87−47931
nonlinear interference filters, pixellation, thermo-optical logic elements appl. 88−72185
nonlinear materials appls. using all-optical interactions 85−24258
nonlinear matrix equations, iterative solutions using fixed number of steps 85−30251
nonlinear optical fibre, twisted birefringent or spun, polarisation evolution and instability 88−65227
nonlinear optical interactions, strong beam confinement by thin dielectric films *(Romanian)* 87−75252
nonlinear optical interfaces, binary vector multiplications 88−26918
nonlinear optical interfaces for binary vector multiplications 88−2356
nonlinear optical logic elements, demonstration 87−39221
nonlinear optical loop mirror for ultrafast processing 88−27303
nonlinear optical materials and devices, conf., Erice, Sicily, Italy (July 1985) 87−43791
nonlinear optical processing with halftones: accurate predictions for degradation and compensation 87−69248

optical information processing continued
nonlinear optics, conf., Los Angeles, CA, USA (1986) 87−10003
nonlinear optics and optical computing 87−12589
nonlinear organic molecular crystals as optical switches, props. study and DP appls. *(German)* 88−51563
nonlinear refractive materials for bistable optical devices *(Japanese)* 85−12953
nonlinear signal processing using fiber-optics neurograms 88−8765
nonresonant optoelectronic logic device 87−26228
NOR gate using diode laser sources 86−68615
nuclear power plants instrumentation and surveillance systems, optical data transmission method 86−49700
object motion constraint equation under space-varying or time-varying illumination 87−47943
object structures, evaluation before image processing, optical Fourier plane symmetries *(German)* 86−23106
on-chip massively parallel Monte Carlo cellular processors, random-number arrays, optical generation 87−39917
online classification using hybrid digital integrated optical processor 86−15522
operating curves for optical bistable devices 88−20464
optical and hybrid computing, conf., Leesburg, VA, USA (March 1986) 88−6087
optical computer, fundamental problems and future prospects *(Japanese)* 86−29987
optical computing, conference, Jerusalem, Israel (July 1986) 87−51707
optical computing using nonlinear optical phenomena 88−65415
optical crossbar interconnected signal processor, optimal least square filtering 87−47952
optical disc memory, fast access method 88−51427
optical excisor processor, improving signal detection 87−47955
optical fibre signal processing, appl. in EW systems 87−39995
optical fibres, optical time domain reflectometry, coherent detection techniques use 86−48152
optical flow computation using gradient-based multiconstraint method 87−47936
optical light modulators, optically addressed, for coherent optical systems 85−57427
optical linear algebra processor for optimal control 87−7190
optical linear algebra processor performance for optimal control apls. 87−46614
optical phase conjugation applications 86−42642
optical pulse compression in 1.5 μm wavelength region using large-positive-dispersion fibre and grating pair 88−59203
optical switching and bistability in semiconductor materials, overview 87−26548
optical-hybrid matrix processor, comparison with digital electronic processor 87−46593
optical-logic-array processor using shadowgrams, parallel neighborhood operations and optical digital-computing system architecture 85−63102
optical-magnetostatic wave interaction for spectrum analysis 85−13584
optically-connected 3-D VLSI architecture, template matching algorithm 87−60617
optics symposium, Budapest, Hungary (April 1984) 85−54025
optimal frequency domain textural edge detection filter 85−57455
optimal linear filtering algorithm 85−13609
optimum receiver of weak optical Gaussian signals 85−63672
opto-electronic signal processing, spatial light modulators and bus systems *(German)* 87−69268
optoelectronic ALU, data ranging and memory units *(German)* 88−3145
optoelectronic central processing unit, architectural and performance considerations 88−13984
optoelectronic devices, angular resolution, analytical determ. 85−56398

optoelectronic gated thyristor, high speed response 87−68287
optoelectronic IC emitter and receivers, materials, review 88−65512
optoelectronic image processor, binary and circular symmetric filters 85−56393
optoelectronic integrated circuits for high speed signal processing 87−26233
optoelectronic resonator neural networks, associative memory using hologram 88−20328
optoelectronic shift encoders using self-reproduction effect *(Russian)* 88−45905
optoelectronic signal processing for phased-array antennas, conf., Los Angeles, CA, USA (Jan. 1988) 88−69974
optoelectronics, development and state of the art in Poland *(Polish)* 88−14059
optoelectronics technology for communications and information processing systems, current state and future trends 86−28941
organic materials in nonlinear optics review, optical signal processing and computing appl. 88−72423
organic molecules, spatial light modulation via optically induced absorption changes 88−65411
organic molecules and optical signal processing *(French)* 87−70032
organic photochromics for spatial light modulation 86−29975
OTDR sensors, enhanced, signal processing techniques 88−42303
output signal moments of optical processors 85−2898
overview of optical image processing 85−30479
overview of optical signal processing techniques 85−30478
packets optimisation, fluctuating optical signals detection 86−37151
page oriented holographic memory addressing of optical bistable devices arrays 88−58721
PAL TV receivers, quality improvement by adaptive inter-/intraframe processing 86−11237
para-Hensel codes for exact parallel matrix inversion with systolic processors 88−58286
parabolic differential equation soln. 88−65408
parallel N^4 weighted optical interconnections 88−8008
parallel array logic system, architecture without memory elements 87−13054
parallel computing, complexity implications 88−3254
parallel digital and symbolic optical computation via optical phase conjugation 88−58287

optical information processing continued
parallel digital optical computation based on optical phase conjugation (OPC) 88−65436
parallel interconnections, N^4 weighted 88−58317
parallel logic by spatial filtering 88−8030
parallel logic gate, polarisation based, using ferroelectric liquid crystals 87−68215
parallel logic gate using Pockels effect modulators, fundamental components for optical digital computing 87−26076
parallel logic gate using spatial light modulators, PROM device implementation 86−42362
parallel logic gates, liquid crystal televisions 88−20470
parallel logic operation with microchannel spatial light modulator 87−12260
parallel multiprocessing systems, development 87−38959
parallel optical computing and symbolic substitution 88−58305
parallel optical flow computation, constraint method 88−3282
parallel optical interconnections and computer architecture *(German)* 88−33906
parallel optical logic operations using phase conjugation 87−33258
parallel optical processing *(Japanese)* 86−29983
parallel optical syntactic pattern recognizers 87−55248
parallel processing optical limits in Fabry-Perot etalon 87−33811
parallel processor interconnections using GaAs optoelectronic ICs 87−16967
partial deconvolution and spectral extrapolation with limited field 87−47929
partially coherent light optical processing, progress in optics book 87−36306
partially coherent optical information processing, inverse source problem *(Chinese)* 86−16494
particle velocity and displacement distribs. from double-exposure holograms using opt. and digital processing 87−19067
passive ranging from a moving vehicle via optical flow measurement 88−59311
passive sonar, optical information of freq. channels *(French)* 88−22232
passive star all-optical ultra-fast networks 87−69684
pattern recognition, automatic, real-time 87−38879
pattern recognition, holography appls., computer generated holography elements 86−10015
pattern recognition, hybrid, using Fraunhofer diffraction 85−7935
pattern recognition, large-memory real-time multichannel multiplexed, using hololens 85−19045
pattern recognition, optical implementations of digital algorithms 86−37139
pattern recognition, projection synthetic discriminant function optimality 87−13102
pattern recognition, real time, log/polar transform. by complex computer generated hologram 85−30486
pattern recognition, rotation-invariant 85−25171
pattern recognition, rotation-invariant, using optimum feature extraction 85−25143
pattern recognition, symmetry feature extraction approach 85−36436
pattern recognition by spatial filtering *(Japanese)* 87−61006
pattern recognition using optoelectronic neural networks 88−20474
perfect shuffle, using optical spatial filters 88−45250
permutation network, N-stage planar, construction 87−47876
phase characteristics reconstruction of optical fields from amplitude charact. using active optical system 86−48998
phase conjugate mirrors, physics and appls. 85−35888
phase conjugation with transversally modulated pump fields 86−68628
phase retrieval, improvement in logarithmic Hilbert transform evaluation 87−19869
phase retrieval algorithm using sampling theorem 87−33761
phase retrieval based on theoretical models for multi-dimens. band-limited signals 87−33764
phase retrieval in imaging 88−34735
phase retrieval method apparent limitations 87−33763
phase retrieval using boundary conditions 86−37133
phase unwrapping by regions 88−46249
phase-gradient speckle image processing, digital implementation and noise bias terms 86−43288
phase-retrieval problem, two-dimens., noniterative soln. 85−46944
phased array antennas, optical beam-forming system, development 85−30119
phased-array antenna beam formation, optical processor appl. 85−13365
photo echoes, information processing appl. 87−69148
photodetectors, role 88−67784
photodetectors for acousto-optic signal processing, review 87−49757
photodetectors for optical data processing systems *(Russian)* 87−41518
photoemitter membrane light modulator, information processing capabilities 88−8838
photographic and electronic systems, image quality 85−57424
photographic negative grey scale resolution estimation method 85−19528
photoneural device structures 88−3198
photonic analog data processing system, multi-GHz, multi-channel 85−24287
photonic computing using the modified signed-digit numberrepresentation 86−37137
photonic material developments 87−12102
photonic switching, present and future prospects, review 88−65862
photonic switching, self-routing with optical control 87−60964
photonic switching devices, appls. 88−51639
photonic switching role in future communications systems 88−4043
photonic switching systems, directional coupler-based, crossover minimisation 88−4045
photonic switching technology appls. for telecommunications switching 88−4041
photopolymer, optical information processing appl. 88−33583
photopolymer holograms for optical interconnect appls. 88−58713
photoreceivers for microwave and millimetre wave applications, use with optoelectronics 87−20485
photoreceivers in optical pulsed signal detection, anal. 88−28076
photorefractive crystal, information recording and readout, raster effect 86−15439
photorefractive crystals, digital optical processing, parallel half-adder circuit, algorithmic state machines appl. 88−20466
photorefractive crystals, optical signal processing and in-line recording, role of speckles 88−34763
photorefractive crystals as adaptive elements in acoustooptic filters 88−26905
photorefractive crystals in optical neural computers 88−65132
optical information processing continued
photorefractive incoherent-to-coherent optical conversion using holographic config. 85−12982
photorefractive incoherent-to-coherent optical convertor using volume holographic storageZ 85−12983
photorefractive integrated optical vector matrix multiplier 88−58221
photorefractive materials, appl. to optical processing, overview 85−30481
photorefractive materials, introduction and appls. 87−68014
photorefractive materials appl. to signal processing 87−69380
photorefractive materials for optical computing and image processing 88−65120
photosensitive mosaics with spatially controllable quantum efficiency, image processing appl. 88−10033
phototransistor and laser diode, monolithic integration in BILAS structure *(French)* 87−68308
picosecond cascadable inverter gate using second harmonic pumping 87−61234
picosecond integrated optical logic 88−26910
picture pattern matching, optical, 3D shape meas. appl. *(Japanese)* 86−29984
pixel-by-pixel array division by optical computing 85−25180
Poisson image distorted by atm., statistical synthesis of algorithms for optimal processing 85−46949
polar tomographic reconstruction 86−43319
polarisation and colour as orthogonal states 85−51749
polarisation imagery, new image processing technique 87−27670
polarisation-encoded shadow-casting scheme, design of multioutput trinary combinational logic units 88−13972
polarised image overlay technique, image comparison, appl. to Shroud of Turin photographs 85−36309
polychromatic point source illumination in processing and holography 86−16495
polydiacetylene as optical memory and information processor 88−51429
polydiacetylenes, intensity dependent refractive index, appl. to nonlinear ultrafast signal processing systems 86−3304
position-coded look-up tables, optoelectronic and electronic residue, comparison 88−65519
position-coded residue look-up table using laser diodes 87−39910
PPM optical channel, optimum joint slot and symbol synchronisation 87−61541
PPM optical communication, simultaneous slot and symbol synchronisation 87−40946
PPM photon counting channel charact. 86−54534
PPM Poisson channel, capacity and cut-off rate *(French)* 88−66240
PPM weak noisy photon-counting channel, efficient capacity 86−49000
pre-detector optical signal processing technique, optical transform. image modulation 85−30482
pre-processor for automatic vision systems 86−48220
precompensated contact screen for nonlinear optical image processing, design anal. 85−63126
preprocessing using multiresolution lateral inhibition 85−46906
PRIMO: programmable real-time incoherent matrix multiplier for optical processing 87−54839
printed Thai character recognition method using topological props. 86−29988
PRIZ conducting spatial light modulators, fabrication and props. 87−46592
PRIZ controllable transparency, space-time transfer charact. 88−13936
PRIZ space-time light modulators, linear operation 85−35550
PRIZ spatial-temporal light modulator with fibre-optic input 86−42371
processor, coherent, spatial frequency spectrum, effect of non-sinusoidal vibrations 85−30296
processors, digital accuracy acousto-optic, system efficiency 87−46613
processors operating in coherent or incoherent light, signal processing *(French)* 85−7938
profilometry and 3D image processing for cavitation erosion prevision 88−34791
programmable hybrid parallel processing for real-time digital logic operations 88−13987
programmable logic arrays, optical design 88−51621
programmable masks written on spatial light modulators, suppression of selected diffr. orders 88−65412
programmable optical processor based on symbolic substitution logic 88−51625
programmable real-time incoherent matrix multiplier foroptical processing 86−69099
projection filter regularization of ill-conditioned problem 88−46206
Prolog computer using symbolic substitution 88−65437
pseudocolor encoder for scientific imaging, white-light processing 86−10267
pseudostereo images, creation from monocular images by processing systems 85−30346
pulse signals, nonlinear processing 87−47921
pulsed analogue/dig. signals, optical multiplexing 88−41019
pulsed optical signals, time position accuracy *(Russian)* 87−27575
pulsed signals detector, probability characteris. invariance 87−55261
pupil-function design for bipolar incoherent spatial filtering 87−19859
PWM, error reduction in one-dimens., appl. to computer-generated transparencies 88−2921
quadratic filtering of 2D signals by serial and parallel optical processors 85−41966
quality improvements in variable size encoding system by post processing 87−75894
quantum wells for optical information processing, materials and devices 87−60975
quantum wells for optical processing applications 88−58239
quasi-heterodyne hologram interferometry for quantitative meas. 86−3341
radar, acousto-optic adaptive processor for sidelobe cancellation 88−4088
radar and communication systems optical techniques for signal distrib. and control 85−58219
radiooptical antenna arrays focused into the Fresnel zone 86−43052
Radon transform applications in optical inspection 88−46182
random number 2D array generation using clipped laser speckle 86−29964
range image segmentation using sine wave coding and Fourier transformation 88−73243
rank detection of optical signals using the distribution-function scale variation 88−46264
raster stereography use for automatic body shape meas. 86−32294
real number representation with arbitrary radix 85−2872
real time IR image processing techniques, enhancement methods 86−10476
real time iterative algorithms 88−28070
real time optical logic processing 88−13980

optical information processing continued
real time signal processing, conf., San Diego, CA, USA (Aug. 1987) 88−24328

tomographic memory method 88−20335
tomographic reconstruction of objects by gratinginterferometer 86−43281
tomographic reconstructions, internally iterative improvement 85−46943
tomography, optical microscopic type, constrained resolution enhancement 87−27635
tomography principles in image data compression 85−41971
Toshiba high-power semiconductor laser appl. 88−2258
transform techniques for electro-optical pre-detectorsignal processing 87−2663
transient processes in acoustooptic spectrum analyzers 87−54138
transistors with negative feedback 88−65422
transmission of continuous energy distribution viafiber-optic elements 86−15486
transparent nonlinear optical devices 88−51940
transparent random structures, distrib. function of probability determ., time interval summing methods *(Czech)* 86−50017
transphasor element for optical computer, optical bistability, transistor realization *(German)* 85−56788
transverse optical bistability under conditions of self-defocusing of opposed beams in a nonlinear medium 88−8286
triple product processor, coherent interferometric 85−46878
triple-in double-out optical parallel logic processing system 88−13988
tristimulus based method for incoherent optical processing 85−2870
truth-table look-up parallel data processing using anoptical content-addressable memory 86−63876
truth-table lookup using content-addressable memory 86−57812
TV image statistical moments, real-time computing using hybrid optical numerical processor *(French)* 86−16577
TV meas. of high-speed process parameters, optimal signal filtering 86−30034
two-channel ASK heterodyne detection system, crosstalk and prefiltering without laser phase noise 88−73927
two-dimensional, role of photoconductive/photorefractive materials 86−42222
two-dimensional information, anal. using integral variants 85−46946
two-dimensional membrane spatial light modulator, optically addressed 85−35535
two-level classifier for use in moment-based optical/digital processor, image segmentation and real image tests 85−7936
twos-complement data processing for improved encodedmatrix-vector processors 86−43282
UHF and microwave frequencies, optical fibre appl. 85−25194
unique phase retrieval with explicit support information 86−30001
US pulse echo imaging, optical deconvolution using phase-holograms asspatial filters 85−53237
Vander Lugt three plane correlator for optical signal processing 88−66697
vector nature of light use in imagery and image processing 87−62191
vector optical field, optimum processing in presence of atmospheric distortions 88−8483
vector optical field processing, optimal filter design *(Russian)* 86−23091
VHF and UHF range wireless H-fieldprobe with laser as optical transmitter *(German)* 86−10074
VHSIC chips, optical interconnects 88−51710
VHSIC/VLSI interconnections, fibre-optic coupler 87−16968
video imaging systems, MTF meas. techniques 86−24376
video signal processing in optoelectronic television system 85−19530
video/computer technology role in exptl. mech. 87−36855
visual hyperacuity 86−4020
visual limits to image quality 86−23149
visual scanning system, laser based, space-time anal. of LF component of optical signal *(Russian)* 87−47027
VLSI, appls. and design considerations for optical interconnections 87−18235
VLSI and optical technologies for image and signal processing, comparison 85−30480
VLSI fiber optic local area network 87−48618
VLSI optical interconnection networks 88−4003
VLSI testing, optical techniques 87−53628
volume holograms as optical two-port operators 88−20327
volume holographic information processing, medium design 86−68637
Walsh function spectrum analyzer using programmable magnetooptic spatial light modulator 88−59189
wavefront, turbulence-distorted, sampling and reconstruction 86−59328
wavefront estimation from difference meas. using discrete Fourier transform 87−19860
wavefront inversion using thin phase hologram, computer simulation 85−19046
wavefront reconstruction from noisy slope ordifference data using the discrete Fouriertransform 86−49014
wavefront reconstruction using intensity distrib. 88−34764
wavefront reversal fraction determ., optical data processing method 86−29235
wavefront sensor error estimation using Cramer-Rao lower bound 86−50237
waveguide holographic systems, information characteristics 88−27323
waveguide soliton processing element for all-optical switching and logic 88−13977
waveguides, dynamic operation for optical logic 88−72115
waveguides, multi-layer, for integrated optical magnetostatic-wave signal processing devices 88−40013
waveguides, single mode for soliton beams, nonlinear interaction phenomena and appls. 88−58681
wavelength division multiplexing in optical processor 85−30305
wavelength-multiplexed optical signal processing using channel-type acousto-optic switches 88−14783
weighted moments appl. to image coding, decoding and reconstruction 86−43318
whirling hot-wire anemometer with optical datatransmission 85−52909
white light cylindrical holograms, image processing operations 87−12627
white light optical signal processing with programmable magnetooptical device 86−15529
white light signal processor effects of spatially partially coherent illumination on noise performance 85−19494
white-light low-cost optical processor for undergraduate optics laboratory 86−3972
white-light optical signal processing, colour image processing 87−62228
white-light optical signal processing and its applications 88−8840
white-light optical signal processor, noise performance meas. using scanning photometer 85−26487

optical information processing continued
white-light processing application to holographic interferometric and metrological studies 87−61262
white-light processing system based on cross-spectral density function 87−75869
white-light pseudocolour encoder for diagnostic imaging 85−48240
Wigner distribution and ambiguity function for complex signals and images 88−59226
Wigner distribution and ambiguity functions, scale-invariant 86−16531
Wigner distribution function based detect. methods, performance 85−25176
Wigner distribution function from single object transparency, optical system for efficient display 87−19864
Wigner distribution function of 2-D signals, generation by parallel optical processor 85−7937
Wigner distribution function of complex signals, generation by spatial filtering 86−37136
Wigner distribution function optical prod., Radon transform. appl. 85−25177
winner-take-all networks and associative memory: analysis and optical realization 88−58064
X-ray videodensitometry, expanding the dynamic range using ordinary image digitizing devices 85−2869
zero crossings, bandwidth compression, and restorationof nonlinearly distorted band-limited signals 86−54544
$Ag/Al_2O_3/Ag$ tunnel MIMS for visualisation of HF electronic signals 86−41621
AlGaAs-GaAs MQW CCD spatial light modulators using electroabsorption effects 87−12255
$BaTiO_3$, coherent optical images, photorefractive time differentiation 88−21302
$BaTiO_3$, picosecond photorefractive effect for optical data processing 88−65434
$Bi_{12}GeO_{20}$, photorefractive recording and optical processing for speckle velocimetry 88−52544
$Bi_{12}SO_{20}$, photorefractive, real-time differentiation 88−46178
$Bi_{12}SiO_{20}$, 3D photorefractive signal processing 87−55301
$Bi_{12}SiO_{20}$ crysts., transverse electro-optical effect, MTF and time characts. study 85−35547
$Bi_{12}SiO_{20}$, moving photorefractive gratings, applications 87−68631
$Bi_{12}SiO_{20}$ photoconductive electrooptic crystals, physical props. and appls. *(Chinese)* 85−18634
$Bi_{12}SiO_{20}$ photorefr. crystals, moving grating erasure, expt. study 87−7437
$Bi_{12}SiO_{20}$, photorefractive, real-time optical logic 88−58296
$Bi_{12}SiO_{20}$, picosecond photorefractive effect for optical data processing 88−65434
$Bi_{12}SiO_{20}$ real time intensity inversion by four wave mixing 87−68624
CO_2 hybrid and injection-locked TEA lasers for lidar and nonlinear optics appls. 85−51092
CdS liquid crystal light valve, current status and performance for optical data processing 88−7998
CdSe, all-optical data processing, picosecond plasma dynamics 88−46195
CdSe all-optical picosec. inverter gate by exciton screening *(French)* 88−8016
CdSe logic gate, NOR, using frequency doubling 88−65420
CdSe, picosecond all-optical NOR gate, Mott transition 86−63872
CdTe:In, time-resolved photorefractive four-wave mixing, image processing appls. 86−36569
GaAlAs composite cavity laser array, monolithic integration with photodetectors 86−68554
GaAs CCD, electro-optical signal processing appls. 85−30304
GaAs bistable devices as logic gates for room-temp. single-wavelength optical latching circuits 88−51635
GaAs, bulk and multiple quantum well, optical nonlinearities 88−8013
GaAs, bulk, room temperature, optical nonlinearities, fast-recovery gates arrays for parallel processing 87−75254
GaAs detector array/CCD multiplexer for optical signal processing 87−1775
GaAs detectors, direct backside connection of optical fibres 88−65205
GaAs etalons, computer simulation of transient operation 88−65430
GaAs etalons for parallel nonlinear optical signal processing 85−56842
GaAs logic gate, NOR, using frequency doubling 88−65420
GaAs nonlinear Fabry-Perot etalons, optical bistability, logic gating and waveguide operation 88−26871
GaAs optical bistable devices, array fabrication 86−36558
GaAs optical logic, high speed 87−46585
GaAs photoconductive mixer for broadband downconversion, postdetection processing at low frequencies 85−2154
GaAs, picosecond photorefractive effect for optical data processing 88−65434
GaAs quantum well intersubband absorption tunneling detectors compatible with 10 μm optical computing 88−65433
GaAs waveguide, thermal index changes by optical absorpt., all-optical signal processing 87−19033
GaAs windowless etalons as optical logic gates 87−592
GaAs/AlGaAs MQW structure for monolithically integrated optical gate 2×2 matrix switch 88−2028
GaAs-AlAs monolithic microresonator arrays as logic devices 87−68177
GaAs-AlAs monolithic microresonator arrays as optical logic devices 88−65429
GaAs-AlGaAs MQW, elec. field effects, appls. in digital optics 88−20448
GaAs-AlGaAs MQW modulator, integrated optoelectronic logic devices for digital optics 88−20475
GaAs-AlGaAs MQW modulators for optical processing 88−72160
GaAs-AlGaAs MQW spatial light modulators, high-speed 2×2 electrically driven config. 88−2140
GaAs-AlGaAs integrated optoelectronic logic devices, dynamic response 88−8009
GaAs-AlGaAs laser diodes, inhomogeneously pumped quantum well, bistability obs. 88−27286
GaAs-AlGaAs multiple-quantum-well etalon as optical logic gate 85−51242
GaAs-AlGaAs spatial light modulators with CCD addressing, MBE growth 88−72163
GaAs-AlGaAs three-terminal noninverting optoelectronic logic device 88−2058
GaAs-AlGaAs twin stripe LD, optical tristability and ternary digital functions 88−27288
GaAs-GaAlAs MQW material, nonlinear optical props., phenomena and appls. 86−3299
GaAs-GaAlAs MQW subpicosec. all-optical logic gate, Stark effect appl. 88−8015

optical information processing continued
GaAs-GaAlAs MQW ultrafast all-optical gate with subpicosecond ON and OFF response time 87−7434
GaAs-GaAlAs quantum wells, optical Stark effect and band edge absorption, review 88−58679
GaAs-InGaAs spatial light modulators with CCD addressing, MBE growth 88−72163
GaSe double resonator system, optical hysteresis and multistability 88−2371
Hg halide Bragg cells, for optical signal processing 88−45247
HgCl, acoustooptic devices, fabrication and charactn. 88−13957
Hg_2Cl_2, Hg_2Br_2 and Hg_2I_2 acousto-optic cells for EW signal processing 88−27947
Hg_2Cl_2, acousto-optic Bragg cell, for long delay devices 88−40023
Hg_2Cl_2 vapour-phase-grown crystals, acousto-optic tunable filters and optical signal processing 87−54139
InGaAs-InP MQW excitonic states, nonlinear optical props. and appls. *(French)* 88−8297
InGaAs-InP multiple quantum wells, 1.55 μm optical logic etalon with picojoule switching energy 87−61225
InGaAsP optically controlled modulators for parallel optical data processing 88−46301
InGaAsP/InP bistable laser amplifier as 1.3 μm optical AND gate 86−57761
InGaAsP/InP nonlinear laser diode amplifiers for optical thresholding and logic 87−54340
InGaAsP-InP system, all-optical modulation at 1.3 μm 88−51921
InP waveguide, thermal index changes by optical absorpt., all-optical signal processing 87−19033
InP:Fe, time-resolved photorefractive four-wave mixing, image processing appls. 86−36569
InSb, nonlinear Fabry-Perot etalon, optical bistability and digital computing 85−51281
InSb optical bistable elements as optical computer components 87−19047
InSb transphasor channels, diffusive transverse coupling 87−74830
$LiNbO_3$, SAW acousto-optic interaction bandwidth and diffr. efficiency rel. to optical polarisation 86−68356
$LiNbO_3$ Ti-indiffused proton exchanged waveguide lenses for optical information processing 86−63682
$LiNbO_3$ apodized phased array Bragg cell 88−27669
$LiNbO_3$ channel-planar composite waveguide, acousto-optic Bragg diffr., optical computing appl. 86−2883
$LiNbO_3$ component wafer-scale integration for coherent optical signal processing 85−50991
$LiNbO_3$, guided-wave optics, physical props., devices and signal processing systems 85−50956
$LiNbO_3$ integrated-optical device modules for computing and signal processing 88−65350
$LiNbO_3$, picosecond photorefractive effect for optical data processing 88−65434
$LiNbO_3$ thin film acousto-optical SAW modulators 86−2890
$LiNbO_3$:Fe crystal, white-light information processing, coupled wave theory 87−13119
$LiNbO_3$:H,Ti integrated optic Bragg modulator modules for optical computing 88−2042
$LiNbO_3$:MgO for higher power optical applications 85−35878
$LiNbO_3$:Ti acousto-optical series-parallel converters, light deflection using SAWs *(German)* 85−51011
$LiNbO_3$:Ti channel waveguides, optical mode intensity meas., two dimens., comparison with numerical calcs. 87−54098
PLZT, charactn. for holographic mode spatial light modulator appls. 88−58676
PLZT/Si 2D spatial light modulators, design and technology 86−42370
PLZT/Si spatial light modulators, technology 87−12256
PLZT-Si spatial light modulators, 1D, performance design and appls. 87−60976
Si liquid crystal spatial light modulator 87−18767
Si on sapphire waveguide optimisation, optical bistability obs. *(French)* 88−58646
a-Si:H optical recording methods 85−63118
Si-PLZT spatial light modulators, ID, design and performance 88−7980
TeO_2 paratellurite acoustoelectronic devices, impedance matching 87−32815
Tl_4AsS_4 acousto-optic Bragg cells, performance 87−46611
Tl_3AsSe_3 acousto-optic Bragg cells 86−22193
ZnS, ZnSe interference filters, simultaneous optical bistable switching on adjacent pixels, pattern recognition 87−33311
ZnS bistable etalons, design parameter effects 88−8288
ZnS interference filters as logic elements for symbolic substitution 88−33816
ZnS interference filters for parallel nonlinear optical signal processing 85−56842
ZnSe optically bistable element arrays, appl. as man-machine interface 87−46977

optical instrument testing
see also aberrations
borescope quality assurance, test specification development 86−25354
cameras, automatic focusing systems, IC testing 87−26235
conference, Quebec City, Canada (June 1986) 87−58513
fibre lightguides damage site detection, instruments certification and meas. errors 85−63651
fibre optic bundles used in endoscopes, inspection arrangement for checking end part brightness changes 86−50534
fibre optic rotation sensor, passive, 1.3 μm, lab. test results 87−68147
fibre waveguides damage sites detection, meas. facilities inspection 86−30795
gyroscope, passive ring laser in very high finesse cavity, laser feedback control system 87−68556
ocean-optical studies, design, testing and calibration of semiconductor laser-based instrumentation 87−77890

ATE, optical inspection system for manufactured components *(German)* 85−37413

optical instruments continued
atmospheric flight of spacecraft, perform. of vehicular optical sensors 88−42615
attenuator, programmable, for fibreoptic test environments, design approach 87−40901
automation, information processing and microelectronics trends 86−24435
biosensor technology, review 88−68336
blood glucose concentration monitoring using fibre-optical instrument 85−53025
book 87−43834
borescope for internal visual inspection 85−37601
borescope quality assurance, test specification development 86−25354
CD player, compact optical head using holographic optical element 88−58707
circuit breaker disconnecting-switch restriking surge meas. using optical transmission techniques 88−11324
conference, optical systems engineering, Cambridge, MA, USA (Oct. 1984) 85−54024
conference, optics and the information age, Quebec, Que., Canada (Aug. 1987) 88−55789
contactless optical-electrical position and dimension meas. and industrial applications *(German)* 86−11711
DMIPS cell analyser, implementation and evaluation 87−57130
dual axis differential electronic level, alignment and monitoring problem appls. 85−20633
dual beam double pass optical sensor for online web transmission meas. 85−58717
electro-optical distance meters, vignetting 86−36258
encoder, vernier-type optical, using spatial filter, for absolute angular meas. 88−53873
encoders, slit-pattern and potentiometer types, features *(Japanese)* 86−11600
endoscope, tube peeper, design 85−50949
endoscopes for NDT, flexible controllable tubes 85−50954
fibre optics fault locator with microprocessor control and statistical averaging 86−28885
fibres, dispersion, time domain meas. 88−33660
Generation-V dual-Purkinje-image eyetracker 85−31786
gyros, passive, overview 85−26287
heterodyne coherent detection, appls. 88−41606
Hewlett-Packard fibre optic measurement instruments 88−7918
horizons in optics, conf., Besancon, France (May-June 1985) 86−54
immunosensor, quantitative analysis of immunological reactions on Si surfaces by multiple-angle Brewster angle reflectometry 88−42500
instrument for measuring dispersion distortions inoptical fibers and cables 86−37876
measuring systems for machine tools, VEB Feinmess Dresden prod. program 86−24436
milk quality measurement, analysis of multicomponent polydispersed media by optical methods on-line with a computer *(Russian)* 85−4150
non-contract high precision optical surface measuring instrument 87−29281
ophthalmoscope, scanning laser, overview of uses 85−4310
optomechanical systems engineering, conf., San Diego, CA (Aug. 1987) 88−49334
profilometer, polar, for analysis of surfaces with circular symmetry 85−52877
pulse stacker for time-resolved laser plasma diagnostics 86−3396
rotational speed measurement with analogue display *(German)* 85−31595
roughness meas. on tooth flanks *(German)* 88−16499
RPV appls., optical altimeter design 88−16846
sensors, effect of particle contamination on direct scatter, analysis 88−8023
shaft-angle digitizers, gimbal-angle meas. techniques 86−11707
Space Telescope, detailed outline 86−18408
spatial variables meas. with optoelectronic transmitted-light meas. system *(German)* 87−35188
spectral radiance meter for light source evaluation, microprocessor controlled *(Japanese)* 88−43480
stereopsis using image intensifiers in binocular devices 87−63266
strain measuring system, microprocess-controlled, for biomech. testing 88−4939
stroboscopic pulsed laser photolysis apparatus 85−56910
theodolite, KERN DKM 3A, laser-diode distance meter 85−4107
theodolite for wind velocity meas., Apple II microcomputer appl. 87−50552
therapeutic laser instrument for ophthalmology, the VISULAS YAG 87−29812
triangulation based range sensing, high resolution, for metrology 88−53874
TV camera lenses with integrated digital control electronics *(French)* 87−70371
visual magnification aids/devices, magnifying power standard and Hughes Magnascope calibration instrument 88−11790
wafer steppers for VLSI high-volume production 85−55908
water level gauge with range shift servomechanism 86−70246
wind tunnel expts., automated optical instrument for water droplet impingement data extraction 88−48268
E2-SE, precision theodolite with computerised motor control and 3D image processing 87−63524

optical interference *see light interference*

optical interferometers *see light interferometers*

optical interferometry *see light interferometry*

optical isolators
acoustooptic and Faraday effect based 87−68223
angle of rotation meas., rotating linearly polarised light source appl. 87−14576
cascaded optical isolator with high-isolation characts. over wide temp. and wavelength range 87−68222
compact bulk isolator with monomode fibre pigtails, design for 1.3 μm use 87−7187
compact optical isolator, design 88−65400
DFB laser diodes, power penalties caused by feedback noise 88−51810
diode DFB laser, single mode fibre coupling module with optical isolator for high bit rate modulation 86−42568
F-1.6 G repeater, design and characts. *(Japanese)* 87−56112
F-1.6 G system, optical coupling components *(Japanese)* 87−56115
Faraday isolator, simple compact high performance permanent magnet 87−18774
Faraday isolator for optical NOR gate using diode laser sources 86−68615
Faraday optical gate, periodic action 86−2876
Faraday optical isolator, design and limiting factors 87−46602

optical isolators continued
Faraday rotator for optical isolator using magnets arranged with alternating polarities 86−28935
Faraday rotator isolator for single mode fibre, high performance polariser 88−65243
Faraday rotator materials for laser systems 88−72170
Faraday rotator using garnet single cryst. as optical isolator *(Japanese)* 86−49596
Faraday rotators designed as optical isolators for high power glass laser system *(Japanese)* 85−18761
ferromagnetic garnets, magneto-optical effects and appls. *(French)* 87−33020
fiber devices using polarization-maintaining fibers 88−7869
fibre devices, conf., London, UK (June 1988) 88−62904
fibre devices using polarisation-maintaining fibres 88−13805
fibre Faraday rotator, temperature-insensitive, magnetic field sensor and optical isolator appls. 85−56272
fibre optic isolator, YIG spherical lens and PANDA-fibre polarisers 85−18681
all-fibre single mode isolator at 1.3 μm using Faraday rotator fibre 86−48201
fibre transmission systems, optical and optoelectronic devices appl. 88−35487
fibre-coupled Faraday optical isolators, characts. at 1.5 μm 88−35480
fibre-optic appl. 88−45254
fibre-optic passive components for communication systems, review 86−48150
Fourier transform IR spectroscopy appl. to failure analysis 85−49347
garnet film, waveguide magneto-optic isolator, laser-annealing fabrication 88−65387
garnet magneto-optic film non-reciprocal waveguides, isolator appls., 87−54133
HV meter with optical isolation, 1 to 30 kV 88−67982
kilovoltmeter with optical feedback 87−21186
laser diode coupled to $LiNbO_3$ chip using optical isolation by orthogonal polarisation, stable operation 88−1985
laser-to-fibre coupling with low optical feedback 88−45245
local-oscillator isolation using multiple acousto-optic modulators and frequency diversity 87−68234
low-noise laser diode module with optical isolator using highly Bi-substituted garnet film 87−40875
magneto-optic slab isolator, integrated optics use, design guidelines 87−74887
magneto-optical branching waveguide, appl. in nonreciprocal optical devices 87−33014
magneto-optical bulk optical isolator tunable from 1.2 μm to 1.7 μm 85−62415
magneto-optical Faraday rotation, personal computer controlled meas. system 86−24314
magneto-optical isolators, materials and devices, overview 88−72169
mode conversion in magnetic garnet films, calcs. 88−7950
modulator IC in optical link used for voltage sensor isolation 86−5192
multiple-paths optical isolator with Faraday rotator, operating characts. 88−51602
nonreciprocal devices in integrated optics 85−29646
semileaky isolator, multilayer, design 88−51545
single-mode optical isolator at 1.3 μm usingall-fibre components 86−53957
waveguide isolator with form-birefringent top-layer, design and anal. 86−2814
waveguide-type optical isolator using magneto-optic effects 88−65446
waveguide-type optical isolator using the Faraday and Cotton-Mouton effects 87−18776
YIG Faraday rotator material, temperature-stable and use in high-performance optical isolators 86−58803
Bi-substituted garnet, liquid phase epitaxial films for optical isolators, growth and magneto-optic props. 86−42101
(BiGa)YIG films, laser annealed, magnetooptic waveguide isolators 86−28923
$Bi_{0.8}Gd_{2.2}Fe_{4.9}Al_{0.1}O_{12}$ epitaxial garnet film, optical isolator characts. meas. 86−9485
$(BiGdLu)_3$ $(FeGa)_5O_{12}$ LPE films, waveguide mode conversion by mag. linear birefringence 85−29581
$(BiLuGd)_3Fe_5O_{12}$, LPE growth for optical isolators 88−31746
$(BiLuGd)_3Fe_5O_{12}$, garnet composite films, Faraday rotation, optical isolators appl. 88−51595
$(BiLuGd)_3Fe_5O_{12}$-$(BiGd)_3(FeGa)_5O_{12}$ composite film, temperature-stabilized optical isolator for collimated light 88−45255
(BiLu)IG LPE garnet film, low loss 0.8 μm band optical isolator 88−51596
$(BiNdLu)_3(AlFe)_5O_{12}$ thin film waveguides, optical birefringence 86−9483
BiRIG garnet based optical isolator for 0.8 μm wavelength, insertion loss 88−65399
CO_2 TEA laser, single-mode, optical isolation design 85−29881
$Dy_{2.5}Bi_{0.5}Fe_5O_{12}$ films, magneto-optical props., optical isolator appls. 88−33523
$(Gd, Bi)_3Fe_5O_{12}$ films for optical isolators, growth and characterisation 86−52447
$(GdBi)_3$ $(FeAl)_5O_{12}$, magneto-optical props., appl. to 1.3 μm optical isolator 88−26899
$Gd_{1.8}Bi_{1.2}Fe_5O_{12}$, flux method cryst. growth *(Japanese)* 86−28924
$Gd_{3-x}Bi_xFe_5O_{12}$ IR micro-isolator for fibre-optic communications, fabrication 86−42346
$Gd_{3-x}Bi_xFe_5O_{12}$ crystal growth for 0.8 μm optical isolator 87−34577
$(GdBi)_3Fe_5O_{12}$ light isolator, crystal growth 86−7726
Nd:YAG laser cavities; losses due to optical isolators 86−54182
YIG, FZ growth for magnetooptic devices in fibre-optic communication systems 87−16558
YIG and YIG:Bi films, stress birefringence meas. 85−35296
YIG cryst. laser diode module with optical isolator, floating zone growth method 87−54326
YIG multilayers, LPE, single mode magneto-optical waveguide props. 87−60912
YIG thin-film waveguide magneto-optic isolator 85−41222
YIG:Bi thin film waveguide-type mono-sectional optical isolator, nonreciprocal props. 88−40016

optical Kerr effect
adaptive flexible mirror, light pulse nonlinear distortion compensation under different control geometry conditions 85−56795
amplifier for terahertz AM signals 87−46578
beam propagation in diffusive Kerr-type media 85−29910

optical Kerr effect continued
birefringent optical fibre, polarisation instability, obs. 87−18596
bistability, angle and freq., reson. excitation of nonlinear guided mode 87−33320
bistability based on self-induced polarisation-state change in anisotropic Kerr-like media 86−9966
bistability with surface plasmons beyond plane waves in Kerr medium 86−36566
bistable elements, Kerr-type medium device, noise-induced switching theory 87−33282
composite nonlinear device, hysteresis transmission of evanescent waves 86−22533
continuous tuning of coherent radiation in the 117.6-119.2nm range 86−54213
couplers, nonlinear, directional with diffusive Kerr-type nonlinearity 88−51508
degenerate four-wave mixing and phase-conjugate lasers, stability anal. and temporal evolution 88−51845
dielectric film, s-polarised guided and surface EM waves 88−34119
distributed fibre temperature sensor using the optical Kerr effect 88−36037
femtosecond pulse ring dye laser, design and operating characts. 86−42595
fibre, low birefringence, nonlinear ellipse rotation 86−68296
fibre, single mode, nonlinear phase shift between orthogonally polarised states 85−29595
fibre couplers, optical pulse compression and breaking 86−28844
fibre gates, induced Kerr phase shifting at diode laser pump powers 88−58322
fibre nonlinear couplers, two-core dual polarisation, coupling instability and power-induced switching 88−33654
fibre nonlinear refr. index nondiagonal component determ. using optic Kerr modulation 88−13801
fibre optic Kerr shutter for optical sampling 85−35852
fibre-optic gyroscopes, Kerr effect and chromatic dispersion 86−2743
fibre-optic logic gate 85−29531
fibre-optic passive-loop resonator, optical multistability 87−1960
fibres, beam propagation method approx. of Helmholtz eqn., anal., report 87−46553
fibres, birefringent, soliton stability 88−33652
fibres, birefringent, soliton stability, use of Kerr nonlinearity 87−68130
fibres, conf., London, England (June 1988) 88−55851
fibres, high birefringence, optical multistability and phase conjugation 87−75227
fibres, single-mode, birefringent, polarisation state changes 88−58175
fibres, single-mode, low birefringence, intensity-induced polarisation ellipse rotation 86−15487
fibres, single-mode, straight or highly twisted, nonlinear interaction of copropagating and counterpropagating waves 88−33655
fibres, single-mode with strong and weak birefringence 87−74708
fibres and fibre devices, Kerr nonlinearity 87−54402
fibres with Kerr-effect nonlinearity, nonlinear waves 86−28851
four-photon polarisation Raman spectroscopy for remote detection of hydrocarbons in water 87−29953
four-photon Raman spectroscopy in remote sensing 88−30176
four-wave mixing, near degenerate in Kerr medium in Raman-Nath approximation 85−41468
four-wave mixing optical bistability, isolas 86−22508
glass, femtosecond nonlinearities using opt. Kerr effect 87−26546
graded-index film waveguide, exponential-like profile, nonlinear waves study 87−39202
graded-index slab waveguides, arbitrarily nonlinear, finite-element soln. 87−46966
gratings in nonlinear optics and optical bistability, realisation of components 85−56791
GRIN waveguides, guided nonlinear TE waves 87−74728
guided optical fields, evolution down dielectric film with nonlinear cladding 88−33737
hypertubular light beams, nonlinear distortion 86−36563
isotropic media, optical harmonic generation efficiency, Kerr nonlinearity influence 85−56804
Kerr modulation of signals at 1.3 and 1.5 μm in polarisation-maintaining fibres pumped at 1.06 μm 88−13800
laser beam self-trapping and soliton propag. in Kerr media *(French)* 86−3296
laser beam stable self-trapping obs. in nonlinear planar waveguide 88−34127
liquids, third order electronic susceptibilities, meas. by optical Kerr effect femtosecond kinetics 85−41459
logic gate, optical, using single-mode waveguide and Mach-Zehnder inteferometer 85−56358
Mach-Zehnder all-fibre interferometer, demonstration of optical Kerr effect at laser diode powers 88−40032
magnetooptic storage media, effects of incident angle on readout 88−33590
measurement of optical Kerr constant in weakly anisotropic liquids 88−10149
metallic anisotropic microparticle aerosols as artificial Kerr media for degenerate four-wave mixing 85−56818
micro-particle phase conjugator, artificial Kerr medium, freq. response 86−3280
nonlinear prism output coupler, theoretical study 87−39207
nonlinear waveguide, ATR device, resonant excitation and optical bistability 86−22477
optical fibre, Helmholtz eqn., beam propag. method 87−74716
optical fibres, glass, nonlinear propag. effects 85−50978
optical fibres, soliton form., subpicosecond pulse propag. 88−72047
optical glasses, high nonlinear refr. index and transmittance calcs., visible and IR spectra 85−41101
passive ring-resonator gyro, Kerr effect, anal. 86−63643
phase conjugate resonator, nonlinear theory of self-oscills. 85−12954
phase conjugate resonator, period doubling induced phase hopping 85−51253
phase conjugation for removing dispersive self-phase-modulation effects 85−2410
phase conjugation of laser beams 87−12594
phase conjugation using four- and three-wave mixing processes in Kerr-like nonsaturated media, diagrammatical anal. 85−41461
phase-conjugate mirrors, Kerr-type, eigenmodes 85−7523
photothermal deflection method to measure Kerr-type nonlinearities 88−51941
planar nonlinear waveguides, computer anal. method 88−13920

optical Kerr effect continued
pulse shaping and passive mode-locking with nonlinear Michelson interferometer 87−7428
pyridine methyl derivatives, optical birefringence, Rayleigh scatt., mol. interactions effect 86−9933
quartz glass, laser radiation action process, optical failure, electrostriction influence 86−68219
resonator three-mirror phase-conjugate, resonances and mirror confinement 86−15776
rhodamine 6G laser, hybridly mode-locked CW, self-phase modulation 85−29785
rib waveguide with nonlinear substrate, anal. 87−60928
ring cavity, steady-state and pulse behaviour of light transmitted through dispersive nonlinear media 85−7522
ring resonators, nonlinear, instability thresholds 88−40339
Sagnac effect in fibre optic gyroscope 86−9524
scanning light beams, nonlin. distortions compensation 86−29234
semiconductor chirped laser, appl. to fibre gyroscope 88−65934
short pulses in long optical fibres, modulation instability 86−36184
silicate glasses, electronic contrib. meas. to nonlinear susceptibility 85−46476
simple liquids, femtosecond optical Kerr studies on nonlinear response origin 88−40338
slab waveguide, TE modes, nonlinear coupling, beam propagation study 87−53956
SLAM, program for vectorized calc. of refraction and reflection at nonlinear interface 88−34106
soft glass fibres with large thermal expansion differences 88−58177
soliton transverse structure and optical bistability 87−39229
solitons in optical bistability, saturable or Kerr media 85−41494
surface plasmon optical bistability beyond plane waves in nonlinear dielectric 87−33321
surface waveguide nonlinear props. 87−33313
symmetric dielectric slab waveguide with Kerr like nonlinear permittivity, TE wave propag. 87−46976
thin-film guided waves in higher-order nonlinear media, exact soln. 88−34120
three-port reversible logic 88−51634
transient stimulated Rayleigh scatt. mechanism 86−29243
ultrafast light-controlled optical-fiber modulator 87−46440
ultrafast optical multi/demultiplexer utilising optical Kerr effect in polarisation-maintaining single-mode fibres 87−49033
ultrashort light pulses, linear meas. by phase-contrast optical sweep 85−29908
wavefront reversal in four-photon parametric interaction with rotation, quality 85−56800
waveguide devices for optical switching and processing , review 88−72114
waveguide modes, nonlinear coupling 87−60896
waveguides, nonlinear interaction between TE and TM waves 88−34118
waveguides, single mode for soliton beams, nonlinear interaction phenomena and appls. 88−58681
waveguides, stationary with quadratic Kerr effect, instability, Talanov transformations 86−15786
CdS_xSe_{1-x} doped filters, femtosecond nonlinearities using opt. Kerr effect 87−26546
CuCl, dispersive optical bistability stationary props. and switching characts. 85−56841
H, Lyman-alpha radiation, nonresonant transformation, conversion efficiency, Kerr effect limitation 86−3315
PbO-SiO_2 glass, femtosecond nonlinearities using opt. Kerr effect 87−26546

BIGFON, general description *(German)* 87−76056
BIGFON, integrated broadband telecommunication network, development 85−20244
BIGFON, power supply of optical subscriber system 86−61640
BIGFON and BSS system architecture, development method 86−49424
Bigfon and its possibilities, comparison with B-ISDN system *(German)* 85−19983
BIGFON broadband network, situation in Western Germany *(German)* 86−49117
BIGFON fibre optic networks, design and operational results 86−11117
BIGFON fibre optical network development *(German)* 85−30555
BIGFON network in West Germany *(German)* 85−25247
BIGFON optical local networks using BIGFERN optical links *(German)* 86−23893
Bigfon project, 140 Mbit/s trunk network and videotelephone trial network *(German)* 85−36875
BIGFON project, appl. of four-channel WDM 85−25861
BIGFON signals reception, digital PCM tuner appl. 85−52335
BIGFON tuner for sound broadcast reception *(German)* 85−52484
Bigfon use of wideband switching stations for videotelephony and videoconferencing *(German)* 85−36847
binary differential detection for coherent lightwave communication 86−30754
binary optical communications, alignment jitter tolerance from APD-based receivers 88−41641
binary-interleaved coding on the degraded *M*-ary PPM direct-detection optical channel 87−56186
Bionet fibre optic ring network, fault tolerant *(French)* 88−60156
bipolar integrated circuits for digital optical links 87−40970
bipulse regenerators for optical communications systems 86−30812
birefringent single-mode fibre link with imperfect joints, polarisation noise 85−62338
bit rate limiting as an alternative to facility bypass 88−4022
bit rate/bit error rate monitor for digital data communication equipment performance assessment 87−27781
bit-rate-repeater spacing product for optical fibre communication systems 88−4053
Blazenet: A high performance wide-area packet-switched network using optical fibers 87−69744
blown fibre cable installation, optical characterisation of trial link 86−43859
blown fibre installation methods 87−70030
blown-fibre cable network in Leeds 86−11054
Bragg grating filters, linearly chirped, dispersion cancellation in fibre link 88−2087
branching systems with optical fibres *(German)* 86−23887
British Telecom's switched star cable system 88−35694
British Telecom 565 Mbit/s lightline system 86−17406
British Telecom 565 Mbit/s lightline system 85−25905
British Telecom 565 Mbit/s lightline system, development 85−37067
British Telecom junction and local networks, optical fibre appls. 87−56197
British Telecom optical fibre transmission network 88−60127
British Telecom switched star system in Westminster, initial experience 86−60042
British Telecom Telephone over a Passive Optical Network programme 88−60126
British Telecom trunk network, dispersion-shifted fibre installation 88−47036
British Telecom UK network, cost effective optical systems use 86−49666
broad-band communications, economic and social implications 86−64444
broadband access networks based on fibre optic technology 87−40111
broadband buses based on multicore optical fibres 87−20560
broadband business and residential network systems, development *(Korean)* 87−27784
broadband communication networks, coherent multicarrier techniques 88−46461
broadband communications, digital switching and transmission, technology trends 87−2707
broadband correlators employing fibre-optic recirculating delay lines 88−7854
broadband distrib. system, control system *(Japanese)* 87−34545
broadband distrib. system, user-network interface *(Japanese)* 87−34542
broadband distrib. system, video selection and data switching equipment *(Japanese)* 87−34544
broadband distribution networks using fibre optics *(Italian)* 87−20290
broadband fiber optic alternative for long haul military communications to Europe 88−35566
broadband fibre optic cable restoration by satellite service, network and performance considerations 88−53244
broadband ISDN, appls. and compliance with user requirements 87−40156
broadband ISDN, development steps in transmission and switching technology *(German)* 85−47053
broadband ISDN, future lightwave technology 88−3385
broadband ISDN, system concepts 87−20555
broadband ISDN, universal worldwide strategy for realisation *(German)* 88−73711

optical links continued
broadband ISDN local access system using emergingtechnology components 87−3212
broadband ISDN over optical fibres, modular approach 88−41404
broadband ISDN service prospects 87−27817
broadband ISDN-B networks and BIGFON system *(German)* 85−47054
broadband local distribution networks development *(Italian)* 86−4645
broadband local network *(German)* 86−23900
broadband local network, development 85−19677
broadband local network developments in the UK 88−35488
broadband multi-service distribution system development 87−28624
broadband network appls. 86−30764
broadband network for telephone and data communications, config. and equipment *(German)* 86−64973
broadband network transmission quality improvement by fibre-optic line systems 87−70100
broadband networks, basic concepts and possibilities 85−19669
broadband networks, coherent optical fibre techniques appl. 87−62974
broadband networks, coherent optical techniques appl. 87−20541
broadband networks, direct detection and coherent lightwave technology 88−41684
broadband networks in Europe, optical fibres 87−40926
broadband networks introduction strategy in Italy 87−48349
broadband optical distribution networks, cost reduction 88−4050
broadband optical fibre distribution network, value/cost ratio 86−16663
broadband optical fibre ISDN, TV network integration *(German)* 88−59754
broadband optical fibre network implementation in West Berlin *(German)* 87−69513
broadband optical fibre network in London, to include TV and sound channels 87−70062
broadband optical fibre networks, time switching of gigabit/s highways 87−76436
broadband optical networks, coherent communications 88−60188
broadband optical transmission systems, linearisation by adaptive predistortion 85−3455
broadband services, network evolution 88−9291
broadband services, value/cost considerations 87−34610
broadband services on optical fibres, value/cost considerations 87−62937
broadband subscriber loop system using multi-gigabit intelligent optical shuttle nodes 88−46714
broadband subscriber network, optical fibre and system considerations 86−49664
broadband subscriber network using optical star couplers 88−46771
broadband subscriber networks in Italy, research and expts. 87−34626
broadband subscriber networks in Italy, research and expts. 86−59439
broadband subscriber services, development 88−35520
broadband transmission systems, development *(Japanese)* 85−30551
broadcast packet switching network, design 88−59901
broadcast TV, optical fibre transmission system, anal. and design of differential gain and differential phase correction circuitry *(Chinese)* 85−63836
broadcasting developments and evolution 88−29021
Brooklyn (NY) Opnet fibre-optic ring structure 87−56179
building wiring and fibre optic standards for communications utility 88−35549
building wiring system with optical fibres 85−14320
bunched fibre arrays, crosstalk in separating cct. *(Japanese)* 86−28872
burst communications system through clouds 86−65011
burst mode TDM transmission system 87−20576
bus-type fibre-optic video transmission system *(Japanese)* 88−28871
business communications and process control, UK market overview, report 85−63701
business communications and process control appls., installation case studies, report 85−63697
business communications and process control use of fibre optics, transducers and sensors, report 85−63699
business communications distribution systems using fibre optic cables 86−54935
Buzz-net hybrid fibre optics LAN, performance models 87−55781
C&C-NET LOOP6830 local area network 87−28096
C&C-NET LOOP subsystem in optical LAN 85−52059
cable, manufacturing trends in Sweden *(Swedish)* 85−14259
cable design, manufacture and optical charact. 87−13679
cable design and specification 88−9575
cable networks, optical fibres, optimum config. *(German)* 86−23886
cable on light waveguide networks *(German)* 85−8423
cable systems, decade of experience 86−65007
cable television, optical cable system 88−60128
cable television by satellite, optical fibres and video switching centre *(Swedish)* 85−47653
cable TV, broadband local networks, transmission aspects *(German)* 85−52540
cable TV, single mode optical fibre trunking systems 85−14464
cable TV and data communication, optical fibre develops. and appls. 88−28896
cable TV broadband urban distribution networks, review 85−52534
cable TV tapping for videotex use in Germany 85−26058
cable TV transmission system 85−47701
cable TV with coaxial terminals in Paris *(French)* 88−29113
cable-based videocommunications network in France 87−40264
cabled-fibre, 1.6 Gbit/s, 1550 nm transmission expt. 87−13699
cables, metal-free, in HV overhead networks, elec. stress mechanisms 88−69009
cables, metallised lightguides properties 85−20209
cabling dependence of optical fiber cutoff wavelengths 88−28906
Cairo interoffice communication, computer program for choice of optical fibre link components 85−37086
Cambridge Backbone Network using monomode optical fibre 88−73652
CAN Customer Access Network, fibre optic appls. 88−35464
Canada fibre optic telecom. system construction 88−22161
car stereo with 2-way remote control using opticalfiber *(Japanese)* 86−11365
car wiring system using optical fibres *(German)* 86−52010
carthage and Artis LANs for video communication facilities 87−20553
cascaded inline semiconductor laser amplifiers in a coherent optical fibre transmission system 88−47037
cascaded multimode fibres, time dispersion props. in presence of distrib. mode coupling 85−29592
CATCOM '84, Lucerne, Switzerland (Nov. 1984) 85−44405

optical links continued
CATV, multichannel multidrop digital video transmission equipment 86−55312
CATV fibre optic broadband network, development 87−76723
CATV networks, optical fibre technology viability *(Spanish)* 87−56389
CATV with digital optical transmission 85−14463
CCITT optical fibres standardisation for telecommunications systems 85−42618
CCITT standardisation for telecomm. systems 87−49069
channel capacity increase in light-wave communication system by photon-number squeezed light 87−62976
Charles Kuen Kao and the develop. of optical fibre communication 88−41633
China communication facilities, prospects 86−64977
Chipnet: an optical network of terminals and workstations 88−67337
chirp free transmission conditions with directly modulated semiconductor lasers 88−67400
chirp power penalty in 1.55 μm DFB LD high-speed fibre optic transmission systems 88−22091
chirping model of modulated DFB LD 88−65733
chromatic dispersion meas. at 1300 and 1500 nm, error anal. 87−70077
circuits and media and their compatibility 87−76514
cleared channel communication service between Tokyo and Osaka *(Japanese)* 87−62940
clock distribution to Si chips 87−46238
clock scheme recovery for optical fibre transmission *(Polish)* 87−70092
clocks comparison through optical communication channels 85−4123
CMI optical fibre intraoffice transmission system, design and performance 87−28576
CMOS optical data link receiver IC 87−18870
CMOS RAM, optical addressing techniques 88−51705
coal mines, all-optical fibre networks 88−22107
codec, 565/680 Mbits type, design techniques, multiplex and optical fibre transmission system appls. 85−36783
coded mark inversion TV signal transmitted through fibre-optic heterodyne system, power spectral density determ. 87−76756
Codenet fibre optic LAN competes with coaxial 85−42269
Codestar passive fibre-optic star coupler for Ethernet 86−16885
coherent communication networks, development 88−47101
coherent detection in optical systems, channel capacity and power budget 88−60129
coherent fiber optics 87−49082
coherent fiber-optic transmission systems: potentials and problems 87−49092
coherent fibre optic communications, heterodyne and homodyne methods, review 86−30804
coherent fibre optic technology, telecom. considerations 88−41345
coherent heterodyne systems, integrated-optic phase modulator, signal fading elimination 88−41696
coherent light communication system *(Japanese)* 88−67371
coherent lightwave communication systems, external cavity semiconductor lasers, feedback bandwidth dependence 88−40237
coherent lightwave communications 86−30752
coherent lightwave communications 88−41693
coherent lightwave technologies 88−35489
coherent lightwave transmission system, optical receiver design 88−67405
coherent lightwave transmission systems, chromatic dispersion limitations 88−53273
coherent lightwave transmission technology *(Japanese)* 88−73914
coherent optical communication, appls. in network environment 87−13725
coherent optical communication, status and prospects *(German)* 88−15487
coherent optical communication in submarine links 86−59886
coherent optical communication systems 87−56183
coherent optical communication systems, introduction 87−70099
coherent optical communications, 3-wave mixing heterodyne approach 88−67425
coherent optical communications systems 88−35532
coherent optical communications systems with DPSK and PSK modulation 88−41694
coherent optical communications using four birefringent elements, endless polarisation control 88−41695
coherent optical detection of laser signals 87−40894
coherent optical fibre communication system *(Chinese)* 88−35463
coherent optical fibre communication systems 87−34561
coherent optical fibre heterodyne communications, polarisation-insensitive detection technique 87−76741
coherent optical fibre multi-carrier techniques in the subscriber loop *(German)* 87−34557
coherent optical fibre system with Zeeman lasers 87−28557
coherent optical fibre systems, polarisation control 87−62934
coherent optical fibre transmission, homodyne detection technique using Brillouin amplification 86−49586
coherent optical fibre transmission, introduction 85−47517
coherent optical fibre transmission for subscriber and bidirectional CATV networks 85−47501
coherent optical fibre transmission systems, techniques 85−63649
coherent optical fibre transmission using injection locked lasers, CATV system 85−42626
coherent optical systems for telecommunications 88−9521
coherent optical systems technology 88−67428
coherent optical transmission *(German)* 88−3988
coherent optical transmission, development 85−25884
coherent optical transmission, eval. method for propag. through fibres *(Japanese)* 87−56184
coherent optical transmission system, probability density function and bit error rate 85−58110
coherent optical transmission system using robust PSK method 86−23934
coherent optical transmission using lasers *(Japanese)* 86−43828
coherent OTDR for fault location in long wavelengthoptical systems 86−30844
coherent Rayleigh noise, observation in bidirectional optical fibre systems 88−65240
coherent transmission for intersatellite links 88−53292
coherent transmission insensitive to laser phase noise 88−60132
coherent transmission system with phase diversity reception, broad linewidth DFB lasers 88−47138
Colorado springs area EMP hardening project 85−37008
colour television picture transmission via optical links 88−41700
combinatorial star couplers for single-mode optical fibers 85−12630

optical links continued
combined optical mixer-preamplifier for 1.3 μm lightwave subcarrier systems 88−28832
commercial 565 Mbit/s optical link, design and installation of first system in UK 88−35530
commercial aircraft appl. 88−35547
commercial fibre-optic LANs, technology 86−49236
common carrier trunk networks using fibre optics *(Japanese)* 87−28560
communication, control and sensing appls. of optical fibres *(French)* 87−1954
communication, optical, conf., Stuttgart, Germany (Sept. 1984) 86−37
communication and instrumentation applications forelectric power utilities 86−54913
communication between aircraft in low-visibility atm. using diode lasers 86−17359
communication channel burst errors induced by Gaussian distributed mis-pointing 87−20452
communication link, on power overhead line, construction, technical equipment *(German)* 85−31040
communication network architectures, WDM appl. 87−28630
communication networks, fibre optic technology application 88−21678
communication protocols, impact of advancing technology 87−56192
communication satellites appls., conf., Los Angeles, CA, USA (Jan. 1986) 87−16252
communication systems, impact on information society *(Japanese)* 85−14287
communication techniques, introduction *(Japanese)* 88−28840
communication technologies, advances *(Spanish)* 88−15472
communication technology developments, expert outlook 85−30562
communication transmission technology, use in BIGFERN and BIGFON *(German)* 85−31052
communication using optical fibres, functions and appls. *(German)* 86−11071
communications, present and future 85−8443
communications, present and future 85−42600
communications, sound to light, conf., Seattle, WA, USA (June 1987) 88−31
communications 1984 developments review 85−30563
communications channel, separate points synchronisation 88−73935
communications data transfer from venus 85−31072
communications marketing, over production 85−63384
communications satellite transponder, electro-optical 86−37905
communications satellites versus fiber optics 86−59847
communications system and host spacecraft interface 88−67302
communications system for linking NC machine tools with central computer, tests *(Swedish)* 85−14260
communications using optical fibre cables, cable type, construction and LANs 88−9532
component reliability considerations for fiber optic communication systems 88−4021
components for military optical fibre links at 1300 nm *(French)* 88−60164
composite fibre-optic ground wire, development 85−36892
composite fibre-optic ground wire communication systems for power transmission facilities appl. 85−58120
composite fibre-optic overhead ground wire, optimum design 88−68998
composite optical fibre overhead ground wire 87−76764
composite overhead ground wire containing optical fibres, mechanical and electrical testing 85−59805
computer communications using directed optical beams 86−54930
computer data links, transmitter availability improvement using monolithic laser arrays 88−46581
computer data links with monolithic laser arrays, transmitter availability improvement 88−35177
computer networking, fibre optics appl. 85−47220
computer networks, installation and maintenance 88−73899
computer networks, optical hypergraph, resource sharing, open loop locking 88−3628
computer optical channel subsystem develop. 88−15465
computerised remote meas. data collection and processing *(French, German)* 85−36670
conf., London, England (Dec. 1984) 85−22088
conference,. Barcelona, Spain (Sept. 1986) 88−62879
conference, fibre charact. and standards, Cannes, France (Nov. 1985) 87−36301
conference, fibre optics, short-haul and long-haul meas. and appls., San Diego, CA, USA (Aug. 1985) 87−22969
conference, optical fibre communication and integrated optics, Reno, NV, USA (Jan. 1987) 87−65064
connectors for optical fibre transmission lines *(German)* 85−1997
connectors for singlemode fibres, manufacturers face up to user demands 85−18693
connectors for VLSI chips to replace hardwire 87−38954
construction and maintenance on optical fiber cable networks 88−4026
contention resolution for an opto-bus LAN network 87−8034
contention ring protocol in LANs, integrated token-passing/control scheme, performance eval. *(Japanese)* 87−40411
continuous phase FSK optical heterodyne transmission through 200 km single-mode fibre at 2 Gbit/s 87−40885
control/monitoring signals transmission in distribution networks, noise immunity and reliability *(German)* 85−8403
conveyor robots, optical-band phase systems appl. 86−30814
Copenhagen, fibre optic packet-switched network for power cable and district heating supervision 88−73966
copper wire verses optical fibre, for communication/data transfer *(German)* 85−14281
Cossor's FMS, use of fibre-optic links 87−3170
Cossor flexible manufacturing system, using fibre optic links 87−8249
coupled single-mode fibre communication links 87−49065
crossbar network analysis 88−60172
crossconnection of wavelength-division-multiplexed high-speed channels 87−76748
crossover networks and their optical implementation 88−72183
crosstalk meas. on high birefringence fibres 87−32932
cryptography using public-key for data transmission, calculations *(Italian)* 85−30211
CSMA/CD fibre optic LAN, star type *(Japanese)* 87−13396
CSMA/CD IEEE 802.3 compatible fibre optic LAN standardisation, physical topology 87−40362
CSMA/CD networks, collision detection methods 86−23866
CSMA/CD optical fibre LAN 86−54910

datalink transmitter/receiver using 1.3 micron LED and PIN-PD 86−4663
Datapoint Corporation's LightLink, IR data transmitter 85−37012
Datapoint Lightlink, use in LAN for retail organisation 87−13687
Dateabus 232, fibre optic LAN for data transmission 88−35152
DBP optical fibre systems for subscriber area, development 87−28623
DBS receiver system with optical distribution network 87−20455
DDR technology, progress *(German)* 86−49599
DEC's corporate network DLN, based on fibre optic technology 88−73569
decision point steering for long distance optical fibre links 88−47183
deep-space optical communication, PPM 88−53288
deep-space optical communication expts., Space Station based 88−53286
deep-space optical communication for planetary vehicles 87−70026
deformable mirror device for optical crossbar switch 88−60171
demand assignment TDMA protocol for video teleconferencing-voice data optical networks 87−40424
Denmark, moves towards optical fibre cable TV networks 85−58365
design of circuits and systems 88−4051
design of optical fibre transmission systems usingstatistical techniques 85−58152
Deutsche Bundesbahn fibre cable optics technology for telecommunications links *(German)* 86−23933
Deutsche Bundesbahn optical fibre cable installation for telecommunication network *(German)* 86−23932
Deutsche Bundespost broadband network, expansion *(German)* 87−2709
Deutsche Bundespost long-distance 140 Mbit/s network, transmission equipment review 85−31067
Deutsche Bundespost long-distance 140 Mbit/s network cable plant, development 85−31066
Deutsche Bundespost networks and activities 88−4036
Deutsche Bundespost wideband overlay network, system components *(Hungarian)* 87−76116
development of high speed optical transmission technique *(Japanese)* 87−40910
development trends in optical fibre networks 88−73989
developments in devices and components for lightwave transmission systems 88−73950
developments in systems and equipment technology 85−42588
device manufacture, machine-vision-assisted workstations use 88−67335
devices and systems aspects in Gbit/s range fibre transmission research 88−4017
devices for coherent optical fibre transmission systems 88−47103
devices for communication systems *(Japanese)* 87−34567
devices for fibre optic communications *(Japanese)* 87−40912
dFB evaluation in high speed, high dispersion single mode systems 88−67416
DFB lasers with broad linewidth, coherent optical systems for local loop appls. 88−47160
DFB LD, directly modulated, sub mode oscillation influence on long span transmission systems 88−45455
Diamond Net, integrated audio-visual information system using multiplexed optical fibre transmission *(Japanese)* 87−76772
diffraction-limited tracking for space communication 88−53298

optical links continued
digital audio interface standardisation, IEC specifications *(Japanese)* 88−15855
digital CATV via passive optical networks 88−74140
digital colour TV signal transmission via optical fibres *(Croatian)* 85−63685
digital communication, transmission techniques 88−9531
digital communication on broadband networks at 140 Mbit/s for the future *(German)* 87−7918
digital communications, conf., Saskatoon, Sask., Canada 88−62883
digital communications, conf., Tirrenia, Italy (Sept. 1985) 86−61849
digital data 4 Gbit/s transmission over 103 km of optical fibre using electronic multiplexer/demultiplexer 86−23873
digital dual channel, analog temporal data transfer 86−17386
digital fiber-optics transmission system for intrazonal networks 87−62946
digital fibre optic communication, codulation techniques 88−9604
digital fibre optic communication systems, elementary parameters *(German)* 86−23880
digital fibre optic links, transmission section design *(Czech)* 86−4676
digital fibre optic systems, two-level binary line codes 85−52362
digital fibre optic transmission system using biphase coding and telemetry channel, optimum design 85−58109
digital fibre transmission systems, bit rate dist. product rel. to optical pulse shape *(German)* 86−64959
digital fibre using multidimensional coding method *(Japanese)* 86−29742
digital high-speed transmission systems, wideband negative-feedback AGC amplifier design 85−44895
digital lightwave links, computer simulation 88−34930
digital link, transmission section design *(Czech)* 86−4678
digital link design, generalised method *(Czech)* 87−70095
digital link using SSMA technique, in-house data transmission, theoretical study *(Japanese)* 86−43844
digital loop carrier system or remote switch unit, comparison 87−69761
digital loop carrier systems, urban appls. 86−37912
digital loop carrier testing for fibre-to-the-home 88−73941
digital meter with automatic sensitivity calibration and optical lines between transducers 88−16246
digital networks, impact of technological advances 86−10670
digital optical CATV system using hubbed distribution architecture 88−47313
digital optical fibre communications, 3B2T-RBS transmission method 87−8275
digital optical fibre system characterisation using pseudo-randomdata 86−30845
digital optical fibre systems, 5B6B line code encoder design and characts. *(Czech)* 87−13734
digital optical fibre transmission systems, instantaneous in-service fault location scheme 85−20242
digital optical fibre transmission systems, noise, amplification and signal detection, theoretical study *(Spanish)* 87−20510
digital optical service-integrated subscriber line system, plesiochronous signals multiplexing 86−17081
digital optical systems for submarine communication systems, design and develop. 87−62981
digital optical waveguide transmission, flexible, modular power-feeding system 88−30871
digital optical-fiber transmission system for city telephone offices 87−62948
digital signal distribution bus for pooled signal processors 87−69554
digital signals, optical fibre transmission, theoretical and practical limits *(Spanish)* 86−10234
digital subscriber loop systems using single-mode fibre 87−34604
digital system, modulation-induced modal noise, bit error ratio prediction 86−11106
digital telecom. data throughput enhancing methods *(Polish)* 87−40939
digital telephone network in Italy with optical fibres, broadband communications for ISDN 87−48472
digital telephone network in Switzerland *(German)* 86−64573
digital time domain fault anal. techniques 86−30843
digital transmission on optical fibre lines, receiver and transmitter configs. using TAXI chips *(German)* 88−41637
digital transmission over 30 km of fibre 86−49694
digital transmission systems, delay time fluctuations meas. *(French, German)* 88−59446
digital transmission systems, ultra-high speed, expts. 88−47162
digital TV pictures transmission by optical fibres *(German)* 86−24093
digital TV studio multiplexed routing system, technical details 87−28811
digital video demultiplexing, descrambling and channel selection, sampling technique 88−53424
digital video supertrunking on single-mode optical fibers 85−37284
digital waveguide links interference immunity, influence of photoreceiver parameters *(German)* 86−23877
diode laser, performance meas. 87−68525
diode laser and photodetector packages for microwave optical transmission 88−24570
diode laser transmitter, single-element in free-space optical link, diffraction losses eval. 88−41648
diode lasers, spectral behaviour and communication system performances 86−48521
diode lasers with high-power for space communications, review 88−51821
DIPS computer complex 87−20245
DIPS computer complex, system configuration *(Japanese)* 86−49261
DIPS computer complex, system control processor *(Japanese)* 86−49262
DIPS computer complex featuring 100 Mb/s optical fiber rings 87−40900
DIPS-11/5E series computers, hardware maintenance *(Japanese)* 87−40354
DIPS-11/5E series mainframes, review 88−21669
direct detection optical communication with colour coded PPM signalling 85−42617
direct detection optical intersatellite link demonstrator 88−22166
direct-detection optical communication systems, symbol and frame synchronisation 87−40895
direct-detection optical-fibre communication systems, timing errors, influence on performance 86−17381
directional coupler and connecting device for fibre optic local area networks 85−8393
dispersion-shifted fibres, optical fibre transmission system *(Japanese)* 88−15469
dispersion-shifted monomode fibre, 1.3 Gbit/s transmission over 107 km using 1.55 μm multimode laser 85−58091
distance teaching using interactive TV fibre-optic network 88−35540
distributed circuit switcher for a network usingoptical fibres 86−43849

optical links continued
distributed control by microprocessor using fibre optics 86−42350
distributed machine control uses zoned logic, isolated controllers, fiber optics 88−3969
distributed sensor network optically powered via fibre links 86−50093
distributed star network architecture forinteroffice applications 86−49671
distribution network, multiplexing, technical and economic comparison 86−4620
distribution network, value/cost ratio for broadband services introduction 86−49686
distribution network for communication/control signals in MM-wave phased array antennas 87−61518
distribution networks, impact of new technology 87−50793
distribution system, computer controlled, reliability improvement by switch telecontrol using optical fibres *(Japanese)* 87−35620
Divac, experimental glass fibre telephone network in Holland *(German)* 85−52355
DIVAC experiment, digital connection between subscriber and exchange via glass fibre 87−28622
DIVAC project, Dutch integrated services glass fibre experimentation system 85−20241
diversity methods for fading control 88−53246
DOLPHIN-3K remotely operated vehicle, digital communication and control equipment *(Japanese)* 88−66928
DOTAN, optical fibre ISDN, subscriber line encoding and TDM techniques *(German)* 85−57885
DOTAN experimental integrated optical broadband subscriber network, multiplex technology *(German)* 85−47057
DOTAN project, 284/81 Mbits/s fibre optic two-way transmission system 86−17566
double core fibre systems for future broadband distrib. networks 85−20240
double star broadband fibre optic subscriber loop network, economic anal. and design guidelines 88−47080
drawing tension, effect on optical fibre characteristics 88−45157
DS3 rate customer controllable broadcast TV multipoint network 88−47311
DSLINK distributed processing system link from Fujitsu *(Japanese)* 87−62629
DUAL fibre optics network for parallel processing 88−3637
DUAL LAN network communication and synchronization services 87−69686
dual-channel and bi-directional transmission, semiconductor laser amplifier repeater 88−47135
dual-channel high-speed data transmission links military aircraft appl. *(Spanish)* 87−76383
duplex and diplex transmission systems, automatic optical fibre break location scheme 88−28824
duplex and multiplex transmissions by glass fibres *(Dutch)* 85−25857
duplex optical fibre systems, receiver penalty calcs. 88−4039
duplex transmission over single-mode fibre using electro-optical modulator, system config. 86−43818
duplex-diplex optical transmission system for 1300 and 1500 nm fibre windows 87−56128
dynamic loop cable network, subscriber optical fibre cable network 86−69780
dynamic network architecture, design for survivability 87−28629
